PART I.

Orders and Notifications by the Lieut.-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUTENANT-GOVERNOR OF BENGAL.

REVENUE AND GENERAL DEPARTMENTS.

No. 2159C.S.

GENERAL.—*The 24th July* 1874.—The Lieutenant-Governor is pleased to grant to Mr. J. M. Luff, Executive Engineer, subsidiary leave from the 7th to the 31st October 1873 inclusive, to enable him to join his appointment on the Northern Bengal (State) Railway line, after the expiry of his leave to Europe.

The 31st July 1874.—Mr. George Kennedy Webster, C.S., reported his departure from Dacca on leave on the 14th July 1874.

The 1st August 1874.—Moulvi Feda Ali, Deputy Magistrate and Deputy Collector, on leave, is allowed leave for three months, without pay, in extension of the leave granted to him under orders of the 2nd May 1874.

The 3rd August 1874.—The Lieutenant-Governor is pleased to accept the resignation tendered by the Rev. John Robinson of his appointment as a Marriage Registrar of Calcutta.

Mr. Edmund Craster Graster, District and Sessions Judge of Patna, is allowed leave for four months under Section 10 (*a*), clause first of the Civil Leave Code.

Mr. Thomas Taylor Allen is appointed to act as District and Sessions Judge of Patna during the absence on leave of Mr. E. C. Craster, or until further orders.

Mr. John Tweedie is appointed to act, until further orders, as Second Additional District and Sessions Judge of the 24-Pergunnahs and Hooghly.

Mr. Charles Bazett Garrett, District and Sessions Judge of Dacca, is allowed leave for three months under Section 21, Chapter VI of the Civil Leave Code.

Mr. Thomas Walton is appointed to act as District and Sessions Judge of Dacca during the absence on leave of Mr. C. B. Garrett, or until further orders.

Henry Fitzmaurice John Kean, Magistrate and Collector of Chumparun, is allowed furlough for two years under Section 10 (*a*), clause second, together with the usual subsidiary leave for a period not exceeding thirty days.

Mr. Warren Hastings D'Oyly is appointed to act in the First Grade of Magistrates and Collectors.

Mr. James Francis Katherinus Hewitt is appointed to act as Magistrate and Collector of Chumparun during the absence on leave of Mr. H. F. J. Kean, or until further orders. Mr. Hewitt will act in the Second Grade of Magistrates and Collectors.

Mr. William Benjamin Oldham is appointed to act temporarily as Magistrate and Collector of Chumparun from the date on which he may relieve Mr. Kean till Mr. Hewitt joins his appointment.

The 4th August 1874.—Baboo Kali Prosonno Sircar, Deputy Magistrate and Deputy Collector, on leave, is allowed leave for two months under section 3, Supplement F of the Civil Leave Code, in extension of the leave granted to him under orders of the 15th June 1874.

Baboo Amirto Lall Pal, Moonsif on special duty, is posted to Doomka, in the Sonthal Pergunnahs. This cancels the orders of the 16th June 1874, posting him to Julpigoree.

Lieutenant-Colonel Mowbray Thomson, Agent, Governor-General, with the King of Oudh, received charge of his office from Captain H. P. Peacock on the afternoon of the 1st August 1874, and will exercise the powers of a Magistrate of the First Class within the precincts of the King's residence.

Baboo Hem Chunder Ker, Deputy Magistrate and Deputy Collector, on special duty in Maldah, is vested with the powers of a Collector under Act X of 1870.

EDUCATION.—*The 3rd August* 1874.—The Right Hon'ble the Secretary of State for India has confirmed the grant to Mr. H. F. Blanford, of the Bengal Educational Service, of the twenty months' furlough under Section 10 (*a*) of the Civil Leave Code, which was notified in the *Calcutta Gazette* of the 10th June 1874.

The 4th August 1874.—The following gentlemen are appointed to be Members of the Hazareebagh District School Committee, viz.—

Dr. E. A. Birch, Civil Surgeon.
Baboo Nund Kumar Aykat, Extra Assistant Commissioner.
" Deno Bundhoo Sen, Acting Assistant Superintendent of Police.
" Bhubun Mohun Baral.

Mr. George Stevenson, C.S., is appointed to be a Member of the Balasore District School Committee, *vice* Mr. W. Fiddian, who has left the district.

Baboo Taruck Govind Moitra, Medical Practitioner, is appointed to be a Member of the Pubna District School Committee.

MEDICAL.—*The 3rd August* 1874.—Baboo Gopal Chunder Bose, Moonsif of Kandi, in Moorshedabad, is appointed to be a member of the Committee for the management of the Charitable Dispensary at that place.

Assistant Surgeon Luthful Khubeer, in charge of the Doolye Dispensary in Pubna, is allowed leave for fifteen days under Section 21, Chapter VI of the Civil Leave Code.

Assistant Surgeon Komul Kristo Raha, a Supernumerary at the Presidency, is appointed to have temporary charge of the Doolye Dispensary in Pubna, during the absence on leave of Assistant Surgeon Luthful Khubeer, or until further orders.

MARINE.—*The 3rd August* 1874.—Captain A. Baker, Acting Master Attendant, is allowed leave for three months under Section 21, Chapter VI of the Civil Leave Code.

Captain E. J. Butler, Acting Deputy Master Attendant, is appointed to have charge of the Master Attendant's Office during the absence on leave of Captain Baker, or until further orders.

Captain F. Warden, Officiating First Assistant Master Attendant, is appointed to have charge of the Dockyard during the absence on leave of Captain Baker, or until further orders.

Mr. Samuel Reed, Assistant River Surveyor, is appointed to act as River Surveyor during the absence on leave of Mr. F. Laycock, or until further orders, with effect from the date on which he relieved that officer.

OPIUM.—*The 3rd August* 1874.—The leave of absence for one and half months granted to Mr. James David Sayce, Assistant Sub-Deputy Opium Agent of Cawnpore, is cancelled at his own request.

Mr. Richard Alexander Hewitt Russell, Assistant Sub-Deputy Opium Agent of Hurdui, is allowed leave for one month under Section 21, Chapter VI of the Civil Leave Code, with effect from the 10th July 1874.

FORESTS.—*The 27th July* 1874.—Mr. A. L. Home, Deputy Conservator of Forests, is placed in charge of the office of Forest Accounts, with effect from the date on which he rejoined his duties on his return from leave.

JAILS.—*The 31st July* 1874.—The services of Surgeon Alfred Swayne Lethbridge, Superintendent of the Central Jail at Bhagulpore, are placed temporarily at the disposal of the Government of India in the Home Department, for employment in British Burmah.

MUNICIPAL.—*The 4th August* 1874.—The Reverend D. B. Morris, Chaplain of Howrah, is appointed to be a Municipal Commissioner for that town, *vice* Mr. W. W. Kiernander, deceased.

ERRATUM.—*The 29th July* 1874.—In the orders of the 21st July 1874, placing the services of Mr. Henry Mortimer Durand, C.S., at the disposal of the Government of India, in the Foreign Department—

For "Assistant Magistrate and Collector, Monghyr," *read* "Assistant Magistrate and Collector, Bhagulpore."

RESOLUTION.

GENERAL DEPARTMENT.

MARINE.

CALCUTTA PORT TRUST.

The 27th July 1874.

READ—

A letter No. 748, dated 23rd June 1874, from the Port Trust Commissioners, submitting a proposal for the extension of the pitching on the slope of the Inland Vessels Wharf between Juggernath Ghât and Aheereetollah Ghât.

Read also—

Letter No. 920, dated 8th July 1874, from the Port Commissioners, applying for a loan of Rs. 2,50,000 for the above purpose, and for the pitching of the slope in front of the Export Sheds, and for metalling the Jetty enclosure.

Whereas it appears probable to the Lieutenant-Governor of Bengal that the loan of Rs. 2,50,000 applied for in the above-mentioned letters ought to be granted:

It is hereby ordered that the application be published in the *Calcutta Gazette*, as required by the fifth of the rules made by the Governor-General in Council under the Public Works Loan Act of 1871, and published on the 15th of October 1873.

By order of the Lieutenant-Governor of Bengal,

H. REYNOLDS,
Offg. Secy. to the Govt. of Bengal.

No. 920, dated Calcutta, the 8th July 1874.

From—The HON'BLE V. H. SCHALCH, Chairman; W. D. BRUCE, ESQ., Vice-Chairman; and eight other Commissioners for making Improvements in the Port of Calcutta,

To—The Secretary to the Government of Bengal, General Department.

WE, the undersigned, Commissioners for making Improvements in the Port of Calcutta, do hereby apply to His Honor the Lieutenant-Governor of Bengal for a loan to be granted us under the provisions of Act XXIV of 1871 (the Public Works Loan Act). The particulars to be set forth in accordance with the rules published under the aforesaid Act, are annexed hereto:—

(1) The work for the construction or repair of which the loan is required.

1. Pitching slope of Inland Vessels' Wharf from Juggernath Ghât to Aheereetollah Ghât.

2. Pitching river bank with brick on edge in front of new Export Sheds and metalling Jetty enclosure.

And an estimate of the cost thereof.

	Rs.
No. 1—	1,40,000
No. 2—	1,10,000
	2,50,000

(2) The amount of loan applied for.

(3) The funds, cesses, rates, duties, or taxes, and the property, if any, on the security of which it is proposed that the loan shall be made.

The landing and shipping charges, wharf rents, and removal charges levied at the jetties and inland wharves; the jetties, quays, wharves machinery, &c., &c., belonging to the Commissioners.

(4) The law or laws under which the said funds, cesses, rates, duties, taxes are levied or received, and the title on which the said property is held.

Act V (B.C.) of 1870.

(5) The period for which the loan is required.

30 years.

The number and amount of the instalments, if any, in which it is proposed the loan shall be made.

(1) Rs. 1,00,000
(2) „ 1,00,000
(3) „ 50,000

Dates proposed for receiving such instalments.

October 1st, 1874.
December 1st, 1874.
February 1st, 1875.

And the instalments in which it is proposed to repay the loan.

In accordance with the provisions of Rule X of the rules published under the Act modified by clause (D) of the Rule. The Commissioners will pay a fixed sum half-yearly on the 30th June and 31st December, at the rate of Rs. 3,053-5 for each lakh of rupees borrowed. The table showing the proportion in which this half-yearly amount is divided between payment of interest and repayment of principal, which was

forwarded with the Commissioners' letter No. 4735, dated 12th January 1874, will show that the terms of the rule above quoted are complied with, and that one-fifth of the amount borrowed will be repaid within 10 years, one-half within 20 years, and the whole within 30 years.

(6) The proceeds of each of the funds, cesses, rates, duties, or taxes, and all other incomes received by the Port Commissioners for the purposes of the Act.

The ordinary income and expenditure of the Commissioners for 1871-72, 1872-73, and 1873-74, exclusive of repayment of loans.

	1871-72.	1872-73.	1873-74.

NOTIFICATION.

The 18th June 1874.—Whereas it is deemed necessary to re-arrange the thanas of the Sylhet District, the Lieutenant-Governor is pleased to direct that the following shall be the thanas of the district:—

Abidabad,	Dhurmpasha,	Rajnuggur,	Jynteahpore,
Nubbeegunge,	Sonamgunge,	Tajpore,	Molagool,
Hubbeegunge,	Chuttack,	Parcool.	Hingajeeah,
Sunkerpasha,	Noakholly,	Gwine Ghat,	Kurreemgunge;

and that their boundaries and the boundaries of the District of Sylhet shall be as specified below:—

The common boundary between zillahs Sylhet and Tipperah shall be, as defined by the Revenue Survey maps of seasons 1860-61, from Rampore masonry pillar on the west to the Iktiarpore masonry pillar on the east.

The common boundary between Sylhet and Hill Tipperah shall be, as defined by the Revenue Survey maps of seasons 1860-65, and defined in the field by pucca pillars ordered by Government letter No. 1265, dated 31st March 1865, from Secretary to the Government of Bengal, to the Surveyor-General of India, from Iktiarpore masonry pillar on the west to Chatterchoora or Koylalyon hill station on the east.

The common boundary between zillahs Sylhet and Cachar shall be a direct line from Chatterchoora hill station on the south to the Rooptang (Hachicktang) hill station on the north; thence it shall be the watershed of the Seeddeshur Lorishpore hills as far as Budderpore masonry pillar on the north; thence along the Barrack (or Bogleea) or Kooseeara rivers to the junction of the Soorma river at the village of Kandeegaon, and thence along the Soorma river to the village of Karraballah, as defined by the Revenue Survey maps of 1864-65.

The common boundary between Sylhet and Jynteah Hills shall be, as defined in the Revenue Survey maps by Lieutenant H. L. Thuillier of seasons 1837 to 1839, from the village of Karaballah on the east to Bowkee bazar on the west; thence the northern boundary along the Burhill river, and under the foot of the hills along the northern limits of the following villages and hanhars, viz.:—Cooree, Tokechanhar, Bisnakandy, Bogye, Allaidah lands, Teroong, Lamaganm, Beejoopuruah, Balen Hanhar and Kalyrang, and then the Doopree nuddee on to the Terriaghat pucca pillar; thence it shall be, as defined on the Revenue Survey maps (by N. T. Davey, Esq.) of seasons 1861 to 1863, to Panchgaon masonry pillar on the west.

The common boundary between zillahs Sylhet and Mymensingh shall be, as defined on the Revenue Survey maps of seasons 1861-62, from Panchgaon masonry pillar on the north to Rampore masonry pillar on the south.

Thana Boundaries.

ABIDABAD.

On the north-east, north, and north-west, by Beebeeana or Beebeesona, Kalnee, and Soorma rivers.

On the west, by the boundary of the zillah.

On the south, the Barak river from the village of Bade Bajooka on the west, to the village of Moorerabda on the east.

On the east, the Barak river from the village of Moorerabda on the south, to the village of Nowagaon on the north, thence the following villages, viz.:—Nowagaon, Kodoopore, Omurpore, Googoorapore, Secunderpore, Mokha, Gurshoula, Makhalkandee, Makhalkandee Chuk, and Dumargaon on the Bebeeana or Bebeesona river.

NUBBEEGUNGE.

On the north, by Beebeeana or Beebesona river, from the village of Galimpore on the east, to the village of Chowka on the west.

On the west, by thana Abidabad.

On the south, the following villages, viz.—Kholilpore, Ektearpore, Khorsha, Sunkerpore, Aleepore, Bhurgaon, Booreenao, Rookoonpore, Burachur, Sookchur, and thence a line due east to the Dinapore hills.

On the east, by a line nearly due north, passes through the Sathgaon Dinapore hills up to the village of Ooheeshonka; thence the following villages, viz.:—Shotok, Kamargaon Chuk, Kastogaon, Teegaon Chuk, Bhorarec, Boitakhal, Holimpore, Shatia, Minazhoor, Julalpore, Syedpore, Oomurpore, Juggonathpore, Tajpore; and then the Beebeesona river up to the village of Galimpore.

HUBBEEGUNGE.

On the north and north-west, by thanas Nubbeegunge and Abidabad.

On the west and south-west, by the following villages, viz.—Isakaree, Bamkandee, Dhunoobadee, Bhatpara, Bekitika, Akootpore, Doomoorcea, Shanaray, Sreepore, Bajoo Chuk, Baleekandee, Hidatullapore, Motheorapore, Razeeoora, Goyepore, Nowabad, Soiljura, Panchhat, Soiljora, Nazirpore, Alipore, Chandpore, Surabohee, Dullubhnath, Pooraoonda,

Ladees Chuk, Lalichaudjoar, Kamalpore, Punches, Haroonpore, Hulhulia, Kotalbarce, Hulhulia, Gazeepore, Burra, Dhullia, Dowlatkhan, Chandpore, Euatabad, Shatpaika, Gazeenuggur-Gadeeshal, and Dholna.

On the south, the zillah boundary; thence—

On the east, by a line nearly due north, passes through the Sathgaon and Dinapore hills.

SUNKERPASHA.

On the north, by thana Abidabad.

On the east, by thana Hubbeegunge.

On the south and west, by the boundary of the zillah.

DHURMPASHA.

On the north-west and south-west, the boundary of the zillah.

On the south, by thana Abidabad.

On the east, the Soorma river northward to the village of Gunneenuggur; thence the following villages, viz.—Nagore, Magoorah, Rameesurpore, Lallpore, Rangamateah, Rangamatee, Sunkerpore, Noyamutpore, Amedabad, Echear Chur, and Taheirpore; thence—

On the north-east, the villages of Tarhirpore and Noyamutpore, the Pein river to the village of Keokoorapashee; thence the following villages, viz.—Ramporo, Shachna, Alipore, Hurreenakandee, Bowola, Asanpore, Amedpore, Hijla, Moholia, Manik, Pathooka, Shanundpore, Jugodispore, Moikootolla, Moikootee, Rongahoora, and Nowagaon.

SONAMGUNGE.

On the north, by the boundary of the zillah.

On the west by thana Dhurmpasha.

On the south, by the following villages, viz.—Thalee, Doorgapore, Paeekpara, Hasampore, Boorampore, Beerkolash, Aloeejanee, and Kesharpey.

On the east, the following villages, viz.—Kesharpey, Elashpore, Baooshee Chuk, Echapasha, Soyara, Rampore, Ghoradoombur, Busheerpore, Peetaboee, Luckoonchoon, Munbeg, Rajapore, Neagaon, Ronshee Chuk, Peetabosee Chuk, Alumpore Chuk, Chikarkandee, Deshar Haor, Jafurpore Chuk, Futypore, Sreenathpore Chuk, Jafurpore Chuk, Rameshurpore Chuk, Sreenathpore Chuk, Hureepore, Alumpore Chuk, Kaer, Munoohurpore, and Bramunugaon; then the river Soorma, and the villages of Bhoojsha, Jinaree, Baleejooree, Mahomedpore, Andaeer Chuk, Burrakiejar, Choonachoora, Alumkhalee, and Feshkhargaon, on the zillah boundary, at the pucca pillar Feshkhargaon.

CHUTTACK.

On the north, by the boundary of the zillah.

On the west, by thanas Sonamgunge, Dhurmpasha, and Abidabad.

On the south, by thana Nubbeegunge.

On the east, the following villages, viz.—Diggulbak, Dasharahee, Oihakoona, Sreenidheepore, Shashan Joshada, Eggatolee, Joyda, Mitabharung Chuk, Gooramarsea, Tookanpore, Kothalkaier, Paikpara, Ekaneedhur, Hureepore Chuk, Kogboil, Sreekrishtopore, Meshajan, Kadipore, Sreeramshee, Kitladoree, Holeearpara, Mongulpore, Atghor, Pooshparakhyapore, Lahory, Gorgoria, Krishtopore Chuk, Khaghata, Krishtopore, Krishtopore Chuk, Boorva Kismut, Cheeolraoolee, Nakeshur, Shudurpore, Bramunjooliya, Kalahun, Barcegaon, Khidoorpore, Radhanuggur, Sheikhpore, Singaee, Kandadadipara, Rampore; thence it shall follow the general course of the Soorma and Penni rivers, and the Dhooprea nuddee to the Terriaghat pucca pillar.

NOAKHOLLY.

On the north, the Beebeesona river.

On the west, by thanas Nubbeegunge and Hubbeegunge.

On the south, by the zillah boundary.

On the east, by a line, nearly due north, passes through the Baleesira Hills to the village of Nakaskur; then along the eastern limits of villages Nakaskur and Shirpore; and thence the Munnoo river up to the village of Shoonarhai.

RAJNUGGUR.

On the north, by the Kooseeara river.

On the east, by the following villages, viz.—Kamalpore, Ghazeepore, Dhorum, Kaist, and Otah hills to the village of Kaseepore; thence the Munnoo river southward to Nutgram pucca pillar; and then by the zillah boundary.

On the south, by the zillah boundary.

On the west, by thana Noakholly.

TAJPORE.

On the north, by the Soorma river.

On the west, by thanas Chuttack and Nubbeegunge.

On the south, by thanas Noakholly and Rajnuggur.

On the east, the following villages, viz.—Moosshahee, Koorkooraly, Gaishpore, Oojalpore, Ebrainpore, Noshierpore, Khagdior, Hooshunnamkee, Chuk Rohinee, Chilnamonee, Kishorepore, Daookermohol, Dhormoda, Tajmohorompore, Teugra, Ghoorun, Chitakara, Madhubpore, Jasoobhoga, Faradpore, Baleeapoonjee, Talibpore Bhaga, Talibpore, Hydhurpore, Krishenpore, Luckheebasha, Roghoopore, Dursha, Bade Alle, and Rajeeabaree.

PARCOOL.

On the north, the following villages, viz.—Companygunj, Patna or Doolaergaon, Bhadchpore or Oomargaon, and Angarooa; then the Chengarkhal nuddee to the village Feringoora; and then the following villages, viz.—Feringoora, Sylhet, and Cachar Tea Company, Cherragong Tea Plantation, Mr. C. R. Jenning's grant, Butteshur, Choobohar, Butteshur, and Golabnuggur; then the Soorma river to the village of Sheyrpore.

On the east, by the following villages, viz.—Sheyrpore, Chuttris, Chundunbhag, and Anrooa; then the Kooseeara river to village of Sooltanpore.

On the south, by the Kooseeara river.

On the south-west and west by thanas Tajpore and Chuttack.

GWINE GHAT.

On the north, by the boundary of the zillah.

On the west and south, by thanas Chuttack and Parcool.

On the east, by the eastern boundary of pergunnahs Paunchbaug, Durgaun, and Jafflung.

JYNTEAHPORE.

On the north, by the boundary of the zillah.

On the west, by thanas Gwini Ghat and Parcool.

On the south, by thanas Parcool and Soorma river.

On the east, by the eastern boundary of pergunnahs Haorbang, Chotool, Churontta, and Jynteah Pooraj.

MOLAGOOL.

On the north and east, by the boundary of the zillah.

On the south, by the Soorma river westward to the village of Coorormutty; and then the villages of Coorormutty, Rajpore, Shapore, Thakoormutty, Captainpore, Mownuggur, Muttesjarah, Sathparry, July, and Ramporе; and again by the Soorma river down to the village of Kydgaum.

On the west, by thana Jynteahpore.

HINGAJEEAH.

On the north, by the following villages, viz.—Gramtollah, Ghoolshar, Koolagora, Jamkundee, Aditmohal, Duttmohal, Russogram, Shooreekandee, Maijgaom, Burmoydau, Goghra, Mocheebhadkoora, Haor-Hakalookee, Oottur, Deotara, Makuroora, Shooreekandee, Deolee, and Khatkhal.

On the west, by thana Rajnuggur.

On the south, by the boundary of the zillah.

On the east, by a line passes through the Pathureah range of hills, nearly due north from that post to the Great Trigonometrical Survey station of Kuleraiy, and then along the limits of the villages of Burkhola, Dukhingool, Kochreegool, and Gramtollah, up to the northern boundary of the thana.

KHARREMGUNGE.

On the north, by thanas Jynteahpore and Molagool, and the zillah boundary to Budderpore masonry pucca pillar.

On the east and south, by the boundary of the zillah.

On the west, by the zillah boundary up to that post; and then by thanas Hingajeeah and Parcool.

NOTE.—The Pathureah range of hills, along which the boundary runs, has not been surveyed, and cannot be more clearly defined. It is represented to be uninhabited, covered with mixed forests and jungle, and that it was impossible to find either guides or tracks.

NOTE.—In the above description, all villages named as situated on the boundary lines of thanas are included in the limits of the thanas to which reference is being made.

H. REYNOLDS,

Offg. Secy. to the Govt. of Bengal.

[Third Publication.]

NOTIFICATION.

The 24th June 1874.—In modification of the notification dated 5th May 1874, it is hereby declared that so much of the notification dated 15th November 1873 as declared, *1st*, that "all that portion of thana Chilmaree lying to the east of the Teesta and including the small tract on the east bank of the Brahmapooter, shall be detached from the Gyebanda sub-division and will be formed into an outpost with head-quarters at Chilmaree, and be attached to the Olipore thana; *2ndly*, that outpost Sundergunge, detached from Olipore thana, will be attached to the Gyebanda sub-division, and together with that portion of thana Chilmaree lying west of the Teesta, will be formed into a thana with head quarters at Sundergunge," will remain in force.

H. L. DAMPIER,
Secy. to the Govt. of Bengal.

[Third Publication.]

DECLARATIONS.

The 12th July 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up for Government at the public expense for a public purpose, viz. for the construction of a feeder road from Neetpore to Shâtahâr *viâ* Mohadebpore and Nowgaon, it is hereby declared that for the above purpose a strip of land passing through the villages Neetpore, Gopeenathpore, Sootroil, Shalapore, Kaleenogor Digheepara, Shoreegachee, Chak Gopal, Ilimpore, Ghatnogor, Namajoo, Ooporshisha, Meda, Khorpa, Gonopoteepore, Matendro, Kajeepore, Shookaldighee, Rampore, Oomamoheshpore, Seebpore Hât, Shinghaudee, Kristopore, Gopalpore, Dokaree, Mohail, Bishwonathpore, Gafanogor, Bongaon, Debeepore, Khajoora Hât, Dakhinmoora, Joka, Mohadebpore, Kooloopara, Hashimpore, Akhara, Hateyora, Oottargaon Hât, Paddapokhor, Aadharkota Dashora, Shyampore, Soraswateepore, Chamoorsha, Chankooree, Khorda Narayon, Belghoriya, Chakdoree Hât, Baganchra, and Bikram, in the district of Dinagepore; Koonjobon, Haponiya Hât, Pathorghata Lokheepore, Joforabad, Koomooriya, Chak Birahim, Chak Roshid, Chak Ramchondro, Chak Shobder, Chak Aheer, Chak Mooktyar, Chak Mithan, and Nowgaon Hât, in the district of Rajshahye; and Sooltanpore, Peerijpore, Dogachee, and Shâtâhar, in the district of Bogra, measuring 48 miles, more or less, in length, and 72 feet, more or less, in breadth, is required.

J. F. K. HEWITT,
Offg. Junior Secy. to the Govt. of Bengal.

The following orders, issued by the Government of India in the Legislative Department, are republished for general information:—

NOTIFICATIONS.

Fort William, the 31st July 1874.

No. 7.—The following enactments are published for general information:—

37 VICTORIA, CHAPTER 12.

An Act to make provision for the transfer of the assets and liabilities of the Bengal and Madras Civil Service Annuity Funds, and the Annuity Branch of the Bombay Civil Fund, to the Secretary of State for India in Council.

[*8th June* 1874.]

WHEREAS an institution, known as the Bengal Civil Service Annuity Fund, was established in India, under the authority given by the Court of Directors of the East India Company in a public despatch to the Governor-General in Council at Fort William in Bengal, dated the eighth

of December one thousand eight hundred and twenty-four, for the grant of annuities to the civil servants of the said Company on their retiring from the service, who should become subscribers to the said institution; and whereas another institution, known as the Madras Civil Service Annuity Fund, founded on certain annuity funds of earlier dates, was established in Madras, under the authority given by the said Court of Directors in a public despatch to the Governor in Council at Fort St. George, dated the thirty-first of December one thousand eight hundred and twenty-four, for the grant of similar annuities; and whereas another institution, known as the Annuity Branch of the Bombay Civil Fund, founded on an annuity fund of ealier date, was established in Bombay, under the authority given by the said Court of Directors in a public despatch to the Governor in Council at Bombay, dated the thirty-first of December one thousand eight hundred and twenty-four, the said Annuity Branch having a separate capital for the grant of annuities like the Bengal and Madras Annuity Funds; and the said Civil Annuity Funds were supported by the subscriptions of the civil servants of the said Company and by certain contributions from the said Company:

And whereas, in a financial despatch to the Government of India, dated the tenth of February one thousand eight hundred and seventy-one, certain changes respecting the grant of annuities were authorised by the Secretary of State for India in Council, which, taken in connexion with other changes which had been previously made also under the authority of the said Secretary of State for India in Council, rendered the continuance of the machinery of the Bengal, Madras, and Bombay Civil Annuity Funds unnecessary:

And whereas, in accordance with the instructions contained in the aforesaid despatch, the Government of India caused the inquiry to be made whether, upon the terms respecting the grant of annuities offered by the Secretary of State in the said despatch, the subscribers to the said Civil Annuity Funds were willing to surrender the accumulated annuity capital of the said Funds to the Secretary of State for India in Council; and the proposition so to make over the accumulated annuity capital on the terms offered by the Secretary of State was carried in the affirmative by the subscribers to the Bengal, Madras, and Bombay Civil Annuity Funds by a large majority of votes:

And whereas, in order to avoid any doubt that may arise in regard to the legality of such transfer, it is necessary to make provision by law for enabling the trustees of the said Civil Annuity Funds to transfer the assets and liabilities thereof, including the assets and liabilities hereinafter referred to, to the Secretary of State for India in Council, and for enabling the Secretary of State for India in Council to accept the same:

Be it, therefore, enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

Assets and liabilities of Bengal, Madras, and Bombay Civil Funds to be transferred to Secretary of State.

1. It shall be lawful for the trustees of the Bengal Civil Service Annuity Fund, and of the Madras Civil Service Annuity Fund, and of the Annuity Branch of the Bombay Civil Fund to transfer to the Secretary of State for India in Council the assets and liabilities of the Bengal, Madras, and Bombay Civil Annuity Funds, including any assets and liabilities to which the trustees of the Madras and Bombay Civil Annuity Funds may have succeeded as representing the trustees of the earlier funds at Madras and Bombay, and for the Secretary of State for India in Council to accept the same.

Annuities charged on said funds to be payable from revenues of India.

2. As soon as the assets and liabilities of the said Civil Annuity Funds, including as aforesaid, shall be transferred to the Secretary of State for India in Council, and the acceptance thereof by the Secretary of State for India in Council notified by the Government of India, all existing liabilities of the said Funds shall be deemed to be liabilities of the revenues of India, and all such liabilities may be enforced against the Secretary of State for India in Council in like manner as they might have been enforced against the trustees of the said Funds if this Act had not been passed; and every civil servant who shall at the date of such notification be an incumbent of an annuity from any of the said Civil Annuity Funds, or from any earlier fund the assets and liabilities of which shall have been transferred as aforesaid, shall be entitled to receive from time to time the amount of such annuity from the revenues of India; and every covenanted civil servant who shall be a subscriber to any of the said Civil Annuity Funds at or after the date of such notification shall be entitled on retirement to the benefits granted by the despatch of the Secretary of State in Council to the Government of India, dated the tenth of February one thousand eight hundred and seventy-one; namely,

If he shall have completed twenty-five years' service and twenty-one years' residence in India a fully annuity of one thousand pounds payable in England, or Company's rupees ten thousand six hundred and sixty-six ten annas and eight pies payable in Bengal, or Company's rupees ten thousand six hundred and fifty payable in Madras or Bombay:

And if he shall be compelled to resign the service on account of ill health, clearly proved by medical certificate,

If under five years' service, a grant of five hundred pounds;

If of five years' service and under six, an invalid annuity of one hundred and fifty pounds;

If of six years' service and under seven, an invalid annuity of one hundred and seventy pounds;

and so on, an increase of twenty pounds being made to the annuity for each year's service, the highest invalid annuity being four hundred and fifty pounds for a service of twenty years.

Nothing to prejudice subscribers' claims.

3. Provided, that nothing in this Act contained shall prejudice any claim which may be made by any subscriber to the said Civil Service Annuity Funds, or by the representatives of any subscriber, upon the funds so transferred; and in case any question shall arise between any such subscriber or the representatives of any deceased subscriber on the one hand, and Secretary of State for India in Council on the other, as to any liability or alleged liability of the said funds, such question shall be determined by the Court of Appeal appointed by the Judicature Act, 1873, in such manner as may be provided by any general orders, or as the said Court may, on special application, think fit to prescribe, anything in the Statute of Limitations to the contrary notwithstanding.

---

37 VICTORIA, CHAPTER 13.

An Act to extend to the present Bishop of Calcutta the Regulations made by Her Majesty as to the leave of absence of Indian Bishops.

[*8th June* 1874.]

34 & 35 Vict., c. 62.

WHEREAS by an Act passed in the thirty-fourth and thirty-fifth years of the reign of Her Majesty, chapter sixty-two, it was provided that it should be lawful for Her Majesty to make such rules as to the leave of absence of Indian bishops on furlough or medical certificate as might seem to Her expedient: And whereas it was further provided that the provisions of existing Acts of Parliament should not be interfered with by such rules so far as regarded the present Bishop of Calcutta: And whereas the present Bishop of Calcutta has intimated his desire to be brought under such rules:

Be it enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

Rules as to leave of absence applied to present Bishop of Calcutta.

1. The rules made by Her Majesty as to the leave of absence of Indian bishops on furlough or medical certificate under the power given to Her by section one of the said Act shall apply to the present Bishop of Calcutta.

The following order, issued by the Government of India in the Home Department, is republished for general information:—

No. 536.—*Fort William, the* 31*st July* 1874.—*Notification.—Public.*—The Honorable E. G. Birch, a Judge of the High Court of Judicature at Fort William in Bengal, availed himself on the afternoon of the 18th instant of the privilege leave granted to him in Notification No. 440, dated the 3rd idem.

The following order, issued by the Government of India in the Foreign Department, is republished for general information:—

No. 147*J.*—*Fort William, the* 29*th July* 1874.—*Notification.—Judicial.*—Under the provisions of Section 3 of Act II of 1869, "The Justices of the Peace Act," the Governor-General in Council is pleased to appoint Captain H. M. B. Burlton to be a Justice of the Peace for the whole of British India.

The 3rd August 1874.—Mr. Robert Mason Towers, B.A., C.S., is appointed to be Judge of the Court of Small Causes at Sealdah, in the First Grade, from the date on which Moulvie Waheeduddeen's retirement from the service took effect. Mr. Towers will continue to act as District and Sessions Judge of Chittagong during Mr. J. P. Grant's absence on leave.

The following promotions in the Subordinate Judicial Service are sanctioned, *vice* Moulvie Syed Abdullah, deceased :—

To the First Grade.

Moulvie Imdad Ali, Subordinate Judge of Gya.

To the Second Grade.

Baboo Gunga Churn Sircar, Subordinate Judge of Jessore.

To the Third Grade.

Baboo Uma Churn Kastogiri, Subordinate Judge of Tipperah.

Baboo Nund Kumar Bose, Moonsif of Netrokona, in Mymensingh, is appointed to be a Subordinate Judge of the Fourth Grade.

The 4th August 1874.—Baboo Gobind Chunder Bysack, Sub-Deputy Collector, Backergunge, is vested with the powers of a Magistrate of the Third Class.

Baboo Judoonath Roy, Subordinate Judge of Midnapore, is allowed leave for 8 days under Section 21, Chapter VI of the Civil Leave Code, with effect from the 3rd August 1874, or from such subsequent date within one week therefrom as he may avail himself of it.

Baboo Amirto Lall Pal, Moonsif on special duty, who has, under separate orders of this date, been posted to the Sonthal Pergunnahs, is vested with the powers of a Magistrate of the First Class.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 24th July 1874.—Under Section 69 of the Indian Registration Act, 1871, the Lieutenant-Governor is pleased to direct that the last 18 words of Rule 39, which under administrative arrangements have become inapplicable, be cancelled.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 28th July 1874.—Under Section 5 of the Indian Registration Act, VIII of 1871, the Lieutenant-Governor of Bengal is pleased to create the following registration sub-districts, having the head-quarters and local jurisdiction shown opposite their names. The Lieutenant-Governor is also pleased, under section 7 of the Act, to appoint the persons named below to be Sub-Registrars of the said sub-districts :—

DISTRICT.	Name of new sub-district.	Head quarters.	Thanas included in jurisdiction.	Sub-Registrars appointed.
Howrah	Jagatballabhpore ...	Jagatballabhpore ...	Jagatballabhpore ...	Charu Chandra Ghose.
Hooghly	Chanditala	Baksa	Chanditala ... ... / Kristonagar	Baboo Uma Charan Mittra.

These changes will take effect on and from the 1st August 1874.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

[Third Publication.]

NOTIFICATION.

The 17th July 1874.—It is hereby notified that, under the provisions of Section 3, Regulation VI of 1819, the ferry at the point where the Bhoyrub River is crossed by the Bedhampore and Patkabarry Road at the village of Mohamadpur, in the district of Moorshedabad, is declared a public ferry.

RIVERS THOMPSON,
Secy. to the Govt. of Bengal.

Under orders of the Government of Bengal, dated 5th October 1872, a preliminary examination of candidates for Junior Scholarships will be held on the fifth and sixth of the ensuing October, in each of the Government Zillah School of each district of the Rajshahye Division.

The subjects of examination are :—

(1.) Physical Geography.
(2.) Drawing.
(3.) Surveying.

Candidates should apply for enlistment to the Secretary, District Committee, in their respective districts, at least one month before the day of examination, with certificates from their teachers and specimens (certified by the teachers) of their survey work and drawing. A fee of one rupee will be required from each candidate for enlistment. Half the total number of scholarships allotted to this division will be awarded to those who pass in the above special subjects, provided they attain the required standard in the final examination.

BERHAMPORE, the 10th July 1874. E. W. MOLONY, *Commissioner.*

NOTICE is hereby given that the Office of the Inspector of Schools, Behar Circle, has been removed to Bankipore, to which station all communications should in future be addressed.

BANKIPORE, the 25th July 1874. S. W. PALLIN, *Inspr. of Schools, Behar Circle.*

2. The general conditions of the sale now advertised will be the same as usual; they may be ascertained by reference to the Notification issued on the 8th November 1873, and published in the *Government* and *Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3. The latest dates for deposit and clearance will be the 12th and 22nd September, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other Public Securities, that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the Sale-room, will be received after 4 P.M. of Saturday, the 12th September 1874, and no Bank of Bengal Receipts in full payment of lots will be accepted after 4 P.M. of Tuseday, the 22nd September 1874.

4. In addition to the quantity above advertised for sale, the following quantities, more or less, of Behar and Benares Opium will be brought to sale in the present year on or about the dates specified below. The Member in charge of the Opium Department, however, reserves to himself the right of altering these dates, should circumstances render it expedient to do so:—

Dates.		Behar, about Chests.	Benares, about Chests.	Total, about Chests.
On or about Wednesday,	7th Oct. 1874 ...	2,185	1,565	3,750
On or about Friday,	6th Nov. „ ...	2,185	1,565	3,750
On or about Thursday,	3rd Dec. „ ...	2,185	1,565	3,750
	Total ...	6,555	4,695	11,250

By order of the Member in charge,
W. H. GRIMLEY, *Offg. Secretary.*

BOARD OF REVENUE, L. P., FORT WILLIAM, the 4th August 1874.

STATEMENT showing the quantity of Salt in store available for exportation on Private Trade at each of the several Ports of export in the undermentioned Districts.

BOARD OF REVENUE, L.P., Fort William, the 29th July 1874.

The Calcutta Gazette.

WEDNESDAY, AUGUST 5, 1874.

PART II.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

NOTICE is hereby given that the undermentioned plots of land, no longer required by the Government, situated in the district of Patna, will be put up to sale at the Collector's Office at Bankipore at 12 o'clock on Monday, the 7th September 1874, corresponding with 23rd Bhadro 1231 *B.S.*

The purchasers of these plots will be subject to the following conditions:—

1*st.*—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid down at once.

2*nd.*—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled, the sum deposited being forfeited to Government, and the estate to be again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.

3*rd.*—The plots will be sold revenue-free to the highest bidders.

4*th.*—The purchasers shall be put in possession on receipt of the orders of the Collector confirming the sales. But such possession shall be liable to be disturbed in case the final sanction of the Member of the Board of Revenue in charge should not be accorded to the proceedings.

NOTICE is hereby given that the undermentioned plots of class C land no longer required by the East Indian Railway Company, situated on the 74th, 105th and 106th [illegible] of the Main Line respectively in the Burdwan District, will be put up to sale at the [illegible] Collectorate on Tuesday, the 18th August 1874, corresponding with 3rd Bhadra 1281 B.S.

The purchasers of these plots will be subject to the following conditions:—

1st.—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once.

2nd.—If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled, the sum deposited being forfeited to Government and estates to be again put up for sale, at the risk of the defaulting purchasers after issue of advertisement as in the case of original sale.

The plots will be sold revenue free to the highest bidder above the upset price.

Number in statement in Government estate.	Number on the district roll.	Name of estate and pergunnah.	Approximate area in acres.	Upset price.	REMARKS.

JESSORE COLLECTORATE, the 25th July 1874. A. SMITH, *Collector.*

Is hereby given that the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the office of the Deputy Commissioner of Durrung, will be sold by public auction at the said Deputy Commissioner's office at Tezpore at 11 o'clock A. M., on the 3rd October 1874, unless in the meantime the sale is stopped, or postponed in consequence of claims or objections, under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands) or owing to any other cause.

For the conditions of sale, see detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Durrung.

SCHEDULE.

A lot of waste land consisting of 843·97 acres, situated in Mouzah Sakomatha in the district of Durrung, and bounded as follows:—

East.—By a line running from pillar B to C along the Majulighor, measuring 3,375 yards long.

South.—By a line from pillar B to pillar A and by Gorsunga Bheel, measuring 1,155 yards.

West.—By a line from pillar A to pillar D along the Khoraghor and the Dehingijhan, measuring 2,215 yards approximately.

North.—By Bengna Khawa Joory (stream), measuring approximately 2,665 yards.

The pillars are marked A B C D on the map filed in the office of the Deputy Commissioner of Durrung, Assam. J. M. GRAHAM, *Deputy Commissioner.*

ZILLAH DURRUNG REVENUE DEPUTY COMMISSIONER'S OFFICE, the 16th *May* 1874.

Notice

Is hereby given that the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the Office of the Deputy Commissioner of Durrung, will be sold by public auction, at the said Deputy Commissioner's Office, at Tezpore, at 11 A.M., on the 13th October 1874, unless in the meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to Waste Lands), or owing to any other cause.

For the conditions of sale see detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Durrung.

SCHEDULE.

A lot of Waste Land, consisting of 399·75 acres situated in Mouzah Shakomatha, in the district of Durrung, and bounded as follows :—

West—By a line running from pillar A to pillar B through grass jungle, bearing 140°30″ east, and measuring 2610 feet approximately.

South—By a line running from pillar B to pillar D through grass jungle, bearing 66°5″ east, and measuring 6178 feet approximately.

East—By a line running from pillar D to pillar C through grass jungle, bearing 148° west, and measuring 3140 feet approximately.

North—By a line from pillar C to pillar A through grass jungle, bearing 60°45″ west, and measuring 6168 feet approximately.

The pillars are marked on the map filed in the office of the Deputy Commissioner of Durrung, Assam, and have been erected.

TEZPORE, the 26th May 1874. J. M. GRAHAM, *Deputy Commissioner.*

Notice

Is hereby given that the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the office of the Deputy-Commissioner of Nowgong, Assam, will be sold by public auction, at the office of the said Deputy-Commissioner, at 11 o'clock, on the 2nd October 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands), or owing to any other cause.

For the conditions of sale see the detailed notice, copies of which may be obtained on application to the Deputy-Commissioner of Nowgong, Assam.

SCHEDULE.

A lot of waste land, consisting of about 317 acres, situated in Mouzah Telia Chapori, in the district of Nowgong, Assam, and bounded as follows :—

North.—A line drawn from pillar marked G, on the side of a road to pillar H, and a stream called Dijoo Nuddee on the north-east, at a distance of 400 yards.

South.—A line drawn from pillar O to pillar A, on the south-west, at a distance of 1,580 yards.

West.—A line drawn from pillar A to pillar B on the north-west, at a distance of 240 yards; from pillar B to pillar C on the north-west, at a distance of 200 yards; from pillar C to pillar D on the north-west, at a distance of 220 yards; from pillar D to pillar E on the north-west, at a distance of 1,320 yards; from pillar E to pillar F on the north-west, at a distance of 600 yards; from pillar F to pillar G on the north-east, at a distance of 940 yards.

East.—A line drawn from pillar H to pillar I on the south-east, along the edge of the above stream, at a distance of 400 yards; from pillar I to pillar J on the south-east, along the edge of the above stream, at a distance of 200 yards; from pillar J to pillar K on the south-east, along the edge of the above stream, at a distance of 120 yards; from pillar K to pillar L on the south-east, along the edge of the above stream, at a distance of 200 yards; from pillar L to pillar M on the south-east, at a distance of 500 yards; from pillar M to pillar N on the south, at a distance of 820 yards; from pillar N to pillar O on the south-west at a distance of 500 yards.

Note.—The pillars are marked A to O on the plan of the land filed in the office of the Deputy-Commissioner.

NOWGONG, ASSAM, the 1st May 1874. J. F. SHERER, *Deputy Commissioner.*

Notice

Is hereby given that the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the office of the Deputy Commissioner of Cachar, will be sold by public auction at the said Deputy Commissioner's office at 12 o'clock on the 12th day of October 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (*to provide for the adjudication of claims to waste lands*) or owing to any other cause.

For the conditions of sale see the detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Cachar.

SCHEDULE.

A lot of waste land, consisting of about 1,030 acres 2 roods and 26 poles, situated in mouzah Bengalpore, pergunna Serispore, in the district of Cachar, and bounded as follows—

North—A line commencing from pillar No. 1, on Koya Khal, close to which is a pucca pillar on the other side of the said Khal, to pillar from 2 to 7 at a distance of 2,748 yards, in bearing 290.

West—A line from pillar 7 to pillar No. 12 at a distance of 1,832 yards, in bearing 188.

South—A line from pillar 12 to pillar No. 20, at a distance of 2,748 yards, in bearings 107 and 108.

East—A line from pillar 20 to pillar 32, along the bank of Serispore Khal, thence to pillar No. 1, along the bank of Koya Khal.

W. METCALFE, *for Offg. Dy. Commr.*

Commissioners for making Improvements in the Port of Calcutta.

By order of the Directors,
R. HARDIE,
Secretary & Treasurer.

(307—1)

North-Western Watson's Patent Press Company, "Limited."

NOTICE

Is hereby given that the following Special Resolutions were passed at an Extraordinary General Meeting of Shareholders of this Company held on the 27th day of June 1874, and were confirmed at a subsequent Extraordinary General Meeting held on the 15th July 1874.

1*st*.—That this Company be wound up voluntarily.

2*nd*.—That Mr. R. Howard be appointed Liquidator of this Company for the purpose of winding up the affairs thereof, and that the said Mr. R. Howard, as such Liquidator, be, and he is hereby, empowered and authorized to make over and transfer the License granted to this Company by Mr. James Watson for the use of this Patent, and to convey, assign, and transfer all the movable and immovable property, cash, outstanding credits, and effects belonging to this Company, subject to all the liabilities of the Company, including the remuneration of the Liquidator and expenses of Liquidation, to a new Company, to be formed for purchasing and taking over the same, and to be styled 'The Strand Bank Press Company (Watson's Patent), Limited' and to receive from the said 'Strand Bank Press Company (Watson's Patent), Limited,' on behalf of the Shareholders of this Company, 2,123 fully paid-up shares of the said 'Strand Bank Press Company (Watson's Patent), Limited,' of the par value of Rupees one hundred each, to be distributed to and among the Shareholders of this Company in accordance with the number of shares held by each of them in this Company; and that such Liquidator be authorized, for the purpose aforesaid, to make, execute, and register all necessary conveyances, assignments, transfers, and other deeds and assurances whatsoever, and to exercise all or any of the powers conferred by Section 116 of the 'Indian Companies' Act, 1866,' on Official Liquidators as shall or may be necessary in the premises.

R. HOWARD, *Liqudator.*

8, NEW CHINA BAZAR STREET, CALCUTTA, the 16th July 1874.

CIVIL FUND OFFICE, the 29th July 1874. (299—1)

Sale of Landed Property.

THE sale of the demi-upper-roomed dwelling-house, with the land, situate at Nos. 21-1 and 21-2-1, Ballygunge Circular Road, in the 24-Pergunnahs, was this day adjourned for Thursday, the 13th August 1874, on which day the said property, if not previously disposed of by private contract, will be again put up for sale by public auction, by A. B. Miller, Esq., Official Assignee, at his office, No. 3, Old Post Office Street, at the hour of one o'clock, P.M., with the concurrence of the mortgagee.

For further particulars and conditions of sale apply to— M. CAMELL, *Attorney.*

12, OLD POST OFFICE STREET, CALCUTTA, the 23rd July 1874. (300—2)

Notice,

Is hereby given, that Sham Soonder Auddy, of 31, Durponarain Tagore Street, Calcutta, has sold and conveyed his share, right, title, and interest in the estate of his father Krista Nundo Auddy, deceased, to the undersigned for valuable consideration. The public is hereby cautioned against advancing any money to the said Sham Soonder Auddy on his promissory note, mortgage, &c., or purchasing any property from him.

301—2 RASBEHARY AUDDY. NILMONEY AUDDY.
KHETRO MOHUN AUDDY. BEHARY LALL AUDDY,

PURSUANT to a decree of the High Court of Judicature at Fort William in Bengal, in its Ordinary Original Civil Jurisdiction, made in suit No. 744 of 1873 (wherein Boodh Singh and Bissen Chund, both residing at Azeemgunge in the district of Moorshedabad, in the Province of Bengal, and carrying on business in copartnership at Cross Street, Burra Bazar, in the town of Calcutta, under the style and firm of Mool Chund, Hurreck Chund, and at Serajgunj under the style and firm of Neem Chund, Hurreck Chund, on behalf of themselves and the other creditors of the estate of Radhagobind Shaw, deceased, are plaintiffs, and Sreenibash Shaw and Hurrydhone Shaw, the infant sons of one Radhagobind Shaw, deceased, and Sreemutty Kooboja Dassee, widow of the said Radhagobind Shaw, and mother and guardian of the said infants, all residing at Shoba Bazar Street, Hatkhollah, in the town of Calcutta, are defendants), and dated the ninth day of January, one thousand eight hundred and seventy-four, all creditors of the said Radhagobind Shaw, deceased, are, on or before the first day of August, one thousand eight hundred and seventy-four, to come in and prove their respective debts and claims before the Honorable Arthur George Macpherson, one of the Judges of the said Court, at the Court House, or in default thereof they will be peremptorily excluded from the benefit of the said decree.

The eighth day of August one thousand eight hundred and seventy-four, at the hour of eleven o'clock in the forenoon, at the said High Court, is appointed for hearing and adjudicating upon the said claims.

ORR AND HARRISS, *Plaintiffs' Attornies.* R. BELCHAMBERS, *Registrar.*

CALCUTTA HIGH COURT, ORIGINAL JURISDICTION, the 2nd day of June 1874. (234—5)

TO BE PEREMPTORILY SOLD by the Registrar of the High Court in its Ordinary Original Civil Jurisdiction, pursuant to a Decretal order of the said Court bearing date the thirty-first day of July one thousand eight hundred and seventy three, made in the suit No. 391, of one thousand eight hundred and seventy three, wherein Seth Arratoon Apcar, Thomas Arratoon Apcar, and Alexander Arratoon Apcar, all of Calcutta, are the Plaintiffs, and Anund Lall Dass and Nundo Lall Dass, both of Soba Bazar, in the Town of Calcutta, are the Defendants, at the Registrar's Sale Room in the Court House, on Saturday the twenty-ninth day of August next, at the hour of 3 o'clock in the afternoon, the following property, viz.—

Lot 1.—All that three storied brick built messuage, tenement or dwelling house, together with the piece or parcel of land or ground thereunto belonging and upon part whereof the same is erected and built, containing by estimation eight cottahs, situate in and being No. 58, formerly No. 59, Burtollah Street, in the Town of Calcutta, and bounded on the north by the tenanted house of Munno Baboo, on the south by the public road called the Burtollah Street, on the east by the dwelling house of Joogul Baboo, and on the west partly by the tenanted house of Gooroo Churn Sein, and partly by the tenanted house of Bungseedhur Mullick.

Lot 2.—All that recently erected upper-roomed brick built messuage tenement or dwelling house, together with the piece or parcel of land or ground thereunto belonging and upon part whereof the same is erected and built, containing by estimation sixteen cottahs, situate in and being No. 54, Soba Bazar Street or Durmahatta, in the Town of Calcutta, and bounded on the north by the tenanted house of the late Ram Kistoo Dass, on the east by the tenanted land of Hurro Chunder Mullick, on the south by the public road called the Soba Bazar Street, and on the west by the tenanted land of Buddun Chunder Mitter.

Lot 3.—All that three storied brick built messuage, tenement or dwelling house, together with the piece or parcel of land or ground thereunto belonging and upon part whereof the same is erected and built, containing by estimation ten cottahs, situate in and being No. 114, formerly No. 83-1, Durmahatta Street, in the Town of Calcutta, and now 142, Coondoo Parrah in Durmahatta Street, and bounded on the north by the tenanted land of Khettermoney Dossee, on the south by the dwelling house of Myaram Shaha, on the east by the tenanted land of late Anundo Mohun Mullick, and on the west by the tenanted house of Bipprodass Dey.

A. CARAPIET, *Plantiffs' Attorney.* (297—3) R. BELCHAMBERS, *Registrar.*

TO BE SOLD by the Receiver of the High Court in pursuance of the order of the said Court, dated 13th June 1874, made in the suit Charlotte Boileau *versus* William O'Brien Smith, &c., on Saturday, the 15th day of August 1874, at the hour of one o'clock in the afternoon, at his Office in the High Court premises, the undermentioned properties belonging to the estate of Simeon Henry Boileau, *viz.*:—

Lot No. 1.—All that piece or parcel of land or ground occupied by tenants, containing by estimation ten cottahs eight chittacks and eleven square feet, more or less, situate, lying, and being at No. 119, formerly 95-2, Jaunbazar Street, in Calcutta.

Lot No. 2.—And also all that piece or parcel of land or ground containing by estimation 2 beeghas 15 cottahs and 3½ chittacks, more or less, situate, lying, and being at Gobra, in Holding No. 129, of Division IX and Sub-Division I, in Dhee Punchannogram, in the Zillah of 24-Pergunnahs.

For further particulars and conditions of sale apply at the Receiver's Office.

HIGH COURT RECEIVER'S OFFICE, 25th July 1874.

(293—3)

Notice.

CALCUTTA MUNICIPALITY.

THE period for which the assessments of the portions of the Town noted in the margin were made having expired, it is hereby notified that the Justices of the Peace for the Town of Calcutta have, under Section 76 of Act VI of 1863 (B. C.), adopted the valuations, measurements, and assessments made on the occasion of the last assessment, for the three years next following. The Registers containing the aforesaid valuations, measurements, and assessments can be inspected by owners or occupiers of property at the Office of the Justices.

Bounded on the South by Manicktollah Street, on the North by Rajah Nobokissen's Street, on the East by Cornwallis Street, and on the West by Chitpore Road.

Bounded on the North by Manicktollah Street, on the South by Machooa Bazar Street, on the West by Cornwallis Street, and on the East by Upper Circular Road.

It is further notified that, in accordance with Section 73 of Act VI of 1863 (B. C.), the Justices will, on the 31st August 1874, at noon, hear any appeals against the said valuations, measurements, and assessments, and any person desirous of appealing against the said valuations, measurements, and assessments, must do so by a written application, which must be left at the Office of the Justices three days before the date fixed for hearing appeals. Under Section 27 of Act VI (B. C.) of 1866, no appeals can be heard unless the amount of the rate has been deposited with the Justices, and unless such appeals be perferred by the person who, at the time the appeal is made, shall be recorded in the Assessment Register as the owner or occupier of the premises to which such appeal refers.

R. TURNBULL, *Secretary to the Justices of the Peace.*

CALCUTTA, *the 4th August* 1874. (306—1)

*** The Rig-Veda, the oldest book of Indian literature, has very properly been made one of the principal class-books for those who study Sanskrit in the schools and colleges in India, and though at present a scholar-like knowlege of the Vedic hymns is in the examinations required of the more advanced students only, yet, as soon as editions, translations, grammars, and dictionaries shall have rendered the study of these ancient documents more accessible, I doubt not that the time will come when no one in India will call himself a Sanskrit sholar, who cannot construe the hymns of the ancient Rishis of his country.—*Extract rom Preface.*

PART VI.

Bill of the Legislative Council of India.

Government of India.

LEGISLATIVE DEPARTMENT.

[First Publication.]

The following Bill and Statement of Objects and Reasons are published for general information, by order of His Excellency the Governor-General, under the 22nd of the Rules for the Conduct of the Legislative Business of the Council of the Governor-General.

No. 15 OF 1874.

A Bill to provide for the exercise, in Sylhet, of the powers of the Lieutenant-Governor and Board of Revenue of Bengal.

Preamble.

WHEREAS the District of Sylhet is about to be transferred from the Lieutenant-Governorship of Bengal to the Chief Commissionership of Assam, and it is therefore necessary to provide for the exercise, within the said District, of the powers now vested in, or exerciseable by, the Lieutenant-Governor of Bengal and the Board of Revenue for the Lower Provinces of the Presidency of Fort William in Bengal, respectively; It is hereby enacted as follows:—

Powers of Lieutenant-Governor and Board in Sylhet transferred to Governor-General in Council.

1. All powers over the whole or any portion of the said District, which at the time of the said transfer are, under or by virtue of any law or regulation, vested in, or exerciseable by, the said Lieutenant-Governor or Board of Revenue, shall, on the said transfer, become vested in the Governor-General in Council.

Delegation of such powers.

2. The Governor-General in Council may, from time to time, delegate to the Chief Commissioner of Assam all or any of the said powers and withdraw any powers, so delegated.

STATEMENT OF OBJECTS AND REASONS.

Sylhet being about to be transferred to the Chief Commissionership of Assam, it is necessary to provide for the exercise in that district, of the powers now exerciseable by the Lieutenant-Governor of Bengal and the Board of Revenue for the Lower Provinces. This, briefly, is the object of the present Bill, which in form closely resembles Act VIII. of 1874.

A. HOBHOUSE.

POLICE ADMINISTRATION OF THE TOWN OF CALCUTTA AND ITS SUBURBS.

RESOLUTION.

POLICE DEPARTMENT.

Calcutta, the 4th August 1874.

READ—

The Annual Report on the Police Administration of the Town of Calcutta and its Suburbs, by the Commissioner of Police, for the year 1873; also the Annual Reports of the Police Magistrates of the Town of Calcutta.

Read also—

The Reports of the previous year and the orders passed thereon.

THE reports by the Police Magistrates on crime in the town and suburbs of Calcutta have been drawn up on the same plan as those of last year, though in his resolution on them the Lieutenant-Governor said he would prefer to have a joint report drawn up by the Magistrates of the Northern and Southern Divisions, similar to that drawn up for the Small Cause Court. The Magistrates however, in preparing their separate reports, have acted in communication, and agree in the conclusions come to and the recommendations made by each other.

The Commissioner of Police has very fully compared and analysed the figures given in his statements, and has submitted detailed explanations where necessary. The total number of offences, both cognizable and non-cognizable, reported in the course of the year both in the town and suburbs, was 48,322. Compared with previous years the figures stand as follow:—

	1871.	1872.	1873.
Town	27,867	38,879	39,169
Suburbs	5,894	8,659	9,153

The increase in crime indicated by these figures is explained in part as regards the suburbs by the inclusion in the returns for the first time of cases not enquired into. False cases too have increased and tend to swell the apparent amount

of crime. There are, however, certain classes of crime, such as assaults and nuisance, which have undoubtedly increased largely in the town of Calcutta, and the same remark applies to the suburbs as regards the former offence.

The total number of cases of all descriptions reported in the year was 39,169 in Calcutta and 9,153 in the suburbs. The total number of persons arrested or made to appear on process in these cases was 46,540 in Calcutta and 11,750 in the suburbs, of whom 32,371 and 6,187 respectively were convicted. The distribution of crime, according as it was cognizable or non-cognizable, and according as it arose under the Penal Code or under miscellaneous laws, was as follows :—

	Cognizable.		Non-cognizable.		Total.
	Penal Code.	Miscellaneous.	Penal Code.	Miscellaneous.	
Cases	7,952	16,063	8,102	16,205	48,322
Number of persons summoned or arrested	8,901	20,964	6,238	22,187	58,290
Convictions	5,494	14,246	6,894	11,919	38,558

From this it appears that of the crime reported, about two-thirds arose under special or local laws, and an examination of the detailed returns shows that a large proportion of the remainder were cases of public and local nuisance. The figures given would also show that two out of three persons who appeared on arrest or on the issue of process were convicted. This inference, however, is not legitimate, as in the returns of persons convicted many cases have been included in which it is not obvious how the offenders came before the court. The procedure adopted with regard to the 6,476 persons, whom the return of non-cognizable crime for Calcutta shows to have appeared before the court on charges of local nuisance, requires some explanation, as process was issued in four cases only, against six persons. The return refers to offences not cognizable by the police, while the police are not expected to enquire into such cases *suo motu*.

The number of cases and persons disposed of by the Police Magistrates of Calcutta are shown by their returns to have been as follows :—

	Number of cases instituted.	Total number of persons put on trial.	Acquitted.	Convicted.	Committed.
Northern Division	8,509	14,457	2,138	12,137	142
Southern "	11,151	11,929	1,878	10,008	40
Total ...	19,660	26,386	4,016	22,145	182

The report shows that the total number of persons who appeared before a Magistrate in Calcutta was 37,211, of whom 4,286 were acquitted and 32,366 convicted. The difference, it is presumed, is accounted for by the cases disposed of by the Honorary Magistrates, who would thus seem to have done a very fair share of the work. The large number of committals from the Northern Division Court is noteworthy. Mr. Dickens expresses his regret that the jurisdiction of the Police Magistrates is so limited, and certainly a great waste of time and power would seem to be involved under a system which compels committals to the High Court in many cases of a very petty character. The subject is under consideration, and a remedy may be provided in the Bill now before the Legislative Council to amend the procedure of the Presidency Police Courts. The necessity for a reformatory for boys, alluded to by Mr. Dickens, has long pressed itself on Government, and a committee has been appointed to report as to the manner in which one should be provided.

Cognizable Crime.—Mr. Hogg justly congratulates the town of Calcutta on the peaceable and orderly conduct of its inhabitants. Serious crime has happily been infrequent in Calcutta during the year, and there has been a complete absence of any violent disturbance of the public peace. Both Calcutta and the suburbs were also free from dacoity and other offences against property attended with violence; but one case of robbery was reported, which was successfully

dealt with. Taking town and suburbs together, there were eight cases of murder, two of which remain still undetected. In another case the accused was acquitted, but it seems that the verdict of the jury could hardly have been anticipated. Convictions were obtained in the other cases, and considerable credit is due to the police for tracking and apprehending Sheikh Doman, one of the murderers, who, through the connivance of his neighbours, escaped in the first instance and fled to Purneah. Three true and four false cases of culpable homicide were reported. Of the accused in two true cases of attempted murder, one was unaccountably acquitted, the other has eluded apprehension. With 21 true cases of grievous hurt reported, 8 persons only were convicted out of 42 arrested. The Commissioner of Police explains that while these results, viewed in the abstract, speak badly for the police, they are really independent of police action. The failure seems to arise from the delay which often intervenes from the detention of injured parties in hospital and the attempts then made to avert prosecutions. It is a class of offence in which prompt and summary punishment would be more effectual in the way of repression than the tedious delay of committal to the sessions in the desire of a heavier punishment; and the Lieutenant-Governor cannot help questioning the propriety of admitting compromises in cases of this nature. Sixteen persons were arrested by the police in connection with 11 charges of rape and 8 of unnatural offence; but one committal and no conviction resulted. Ten of the cases are said to have been undoubtedly false ones, and the action of the police in this matter would seem to have been precipitate. On the other hand, it is satisfactory to observe that the only true case of administering stupefying drugs was successfully dealt with. The conduct of the ghât sirkar and of constable Ruchha Sing in foiling an intended murder on the river was particularly praiseworthy, and they should be rewarded.

The returns of the year under review, and of the previous one, show that burglary is more frequent in the suburbs than in the town, and that there has been a failure in dealing with this crime. It is explained that the Magistrates treat simple cases as cases of theft only. Considering the difficulty with which burglars are detected, and the fact that they usually are habitual thieves, it is very desirable that these crimes, though simple, should not be lightly dealt with. Taking thefts, burglaries, and house-trespass together, the figures for the three years past were as follow :—

	True Cases.		Detected.		Amount stolen.		Amount recovered.	
	Calcutta.	Suburbs.	Calcutta.	Suburbs.	Calcutta.	Suburbs.	Calcutta.	Suburbs.
1871	2,543	1,021	... ..	.... .	1,45,769	50,336	33,308	10,506
1872	2,377	1,392	716	413	1,57,127	42,600	35,704	17,003
1873	2,141	1,224	809	370	99,397	21,175	52,346	9,354

These figures show that there has been a steady decrease in those crimes in Calcutta, and an improvement in the number of cases detected. In the suburbs, on the other hand, though these crimes were slightly less than in the previous year, the number of cases in which convictions were obtained was inconsiderable. The number of cases declared false in Calcutta deserves notice. They form more than 35 per cent. of the whole number reported, while in the suburbs the percentage is 17 only. There would appear to be more scope yet for energy on the part of the Police Magistrates in dealing with those who bring false complaints before them. Severity of punishment in a few instances might check what appears to be an increasing evil. The percentage of the stolen property which was recovered was 52·6 in Calcutta and 44·1 in the suburbs; these results are better than in the previous year, when the percentages were 22·7 and 40·9 respectively.

Non-cognizable Crime.—The increase in cases of assault and nuisance has been already noticed. The small number of offences against weights and measures is satisfactory. There were 25 cases of giving false evidence and making false complaints in Calcutta, and 53 in the suburbs. But little success attended the prosecution of these, only 9 offenders in all out of 59 tried having been convicted. But 9 persons were convicted of forgery, though there were but 24 cases in all. The intervention of the police, who in Calcutta treat this crime as a felony, would seem to have been of advantage. The action of the Magistrate in the

case of the Jews Ezekiel and Moses would appear, in the absence of fuller explanation, to have obstructed for a time the course of justice. Any explanation which might remove this apprehension would be acceptable. It is observed that in the suburbs care was taken to employ the police but sparingly in non-cognizable cases; of a total of 4,956 only 108 cases having been investigated by them.

Offences against special or local laws.—In Calcutta there were 335 cases and 566 convictions under the Gambling Act. The attention of the Police Magistrates should be directed to the provisions of the law allowing imprisonment in cases of second convictions, which, in the Lieutenant-Governor's opinion, should be enforced against professional gamblers.

No less than 1,960 persons, out of 2,036 arrested, were convicted for cruelty to animals. There seems to be some ground to fear that these cases are too summarily dealt with. The certainty with which conviction follows arrest is creditable to the vigilance with which these cases are prosecuted, and it must rest with the Magistrates to see that the proof is in every case adequate before conviction is allowed. There can be no doubt, however, that the humane efforts of the society which institutes this watchful and active supervision have been productive of much good.

Mr. Miller, the Magistrate of the Southern Division, reports that, owing to the extension of the jetties, compliance with certain of the Port Rules regarding the mooring of boats has been rendered utterly impossible. The Lieutenant-Governor is not prepared without further explanation to accept his statement, that the law stands so that he is bound to convict persons for not performing impossibilities. There has been a very large increase in the number of persons convicted for contravention of the Port Act Rules in Calcutta. The Lieutenant-Governor hopes that while the public convenience is guarded and promoted, all reasonable moderation may be exercised in instituting charges of this nature. The large percentage of convictions obtained would seem to be suggestive of caution, lest rules in themselves beneficial should be worked in a manner calculated to be unduly troublesome to the people. The Commissioner of Police should make special enquiry as to whether any grievances in this repect exist, and if they do, then he should report, after communication with the Port Commissioners, as to the manner in which they may best be removed. He should also say whether some relaxation is not advisable in the rules which Mr. Miller reports to work oppressively with regard to the obstruction of passenger ghâts by hackney carriages. If it be finally determined that carriages cannot be allowed access to these, notice to this effect should certainly be put up in English.

Three hundred and seventy-five persons were tried for offences against the Shipping Act; of these 293 were convicted. These facts suggest somewhat painful considerations. The lot of the British seaman in this port is not a pleasant one, and he is likely to continue to be troublesome till he is as well cared for as skilled European laborers are on shore. It is hoped that the disadvantages incidental to his sojourn here may be gradually removed.

The Arms Act.—The prosecutions instituted under this Act have not been successful, but one person having been convicted out of 17 charged with offences against it. The licenses of several dealers were, however, suspended, and one was cancelled. A check has been advantageously put on the import trade in fire-arms and ammunition in consequence of the regulation lately issued by the Government of India with a view to the discouragement of the import of a cheap description of weapons. The necessity of increased supervision over local factories has already been pressed by this Government on the Government of India. It is satisfactory to find that endeavours are being made to induce native dealers to keep their books in an intelligible way. Considering the large staff of police officers already at the disposal of the Commissioner of Police, his proposal to appoint a special officer to examine the dealers' books is quite unnecessary.

Condition of the Police Force.—With a strength of 3,207 constables in the town and suburbs, 157 were dismissed and 61 deserted. This is an improvement on the previous year. The Lieutenant-Governor notices that the reduction ordered on Mr. Wauchope's recommendation in the strength of the Suburban Police has only partially been carried out. From a recent return of the Commissioner of the Presidency Division it is found that the constables

have been reduced from 810 to 703, and the number of Inspectors from 15 to 12. Any further reduction has been for the present stayed through apprehensions of an increase of crime on account of the prevalent scarcity. It is also represented that the circumstances of the Northern Suburb require an additional force for a time on account of the opening of the Railway branch line at Chitpore, which has attracted a considerable floating population of workmen and coolies to the neighbourhood. The further diminution of the police force there will not be immediately pressed. The proposal of the Suburban Municipality to place the Suburban Police under the Magistrate and District Superintendent of the 24-Pergunnahs cannot be entertained. The police administration under existing arrangements has been much more successful than formerly.

As regards the constitution of the Calcutta and Suburban Police force, to which the Commissioner refers in his 34th paragraph, the Lieutenant-Governor regrets to find that the endeavours made upon last year's suggestion to increase the number of Bengali constables do not appear to have been very successful. He begs that these endeavours may be still further persevered with. It may, as a rule, be accepted that in a populous city where an organized system of watch is necessary, the up-country policeman will be found the better officer for the prevention of crime, but there are many qualities in the Bengali which can be called into use for police purposes, and especially his capacity for the detection of crime, of which we have many good examples in our mofussil experience. There is room for both classes in the Calcutta Police, and neither could be safely dispensed with.

The difficulties which arise in connection with the subject of habitual offenders have been properly brought to special notice. The Lieutenant-Governor is glad to find that the endeavours of the Commissioner have been successfully directed to the preparation of all the preliminary essentials for the enforcement of the law. A careful register of recorded convictions is now available, and communications have been opened with the Superintendents of the Alipore and Presidency Jails by which proof will always be obtainable of former convictions against old offenders. It remains now with the Police Magistrates to do their part of the duty required for the suppression of habitual crime. It is clear from the returns which are now before Government, with the Commissioner's separate letter of the 9th instant, that the short sentences of punishment passed within the summary power of the Police Magistrates are no deterrent to those who gain a livelihood by crime; and both in the public interest and in support of the Police Administration of this large city the Lieutenant-Governor must press upon the Magistrates that as long as the law remains unaltered it devolves upon them to assist in the repression of the evil complained of by committing to the High Court all such habitual offenders. It is the Lieutenant-Governor's hope that in the measure now before the Legislative Council for the amendment of the procedure in the Presidency Police Courts, arrangements may be made to extend the jurisdiction of the Police Magistrates, but till this is effected the only course open to secure exemplary punishment in such cases should not be neglected.

As regards juvenile criminals of this class, endeavours are being made to meet the increasing necessity for a reformatory institution.

For the greater part of the year under review Mr. Wauchope, C.B., very ably assisted by Mr. J. Lambert, was at the head of the Police, and to both these gentlemen and the subordinate officers mentioned in the report the thanks of the Government are due for the efficient discharge of the difficult and responsible duties connected with the Police administration of Calcutta. Mr. Stuart Hogg rejoined his appointment as Commissioner of Police within a short time before the close of the year. Sir Richard Temple is confident that under Mr. Hogg's management the same standard of efficiency will be maintained, and that all requisite improvements will be gradually introduced.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Commissioner of Police, Calcutta, for his information and guidance, and to the Magistrates of Calcutta for information.

By order of the Lieutenant-Governor of Bengal,

RIVERS THOMPSON,
Secretary to the Govt. of Bengal.

PROGRESS OF ROAD CESS VALUATIONS.

RESOLUTION.

ROAD CESS.

Calcutta, the 3rd August 1874.

READ—

Letter from the Secretary to the Board of Revenue, No. 256A, dated 4th July 1874,

The Lieutenant-Governor notices with satisfaction that during the Road Cess year 1872-73, the valuation of land of immovable property, and of houses for the imposition of the Road Cess under Act X (B.C.), of 1871, was completed in the 16 districts noted in the margin.

Burdwan,	Fureedpore,
Hooghly,	Monghyr,
24-Pergunnahs,	Bhagulpore,
Nuddea,	Purneah,
Jessore,	Cuttack,
Moorshedabad,	Pooree,
Rajshahye,	Balasore, and
Dacca,	Hazareebagh.

2. These operations commenced in August 1871, and were, therefore, completed within little more than two years in the districts in question, a result which is very creditable to the energy of the officers concerned, when the large number of estates and tenures to be valued is taken into account. In the district of Burdwan, the total number of separate valuations amounted to 6,794 estates, and 77,015 tenures, and in Jessore to 3,044 estates, and 51,979 tenures. The figures in the other districts are not so high as these; but the totals of the 16 districts give no less than 80,951 estates, containing 304,656 tenures, and the labor attending these valuations is rightly described by the Member in charge as "enormous."

3. The explanation given in paragraph 9 of the Report omits all reference to Register IX: a register which appears opposite to the entries of several districts in Statement A. The Lieutenant-Governor believes that Register IX includes lands held without payment of rent and paying the cess direct to the Collector under section 26.

4. *Paragraphs* 13 *to* 15.—It is gratifying to find that there has been no real resistance to the submission of the required returns, and that even in cases in which fines have been imposed, it has, in the great majority of instances, not been found necessary to enforce their realization. The figures, however, given in columns 6 and 7 of Statement B show that District Officers must have held very differing views of the necessity for having recourse to the penalty provisions of the Act. In Moorshedabad, especially, fines appear to have been imposed and remitted. As they were so largely remitted their impostion to so large an extent could hardly have been necessary.

5. The case noticed in paragraph 18 of the Report is a striking instance of the difficulties which have been encountered in the progress of the work. But if in this estate the shares and subordinate tenures were formed, not of specific lands, but of fractions of the sudder jumma, it appears to His Honor that it might have been possible to complete the valuation on the basis of any one of the original returns; as the value of each share or tenure might be presumed to bear the same proportion to that of the whole estate, as the sudder jumma of that share did to the entire sudder jumma.

6. His Honor is inclined to agree in the opinion advanced in paragraph 19 of the Report, that the returns made under Parts II and III may generally be accepted as a fairly close approximation to the truth. At all events these returns do not always err on the side of deficiency. Instances have come to His Honor's notice in which a zemindar has entered under Part III tenures which did not really belong to his share of the estate, and from which he was receiving no rental. As regards the neejjote lands, the difficulty is not in respect of the valuation, but of the area: and we have practically no check at all upon this. It is fortunate, therefore, that these lands are of so insignificant an extent.

7. The Lieutenant-Governor fully concurs in the remarks of the 21st paragraph of the Report, on the necessity of exercising the greatest caution in the summary valuation of small tenures, or rather of tenures which bear a small rental. It is so common a thing for zemindars to grant tenures at a

pepper-corn rent on payment of a bonus, or in favor of members of their own families, that His Honor cannot but fear that the results of these summary assessments can scarcely have been so accurate as the Member in charge seems inclined to believe them to be. At the same time it must be admitted that in dealing with so large a number of petty estates and tenures, a free recourse to summary valuation was unavoidable.

8. The Lieutenant-Governor will await with interest the submission of the tables and of the further report promised in paragraph 25, as well as the report referred to in section 31, on the success which has attended the realization of the collections.

9. *Paragraphs* 32 *to* 35.—Operations under Part III of the Act were confined to the two districts of Burdwan and Hazareebagh, and in the latter of these, were of very inconsiderable extent. In Burdwan the valuations of the coal mines amounted to Rs. 2,88,367.

10. *Paragraphs* 36 *to* 39.—Some further particulars with regard to the house cess will probably be given in the Report to be submitted after the close of the Road Cess year. The figures given in Statement D, seem certainly to call for some explanations. The total number of villages in the 16 districts appears from the Census returns to be 64,623, but only 4,609 villages were assessed, or as nearly as possible one village in 14. In Pooree, out of a total of 3,175 villages only three were assessed: while, next to the 24-Pergunnahs, the greatest number of villages assessed was in Monghyr. The amounts of house assessment, also, show very remarkable variations. In Rajshahye, 126 villages produced only Rs. 115-10: while in Dacca, 122 villages yielded Rs. 6,828. On an average of the whole number, each village yielded as nearly as possible Rs. 15: but in Nuddea the average assessment was nearly Rs. 39, while in Cuttack it was less than Rs. 3. Even when all allowances are made for different conditions of the Presidency and the Orissa Divisions, it is difficult to believe that an uniform principle of assessment can have been followed by the several officers concerned.

11. *Paragraphs* 40 *to* 45.—The Lieutenant-Governor is glad to observe that the Member in charge is able to speak in such favorable terms of the cordial assistance he has received from the officers employed in the work of valuation. The Commissioner of Orissa is entitled to special commendation for his successful conduct of the operations in his Division. The Deputy Collectors named in the margin, are also noticed by the Member in charge as having distinguished themselves in carrying out the operations of the Act in districts which presented unusual difficulties. His Honor has learnt with much regret the accidental death of Baboo Kedarnath Dass, Deputy Collector of Hooghly, an able and hardworking servant of Government.

Baboo Bogolanund Mookerjee, Burdwan.

12. The Lieutenant-Governor's best thanks are due to Mr. Schalch himself, for the zeal and ability which he has displayed in superintending this department of the administration.

By order of the Lieutenant-Governor of Bengal,
H. J. REYNOLDS,
Offg. Secretary to the Govt. of Bengal.

No. 256—A, dated Fort William, the 4th July 1874.

From—T. J. C. Grant, Esq., Offg. Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Revenue Department.

I AM directed to submit, for the information of His Honor the Lieutenant-Governor, the report on the completion, during the road cess year 1872-73, of the valuation of land, of immovable property, and of houses, for the imposition of the road cess under Bengal Act X of 1870 in the 16 districts noted in the margin.

Burdwan,	Moorshedabad,	Bhagulpore,
Hooghly,	Rajshahye,	Purneah,
24-Pergunnahs,	Dacca,	Cuttack,
Nuddea,	Fureedpore,	Pooree,
Jessore,	Monghyr,	Balssore, and
		Hazareebagh.

2. The history of the circumstances leading to the enactment of the road cess is fully given in the Bengal Administration Report* for the year 1871-72, and the nature of the Act and

* Pages 172 to 186.

the general progress of the measures up to the 1st October 1873, are detailed in the report† for 1872-73, so far as the information then before the Government afforded the necessary materials.

† Chapter XXII, pages 348 to 359.

3. It is advisable, however, here to recapitulate the principles laid down by the Act for the conduct of the valuations, and to describe the mode in which those principles have been carried out, the extent to which those valuations have been effected, and the financial result they produced.

Valuation of land under Part II.

4. The first and most important class of valuations is that connected with the land.

5. All estates and tenures paying annually Government revenue or rent over Rs. 100 are required to be valued on returns given in by the proprietors showing, in a specified form, the gross receipts from the lands of the estate and tenure classified under four heads;* while if the revenue or rent be at or below that sum, it is discretionary with the valuing authorities either to demand returns or to assess summarily on a ratio of the revenue or rent, or at a rate per acre.

* Part I.—Lands in the actual cultivation and occupation of the person submitting the return.
Part II.—Lands held by cultivating ryots paying direct to the person submitting the return.
Part III.—Tenures of which the rent is paid to the person submitting the return.
Part IV.—Details of lakhiraj lands.

6. The Act seeks to secure the submission of these returns by the imposition of fines, by the suspension of recovery of rent by legal process during the period of recusance, and by granting power to Collectors to make the valuations if the returns be not submitted within the prescribed time.

7. The correctness of the returns is sought to be obtained by making the returns evidence against the submitter and not against the parties entered therein, so that entries of undue and excessive demands render the former liable for the cess assessed on the returns, while they are not recoverable from the latter, and also by rendering the submitter liable to a prosecution under the Penal Code for furnishing false information.

8. Preparatory to the commencement of the operations for valuation, printed forms of registers, notices, statements, accounts, &c., were issued in large numbers to the several Collectors with instructions for their use; and as questions of difficulty in the construction or application of the Act were anticipated, or actually arose in practice, rules for their solution were from time to time issued. These rules received the sanction of the Lieutenant-Governor and now form a code of procedure, which the experience obtained during the past year ha, proved sufficient to meet all the difficulties which have as yet been encountered, and this codes it is hoped, will suffice for the conduct of the valuations in future years.

9. In explanation of the accompanying statements, it should be mentioned that all estates subject to the Act are entered in two registers,—Register I. being restricted to estates, revenue-paying or revenue-free, the property of private individuals, under clauses 1 and 2 of section 3 of the Act; and Register III. to estates the property of Government, and to all waste land sold or granted by Government; while Registers II. and IV. shew respectively the tenures of the two classes of estates.

10. The operations were conducted by the Collector of each district assisted by an Uncovenanted Deputy Collector specially appointed for the duty. The Collector acted under the immediate orders and supervision of the Commissioner of the Division, who was invited to refer freely in all cases of difficulty or doubt to the Member in charge.

11. The operations commenced from the 15th of August 1871, and were completed throughout the 16 districts by the commencement of the current road cess year, 1873-74—that is, by the 1st October 1873.

12. The labour attending the valuations has been enormous. It will be seen from the accompanying statement that in the 16 districts there have been valued 80,951 estates, containing 304,656 tenures. Of that number, 29,404 estates and 63,563 tenures have been valued on returns submitted by the proprietors, and 59,647 estates and 241,093 tenures summarily under the discretion given by section 8 of the Act.

13. It was anticipated that it would be found scarcely practicable to overcome the passive resistance of the landholders to the submission of the required returns. When, however, it was seen that the authorities were determined to carry the measure—that fines would be rigorously inflicted, the withdrawal of the power to sue for rents enforced, and, as a last resort, the valuation made by the Collector after local inquiry, the landholders felt that the law must be obeyed, and no determined resistance was shewn.

14. It was found absolutely necessary to impose fines to a very great extent; but in all cases where good grounds were brought forward for delay, the fines were invariably remitted on the submission of the returns, and in only a few instances was the Deputy Collector obliged himself to undertake the valuation of any estates.

15. Out of a total of Rs. 4,8[illegible],521 imposed as fines, it was necessary to realize them only to the extent of Rs. 16,127, or less than 4 per cent. of the amount of fine imposed.

16. The chief obstacle to the completion of the valuations lay, not in the recusancy of the landholders to submit their returns, but in the difficulty they experienced in preparing them. The demand for returns was novel, the returns somewhat complicated and hard to prepare, even when the zemindar's accounts contained the necessary data, and in very many cases no such data in sufficient detail were procurable. Again, in estates held in joint coparceny between many shareholders, each party collecting his rents separately and often disproportionately to the share he held, the preparation of the returns became almost impossible. It was only with the assistance and the advice of the Deputy Collectors, which were frequently sought, that in these latter cases the returns could be prepared; but with their hearty co-operation, tact, and patience, this task was on the whole well accomplished.

17. As an instance of the minute sub-division and sub-infeudation of estates, the following case that occurred in the 24-Pergunnahs may be noted.

18. The original estate bore a sudder jumma of Rs. 14,784. It was subsequently subdivided into 16 estates, formed, not of specific portions of land, but of shares in the whole estate, the largest of which formed 2*a*. 2*g*. 2*c*., and the smallest 0*a*. 2*g*. 2*c*. of the original estate. In each of these estates there are numerous shareholders, and in all over 400 tenures, not of specific lands, for no such specification was made of the original estate when portioned off, but of the fractions of its sudder jumma; and in each of these tenures are comprised sub-tenures, all, whether tenures or sub-tenures, being held by numerous shareholders. It may be imagined how arduous the task to unravel such an entangled yarn.

19. The Collectors are of opinion that under the pressure of the penalty whereby entries under the proper rents in the returns risk the loss of the recovery of such rents, the returns of Parts II. and III. are fairly and truthfully made, and do represent, if not absolutely correctly, at all events approximately, the gross rental of their respective estates and tenures and that the valuations founded on those returns may be accepted.

20. To the neej jote lands entered in Part I. the same checks do not apply; but fortunately such lands bear an infinitesimally small proportion to the other lands of the estates.

21. The case is, however, different with regard to the valuations summarily effected of the smaller estates and tenures under section 8. Stringent orders were issued to the Collectors to exercise the discretion given under that section, of calling for returns, and not to have recourse to the summary process in cases where, at the time of the permanent settlement of the estate, or the creation of the tenure, the lands may not have been fairly cultivated, or where there may be reason to believe that the rents have been fixed at unduly low rates from interested motives, as in the case of tenures given to members of the landowner's family, or for waste land to be brought into cultivation.

22. This discretion has been as largely exercised as was compatible with the completion of the valuations within a reasonable time; for it is clear that with small estates and tenures (numbering in the 16 districts 69,028 of the former and 273,920 of the latter,) it would have been impossible to value the mass otherwise than by the summary process. Although the value of some of these petty estates and tenures may exceed that arrived at summarily, yet the numerous instances in which proprietors have contested the summary assessment by submitting of themselves returns shewing their value to be much less than the assessment fixed by the Collector, leads the Member in charge to believe that the summary assessment of petty estates and tenures has been on the whole fairly approximate.

23. Appeals from the Collector's assessments under sections 18 and 19 have not been many, amounting to but 117 for the 16 districts.

24. Elaborate tables are in course of preparation, shewing for each pergunnah—

1*st*. Details of estates under the several heads of—

(*a*.)	Estates paying revenue	Register I.
(*b*.)	Estates revenue-free	
(*c*.)	Estates paying revenue or rent directly to the Collector... ...	Register III.
(*d*.)	Estates acquired under rules for the sale, grant, and clearance of waste lands	

classified according both to the revenue paid and the valuation fixed in seven grades, varying from Rs. 1,00,000 to Rs. 100. Other tables give similar details in regard to tenures, and others again in reference to ryottee holdings.

25. As, however, these tables will not be completed for some months, it has been deemed advisable not to delay further the submission of this report; and it is proposed, when forwarding these tables, to discuss the questions connected with the incidence of the cess, the extent and nature of the tenures, and other matters which may arise from the information those tables contain.

26. It will suffice here to state that sub-infeudation is very general throughtout the 16 istricts under review. Statement A shews that out of the aggregate valuation for all the districts, amounting to Rs. 4,72,13,324, or nearly 4¾ crores, Rs. 3,14,90,811, or a little over 3⅓ crores, are due to 304,656 tenures in 80,951 estates, or fully 66 per cent. of the entire valuations.

27. The average ratio of the valuations to Government demand of revenue in the 16 districts is 2·9; but the ratio varies much in the several districts, being highest (9·5) in that of Hazareebagh, and lowest in the Orissa districts, where it varies from 2·1 in Pooree and Balasore, to 2·4 in Cuttack.

28. In the first-named district the Government demand is light, in consequence of large portions of the estates having been at the time of the permanent settlement jungle or uncultivated; while in Orissa, the temporary settlement having been made on a minute inquirv into their condition and assets, the Government revenue was fixed on more accurate data, and with a less margin for proprietary rights.

29. In the two districts of Behar Proper to which alone the Road Cess Act has been extended, the ratio is 6·2 in Bhaugulpore, against 3·9 in Monghyr. The larger ratio in the former district is due to the extension of cultivation since the permanent settlement. It may be mentioned as an instance that in that district, owing to this cause, the assets of an estate with a revenue of Rs. 49, were returned by the proprietor at over 200 times the Government revenue.

30. In the districts of Bengal Proper the ratios are highest in Dacca, at 4·5; in Jessore and Fureedpore at 3·6; and in Rajshahye at 3·2; while in all the remaining districts it varies but slightly, from 2·6 in Hooghly, 24-Pergunnahs and Nuddea, to 2·3 in Purneah.

31. This is not the place to mention the success that has attended the realization of the cess; but it may be stated that the difficulties anticipated in its collection have mostly disappeared, as in the case of those feared in completing the valuations. A report on this subject will be submitted after the close of the road cess year on the 30th September.

Railways, mines, and immovable property, under Part III.

32. The valuations under this part were confined to mines and quarries, the consent of the Governor-General of India not having been given to bring the guaranteed railways under the operation of the Act.

33. These mines exist only in the districts of Burdwan and Hazareebagh.

34. The Collectors observe that no difficulty whatsoever was experienced in effecting these valuations.

35. The financial result, as shewn in statement C, has been that 35 mines have been valued at Rs. 8,28,585. Of these, the coal mines in the Burdwan district, to the number of 25, have been valued at Rs. 2,88,361 while the ten petty mines in the Hazareebagh district bear a value of only Rs. 224.

Assessment of houses under Part IV.

36. As the land valuation approached completion in each district, the Collector was instructed to commence the assessment of the houses under Part IV, instructions having been previously issued for his guidance.

37. By the Act the assessment was to be carried on by the punchayets appointed under Act XX of 1856 and under the Village Chowkeedaree Act of 1871; and where no such punchayets existed, by assessors appointed by the Collector.

38. It was strongly impressed on the Collectors to exclude from the operation of this part of the Act purely agricultural villages where the houses would be exempt from assessment under section 40, and to be careful that in considerable places of a non-agricultural character, such as may be classified under the head of towns, the exemption under that section should be borne in mind.

39. The result has been that of 11,103 villages reported by the assessors as liable to assessment, 6,494 have, for the reasons above given, been freed from assessment by the Collectors, leaving 4,609 villages assessed at an annual charge of Rs. 66,942-14. The assessments appear to have been carefully carried out, and without undue pressure.

Conduct of agency employed in valuation.

40. The Member in charge records with much satisfaction the cordial assistance he has received from all grades of the Government officers employed in the most arduous and wearisome labour of valuation.

41. The Commissioners generally entertained great doubts of the expediency of the Act, and of the possibility of working its provisions with any approximate approach to accuracy, and freely expressed themselves on these points.

42. When, however, the Act was extended to their divisions, they at once addressed themselves to carry it out loyally. This was specially the case with the Commissioner of

Orissa; and it is due to the great attention he has paid to the details of the valuation, assisted as he has been by his Collectors, that the valuations have been carried through in the Orissa districts in so satisfactory a manner.

43. Where the Collectors and Deputy Collectors in charge of the road cess operations have afforded the Member in charge such general satisfaction, it is difficult to select instances of special merit. It may, however, be mentioned that the work of valuation, it will be seen from Statement B, was, as regards the number of estates and tenures valued, and number of returns called for, heaviest in the districts of Burdwan, the 24-Pergunnahs, Jessore, Nuddea, Hooghly, Dacca, and Moorshedabad.

44. In the 24-Pergunnahs the task was much complicated by the intricate nature of the tenures and the great difficulty experienced in dealing with a class of proprietors accustomed to refer to the law in all cases of doubt.

45. The Member in charge now recommends the Deputy Collectors mentioned in the margin to the notice of Government. The Deputy Collector of Hooghly, Kedarnath Dass, was drowned shortly after the completion of the valuations, and in him the Government service has lost a most intelligent and hardworking member.

ANNUAL ADMINISTRATION REPORT OF THE KISHNAGHUR MUNICIPALITY FOR 1873-74.

No. 6M.M., dated Calcutta, the 13th June 1874.

From LORD H. ULICK BROWNE, Commissioner of the Presidency Division,
To the Secretary to the Government of Bengal, Judicial Department.

I HAVE the honor to submit herewith the annual administration report of the Kishnaghur Municipality under Act III of 1864, for the past year 1873-74, together with the usual statement of income and expenditure.

2. The report calls for very few remarks from me. As I said when submitting the last report, the municipality of Kishnaghur has been thoroughly established, and has now worked efficiently for several years, so that there is not much to be done and to report, unless some great work, such as a covered drainage system, were introduced; but the cost of such an operation would, I fear, be far beyond the means of the town, and there is a disinclination to increase taxation at all.

3. It will be observed that the registration of births and deaths has been attended to during the year, and that the municipality have promoted vaccination at their own expense.

4. The amount of fines inflicted by the municipal bench shews, when compared with the number of persons fined, that the Municipal Commissioners have exercised their magisterial power with moderation.

No. 87, dated Kishnaghur, the 29th April 1874.

From—C. C. STEVENS, ESQ., Chairman of the Kishnaghur Municipality,
To—The Commissioner of the Presidency Division.

I HAVE the honor to forward the annual administration report of the Kishnaghur Municipality for the year 1873-74, together with a statement of actual receipts and disbursements.

2. At the commencement of the year there were fifteen municipal commissioners.

3. The gentlemen mentioned below have been ex-officio members :—

The Commissioner of the Presidency Division.
C. C. Stevens, Esq., Magistrate and Collector.
Major Forbes, Executive Engineer.
Captain G. M. Bowie, District Superintendent of Police.

The following gentlemen have been municipal commissioners :—

P. Dickens, Esq., Officiating Joint Magistrate and Vice-Chairman, from April 1873 to June 1873.
E. S. Moseley, Esq., Officiating Joint Magistrate and Vice-Chairman.

Dr. F. J. Earle, Civil Surgeon.
Rev. C. H. Blumhardt.
Rai Judu Nath Rai, Bahadoor.
Baboo Umes Chandra Datta.
" Prassanna Coomar Bosu.
Baboo Mrittonjoy Roy.
" Ram Chandra Mookerjea.
" Kali Charan Laheri.
" Poresh Nath Sakul.
Moulvie Golam Russool.

5. During the year Mr. Dickens left the station. There have thus been fifteen commissioners, of whom seven are European, and eight Natives; of the Europeans six, and of the Natives four, are officials.

6. Nine ordinary meetings were held during the year under report.

7. Baboo Prassanna Coomar Bosu and Moulvie Golam Russool have attended no meeting during the year, but have several times attended Municipal office to sit on benches with other Commissioners for the purpose of deciding cases under Act III of 1864, and bye-laws. Major Forbes and Baboo Ram Chandra Mookerjea only attended one meeting each. The following commissioners were the most regular in their attendance :—

Mr. E. S. Moseley.
Rev. C. H. Bhumhardt.
Rai Judu Nath Rai, Bahadoor.

8. The income of the year was derived from the following sources :—

	Rs.	As.	P.
Balance of last year ...	6,323	13	8
House-rate collection ...	13,964	1	6
Toll-bar ...	2,136	14	3
Fines ...	85	15	9
Conservancy ...	234	5	3
Cattle-pounds ...	720	3	0
Printing ...	29	0	0
Voluntary contribution by owners of property for local improvement	1,719	0	3
Miscellaneous ...	799	15	6
Distraint fees ...	63	7	3
Park Estate ...	1,140	12	0
Burial ground ...	10	0	0
Total ...	27,227	8	5

	Budget Estimate.	Actual receipts.	Difference.	Excess collection.
	Rs. As. P.	Rs. As. P.	Rs. As. P.	Rs. As. P.
House-rate collection	14,600 0 0	13,964 1 6	635 14 6	.....
Toll-bar	2,650 0 0	2,136 14 3	513 1 9	.....
Fines	100 0 0	85 15 9	14 0 3	.....
Miscellaneous	2,000 0 0	1,856 15 0	143 1 0	.....

Voluntary contribution	.....	1,719 0 3	.....	1,719 0 3
Total ...	20,450 0 0	20,903 10 9	1,306 1 6	1,759 12 3

	Rs. As. P.
Outstanding balance of last year	2,053 11 1
Demand of 1873-74	15,045 4 0
Total ...	17,098 15 1
Amount collected...	13,964 1 6
„ remitted	416 8 0
Total ...	14,380 9 6
Outstanding balance	2,718 5 7

9. The collections of house-rate have fallen short of those of last year by Rs. 507-6-9, and of the estimate by Rs. 635-14-6; this is partly owing to high prices, (which have made collection more difficult) and partly owing to the collecting establishment not having done its utmost. The establishment has been recently re-organized, and it is hoped that collection will improve. At the same time the commissioners are prepared to avoid undue pressure on the poorer taxpayers.

10. *Tollbar.*—The decrease of collection from estimate Rs. 513-1-9, under this head, is chiefly attibutable to the absence of check-gates, and to there being no penalty for persons evading tolls. The carters take advantage of all tracks which can enable them to leave the main roads, and by somewhat circuitous routes to avoid the tollgates. The loss of revenue could be provided against with ease, if we were only allowed by Government to establish check toll-gates: but this measure was, I believe, disapproved by the late Lieutenant-Governor.

11. *Fine.*—The decrease under this head is due to the fact that the commissioners who sit in the bench to decide cases under Municipal Act and Bye-laws have been lenient.

12. The statement below will shew that the average rate of fine per head has been Rs. 0-6-6·7 against Rs. 0-9-8 of the year preceding.

13. In accordance with the Government notification of 6th May last, the cases under Municipal Act and Bye-laws have been since June last decided by two of the municipal commissioners forming a bench. The sittings have not been very regular during the year under report, owing to the occasional non-attendance of one of the two Honorary Magistrates appointed to act; this has been often the case with those of the municipal commissioners who are pleaders by profession.

14. The following table will shew the result of trials for breaches of conservancy laws:—

No. of cases required issue of notice.	No. of cases required issue of summons.	No. of persons tried.	No. of persons fined.	No. of persons released.	Amount of fine imposed.	Outstanding balance of last year.	Total.	Amonnt collected.	Outstanding balance.
					Rs. As. P.	Rs. As. P.	Rs. As. P.	Rs. As. P.	Rs. As. P.
460	290	230	157	73	64 5 9	39 6 0	103 11 9	79 12 9	23 15 0
Fine imposed on Municipal Police for neglect of duty ...					6 3 0	.....	6 3 0	6 3 0	.....
				Total ...	70 8 9	.....	109 14 9	85 15 9	.....

15. *Miscellaneous.*—The receipts under this head have been less than the estimate by Rs. 143-1. This is partly owing to the diminished receipts under the head of printing and partly to the non-receipt of any income from the head of house rent. On the other hand, there has been an increase of Rs. 115-1-6 in comparison with the receipts of the year preceding.

16. The miscellaneous receipts are derived from the following sources:—

	Rs. As. P.
Cattle pounds	720 3 0
Conservancy	234 5 3
Distraint fees	63 7 3
License fee	473 2 0
Burial ground	10 0 0
Printing	29 0 0
Salary of the 2nd clerk recoverable from the other Municipalities ...	180 0 0
Sale proceeds of trees on the sides of roads	131 9 6
Unclassified	15 4 0
Total	1,856 15 0

17. The receipts from the cattle pounds are Rs 720-3, against Rs. 688-3-9 of the year preceding. The increase has been caused by the removal of the Chandsarak pound to Shunda.

18. The statement below will shew the working of each pound during the year under eport:—

Names of pounds.	No. of cattle impounded.	No. died in the pound.	No. claimed.	No. unclaimed.	Total.	Receipts.	Disbursements.	Total.	Profit.	Loss.
						Rs. As. P.	Rs. As. P.	Rs. As. P.	Rs. As. P.	Rs. As. P.
Cutcherry ...	1,611	.....	1,603	8	1,611	252 14 0	92 13 9	92 13 9	160 0 3	.....

Barnipara ...	704	.....	697	7	704	144 15 6	118 0 0	118 0 0	26 15 6	.....
Shunda ...	519	.....	516	3	519	98 3 6	117 5 0	117 5 0	.....	19 1 6
Park Estate..	369	.....	365	4	369	75 7 0	90 8 6	90 8 6	.....	15 1 6
Total ...	4,092	3	4,055	34	4,092	720 3 0	502 11 3	502 11 3	251 10 9	34 3 0

19. *Conservancy.*—The receipts under this head are recoverable expenses of a special conservancy cart employed solely for removing professional refuse of the stable-keepers. The increase of Rs. 63-7-3 upon the receipts of the year preceding has been caused by the collection of the arrears of the previous year during the year under report.

20. *Distraint fee.*—The receipts under this head have been Rs. 63-7-3 against Rs. 92-7 of the year preceding. The decrease of Rs. 28-15-9 has been due to the decreased number of warrants issued for the realization of arrears.

21. *License Fees.*—The receipts under the head of license fees have been Rs. 473-2 against Rs. 444-11 of the year 1872-73. The increase has been entirely due to receipts for brick licenses, since the municipal commissioners have been enforcing the Section 63 of Act III of 1864 and Bye-law 18 in this town.

22. *Printing.*—The decrease of Rs. 31-15 in comparison with the receipts of the preceding year under this head is nominal, because a sum of Rs. 43 is due from the Magistrate of Nuddea for forms supplied during the year under report.

23. *Burial Ground.*—A sum of Rs. 10 has been received as fee for allowing a man to bury a corpse out of the line in the Mahomedan Burial Ground.

24. *Park Estate.*—The collections have been below those of the year 1872-73 under this head. Since the lands cultivated for winter crops were not sown for want of seasonable rain, strict measures have not therefore been taken for the realization of the rent of such lands from the ryots.

25. *Voluntary Contribution.*—The receipts under this head have been derived (1) from a contribution by the Nuddea estate of half the cost of improving a large tank belonging to the estate and lying within the municipality; (2) from a contribution of Rs. 300 given by the proprietor of a tank called the Pora Pokhur, towards the expense of its improvement.

26. The subjoined statement shews the expenditure of the year:—

	Budget Estimate.	Actual Expenditure.	Less Expenditure.	Excess Expenditure.
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
1. Expense of collection of house-tax ...	700 0 0	766 10 6	0 0 0	66 10 6
2. General charges	842 0 0	747 1 6	94 14 6	0 0 0
3. Roads	11,000 0 0	8,225 11 9	2,774 4 3	0 0 0
6. Conservancy	1,122 0 0	1,039 9 9	82 6 3	0 0 0
7. Police	5,707 0 0	5,391 4 3	315 11 9	0 0 0
8. Local Improvement	1,000 0 0	2,985 7 0	0 0 0	1,985 7 0
9. Miscellaneous	1,350 0 0	1,190 0 6	159 15 6	0 0 0
10. Park Estate	1,203 0 0	1,195 12 9	7 3 3	0 0 0
Total ...	22,924 0 0	21,541 10 0	3,434 7 6	2,052 1 6

27. *Expense of Collection.*—The cause of increase of Rs. 66-10-6 upon the budget estimate was that the expenditure required for newly numbering the houses (a step rendered necessary to the revision of the boundaries of wards), had not been provided for in the budget estimate.

28. *General Charges.*—A sum of Rs. 94-14-6 less than the budget estimate was expended because the salary of the vaccinator was not paid during the year under report, but subsequently, on the request of the Superintendent of Vaccination, Metropolitan Circles. There was also a saving of Rs. 39 under the head of stationery.

29. *Roads.*—The expenditure on roads was Rs. 8,225-11-9 against the budget estimate of Rs. 11,000 under this head. The saving of Rs. 2,774-4-3 was due to the fact that some of the metalled roads did not require thorough repairs, though provision had been made in the budget estimate.

30. The following table will shew the expenditure on metalled roads during the year 1873-74:—

	Rs.	A.	P.
Church lane	615	7	3
Gab road	1,159	0	3
High street	1,118	13	6
Toho road	86	0	0
Nootunsarak	971	9	6
Kutcherry lane	732	9	6
Judge's road	643	3	6
Gobind road	199	10	3
Rajah's road	425	0	6
Barendra road	158	13	3
Working establishment	812	6	6
Total	6,922	10	0

31. The metalling of the Gab and part of the Nootunsarak roads were new works. Of the total expenditure Rs. 800 had been advanced in March 1873, and accounted for in the annual statement for 1872-73, hence the expenditure on pukka roads debitable to the year 1873-74, was Rs. 6,922-10 minus Rs. 800, or Rs. 6,122-10.

32. All the kutcha roads of the town, about 45 miles, were kept in good order at a cost of Rs. 1,238.

33. 17 new culverts were constructed during the year at a cost of Rs. 658-4-6. The roads and bridges of the town have been in good condition throughout the year.

34. *Arboriculture.*—About 400 young teak and banian trees were planted on road sides to fill up vacant places, and the enclosures of those planted during the previous year were kept in good order.

35. *Conservancy.*—The saving of Rs. 82-6-3 from the budget estimate was due to the fact that a sum of Rs. 150 had been provided for in the estimate for repairs of the stables and conservancy carts, but only about Rs. 60 was expended on that account.

36. *Police.*—The saving of Rs. 315-11-9 on the budget estimate is atributable to the fact that the amount estimated for clothing was not drawn during the year under report.

37. *Local Improvement.*—The excess expenditure of Rs. 1,985-7 was incurred in improving the Ameen Bazar tank and Pora Pokhur.

38. *Miscellaneous.*—The saving of Rs. 159-15-6 was partly due to the fact that a sum of Rs. 200 had been provided in the estimate for keeping the toll-bar under khas collection; as all the toll-bars were farmed out during the greater part of the year under report, the expenditure was not required. Again, though provision had been made in the estimate for repair to the municipal office, the work was not done in the course of the year.

39. *Park Estate.*—The saving of Rs. 7-3-3 is due to the fact that a lakhirajdar did not appear to claim his rent during the year under report.

40. *Health.*—The health of the town during the year was better than in the year preceding. The death rate was 18 per thousand, against 22 of the year 1872-73:—

DEATHS—	
Male	276
Female	210
Total	486

41. The causes of deaths were as follows:—

Fever	187
Cholera	27
Small-pox	1
Other causes	271
Total	486

42. BIRTHS—

Male	349
Female	355
Total	704

The average birth rate has been 26 per thousand, against 28 of the year preceding.

43. *Vaccination.*—One vaccinator was appointed in November last for three months. The following table will shew the result of vaccination:—

Male	212
Female	182
Total	394
Success	386
Partial	1
Failed	...
Unknown	7
Total	394

44. *General Remarks.*—Upon the whole, the work of the year, while affording no specially brilliant results, has been satisfactory. During the Commissioner's stay here an attempt was made to induce him to believe that a certain quarter had been neglected by the municipality,

but the falsehood of the charge was made clearly apparent. The commissioners have done their best to be just to all parts of the municipality.

45. The daroga has, upon the whole, worked satisfactorily.

Municipal improvement fund of Kishnaghur Municipality, under Act III of 1864, *for the year* 1873-74.

C. C. STEVENS, *Chairman.*

ADMINISTRATION REPORT OF THE MIDNAPORE MUNICIPALITY FOR THE YEAR 1873-74.

No. 326, dated Burdwan, the 19th July 1874.

From—C. T. BUCKLAND, ESQ. Commissioner, Burdwan Division,
To—The Secretary to the Government of Bengal, in the Judicial Department.

I HAVE the honor to submit in original the annual administration report of the Midnapore Municipality for the year 1873-74, together with the statement of income and expenditure, in the form prescribed in Government order No. 2655, dated 25th April 1872.

2. The actual receipts shew a deficit of Rs. 453-4-9 as compared with the Budget estimate. The deficit was marked under the heads of "house-rate" and "fines." The decrease under heading "house-rate" was owing to the exemption of several of the houses which had fallen out of occupancy. I believe there is an error in the Chairman's report, as no house in a municipality can be entirely exempted on account of vacancy, the maximum remission provided in Act II (B. C.) of 1868, being one half of the rate. I have accordingly asked for an explanation. The collections under the heading "miscellaneous" exceed the budget estimate by Rs. 552. This is owing to the large collections of rent on account of *gowbhagár, i.e.,* places in the town where dead animals are deposited.

3. The total expenditure during the year was Rs. 14,782-8-3, or Rs. 2,318-7-9 less than the amount estimated. The chief saving had been under the heading "local improvement," in which Rs. 866-9-3 only were expended out of Rs. 3,500 estimated. This is on account of many of the works estimated not having been completed during the year.

4. The statement of collections shews a balance of Rs. 693-5-9 remaining unrecovered at the close of the year, against Rs. 296-13-3 remaining outstanding at the close of the previous year.

No. 29, dated Midnapore, the 6th July 1874.

From—H. L. HARRISON, ESQ., Magte., and Chairman of the Midnapore Municipality,
To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit the administration report of the Midnapore Municipality for 1873-74.

There were 12 Municipal Commissioners, six Europeans and six Natives, at the beginning of the year under review, as named below.

EX OFFICIO.

Mr. H. L. Harrison, Magistrate and Chairman.
" W. P. Davis, } District Superintendents.
" C. P. Macaulay, }
Colonel Swayne, Executive Engineer.
Dr. R. G. Mathew, Civil Surgeon.

ORDINARY.

Mr. W. B. Oldham, } Vice-Chairmen.
" A. W. Cochran, }
" James Kimber, Member.
Baboo Nobin Chunder Banerjee, Member.
" Romanath Roquitte, ditto.
" Okhil Chunder Dutt, ditto.
" Jumenjoy Mullick, ditto.
Moulvie Khoyrat Alli, ditto.
Moonshi Mahomed Jan, ditto.

Mr. Macaulay only succeeded Mr. Davis on 7th July ; Mr. Cochran was not appointed till Mr. Oldham had left, hence, though the number was 14 in all, it never exceeded 12 at any one time.

2. Nineteen general meetings of the commissioners were called during the year. This, it is true, is less than the number required by law, but even as it was, there was no quorum on eleven occasions, and additional meetings were quite unneeded.

As has often been reported, the number of commissioners is too small. The ex-officio members cannot be relied on for constant attendance, especially in the cold weather. The ordinary members are only eight in number, and though one of them, the Vice-Chairman, is pretty regular in attendance, another, Mr. Kimber, ordinarily cannot spare time to attend, and hence success in obtaining a quorum depends on the regularity of the remaining six native commissioners. Of these, two, Baboos Romanath Roquitte and Okhil Chunder Dutt, were incapacitated for attending to their duty during the greater part of the year, and the former has died since the close of the year.

Many efforts were made to obtain an increase of the ordinary members to 15, so that five may vacate every year, but owing to technical difficulties arising from the working of the new Act (No. II of 1873), the appointments were not made till after the close of the year. It may be hoped that during the current year the meetings will be much better attended.

3. The following statement shews the actual income under the several heads as compared with the budget estimate.

	Budget.	Actual receipts.	Excess.	Deficit.
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
House rate	11,000 0 0	10,690 13 3	.....	309 2 9
Land rate	800 0 0	672 6 9	.....	127 9 3
Wheel tax	1,000 0 0	970 14 0	.....	29 2 0
Fines	500 0 0	180 6 6	.....	319 9 6
Pound	900 0 0	873 14 9	.....	26 1 3
License fees	100 0 0	112 0 0	12 0 0	.....
Fees on processes	.....	106 8 0	106 8 0	.....
Cart fees	1,000 0 0	687 0 0	.....	313 0 0
Miscellaneous	300 0 0	852 12 0	552 12 0	.....
	15,600 0 0	15,146 11 3	671 4 0	1,124 8 9

4. *House Rate.*—The total demand on this account for the year was Rs. 11,146-4-3, to which must be added arrears outstanding from last year, Rs. 296-13-3 ; of this Rs. 10,690-13-3 has been collected and Rs. 220-13-3 has been remitted. There is, consequently, a balance of Rs. 531-7. The decrease as compared with last year is owing to several houses, fallen out of occupancy, having been exempted after due inquiry. The balance not collected is a high one. The ratepayers have been rather backward in paying and the tax collector somewhat remiss. The last part of the year has also been a season of some scarcity even here, and that may have had something to do with the large arrear.

5. *Land Rate.*—The actual demand of land rate was Rs. 683-9-0, which with the arrear of last year, Rs. 53-4-0, amounts altogether to Rs. 736-13-0. Of this sum Rs. 672-6-9 was collected, leaving a balance of Rs. 64-6-3. The same sum was collected on this account last year. In neither year was the budget estimate reached, but it is evident that the estimate was erroneous, being in excess of the actual demand.

6. *Wheel Tax.*—There is little to remark on this head. The budget estimate and the actual demand closely approximated, and a balance of Rs. 15 only was over (see Statement B).

7. *Fines.*—There is a considerable difference between the budget estimate and the actual realization, Rs. 180-6-6, as fewer cases were brought and fewer convictions obtained than in 1872-73.

8. *Pounds.*—The receipts under this head for this year, Rs. 873-14-9, exceed those on same account for last year, Rs. 786-4-0; but are somewhat below the budget estimate. There are no arrears. The police impounded 240 cattle; municipal servants none, and private individuals 4,028. This shews a satisfactory working of the pounds.

9. *Fees under Section 77.*—License fees imposed under this section exceed the budget estimate (Rs. 100), being Rs. 112, but have fallen short of last year by Rs. 13. Nineteen licenses were issued (see Statement B). There are no arrears.

10. *Warrant Fees.*—274 warrants were issued for the realization of rates, the fees amounting to Rs. 90-4-0, or with arrear of last year, Rs. 135-12-0. Rs. 106-8-0 have been realised; the balance is for unexecuted warrants.

11. *Hackery Registration Fees.*—The sum realised under this head, Rs. 687, falls far short of the budget estimate, Rs. 1,000, and of the collection of last year, Rs. 988. The carters are very ready to evade payments, and it is not easy to detect them. The Municipal Benches also are disposed to deal leniently with these offences, two annas being the usual fine imposed; this is far too little in the face of the evasion and trickery practised by cart owners. There are no arrears. Of course special attention will be paid to this breach of municipal law during the current year.

12. *Miscellaneous.*—The collection, Rs. 852-12, under this head, on the other hand, far exceed the budget estimate and the collections of last year, Rs. 529-10-6. This is due chiefly to large collections on account of *gowbaghár, i.e.*, dead animals are deposited at certain places in the town, for which (and for the use of skins, &c.,) a rent of Rs. 231 is paid. The other items are—

	Rs.	A.	P.
Sale proceeds of trees	43	14	0
Payments on account of Julkur	153	8	0
Payments on account of ferry, Nuzurgunge ...	90	0	0
Fees for burial grounds	4	0	0
Sweeper's pay, refunded by the owner of Shib bazar ...	48	0	0
Paid by Executive Engineer for fire engine ...	50	0	0
Refund of advance and coolies' pay by overseer and mohurir	160	5	3
Refund of excess costs in suit brought by farmer of N. Ferry	12	0	9
Refund from Fouzdaree office for platforms used in Municipal Benches	60	0	0
Total ...	852	12	0

Incidence of taxation (see Statement D) Rs. 0-7-9. The percentage of the house rate on the annual value of the houses cannot be accurately given, say about Rs. 4½.

13. *Expenditure.*—The expenditure of the year amounted to Rs. 14,782-8-3, and is specified as follows:—

	Budget.			Actual.			Saving.			Excess.		
	Rs.	As.	P.	Rs.	As.	P.	Rs.	As.	P.	Rs.	As.	P.
Expenses of collection ...	998	0	0	952	15	5	45	0	7	.....		
General charges	769	0	0	538	10	3	230	5	9	.....		
Roads	2,800	0	0	2,843	15	1	.....			43	15	1
Conservancy	2,810	0	0	2,548	4	10	261	11	2	.....		
Police	6,104	0	0	6,004	0	0	100	0	0	.....		
Local improvements ...	3,500	0	0	866	9	3	2,633	6	9	.....		
Miscellaneous	120	0	0	1,028	1	5	.....			908	1	5
	17,101	0	0	14,782	8	3	3,270	8	3	952	0	6

14. *Expenses of Collection.*—Under the first head there has been a small saving, but under the second a considerable one, the expense having been less than expected.

15. *Roads.*—There has been a larger expenditure on roads than were apparently expected. Five first-class roads, two second-class roads, and six third-class roads, have been thoroughly repaired and metalled to a length of 1,092 cubic yards laid down, the width varying from nine to 15 feet. One large bridge at Keranitollah has been constructed, and a good deal of petty repairs done.

16. *Conservancy.*—There was a good deal saved under the next head. The present establishment consists of an overseer, two chuprassees, one sirdar, 30 coolies, and seven sweepers.

17. *Police.*—The saving under the head of Police is small. It was owing to sick leave and leave without pay having been granted to certain of the police. The police force consists of four head constables, four second-grade constables, 50 fourth-grade constables, and 20 fifth-grade constables. They are distributed in four Pharees—Khas Pharee, Notoon Bazar, Patna Bazar, and Hobipore.

18. *Local Improvements.*—Under the head of local improvements several works have been in progress:—(1) a second latrine at Dariband was made at a cost of Rs. 117-4-9; (2) a retaining wall of a tank in Meah Bazar was also made at an expense of Rs. 289; (3) the

Dariband khall, running through the town, which has for years been a deposit for filth of all kinds, in fact an open sewer, has been excavated and embanked and a pathway made along each side. In two convenient places it enlarges out into tanks and thereby improves the water supply. Up to 31st March only Rs. 380-10-3 was paid, but something for work done was owing. The work has been now done, and at a total expense of Rs. 1,566-8-5. (4) Under this head is also shewn an expenditure of Rs. 50 for a survey of the river bank, which now forms the port of the town. The municipality were led to expect by the Lieutenant-Governor, when he visited Midnapore, that they would be allowed to take up this land and construct warehouses and landing places, receiving dues to be sanctioned by Government. When the project was ripe for approval, however, and the survey had been completed, the Government changed its views and declined to sanction the project.

19. *Miscellaneous.*—Under this head there has been a very large excess expenditure, the items being,—to Pierce Charitable Dispensary, Rs. 549-12-0; to pension of Ram Chunder Chuckerbutty and Shaik Maghoo, Rs. 36-6-0; to purchase of tin tickets, Rs. 34-6-0; to purchase of lanterns, Rs. 32-0-0; to rent of municipal land, Rs. 75-7-2; to law charges, Rs. 57-1-0; but the excess over budget estimate of collection helps to balance the large expenditure.

20. At a meeting held this year, Rs. 100 was voted to be given to vernacular schools, and Rs. 500 to the Charitable Dispensary, these sums to be paid from budget of expenditure for 1874-75.

21. Of the resolutions passed during the year under review the most important were—(1) to take over the management of the Pierce Charitable Dispensary and guarantee its deficiency in income; (2) to devote certain tanks to be used for drinking purposes only; (3) to reclaim the management of the Library Tank, though not its income, from the Library committee; (4) to declare the line from Colonel Golla to Soojagunge a highway under second part of bye law XVIII, to lessen the danger to house property from fire.

22. *Lawsuit.*—There was one lawsuit during the year with the farmer of Nuzurgunge Ferry, who sued to recover his deposit when he relinquished the ferry. The suit was for a small amount, Rs. 77-8, and was partly lost. The municipality had to pay Rs. 25-13. There does not seem to have been any good reason to appeal.

23. *Assessment.*—Baboo Okhil Chunder Dutt, Baboo Jumenjoy Mullick, Moonshi Mahomed Jan, and Moulvie Khoyrat Alli, revised the assesment, for the most part making new assessments only in the case of new houses. There were 36 objections submitted, but they were successful to amount of Rs. 6 only, Rs. 223 was newly assessed on new houses.

24. *Prosecutions.*—150 persons were prosecuted, 53 of whom were discharged. In 1872-73, 426 persons were prosecuted and 193 let off. This statement will shew the prosecutions by overseer and police under the various penal sections of the Act:—

	Act III of 1864.										Bye-law.						Total.
	Section 35.	Section 56.	Section 72.	Section 66.	Section 67.	Section 71.	Section 59.	Section 77.	Section 43.	Section 70.	Section 18.	Section 33.	Section 22.	Section 21.	Section 29.	Section 35.	
Police	1	19	3	12	9	3	1	5	2	...	1	...	5	1	14	2	78
Overseer	...	1	...	7	...	...	11	8	...	1	1	2	5	...	1	...	37
Total	1	20	3	19	9	3	12	13	2	1	2	2	10	1	15	2	115

The falling off is due to the change in the Vice-Chairman. Mr. Hopkins was in favor of much more active measures in conservancy and allied questions than Mr. Oldham, and hence prosecutions under his management were much more frequent. On the report of the municipal overseer, 77 notices, issued against 135 persons, in case of 91 persons, sufficiently speedy attention was paid; in 10, cases were pending at the end of the year; on police reports, 27 notices were issued against 32 persons. Six summonses only had subsequently to issue for disobedience, and two cases were pending at the end of the year. These cases went before the Muncipal Benches. Statement C. will shew the attendance of the Commissioners at these Benches.

25. *Charitable Dispensary.*—This institution is superintended by the Civil Surgeon, assisted by a committee of European and Native gentlemen. As already stated, its management has, so far as finances are concerned, passed into the hands of the municipality.

26. *Vital Statistics.*—The police collect these statistics and they are compiled in the Civil Surgeon's office. The cost is Rs. 60. The reports are defective, but as the whole Rs. 500 allotted to this district by Government were assigned to Bogree, and as the municipality were unwilling to expend more money, a more thorough system could not be adopted. Sanction to expend the savings from Bogree grant (Rs. 176) in the Midnapore town has been received for the current year.

27. The Vice-Chairman reports that he has found the municipal clerks and servants working fairly.

H. L. Harrison, *Chairman.*

A. W. COCHRAN, *Vice-Chairman.*

ANNUAL REPORT ON THE ADMINISTRATION OF THE MUNICIPALITIES IN THE CHITTAGONG DIVISION DURING 1873-74.

No. 275,G.M., dated Chittagong, the 15th July 1874.

From—R. L. MANGLES, ESQ., Officiating Commissioner of the Chittagong Division,
To—The Secretary to the Government of Bengal, Judicial Department.

I HAVE the honor to submit copies of the annual administration reports of the municipalities of this division, constituted under Act III of 1864, (B. C.), for publication in the *Gazette*, as directed in the Government circular No. 27, of the 16th August 1873.

2. In this division there are two municipalities, constituted under the aforesaid Act, viz., the municipalities for the towns of Chittagong and Comilla. In the town of Noakholly and at the head-quarters of the sub-divisions of Brahmunberiah and Cox's Bazar, situated respectively in the Tipperah and Chittagong districts, town corporations have been constituted under the provisions of Act VI of 1868 (B.C.).

3. *Assessments.—Commillah.*—As regards the system of taxation prescribed by Act III of 1864 (B. C.), it is quite clear that the assessments in the Comilla Municipality are not and never have been carried out in strict accordance with the requirements of that Act, inasmuch as it is stated that these assessments have been made, not as a rate on the value of houses, but according to the circumstances and property to be protected of the persons liable to assessment; or in other words, in accordance with the provisions of Act VI (B. C.) of 1868. This matter, I observe, has been already brought to the notice of Government by my predecessor, Mr. Fowle, in his report No. 596, dated the 22nd October 1873, wherein he pointed out the irregularity which existed of following the provisions of an Act which had not been introduced, and recommended that the illegality should be at once rectified, with a retrospective effect, to avoid complications which might otherwise arise. No Government orders appear to have been received on Mr. Fowle's recommendation.

4. I fully concur with the views expressed on this subject by Mr. Fowle and the present and former Magistrate of Tipperah, and strongly recommend that Act VI of 1868 be declared to be in force in Comillah, in supersession of Act III of 1864, which is clearly unsuited to the existing circumstances of the town.

5. At present, owing to the exorbitant demands made by the Rajah of Hill Tipperah, the proprietor of the soil, but few persons are either willing or in a position to take long leases of building sites for the erection of masonry houses. The consequence is that the so-called town consists for the most part of a collection of mere mat and bamboo houses, and even these, owing to the fear of fire, are of a cheap and temporary character only. In short, as noted by the Magistrate, 19 houses in every 20 are mere huts. These in no way indicate the actual position and means of their occupants, for there is little to choose between the huts of comparatively well-to-do shop keepers or wealthy money lenders, and those of poor widows or needy sweepers. The rateable value of all would be much the same and, if even all were assessed at the maximum rate allowed under Act III of 1864, the income would be altogether insufficient to meet the necessary requirements.

6. The existing assessments apparently have not been revised for some years, and though from time to time some appeals have been lodged locally, pointing out that the system of assessment was opposed to the law, no references have ever been made to this office as against the repeated rejection of all such appeals. I think, therefore, that it may be held that the present system works well. There is, as noticed by the former Magistrate, a rough but undeniable justice in it, which even the common people can appreciate. Nothing now remains but to legalize the existing system.

7. *Chittagong.*—In Chittagong the requirements of Act III of 1864 have been strictly carried out, and the rates have been assessed with reference to the value of the houses. But apparently this system is not popular with the community in general, and though the tax has been raised to the maximum, the receipts are insignificant; far less than they would be if assessments were made in accordance with the provisions of Act VI of 1868, and altogether insufficient to meet the very urgent requirements for proper and efficient conservancy.

8. Though the people for the most part live in mat and bamboo houses, owing to the force of habit and the fact that bamboos are very cheap, and that really very excellent houses can be made with them, there is much wealth and valuable property in the town, and the people generally are far better off, I think I may safely say, than in any other mofussil town in Bengal. But while money is plentiful, food cheap, and wages high, it is undeniable that Chittagong is at the same time, perhaps, the most unhealthy town of the Province.

9. For the above reasons, I would strongly urge, as proposed by the Magistrate, and as already recommended by my predecessor, Mr. Fowle, the expediency of extending Act VI of 1868 to the town, as being more applicable in every way to its present condition and requirements than Act III of 1864.

10. The subjoined statement shews the income of the two municipalities as derived from the taxation on houses alone and the incidence of such taxation per head of population, after excluding the tax levied on account of public buildings.

1	2	3	4	5	6
Name of the Municipalities.	Number of population.	Actual income on account of house tax levied during the year under report.	Incidence of taxation per head according to income as shewn in column 3.	Incidence of taxation per head after excluding tax on public buildings.	REMARKS.
		Rs. As. P.	Rs. As. P.	Rs. As. P.	
Chittagong	20,604	10,461 10 10	0 8 1	0 6 5	
Comillah	12,948	9,568 0 0	0 11 9¾	0 10 3¼	

11. The reasons for the great difference in the incidence of taxation in the two towns as exhibited in the above statement have been already explained. At first sight, looking to the general incidence of municipal taxation in all the towns throughout Bengal, which is somewhat under six annas per head, it would seem that the rate of taxation in the town of Comillah is inordinately high and must be oppressive. But it must be remembered that the average above quoted includes the figures for Behar and other parts of Bengal where the people are, for the most part, very poor; whereas there are many wealthy people living in the town of Comillah, and the wages of labor in these eastern districts are at least twice as high as they are in most other parts of the Province. Added to this, there is the fact that Mr. Park, the former Magistrate of Tipperah, and Mr. Fowle, the Judge, a long resident, have both confidently asserted that the existing tax has been fairly assessed and has not been found to be oppressive.

12. If this really is the case, and I see no good reason to question it, fair data are afforded by the above statement of the large increase of income which might be realized in Chittagong, which is a far wealthier and more populous town than Comillah, if assessments were made under the provisions of Act VI of 1868.

13. *The Municipalities under Act VI of* 1868.—I now proceed to notice the system of taxation followed in the Noakholly, the Brahmunberiah, and the Cox's Bazar Municipalities. All these corporations have been constituted under Act VI of 1868 (B.C.). The figures as per margin shew the population and tax realized in each during the year under review.

Name of the Municipalities.	Population.	Amount of house tax realized during the year.
		Rs. As. P.
Noakholly	4,752	2,379 7 6
Brahmunberiah	12,364	3,626 0 0
Cox's Bazar	4,656	1,845 13 6

14. The following statement exhibits the incidence of taxation per head of population in the town corporations mentioned above, after excluding the tax levied on public buildings.

1	2	3
Name of the Municipalities.	Incidence of taxation per head on the actual house tax collection.	Incidence of taxation per head after excluding the tax on public buildings.
	Rs. As. P.	Rs. As. P.
Noakholly	0 8 0	0 6 0
Brahmunberiah	0 4 8	0 4 7
Cox's Bazar	0 6 3	0 6 7

15. *Noakholly.*—In Noakholly a re-assessment was made during the year, and this appears to have been made impartially, as no appeals whatever have been preferred against the proceedings of the assessors. Noakholly is, no doubt, a poor town as compared with either Chittagong or Comillah, but for Eastern Bengal, where the circumstances of the people are exceptionally good, as already noticed, I think the amount of the total assessments is too small. Funds are much required at Noakholly for carrying out proper conservancy arrangements. Owing to this want but little has been hitherto done in the way of improvement, and I think therefore, that the assessments should be shortly revised, as well as extended, so as to include some at least of the very large proportion of the inhabitants who have been totally exempted. It appears to me that, however small the contributions may be, all should be called upon to pay their quota, and that only the really indigent, a very small class in these districts of cheap food and high wages, should be totally exempted.

16. The Magistrate of Noakholly reports that 818 assessments were made, the incidence of which was as follows :—

On 698	houses	...	...	1 to 4 annas a month.
„ 57	„	...	...	4 to 8 „ „
„ 16	„	...	...	8 to 12 „ „
„ 13	„	...	...	12 annas to 1 rupee.
„ 18	„	...	...	1 rupee to Re. 1-8 „
„ 4	„	...	...	1-8 to 2 rupees.
„ 12	„	...	...	Above 2 rupees.

17. It appears, also, that of the total number of 1,126 houses, 283 were exempted from taxation owing to the poverty of the inmates, and 25 were exempted as mosques and temples. Of the total population of the municipality, viz., 4,752, only 818 were assessed. Sixty per cent. of the tax is said to fall on owners and occupiers of land, 23 per cent. on shopkeepers, 8 per cent. on amlahs of the courts and offices, 5 per cent. on mooktiars and pleaders, and 1 per cent. on public buildings.

18. *Brahmunberiah.*—The municipality of Brahmunberiah includes 17 hamlets, containing 2,889 houses, with a population of 12,364 souls. The assessment, which had been first made in April 1870, was, under section 54, continued for the three succeeding years.

19. It appears that Rs. 3,626 were collected on account of house tax during the year under review, against Rs. 3,657-7-3 during the previous year, giving an average of Rs. 1-4 only for each holding per annum. The rates vary from Rs. 6 to one anna per mensem, according to the value of the property to be protected.

20. As regards the incidence of taxation. The average rate of Re. 1-4 a year, as above mentioned, or 1 anna 8 pie a month, is no doubt very light on the inhabitants, who, it is to be observed, are exempted from the operation of the Road Cess Act; and as a proof of this, it is reported that not a single case of attachment and sale occurred during the year for the realization of the tax.

21. *Cox's Bazar.*—In the municipality of Cox's Bazar, it is stated that the assessments are made through the members of the committee, and that none of the members like the work. The Magistrate, Mr. Anderson, has moreover submitted a very curt report, which gives little or no information. As there is a large balance of money in hand, Mr. Anderson proposes to hold a fresh assessment during the ensuing year and to reduce the present assessments by several hundreds of rupees. But it appears to me that the incidence of the taxation is already very light, and more especially when it is remembered that the Government is the chief landlord and that the tenants have to pay no ground rent. The requirements, also, of the station, if properly looked after, must be far greater than can be met from the small income at present realized.

22. *Other Sources of Income.*—Irrespective of the tax on houses in Chittagong and the tax on the means and incomes of their proprietors in Comillah, these municipalities derive some income from ferries, pounds, and a few other miscellaneous sources. The chief income from these sources in both municipalities is derived from pounds, and in both municipalities it has been determined to increase the present number, as existing arrangements have been found to be insufficient. The municipalities of Noakholly, Brahmunberiah, and Cox's Bazar have no receipts other than that derived from the assessments already noticed.

23. *Total Income and Expenditure.*—The total income of the Comillah Municipality for the past year, including the balance of the previous year, amounted to Rs. 11,899, and the expenditure to Rs. 11,458. The total income of the Chittagong Municipality, exclusive of the Government grant of Rs. 30,000, which has been given once for all, amounted to Rs. 18,260, and the expenditure to Rs. 20,738.

24. The income of the Noakholly Municipality amounted to Rs. 2,385, and the expenditure to Rs. 2,078. The income of the Brahmunberiah Municipality and that of Cox's Bazar amounted to Rs. 3,626 and Rs. 1,851 respectively, and the expenditure to Rs. 4,474 and Rs. 1,338 repectively.

25. *Expenditure.*—The annexed statement exhibits the amounts spent by each municipality on police, conservancy, roads and establishment, and the percentage of such expenditure as compared with the total annual income, and I will now proceed to review these figures separately in the case of each municipality.

26. *Chittagong.*—It appears to me that the sum of Rs. 6,113, which is annually spent by the Chittagong Municipality for the maintenance of the police, or 33 per cent of the income, is too large. It is represented that of the above amount a sum of Rs. 1,200 represents the pay of an European constable engaged to keep order amongst the sailors visiting the

port; that as the municipality receives no contributions from the Port Fund, the appointment of the European constable is open to criticism, and that the municipality derives but little benefit from the service of this constable and can ill afford his pay.

27. It appears to me, however, that the municipality is fairly debitable with the pay of this officer as the pay of a second European constable is already defrayed from the Port Fund. But even if the pay of the European constable is excluded, it is to be observed that the charges are considerably more than twice as large as they are for the town of Comillah, and I fail to see any sufficient reasons for so large a difference in the expenditure under this head in the two municipalities. The chairman of the municipality will be called upon to make some reductions in the number of the existing force of Native policemen.

28. Notwithstanding the notorious unhealthiness of the town of Chittagong and the urgent necessity which exists for sanitary improvements, it is unsatisfactory to find that only Rs. 813, or 4 per cent. only of the income, was spent on conservancy. During the year under review matters apparently have been left *in statu quo*; nothing having been done beyond opening out one additional latrine.

29. As regards proper conservancy and sanitary precautions, it appears to me that the town is still in a very backward condition. Some of the first and most obvious measures for improving the general health of the community have not been hitherto carried out, and it is not a matter of surprise, therefore, that cholera has become endemic and is nearly always present. To what extent sanitary matters have been neglected may be gathered from the following precis of a letter lately addressed to the commissioners of the municipality by my predecessor, Mr. Cockerell.

30. With reference to the fact that the town is at present full of small foul tanks from which a large portion of the poor inhabitants draw their supply of drinking water, Mr. Cockerell proposed that systematic arrangements should be made to set apart in each quarter of the town a good tank for drinking purposes and that as many of the small tanks as possible should be filled up. He further remarked, that as the flow of the tide in and out of the khals which run through the town must be unhealthy, the opinion of some experienced sanitary officer should be obtained on the subject, and if considered advisable, sluice gates should be erected on the tidal khals.

He was also of opinion that the town would be materially improved by letting in air and light, and by the removal of a great deal of thick jungle growing throughout the lower portions of the town, and with the object of promoting the free circulation of fresh air, suggested that broad belts should be cut through from one end of the town to the other and all trees within these limits removed. In addition to the proposals mentioned above, Mr. Cockerell also suggested that the existing practice of interment within the limits of the more densely populated portions of the town should be put a stop to.

31. Mr. Clay, the chairman, states that the principal objection to carrying out the numerous schemes that have been suggested for the sanitary improvement of the town, is the inadequacy of the funds at the disposal of the municipality, and observes that unless Government is prepared to sanction a large special grant, there will be no great improvement in this respect.

32. But it is to be observed, that looking to the large grant of Rs. 30,000 lately accorded by the Government, the municipal commissioners have at present, and have had for some time back, ample funds at their disposal to enable them to make a commencement in carrying out all obvious improvements, such as cleaning drains, filling up foul cesspools, removing low and rank jungle, and securing a better supply of drinking water than at present exists, in the manner suggested by Mr. Cockerell. I have pointed this out to the chairman, and I have also informed him that I shall be prepared to receive any well considered and practical scheme which is likely to improve the health of the station and to submit it to Government, if necessary, with the recommendation that pecuniary aid be afforded to the municipality in carrying it out, should the undertaking be found to be beyond the means of the municipality.

At an interview I had with the Lieutenant-Governor, His Honor was good enough to say that he would be prepared to receive such an application.

33. But, as already observed, the local funds can be much improved by the introduction of Act VI of 1868, and it is obviously the duty of the municipality to increase their local funds as far as possible in the first instance and to expend usefully and intelligently the large sums they still have in hand, before applying for Government assistance.

34. The sum of Rs. 9,829, or 53 per cent. of the annual income, spent by the Chittagong Municipality on roads, is, I think, far too large, and I am of opinion that less should be spent under this head for the future, so as to provide for the far more important requirements of conservancy and sanitation.

35. It is true that the total length of the roads to be kept up is very great, and that owing to the hilly character of the ground and the nature of the soil, constant repairs are necessary, but it appears to me that many roads are unnecessarily metalled, and that with a little attention and repairs after very heavy rains, these roads can always be kept in a serviceable state without metalling. The attention of the municipality will be drawn to the subject.

36. The cost of establishment is, also, I think too large, but I observe that it is noted by the Magistrate that during the current year there will be a saving of Rs. 960 under this head, owing to the discharge of the road overseer.

37. *Comillah.*—The expenditure in the Comillah Municipality appears to have been very properly and intelligently laid out. Each department of police, conservancy, and roads appears to have been sufficiently provided for, while a disproportionate amount of the income has not been expended on any one of them. It is specially satisfactory to observe that in the town of Comillah, which may be said to be a perfect sanatarium as compared with Chittagong, and in which the income at the disposal of the Commissioners is far less than it is in Chittagong, no less than Rs. 3,033 were expended on conservancy, or nearly four times as much as was spent in the far larger town of Chittagong. The importance of such matters appears to be properly appreciated in this municipality.

38. *Noakholly.*—The percentage of expenditure on police in the Noakholly Municipality appears to be very high, but the total collections are small, and apparently the houses in the municipality are scattered and the area for watch and ward is large. But, I think, comparing the actual outlay with that incurred in Comillah, the present expenditure is higher than it need be. The Magistrate will be addressed on the subject.

39. A fair amount has been spent from the available funds on conservancy, but, as noticed by the Magistrate, the conservancy of the town is still in a very unsatisfactory state. The present condition of the town is thus described by the medical officer. "The drains near the houses of the inhabitants are bordered by privies, and are the repositories of all night soil, which is never removed. During the heavy showers of July and August there is a general washing and overflowing of the town, and this is the only conservancy that does any thing in the way of cleaning it."

40. The Magistrate strongly recommends the entertainment of a good number of mehters, partly paid from the Town Committee's fund and partly by private individuals, with a view to remedy the evils arising from the total neglect of sanitary rules by the residents. As already noticed in para 15, I am of opinion that the Magistrate should reassess the town in order to provide the necessary funds to carry out all proper sanitary arrangements.

41. The Magistrate reports that much was done during the year for the repairs and improvement of the pucka roads of the station; but that this work was carried out from the District Road Fund, and that a good deal is still required to be done. The magistrate also mentions that it was proposed to spend most of the municipal balance of last year on the purchase of a roller, which is badly wanted for the use of the metalled roads.

42. *Cox's Bazar.*—In Cox's Bazar, looking to the unsatisfactory report submitted, and the small amount expended, and the large amount of balances which have been allowed to accumulate from year to year, viz., nearly Rs. 3,000, it is very evident that but little interest is taken in municipal matters. For conservancy purposes Rs. 80, or only 4 per cent. of the income, was expended. The conservancy arrangements are thus noticed by the sub-divisional officer:—

"The conservancy was looked after by a sweeper on six rupees a month, who cleans the bazar, and some petty expense was incurred in clearing jungle. This sweeper is used for cleaning the sub-divisional office, as there is no sweeper for this purpose." The Magistrate of the district will be called upon to report how the large balance of nearly Rs. 3,000 above noticed, can be best expended for the sanitary and general improvement of the town and to submit a full report on the present condition of the town as regards roads and conservancy.

43. *Brahmunberia.*—In the Brahmunberiah sub-division, I am of opinion that the cost of the police is excessive and should be reduced, as well as that of the establishment. Reductions, I am of opinion, are feasible and the magistrate will be addressed on the subject. What the present apparently inadequate conservancy arrangements are, does not appear from the report. A special report on this subject will be called for.

44. Next to the cost of the police, the chief expenditure appears to have been incurred in digging four tanks at a cost of Rs. 825. On the subject of the expenditure, the Deputy Magistrate has written as follows—"Roads and tanks form the bulk of municipal improvement. Any extensive or costly works have never been undertaken and utility is preferred to show and ornament. Small roads through villages, the clearance of jungle, the cutting of drains, &c., have proved very useful and convenient to the people, and as the want of good drinking water tanks was a crying evil in this town, the provision of a goodly number of tanks has been a great boon to them, so that the town, which was 10 years ago no better than a dirty hole, is now become one of the most healthy towns in Bengal."

45. *Vital Statistics—Chittagong.*—I fear that even now, the figures furnished by the municipalities as regards vital statistics are far from being correct. For 1872-73, the figures furnished for Chittagong showed a death rate of 22·42 per thousand, which was manifestly incorrect. For the past year the death rate is shewn at 33·14. This is a nearer approximation to the real facts, but, I believe, that the rate is really far heavier than this and that accuracy has not yet been attained. As noti ed by the Magistrate, cholera prevailed more or less throughout the year in the town and several European sailors succumbed to the disease. During the current year there has been again a severe outbreak of cholera, many deaths have occurred, and two persons among the very limited number of European residents in the station, have been attacked.

46. *Comillah.*—In the town of Comillah the public health is said to have been good and the recorded deaths shew an average of 28·2 per thousand. The returns of births are reported to be manifestly incorrect for both the above mentioned municipalities.

47. *Noakholly.*—The magistrate of Noakholly reports that the year was comparatively a healthy one, as there were fewer severe fever cases and less ordinary sickness than usual. The mortality reported by the police was 27·5 per thousand. The magistrate adds that about

half the deaths resulted from fever, or the diseases, such as spleen and dropsy, which follow in its train. Thirty cholera cases were reported, all but two occurred in the cold weather and of these 12 cases proved fatal.

48. *Cox's Bazar and Brahmunberia.*—In the reports submitted for the municipalities of Cox's Bazar and Brahmunberia, the subject of vital statistics has not been noticed. Attention will be drawn to the omission.

49. *Miscellaneous Expenditure.*—As regards expenditure other than that noticed above, it is to be observed that the Chittagong Municipality has contributed Rs. 16 a month in aid of the Dispensary at the Sudder Station from the 1st of January 1874, and that this contribution will be made up to December 1874. The Comillah Municipality has made a grant of Rs. 30 per annum for the purpose of establishing a patshala within the municipal limits, but nothing was contributed towards dispensaries. Rs. 50 were allotted from the town fund of Brahmunberiah to the charitable dispensary at that station. In Noakholly, since the commencement of the current year, the town committee have contributed Rs. 15 per mensem towards the dispensary. In Cox's bazar it appears that no contributions have been made either towards the dispensary or for education.

50. *Municipal Meetings, &c.—Chittagong.*—There were 18 municipal commissioners in the Chittagong Municipality at the close of the year. Of this number three were ex-officio. Of the remaining members more than half were Government servants. The total number of commissioners were made up of Europeans and Natives, the latter being all Hindoos. I agree with the Magistrate and chairman in thinking that as the town of Chittagong is chiefly inhabited by Mahomedans, some commissioners should be selected from their body.

51. It is stated that the majority of the commissioners cannot be said to take active and intelligent interest in the affairs of the town. It is also stated, that unless work is actually made over to them they are quite content to leave every thing in the Magistrate's hands. I am of opinion with reference to the above remarks, that it would be advisable to make over different portions of the town to the special care and supervision of the several members, and that in this way some responsibility and special interest may be made to attach to the position of the commissioners.

52. *Comillah.*—At the commencement of the year 1873-74, there were 16 members of the Comillah Municipality, out of whom, six were Government servants and the rest zemindars or pleaders. During the year, five members left on their being transferred elsewhere, two of the 16 commissioners never attended the meetings at all, and one attended only once.

Here, also, it appears that the majority of the commissioners took but little interest in the matter. The chief cause of apathy among the non-official members in the municipality of Comillah has, I think, been correctly stated by the chairman. He states that when a really working member does any work so as to promote the welfare of the town, his fellow-townsmen consider it an unwarrantable interference on his part with their private property. The orders which are issued from him are generally regarded by them as a pure bit of spite, and he is treated by them thence forward as a private and personal enemy, and that the ordinary run of the municipal commissioners are deterred from doing any active work through dread of this hostility.

53. *Brahmunberiah.*—The Deputy Magistrate in charge of the sub-division of Brahmunberiah complains of the inaction of the members of the town committee over which he presides, and thinks, that without an official head, the first act of the committee, if left to itself, would be to abolish the tax altogether.

54. *Noakholly and Cox's Bazar.*—The chairman of the town committees of Noakholly and Cox's bazar have not made any remarks regarding the manner in which the members have discharged the duties of their office.

55. Since the above report was written, I have received your Circular No. 29, dated 24th June. Under the instructions now communicated, it will be necessary for me to call for revised figures under the head of establishment, for entry in the new statements prescribed. The statements will, therefore, be submitted as soon as these figures are obtained. I have already recorded my opinion on the subject of sanitation and will, after inquiry, which I am now about to hold, submit a further report if necessary.

STATEMENT OF EXPENDITURE.

No. 39, dated Chittagong, the 20th May 1874.

From—J. C. VEASEY, ESQ., Vice-Chairman of the Chittagong Municipality,

To—A. L. CLAY, ESQ., Offg. Magistrate of Chittagong.

I have the honor to submit the Administration Report of the Chittagong Municipality for the year ending 31st March 1874.

2. *Constitution of the Committee.*—At the close of the year the committee consisted of 18 members, of whom three were ex officio, of the remaining 15, eight, or more than half, were in Government employ. The members were equally divided into Europeans and Natives, the latter being in every case Hindoo. Five members will have to retire shortly under the operation of Act II of 1873 (B. C.), and there will then be an opportunity of redressing some of the inequalities shown by the above results. Any increase of the present number would seem to be unadvisable.

3. *Attendance &c. of Members.*—Ten meetings were called during the year and on three of these occasions no quorum was forthcoming. Several of the members never attended at all, and others again only came once or twice. It follows that the majority cannot be said to take any active or intelligent interest in the affairs of the town. Some few of the members have rendered considerable assistance by inquiring into applications for the remission of tax, but unless work is actually made over to them they are quite content to leave every thing in the Magistrate's hands.

4. The Act authorising the election of commissioners by the rate-payers and of the vice-chairman by the commissioners, was circulated without eliciting any expression of opinion, and it is perhaps as well that the experiment should not have been tried. Education in Chittagong, has as yet made but little progress, and a large mass of the electors would have but the faintest idea of what was expected of them.

5. *Vital Statistics.*—The Civil Surgeon reports a tolerably healthy year, with a death rate of 33·14 per mille as against 22·42 in the year before. This, of course, means an improvement in registration not an increase in mortality, and I think we may consider that nearly every, if not every, death is now reported. There is still room for improvement in the nomenclature of diseases. For instance, out of a total of 683, no fewer than 413 deaths are atributed to fever, but, as Doctor Meadows points out, in the absence of any medical certificate, this cannot very well be remedied. Cholera prevailed more or less throughout the year, and there were several deaths from it amongst the European sailors.

6. The returns of births are so manifestly incorrect that I consider it useless to refer to them. The prejudice against reporting them can be understood, and until the lower classes are widely removed from their present condition I do not see how it is to be got rid of. I do not recommend any recourse to the penal provisions of the law.

7. *Conservancy.*—One additional latrine, intended more especially for persons attending the Magistrates' cutchery, was opened during the year, but beyond this there was no other change. The total expenditure under this head was Rs. 812-11-3, being chiefly pay of mehters and expense of keeping up two carts for the removal of rubbish. It includes too, head money for a large number of dogs, to kill which domes were imported from Dacca. It was hoped that these men might settle down and that the pariah dog nuisance might thus be put a stop to. Unfortunately one of their number died, and the others taking fright refused to remain. An attempt is now being made to get men from Calcutta.

8. *Sanitation.*—There are several schemes for diminishing the unhealthiness of Chittagong, but, unfortnuately, they all require a large sum of money. A system of flood gates for the numerous tidal khals running through the place is now under consideration, and the closing of some of the numerous Musalman burying grounds is also attracting attention. Meanwhile such unobtrusive works as cleaning tanks and clearing jungle continue to be carried on as usual.

9. *Education.*—There are no payments under this head.

10. *Medical.*—The committee has voted a monthly subscription to the dispensary of Rs. 16 for one year from January 1st.

11. *Police.*—The expenditure under this head was Rs. 6,112-14-9, of which Rs. 1,200 represents the pay of a European constable engaged to keep order amongst the sailors visiting the port. As the shipping season begins and ends with the north-east monsoon and the municipality receives no contribution whatever from the Port Funds, this appointment is open to criticism. The municipality certainly derives but little benefit from the money which it can ill afford. The composition of the native force is the same as last year, and calls for no particular remark.

12. *Public Works.*—These absorbed Rs. 11,363-6, or more than half the total expenditure for the year. Notwithstanding this the roads remain, and will remain, a fruitful source of grumbling. The total length of road to be kept up is very great and the heavy rains cutting up the hilly ground render constant repairs necessary. There is, therefore, at first sight but little to show for the amount spent. The only new work completed during the year was a bridge on the Strand Road, but a considerable length of roadway was remetalled. There will be a saving this year of Rs. 960 under this head owing to the discharge of the overseer.

13. *Establishment.*—This is on as economical a footing as is consistent with efficiency, and calls for no special remarks.

14. *Receipts.—House-tax.*—The total demand for 1873-74, at six per cent upon the estimated annual value, was Rs. 9,561, and of this Rs. 7,185 had been collected up to the end of March, leaving a balance outstanding of Rs. 2,376, a considerable proportion of which has since been realized. There are 4,140 distinct holdings upon the towjih; the same number as in 1872-73,

when, however, the demand was 172 less. The average demand is therefore a little under Rs. 2-5 per annum, and it will be gathered from this that the number of large and valuable buildings bears a very small proportion to the total. The trade of the port is on the increase, but the town itself is at a standstill.

15. *Incidence per head.*—Taking the population as returned by the 1872 census at 26,604, and omitting miscellaneous receipts, such as pound fees, bazar rents, &c., which are not taxation, we find that the incidence per head is a little over seven annas and five pie. The general incidence of municipal taxation in Bengal on all municipal towns, both large and small, is given (pages 367 of the Administration Report for 1872-73) at five annas and ten pie. Chittagong, therefore, is rather over the average, but considering the high rate of wages enjoyed by the labouring classes, I do not think they can have much ground for complaint. I may mention here, that for the current year the assessment has been raised by one fourth, to 7½ per cent., the maximum amount leviable under the Act; and that sanction has also been accorded to a tax upon horses and carriages. These measures were rendered necessary by the acceptance of the Government grant of Rs. 30,000, which was made conditional upon the municipality doing its utmost in the way of taxation.

16. *House Rate versus Income Tax.*—There is a decided tendency, not only among the rate payers but amongst the members of the committee, both European and Native, to assume that regard should be had to the circumstances of the occupant. This tendency, however, only acts one way. The well-to-do man living in a thatched shed, is quite as ready to cry out if he thinks it has been assessed beyond its strict value, as the poor man who is living in a house beyond his means. The member to whom the petitions may be sent for inquiry never dreams of being inconsistent when he recommends both cases for reduction upon opposite grounds. Undoubtedly a tax on incomes would bring us in much more than a tax on houses, but the ratepayer cannot complain because he is not allowed the advantages of both systems. He has only to remove to a smaller house or to live outside the town, but if he is told this he thinks that he has been harshly treated. That the house rate in Chittagong causes hardship in but few cases is shown by the fact, that in the year under review arrears for Rs. 69-5-6 only were made over to the police for collection. In some, at least, of these cases recusancy and absenteeism may fairly be taken to have been the cause.

17. *Other sources of income.*—These comprise the amount paid by ferry lessees, pound collections, rents, fines realized in conservancy cases, fees on distraints under Section 47, and some minor items. I have arranged them in order of importance, the only one calling for any separate notice being pound collections, which brought in Rs. 1,421-1-6. When the herds of stray cattle that throng the roads and impede traffic are taken into account it is obvious that this sum might easily be doubled if organized raids were made by the police. If the result attained were that the owners kept their beasts at home or got rid of them elsewhere, it would well compensate for the loss of income. I have proposed the opening of an additional pound in the North West quarter of the town, and if the police were made to understand that animals found on the roads must be seized, we might hope for some abatement of the nuisance.

18. As directed by Government, the accounts of the grant of Rs. 30,000 have been kept separately, and I will submit a supplementary report upon its management.

No. 860, dated Comillah, June 1874.

From—N. S. ALEXANDER, ESQ., Magte. and Chairman of the Comillah Municipality,
To—The Commissioner of Chittagong.

I HAVE the honor to submit the report on municipalities called for in circular No. 2655 and 27, dated the 25th April 1872 and 16th August 1873 respectively.

2. *State of Committee.*—My first notice will be of the Comillah municipality, which is governed by Act III, 1864; there were at the commencement of the year 1873-74, 16 commissioners; six were Government officials and the remaining ten, zemindars or pleaders (vakils). The five members, who left during the year, were Messrs. Park and Birch, Baboos Neelmoney Das, Eshan Chunder Gupto, and Uma Charan Das; Baboo Neelmoney Das had acted as vice-chairman till 14th August 1873, when he left the district, and on 6th September following, Mr. Rochfort, who had succeeded Mr. Birch as District Superintendent of Police, was appointed vice-chairman and continued in that office till the end of the year.

3. There were eight ordinary meetings held during the year; no special meeting was called; two of the 16 commissioners never attended a single meeting and one only attended at one; there were only four non-official members at all constant in their attendance, Messrs. W. F. Campbell and J. P. DeLauney, Baboos Chundee Charan Banerjea and Ram Doolal Roy; the committee has no really non-official working member except Mr. Campbell.

4. *Reasons for non-intervention of non-official commissioners.*—I have stated in my annual administration report what I consider to be one of the chief reasons why in Eastern Bengal districts it is so difficult to get native non-official members to stir themselves and give really effective assistance in improving the towns, looking after the roads and conservancy. A really working member would have in such a town as Comillah to be frequently obliged to be doing acts which would be regarded by his fellow townsmen as unwarrantable interference on his part with their private property. They would look on an order from him to clean a drain, or clear jungle, or any such like order, as a pure bit of spite, and would treat him thence forward as a private and personal enemy, and the ordinary run of our municipal commissioners are, I am

sure, quite deterred from doing any active work through dread of this hostility. In his own heart of hearts I do not think any native of these parts sees any real use in conservancy. To incur enmity and take a lot of trouble about such an apparently trivial matter seems to him a game not worth the candles. This is my experience, now a tolerably long one, in out of the way Eastern districts, of the real cause of apathy among our Native commissioners.

5. The vice-chairman recommends that the names of commissioners not doing any work be reported for their being struck off, and that we should endeavour to get good working men in their places, but I confess, I should like to see and know who those same working men are, as the vice-chairman does not himself suggest even who they are to be. The number of persons from among whom municipal commissioners can be selected is very limited and all such as were at all eligible have already been nominated.

6. *Town of Comillah.*—Comillah is an exceedingly small town, in fact not much more than a largish village, with, in round numbers, some 13,000 inhabitants. There is one long main street in which there are situated the chief shops and places of business. The number of masonry houses is very small; the cause of this is that the land all belongs to one large proprietor, the Rajah of Hill Tipperah, who has made difficulties about granting building leases such as will induce persons to build. The consequence is that the town of Comillah is one of thatched huts, which gives it a poor appearance and renders risk of fires constantly imminent.

7. *Act III,* 1864, *Act VI,* 1868.—The introduction of Act III, 1864, into the town of Comillah was in my opinion a mistake, and indeed the principles of that law have never been acted up to. Assessments have not been made on houses as laid down by the Act, for if that had been done, the income derived would have been insufficient to carry on the necessary work. Assessments made some years ago were based more on the incomes or supposed incomes of the occupiers of the premises assessed; in fact; more according to Act VI, 1868, than Act III, 1864, and in my opinion the former Act would be a deal more applicable to Comillah. I have delayed making fresh assessments under Act III, 1864, with the intention of seeing if Act VI, 1868, could not be extended to the town. The town itself is somewhat similar (only smaller) to * Nassirabad, in zillah Mymensingh, to which Act VI, 1868, was extended shortly after its passing.

8. Here in Comillah under Act III, 1864, we ought only to be able to assess houses and lands within the municipality at a rate not exceeding 7½ per cent. on the maximum annual rental of such, but in a town in which nineteenth-twentieths of the houses are mere huts the income so derived would be very small indeed, and to make up the sum to a sufficient amount assessments were made not on houses but on the incomes of the occupiers. The total income derived is annually Rs. 11,898-9-9, the expenditure is, however nearly on a par with the income, being this year Rs. 11,457-12, so that if we merely got the income which would accrue from a strict observance of Act III, 1864, we should have to give up metalled roads and other expensive works. Act III, 1864, is meant only to be worked in towns really such and not in exaggerated villages like Comillah. I would before this have recommended the introduction of Act VI, 1868, but that Act III, 1864, had been so long in force here, and I did not like to introduce a change until I had had more personal experience of the district and the town, but I am quite prepared to do so now, if it should be considered that a special proposition on the point is necessary.

9. *Revision of Assessment.*—The existing assessment must be revised at any rate as it was made some years ago, but I would not do so now as a new year has commenced, and I am in hopes that the more workable and more applicable law, VI of 1868, may be deemed to be best for the town. I may observe that appeals have been lodged pointing out that the present mode of assessment in vogue here is not according to the law, but they have been year after year rejected.

10. *Conservancy.*—A good deal more has been accomplished in conservancy matters during the year under report than in years preceding, Rs. 857-13 having been spent in addition under this head. During the year, among other works, a latrine was erected near the Judge's Court for the use of the parties attending the Civil Courts; a mehter to attend to it has also been paid from the committee. Besides this, drains have been cleaned, jungles cut, and new drains opened.

11. *Constabulary.*—An increase of Rs. 40 under the heading of Police has been incurred for repairing and erecting proper section houses for the accommodation of the constables on the various beats. There are now two head constables and 24 constables in the town police force. In addition to their ordinary duties the police are employed in collecting vital statistics.

12. *Roads.*—The length of metalled roads made in the municipality during the year was 5,035 feet; 300 feet also were repaired; the length of unmetalled roads made was 1,550 feet, and five miles of such were repaired during the year.

The above includes one new road (a short cross one) about 400 yards in length which was completed during the year; the total expenditure on roads amounted to Rs. 4,451-11-6. This included the manufacture of 4¾ lakhs of bricks for future requirements. I would not myself have sanctioned the manufacture of such a large quantity of bricks, as I think it can never be used, and that the greater part will have to be sold; and it is not a work of the municipality to turn brickmakers. However, I found the bricks nearly made when I arrived here.

13. *Expenditure.*—Our chief items of expenditure have been on roads, police, and conservancy, and our chief sources of income from the house income tax before commented on.

* Nassirabad is the sudder station of Mymensingh District.

In my opinion, the income at present derived is as large as it can possibly be made in such a small and comparatively poorly circumstanced town as Comillah; at the same time the only item of expenditure which it would be possible to retrench in would be in the matter of roads, on which in time we may perhaps be enabled to reduce our expenditure.

14. *Income and Expenditure.*—As regards income and expenditure a sum of Rs. 2,669-4 was collected this year, being the outstanding balance for last year (1872-73); the demand for the current year was Rs. 8,772-14-6; a sum of Rs. 186-8-3 was remitted or struck off during the year, and an unrealized balance of Rs. 1,687-10-3 was left due on 31st March, 1874, the greater portion of which was, however, realized in the following April and May.

15. *Education*—The committee have made an annual allowance of Rs. 30 per annum from their funds for educational purposes, and this amount has been supplemented by an equal sum from Government, and with the money a patshala is kept up in Chuckbazar; if we can manage to reduce our expenditure under any other head, we shall perhaps be able in future to do something more for education, but it must be borne in mind that the population of Comillah, all counted, is only 12,948.

16. The incidence of the taxation chiefly falls on the Government, which pays Rs. 1,200 per annum to the municipality, on the Rajah of Hill Tipperah, and other reputed wealthy persons, but I have explained before why this is. The tax not being really a house tax, but one on the presumed wealth of the party taxed, if Act VI of 1868 were introduced, there would not, I think, be much alteration in the amount of the tax assessed to what it is now and it would fall pretty much as it does now on the same parties.

17. *Vital Statistics.—Mortuary Returns.*—The health of the town has been good, the number of recorded deaths was 366 out of a population of 12,948, which would give a death rate of about 28·2 per 1,000; from July, 1873, a collection of statistics of births was commenced, the result, however, was hardly such this year as to warrant much reliance on it, the returns for the nine months showing 13 05 per mille. The statistical information will probably be more accurately collected this year, 1874-75, when we have had the benefit of more experience.

18. *Pounds.*—There are two pounds within the municipality, the realizations from which amounted to Rs. 563-14-0. We might, I think, with advantage open another pound within the municipality during the present year. In some parts of the town the numbers of stray cattle, goats, and ponies are still very great, and cause much mischief and annoyance, to say nothing of obstruction on the roads.

19. *Difficulty of getting co-operation of the people.*—As an instance of how difficult it is to get the townspeople to co-operate with us even in matters which are patently done for their good, I will mention that in November last a very extensive and disastrous fire occurred in Telikona, or the quarter where the oilmen reside, the second large fire within two years in the same quarter. After this last fire it seemed to the committee that the spreading of the fires which occurred was much facilitated by the narrowness of the streets. The houses being thatched and built close together, caught fire one after the other, and no stop could be put to the conflagration. To prevent this, in the future if possible, the committee resolved to widen the streets to the width of 32 feet, and to effect the purpose, those whose houses had been burnt down, were requested each to put the new houses back a small space from the thoroughfares. Instead of agreeing to the plan which was explained to them by the vice-chairman and Mr. Campbell, the inhabitants of the quarter, far from doing it willingly, threw every obstacle in the way of the project being carried out, and it was only carried out for the general public good in the teeth of their opposition, the moving back of the houses being enforced both by the Magistrate and the manager of the estate of the landlord, Mr. W. F. Campbell, the latter giving his most cordial co-operation.

20. *Rajah of Hill Tipperah.*—The landlord, the Rajah of Hill Tipperah, through his manager, Mr. Campbell, I may remark, deserves our thanks for the good condition in which he keeps the embankment which extends all along the river side to the north of the municipality and effectually shields the town from inundation. I have always found Mr. Campbell very ready in giving his assistance in all matters connected with the municipality.

21. *Conduct of Officers.*—The vice-chairman, Mr. Rochfort, deserves credit for the zeal and energy with which he has fulfilled the duties of his office; the overseer, Baboo Tarak Chunder Gupta, and the head writer, Digamber Rakhit, are well spoken of and deserve credit for the efficient manner in which they have discharged their duties.

22. I now come to the Brahmunberiah municipality, which is governed by Act VI, 1868. This report has been somewhat delayed owing to the non-receipt of the Brahmunberiah committee's report.

23. *Conduct of Committee.*—The committee consists of a chairman and 13 members, five of of whom are officials and eight non-officials. There were five ordinary meetings during the year. The members seem not to have acted very energetically, as the Deputy Magistrate, the chairman, complains of this action or rather want of action; without an official head the chairman thinks the first act of the committee, if left to itself, would be to abolish the tax altogether.

24. *Town of Brahmunberiah.*—The town is composed of 17 mohullahs, or hamlets, and contains 2,889 houses, with a population of 12,364; that is nearly, the same as that of Comillah. Though there are such divisions, the ward system under Section 23 of the Act has not been introduced. There is in fact only a town committee.

25. The amount of tax levied was Rs. 3,626 this year, as against Rs. 3657-7-3 last year, giving an average all round of Rs. 1-4 per house per annum. The rates, however, vary from

Rs. 6 to one anna per mensem, according to the value of the property to be protected. The incidence of taxation appears very light altogether; an average of 1 anna 8 pie per mensem is not very heavy, especially as the inhabitants will be exempted from the operation of the Road Cess Act. The chairman reports that the assessments are made with great care and it is certain that widows, orphans, and the destitute are exempted from any taxation, at the same time the assessment is so adjusted as to fall on those who are really able to bear it. In support of his statement that the assessments are not too heavy and have been carefully made, the chairman writes that there was not a single case of attachment and sale during the year under report.

26. *Constabulary.*—The town police consists of one head constable and 22 constables. A section house has been built for them during the year. In addition to their ordinary duties they are not, like the Comillah Police, employed in collecting vital statistics; a separate establishment being allowed for that work in this town.

27. The sum of Rs. 1,887 was spent on improvements in the town as per items given below:—

	Rs.
Four Tanks, costing	825
Two Roads	175
Seven Bridges	240
Two Pucka drains	150
Repair of Roads	175
Conservancy	212

28. The Committee do not appear to have been able to make any provision for education, but Rs. 50 were allotted to the Charitable Dispensary.

29. The cost of police seems to be one of the heaviest items of expenditure in the township. No extensive or costly works have ever been attempted. Indeed with the very small sum assessed it could hardly be expected. The chief works undertaken have been small roads between the different mohullahs or quarters, the clearing of jungle, making of drains, &c. As there was much want of good drinking water the digging of tanks has, the chairman says, been one of the most popular works undertaken, and much of the present healthiness of the town is attributed to them.

30. As I have had no personal experience of the town of Brahmunberiah I submit the chairman's report in original with this. I think Act VI, 1868, seems to have worked very well indeed in the town, and with a very light tax they seem to have got all they can want in the way of police conservancy and communication. The town seems healthy. The death rate is not stated by the chairman, but I have noticed it in the annual administration report under the heading of statistical inquiries. The death rate here and in Comillah are pretty much on a par.

LIBERALITY OF SOME ZEMINDARS IN NORTH BAGULPORE.

No. 4847S.R., dated Calcutta, the 3rd August 1874.

From—J. F. K. Hewitt, Esq., Offg. Junior Secy. to the Govt. of Bengal, Scarcity and Relief Dept.,

To—The Commissioner of the Bhagulpore Division.

I am directed to acknowledge the receipt of your memorandum No. 6315S.R. of the 28th ultimo, bringing to the favourable notice of Government the names of certain zemindars in North Bhagulpore who have rendered assistance to their ryots during the present scarcity and have otherwise afforded help to Government in connection with relief operations.

Hurbullub Narain Singh of Sonebursa.
Norendro Narain Singh of Baroari.
Rooder Narain Singh of Pachgachea.
Ugur Narain Singh and Chundermon Singh of Burrail.
Tecoormon Singh of Sookpore.
Hemun Singh of Sookpore.

2. In reply I am to request that you will be good enough to convey to the gentlemen referred to the Lieutenant-Governor's warm thanks for all the good that they have done; and that you will express to Baboo Hurbullub Narain Singh of Sonebursa His Honor's special acknowledgments for the liberality evinced by him in initiating relief measures.

3. The question of further recognition of the services rendered by these gentlemen will be considered hereafter. Meanwhile the statement furnished by you will be published in the *Gazette*.

Report on the conduct of Zemindars in North Bhagulpore.

Name of sub-division.	Name of zemindar.	Amount of rent-roll.	Collection made during 1873-74.	Donation to relief fund.	Expenditure from private sources.				Advances taken from Government.				Remarks.
					Money given in charity.	Money given in advances.	Money given for improvement work.	Grain given in advances.	Money for purchase of grain.	Money for advances to ryots.	Money for improvement work.	Grain for advances.	
Muddehpoora and Soopool.	Hurbullub Narain Singh of Sonebursa.	Rs. 93,412	Rs. 23,452	Rs. 10,000	*Vide* remarks	Rs. 9,500 in money, rice, and paddy.	*Vide* remarks	4,000 mds. rice.	Rs. 10,000	Rs. 10,000	.....	.....	This gentleman is a resident, and a very enlightened zemindar. He has suspended the collection of the arrears of rent due to him amounting to Rs. 65,300, and has actually remitted Rs. 9,660. He started several tanks, roads, and bunds, and has employed a large number of persons daily throughout this time of scarcity. He also opened a relief-house of his own. He gave up some 3,000 beeghas of indigo lands to ryots for cultivation of food-crops, and he imitated the action of Government by appointing a relief officer, superintendents, overseers, and goladars. He has promised to make a free gift of all lands taken up in his estates for relief roads. In addition to all this, he has expended Rs. 2,806-15-3 in the construction of golas at Sonebursa and Kamp for storing Government grain. In fact, he has throughout acted in a very energetic and liberal manner.
Soopool ...	Norendro Narain Singh of Barooari.	Rs. 53,000	.....	Rs. 1,000	Rs. 2,750 at his own door.	Rs. 22,540 in grain and cash to ryots.	Rs. 6,824 on about 22 tanks and bunds.	.....	.....	.....	.....	.....	This gentleman is one of the largest and wealthiest zemindars in the district. He has taken no advances from Government; but that he has assisted his ryots, in fact, is proved by the deeds for a large portion of his advances registered in Soopool, and he has allowed his papers and accounts to be scrutinized. He has scarcely realized any of his rents for the past year, and is not pressing.
Soopool and Muddehpoora.	Rooder Narain Singh of Pachgachea.	Rs. 27,000	Rs. 16,000	Rs. 2,500	Rs. 6,000	Rs. 21,550 in cash and grain to ryots.	Rs 7,800 in tanks, bunds, and roads.	.....	Rs. 4,000	Rs. 7,000	Rs. 4,000	.....	This gentleman is one of the leading zemindars in the district. Both Mr. Smith and Mr. Kirkwood have satisfied themselves that he has done well. The bonds for tuccavee given by him have been freely registered. He has acted with great liberality, and is willing to do more. He has postponed collections for the present.

Soopool ...	Ugur Narain Singh for self and brother Chundermon Singh of Burrail.	Rs. 18,000	.....	Rs. 125	Rs. 1,500, besides feeding a large number daily.	Rs. 17,000 in cash and grain to ryots.	Rs. 2,450 in six tanks and 2 roads.	.....	Rs. 3,000	.....	Rs. 1,000	800 mds. rice.	This gentleman is not a wealthy man; he is known as a very good man, and is one of the few examples where good has been done quietly and modestly for the sake of doing good. Mr. Kirkwood says, "instead of magnifying his deeds he has rather concealed them." The Government has not had to do any thing in his zemindaree. He has collected only a small portion of his rents for the past year, a portion of which in necessitous cases he will altogether remit. The balance of his rents is not pressed for.
Ditto ...	Thacoormon Singh of Sookpore.	Rs. 20,000	Rs. 5,000	Rs. 300	Rs. 1,700	Rs. 11,000 in cash and grain to ryots.	Rs. 5,600 on works consisting of tanks and roads.	.....	Rs. 1,500	Rs. 6,500	.....	.....	This gentleman has acted very well and willingly, and has never sought to exaggerate his deeds. He has only collected a portion of his last year's rent, and is not pressing for realization of the balance. In necessitous cases remission will ultimately be given.
Ditto ...	Hemun Singh of Sookpore.	Rs. 20,000	.....	Rs. 400	.....	Rs. 7,000	Rs. 4,000 on works consisting of tanks and roads.	.....	Rs. 4,000	Rs. 7,363	.....	.....	This gentleman does all that is required of him. He has fed and is feeding many of the poor daily. The Government has had to do nothing in his ilaka. He is still continuing advances, *i.e.*, is giving more to those to whom he has already given. His arrears of rents are Rs. 25,000; he is not pressing for them, and will remit where necessary.

GENERAL REMARKS.

Mr. Kirkwood makes the following remarks in which, from personal knowledge, the Collector concurs. The above may all be prominently brought to notice, "not only for what they have done, but for the willingness with which they have done it, and for their readiness to assist in every way, as by lending their servants, deputing their putwaries, giving the use of their elephants, lands, and buildings; they have all for the last two months been working in a manner which leaves little or nothing to be desired."

BHAGULPORE,
The 28th July 1874.

G. N. BARLOW,
Officiating Commissioner.

Asst. Secy. to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 1st August 1874.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
	Western Districts.		
BURDWAN DIVISION. 1	Burdwan, 3rd* Aug. 1874	1·93	Over two inches of rain in Bood-bood and Culna, and nearly two in Raneegunge; at Cutwa only half an inch, and at Jehanabad none. Bad accounts received of the crops. Fever increasing.
2	Bankoora, 1st „ „	1·47	Partial showers throughout the district, generally of a slight nature. High wind, with light rain, on 29th and 30th July. The growing crops are doing well in most places, including the aous or early rice crop; but the cultivation of the amun or late rice is practically at a standstill, except in very low ground. Heavy rain is urgently needed. Telegraphed on the 4th. Rain fell in some parts, none in north and west. Prices rising.
3	Beerbhoom, 1st „ „	2·63	Wet during the former, dry during the latter half of the week. State and prospects of the crops generally good, except in some parts of the east by the Moorshedabad district, where the crops are reported to be suffering from drought. Export of week ending 25th July, 1,640 maunds, chiefly to Bhagulpore division. Prices stationary.
4	Midnapore, 1st „ „	3·67	Over 7 inches of rain fell along the sea coast; and the course of the wind and the barometer caused much apprehension of a cyclone there on the 28th July. In all the district south of Midnapore the prospects are generally very good, and the rainfall has been seasonable and abundant. In the north, however, it has been scanty (at Gurbetta only 1·15), and while it has done much good, more rain is wanted in that quarter. Prices are very slow to come down after their recent rise, and a scarcity of rice is reported from many quarters.
5	Hooghly, 1st „ „	2·97	Cloudy nearly throughout the week and stormy. Wind chiefly from east and north-east. Heavy shower on 31st July. In Serampore the rainfall has been 3·30. The crops are all good, except the late rice, which has only partially been planted out owing to scanty rain. It is hoped that the rain will now be sufficient, but heavy rain is required. Telegraphed on the 3rd. Rainfall ·83 at 2-15 A.M.
	Howrah, 1st „ „	4·59	There has been some rain during the week throughout the district. Weather sometimes cloudy and sometimes clear. Wind from south and east, and once going round to north-east and east. The rain during the week has changed the state of the crops. If such rain continues there will be no fear of a bad harvest. Ryots are preparing land for transplanting amun or late rice seedlings, and some have already commenced transplanting. Jute, sugarcane, and aous or early rice, are good.
	Central Districts.		
PRESIDENCY DIVISION. 6	24-Pergunnahs, 3rd† Aug. 1874.	5·25	Sultry and showery. There was a heavy fall of rain on Friday, 31st July, in the Sudder, Diamond Harbour, Baraset, and Barrackpore sub-divisions. It has greatly improved the prospects of both the aous or early and amun or late rice crops. Transplantation has commenced everywhere except in Satkhira. More rain, however, is still needed. Fever prevails in the Sudder, Busseerhat, Satkhira, Barripore, and Diamond Harbour sub-divisions. Cholera has abated in thanas Sultanpore and Muthoorapore.
7	Nuddea, 1st Aug. 1874	4·16	There has been generally less rain than at the Sudder Station. The rain which has fallen during the week, though almost everywhere insufficient for the late rice, has done much good to the early rice. More rain is much required. At Kooshtea the aous or early rice harvest has commenced. The outturn of indigo is unusually good. The drought has sent up prices again a little.
8	Jessore, 1st „ „	1·14	Cloudy, with occasional slight showers. The prospects of the crops throughout the district are generally favorable. In the Lohagara and Alfadanga stations, in the Narrail sub-division, the loss of the early rice caused by the inundation is said to be irretrievable, but the late rice plants are reviving since the inundation has gone down a little. The rain has done good, but anxiety is still felt as to the unseasonable character of the weather and the short amount of the fall, and generally more rain is wanted. Prices have been falling a little, owing partly to the abatement of anxiety consequent on the late rain, and partly to the early rice already finding its way in some places into the market.

* Telegram of the 3rd August, received on the same day, shows rainfall during the seven days immediately preceding.

† Report of the 3rd August, received on the same day, shows rainfall during the seven days immediately preceding.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Contd.*)				
		Central Districts.—(Contd.)		
RAJSHAHYE DIVISION.	9	Moorshedabad, 1st Aug. 1874.	·74	There has been a very inadequate rainfall for the season of the year; a good shower came down on the 31st July, but it was far from sufficient after the preceding drought. The rain appeared to be general, but reports have not yet been received from the interior. Rainfall at sub-divisions Jungypore 2·05, Rampore Hat 1·06, Lallbaugh, 2·32. More abundant rain is required in the Bhurtpore, Gokurn, and Kallyangunge thanas, where the amun or late rice seedlings just transplanted and the broadcast sowings, are suffering much from its absence. Unless there is a good downpour within two or three days, the prospects of this crop will be very seriously affected. The aous or early rice also in the east of the district is suffering from the drought. Altogether the prospects are not nearly so favorable as in the first three weeks of the past month, and damage has already been caused to the crops, which can hardly be repaired. Prices remain about stationary. Small-pox begins in places.
	10	Dinagepore, 31st July 1874.	2·68	Showers alternated by bright sunshine. The weather has been most favorable for the crops. Jute is being cut, and new jute is in the market; early bhadoi too has been gathered. The main crop is fast ripening; transplanting for the winter crop is well forward.
	11	Maldah, 1st Aug. 1874	1·96	Cloudy and stormy, with occasional rain and brisk sun. The prospects of the bhadoi or early crop continue good. The reaping of bhadoi and Indian-corn has begun in Gorgoribah. Hymunte or late rice cultivation is going on briskly.
	12	Rajshahye, 1st „ „	0·18	Very high winds in the first part of the week, which have done a little damage. There has been some rain in all parts of the district, which has improved all the crops, but more rain is wanted. The aous or early rice crop is ripening fast; in a few places it is being cut. It is less forward in the middle of the district than elsewhere. The amun or late rice promises well. Mulberry, sugarcane, and jute, are all good crops. In Tannore, however, the latter has been a good deal injured by insects. In the north jute is being cut, and a good outturn is expected. Prices have risen slightly in places owing to a decrease in the quantities imported. The rise will probably not be of long duration.
	13	Rungpore, 31st July „	0·54	Generally cloudy, with slight showers. State of crops generally favorable. In places caterpillars have attacked the late rice plants owing to excess of moisture, rendering fresh transplanting necessary.
	14	Bogra, 1st Aug. „	1·80	Seasonable weather. The state and prospects of the crops still continue very favorable. The season has been particularly favorable for the transplanting of the amun or late rice, the young plants of which present a most vigorous appearance. The aous or early rice is being cut, and it is being sold in many places at 20 seers the rupee.
	15	Pubna, 1st „ „	0·67	Slight rain on the 26th July. An average loss of six annas in the aous or early and about two annas in the amun or late paddy has been done by the unusual rise of the water. The water has for the present subsided to a great extent. Harvesting of the early rice, bhura and kowni (millets), going on. A case of cholera reported from Pubna station, and some fever prevails.
COOCH BEHAR DIVN.	16	Darjeeling, 31st July „	2·37	There has been a good deal of bright and pleasant weather in the hills. All the crops, both in the hills and the plains, are progressing very favorably, but more rain is wanted in the Terai.
	17	Julpigoree, 31st „ „	·40	There has been very little rain this week; the weather close and hot. No anxiety is yet experienced regarding the late rice, but a heavy rain is now needed for this crop. The early rice is now being cut in places, and is a good full crop.
		Cooch Behar, 30th „ „	0·27	Fine and on some days very hot. Favorable prospects; fine harvest of the aous or early rice is being reaped, and amun or late rice is being planted out.
		Eastern Districts.		
DACCA DIVISION.	18	Dacca, 3rd* August 1874	3·	Seasonable weather. Crops good.
	19	Fureedpore, 1st „ „	1·95	Weather clear and sunny the first two days of the week. Tuesday and Wednesday strong wind accompanied by rain. Rain also on Thursday and Friday, a very heavy shower having fallen on the morning of the latter day. The rivers continue subsiding in the north of the district, but they are steadily rising in the south. This is not likely to do harm, as the flood in the south rises slowly and the growth of the rice keeps pace with it. The remaining aous or early, and amun or late rice, after the loss reported in the last report consequent on the sudden rise of the waters, are in a promising condition, but should the rivers in the north go down still lower, it will injure the amun considerably, as the plant is weak from excessive growth to keep pace with the flood, and it will fall when the water fails to support it. The ripe aous is fast being reaped. The price of coarse rice is stationary at Fureedpore, Goalundo, and Madareepore, and has fallen at Gopalgunge, but has risen at Bhanga, owing probably to decrease in importations. Three officers have been specially deputed into the interior, one in each sub-division of the district, to report on the crops and condition of the people. Some of the agriculturists in the northern thanas have lost nearly their all in the destruction of the aous which has taken place, and the Deputy Collector of Goalundo is advancing rice to all such as require assistance. No sickness is reported as generally prevalent in any part of the district.

* Telegram of the 3rd August, received on the same day, shows rainfall during the seven days immediately preceding.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Concld.*)			
	Eastern Districts.—(*Contd.*)		
DACCA DIVN.—(*Contd.*) 20	Backergunge, 30th July 1874.	6·44	Rainy weather. Prospects of crops good.
21	Mymensingh, 31st July 1874.	1·55	Generally fine and very hot, with occasional showers. The sunshine has done no harm to the crops already planted out, but the want of rain is becoming serious for the high lands in the north and centre, where the ryots have been unable to transplant at present.
22	Sylhet, 28th July 1874	3·02	Extremely hot; such weather has never been known in July. The thermometer last Sunday stood at 90° in one of the coolest rooms in the Collector's house at 5-30 P.M. Prospects good. The hot and dry weather has pushed forward the aous or early rice crop, half of which has been cut and the rest promises well. The ploughing of the sail or late rice land is progressing. There has been a good deal of sickness—fever generally, sometimes cholera—owing to the unusual state of the weather.
CHITTAGONG DIVN. 23	Chittagong, 30th „ „	3·96	Rain every day at head-quarters; the fall being heaviest on the 30th July up to noon. From Cox's Bazar 2·40 inches reported up to 28th July. The aous or early paddy promises well, and reaping has commenced. More rain is wanted for the amun or late rice, especially in the southern thanas. Cholera reported from Potia in the Sudder and Chuckeria in the Cox's Bazar sub-division.
24	Noakholly	.....	Return not received.
25	Tipperah, 31st „ „	4·58	Some days of rainy weather, with one or two hot still days. Prospects of the early rice crop are excellent; just a little more rain is wanted for the late rice crop.
26	Chittagong Hill Tracts, 28th July 1874.	3·7	Heavy fall of rain throughout the whole week. The cotton and paddy crops sown in the beginning of May are ripening. Plough cultivators have begun to transplant their seedlings. More rain would be beneficial.
	Hill Tipperah, 29th July 1874.	3·12	Almost daily rain, but showers not heavy. Quite cool. Ploughing going on; land being prepared for transplanting the late rice crop. Prospects of late rice crop everywhere good. The aous or early rice being cut; the outturn will probably be below the average.
BEHAR.			
PATNA DIVISION. 27	Patna, 3rd* August 1874	2·99	Weather most seasonable, and all that could be desired for the young crops, which are reported well off everywhere. The number of cholera cases reported is on the increase, and there is a good deal of fever about.
28	Gya, 1st „ „	2·65	Seasonable weather. The bhadoi or early crops are magnificent, and the rice excellent.
29	Shahabad, 1st Aug. 1874	1·30	Stormy, with high east wind at the beginning of the week, clear and hot the last three days; occasional showers. There has been more rain in the south than in the north of the district; steady and heavy rain is much required for the paddy crop in all parts. The present dry weather, if it continues much longer, will do great harm. The Soane rose in flood on the 1st August. Health on the whole good.
30	Tirhoot, 1st „ „	2·05	Weather cloudy and hot, with east wind prevailing. In Mudhoobunnee sub-division 1·05 inches of rain fell during the week. In many places "murwa" (millet) will be harvested in the next fortnight. The other bhadoi or early crops are also doing well. Transplanting is still going on in several parts of the sub-division, but more rain is wanted soon to save the paddy crops on the high lands. Report has not been received from Hajeepore, Durbhunga, Tajpore, and Seetamarhee sub-divisions. The rainfall during the week has benefited the paddy crops on high lands in the Sudder sub-division. Bhadoi or early crops are doing very well. Weeding operations are being pushed on with vigor, and though some damage has been done in parts by the overflowing of the rivers and by the heavy rain, prospects are still favourable. Prices of grain stationary. Public health good.
31	Sarun, 1st Aug. 1874	·95	Generally hot and sunny. East wind prevailing. Slight showers general throughout the district. Weeding operations are almost completed. The bhadoi or early crops are all coming up very well, and promise an abundant harvest. More and plentiful rain is now much wanted for the late rice crop, which is reported to be injured by the drought in places. In parts of the district the rainfall has been very deficient. Manufacture of indigo is going on, but the outturn is small. Price of common rice and gram has slightly risen, owing to a falling off in the importation.
32	Chumparun, 31st July 1874.	0·30	Sunny, with strong east winds and occasional partial light showers and thunder storms. The prospects of the crops not injured by inundation are still most favorable. Rain is now wanted. Threatening weather at the time of report.

* Telegram of the 3rd August, received on the same day, shows rainfall during the seven days immediately preceding.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BEHAR.—(*Contd.*)				
BHAGULPORE DIVN.	33	Monghyr, 1st Aug. 1874	2·08	Hot and cloudy. The prospects continue favorable; more rain is, however, wanted, particularly in the Begoo Serai sub-division.
	34	Bhagulpore, 3rd* „ „	·37	Weather most favorable. Murwa (millet) and bhadoi or early rice are splendid crops. Reaping of some of both has commenced. It remains yet to be seen whether all aghani or late rice lands will be cultivated; some of the lands are still under water, and some which were sown have been damaged. Rain is wanted now in the south of the district, but more fine weather is looked for in the north. Cholera is abating, fever is prevalent here and there.
	35	Purneah, 1st „ „	1·56	Sunny, very hot but seasonable; slight showers of rain towards the end of the week. Prospects of crops everywhere very good. Bhadoi or early rice being harvested in Kissengunge and Bulrampore. Yield good. Koosi floods almost entirely subsided, having done but little injury.
	36	Sonthal Pergunnahs, 1st Aug. 1874.	2·71	Rainfall, at Deoghur 2·34, at Godda 1·54, at Rajmehal 4 inches. Rain said to be badly wanted at Jamtara. Indian-corn promises to be a great crop everywhere. Paddy is looking well. Planting is backward about Doomka on the high lands. Since the last rains field work is going on most vigorously. Good rain on the morning of the 1st August, and heavy rain to be seen all round.
ORISSA.				
ORISSA DIVISION.	37	Cuttack, 3rd* Aug. 1874	7·48	Nearly the same quantity of rain fell all over the district. Steady and continuous rain all the week. Several rivers flooded; no harm done. Crops flourishing. Cholera on pilgrim routes.
	38	Pooree, 30th „ „	7·24	There has been general and ample rain. The weather at the time of report was fair and hot. Sowing completed; transplantation and cultivation of the late rice crop, and weeding of the early rice crop, are going on. The plants are growing well. Sugarcane is doing well. Cotton is being gathered. Mandea is being weeded. Ahur (pulse), castor-seed, and til-seed (oil-seed) plants, are coming out. Prices stationary in the mofussil. The pilgrims have nearly gone away. Cholera and fever are prevalent both in the city and in the interior.
	39	Balasore, 31st „ „	9·68	Heavy and continuous rain during the first six days of the week. During ten consecutive days ending with 29th July nearly 13 inches of rain fell. The Balasore rivers rose and submerged a large tract, the flood reaching the level of, but not topping, the Trunk Road. The inundation is now subsiding. This timely rain has rendered the general prospects of the crop excellent. A splendid yield is expected from the inundated tract.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
	40	Hazareebagh, 31st July 1874.	4·41	The crops are flourishing. There has been abundant rain and also sunshine. The few days of fine weather which delayed the transplanting of the rice did immense good to the maize. Alternate rain and sunshine suits every description of crop, including tea. Nothing could be better than present prospects.
	41	Lohardugga, 1st Aug. 1874.	7·27	Rain every day; there was a fall of 4½ inches on Wednesday, and the fall seems to have been general. The rain was much wanted, as the high land crops were being burnt and transplantation was at a standstill. The crops have now revived, and transplanting is going on briskly. The goondli (millet) crop will be reaped immediately. In Palamow the weather has been fair, with alternate showers and sunshine, but the makai or Indian-corn has suffered from the previous heavy rain. The prospects of the rice crops there are now excellent, and the area of cultivation is very large. Prices easy. General health good.
	42	Singbhoom, 31st July 1874.	8·30	Cool. Heavy clouds about. Abundant rain all over the district since date of last report, and not an hour too soon. Transplanting, &c., in full swing. Public health generally good. Condition of the people satisfactory.
	43	Manbhoom, 1st Aug. 1874.	2·42	Favorable. Since the date of last report a change for the better has taken place in the state and prospect of the crops. Rain fell on the 25th ultimo, and continued till the 29th, but has again ceased. The crops on high lands, which were withering away, have greatly benefited, and if rain continue to fall occasionally, all will yield a full crop, except the Indian-corn and gora or early rice, in which a loss of two annas has occurred in some, but not all places. More rain, however, is wanted for transplanting, but sufficient has fallen to admit the lowest lands being planted out, at which the people are busily engaged.

* Telegrams of the 3rd August, received on the same day, show rainfall during the seven days immediately preceding.

Published for general information.

	30th	·519	87·6	79·6	117·5	83·4	81·0	79·3	·88	S & S by E	...	219·3	0·03	...	Cirrostrati, stratoni and overcast. Light rain at 3¼ and 6 P.M.
	31st	·481	84·5	78·2	124·3	80·7	79·2	78·1	·92	S by E, S W & S by W	0·5	127·7	3·37	...	Cirrocumuli and overcast. Thunder at 12 A.M. and 2½ P.M. Slightly foggy at 10 and 11 P.M. Rain from 11½ A.M. to 5 P.M.

The mean barometer, as likewise the dry and wet bulb thermometer means, are derived from the twenty-four hourly observations made during the day.

The dew-point is computed with the Greenwich constants. The figures in column 10 represent the humidity of the air, the complete saturation of which being taken at unity. The receiver of the lower rain gauge is 1½ feet, and that of the anemometer 70 feet 10 inches above the level of the ground. The velocity of wind, as indicated by Robinson's anemometer, is registered from noon to noon.

The extreme variation of temperature during the past ten days	...	13·0
The maximum temperature during the past ten days	...	91·2
The maximum temperature during the corresponding period of the past year	...	92·0
The mean humidity during the past ten days	...	0·89
The mean humidity during the corresponding period of the past year	...	0·87
		Inches.
The total fall of rain from 22nd to 31st ... by lower rain gauge	...	6·33
The total fall of rain from 22nd to 31st ... by anemometer gauge	...	5·60
Ditto ditto ditto, average of twenty previous years	...	4·84
Ditto ditto between the 1st January and the 31st July	...	24·79
Ditto ditto ditto, average of twenty previous years	...	37·17

GOPEENAUTH SEN,
In charge of the Observatory.

The 3rd *August* 1874.

RESOLUTION.

GENERAL DEPARTMENT.

MARINE.

CALCUTTA PORT TRUST.

The 27th July 1874.

READ—

A letter No. 748, dated 23rd June 1874, from the Port Trust Commissioners, submitting a proposal for the extension of the pitching on the slope of the Inland Vessels Wharf between Juggernath Ghât and Aheereetollah Ghât.

Read also—

Letter No. 920, dated 8th July 1874, from the Port Commissioners, applying for a loan of Rs. 2,50,000 for the above purpose, and for the pitching of the slope in front of the Export Sheds, and for metalling the Jetty enclosure.

Whereas it appears probable to the Lieutenant-Governor of Bengal that the loan of Rs. 2,50,000 applied for in the above-mentioned letters ought to be granted:

It is hereby ordered that the application be published in the *Calcutta Gazette*, as required by the fifth of the rules made by the Governor-General in Council under the Public Works Loan Act of 1871, and published on the 15th of October 1873.

By order of the Lieutenant-Governor of Bengal,

H. REYNOLDS,
Offg. Secy. to the Govt. of Bengal.

No. 920, dated Calcutta, the 8th July 1874.

From—The HON'BLE V. H. SCHALCH, Chairman; W. D. BRUCE, ESQ., Vice-Chairman; and eight other Commissioners for making Improvements in the Port of Calcutta,

To—The Secretary to the Government of Bengal, General Department.

WE, the undersigned, Commissioners for making Improvements in the Port of Calcutta, do hereby apply to His Honor the Lieutenant-Governor of Bengal for a loan to be granted us under the provisions of Act XXIV of 1871 (the Public Works Loan Act). The particulars to be set forth in accordance with the rules published under the aforesaid Act, are annexed hereto:—

(1) The work for the construction or repair of which the loan is required.

1. Pitching slope of Inland Vessels' Wharf from Juggernath Ghât to Aheereetollah Ghât.

2. Pitching river bank with brick on edge in front of new Export Sheds and metalling Jetty enclosure.

And an estimate of the cost thereof.

	Rs.
No. 1—	1,40,000
No. 2—	1,10,000
	2,50,000

(2) The amount of loan applied for.

(3) The funds, cesses, rates, duties, or taxes, and the property, if any, on the security of which it is proposed that the loan shall be made.

The landing and shipping charges, wharf rents, and removal charges levied at the jetties and inland wharves; the jetties, quays, wharves machinery, &c., &c., belonging to the Commissioners.

(4) The law or laws under which the said funds, cesses, rates, duties, taxes are levied or received, and the title on which the said property is held.

Act V (B.C.) of 1870.

(5) The period for which the loan is required.

30 years.

The number and amount of the instalments, if any, in which it is proposed the loan shall be made.

(1) Rs. 1,00,000
(2) ,, 1,00,000
(3) ,, 50,000

Dates proposed for receiving such instalments.

October 1st, 1874.
December 1st, 1874.
February 1st, 1875.

And the instalments in which it is proposed to repay the loan.

In accordance with the provisions of Rule X of the rules under the Act modified by clause (D) of the Rule. The Comm will pay a fixed sum half-yearly on the 30th June and 31st Dec the rate of Rs. 3,053-5 for each lakh of rupees borrowed. showing the proportion in which this half-yearly amount i between payment of interest and repayment of principal, w

forwarded with the Commissioner's letter No. 4785, dated 12th January 1874, will show that the terms of the rule above quoted are complied with, and that one-fifth of the amount borrowed will be repaid within 10 years, one-half within 20 years, and the whole within 30 years.

(6) The proceeds of each of the funds, cesses, rates, duties, or taxes, and all other incomes received by the Port Commissioners for the purposes of the Act.

The ordinary income and expenditure of the Commissioners for 1871-72, 1872-73, and 1873-74, exclusive of repayment of loans.

NOTIFICATION.

The 18th June 1874.—Whereas it is deemed necessary to re-arrange the thanas of the Sylhet District, the Lieutenant-Governor is pleased to direct that the following shall be the thanas of the district:—

Abidabad,	Dhurmpasha,	Rajnuggur,	Jynteahpore,
Nubbeegunge,	Sonamgunge,	Tajpore,	Molagool,
Hubbeegunge,	Chuttack,	Parcool,	Hingajeeah,
Sunkerpasha,	Noakholly,	Gwine Ghat,	Kurreemgunge;

and that their boundaries and the boundaries of the District of Sylhet shall be as specified below:—

The common boundary between zillahs Sylhet and Tipperah shall be, as defined by the Revenue Survey maps of seasons 1860-61, from Rampore masonry pillar on the west to the Iktiarpore masonry pillar on the east.

The common boundary between Sylhet and Hill Tipperah shall be, as defined by the Revenue Survey maps of seasons 1860-65, and defined in the field by pucca pillars ordered by Government letter No. 1265, dated 31st March 1865, from Secretary to the Government of Bengal, to the Surveyor-General of India, from Iktiarpore masonry pillar on the west to Chatterchoora or Koylalyon hill station on the east.

The common boundary between zillahs Sylhet and Cachar shall be a direct line from Chatterchoora hill station on the south to the Rooptang (Hachicktang) hill station on the north; thence it shall be the watershed of the Seeddeshur Lorishpore hills as far as Budderpore masonry pillar on the north; thence along the Barrack (or Bogleea) or Kooseeara rivers to the junction of the Soorma river at the village of Kandeegaon, and thence along the Soorma river to the village of Karraballah, as defined by the Revenue Survey maps of 1864-65.

The common boundary between Sylhet and Jynteah Hills shall be, as defined in the Revenue Survey maps by Lieutenant H. L. Thuillier of seasons 1837 to 1839, from the village of Karaballah on the east to Bowkee bazar on the west; thence the northern boundary along the Burhill river, and under the foot of the hills along the northern limits of the following villages and hanhars, viz.:—Cooree, Tokeehanhar, Bisnakandy, Bogye, Allaidah lands, Toroong, Lamagaum, Beejoopurnah, Balen Hanhar and Kalyrang, and then the Doopree nuddee on to the Terriaghat pucca pillar; thence it shall be, as defined on the Revenue Survey maps (by N. T. Davey, Esq.) of seasons 1861 to 1863, to Panchgaon masonry pillar on the west.

The common boundary between zillahs Sylhet and Mymensingh shall be, as defined on the Revenue Survey maps of seasons 1861-62, from Panchgaon masonry pillar on the north to Rampore masonry pillar on the south.

Thana Boundaries.

ABIDABAD.

RAJNUGGUR.

On the north, by the Kooseeara river.

On the east, by the following villages, viz.—Kamalpore, Ghazeepore, Dhorum, Kaistgaon, and Otah hills to the village of Kaseepore; thence the Munnoo river southward to Dutgram pucca pillar; and then by the zillah boundary.

On the south, by the zillah boundary.

On the west, by thana Noakholly.

TAJPORE.

On the north, by the Soorma river.

On the west, by thanas Chuttack and Nubbeegunge.

On the south, by thanas Noakholly and Rajnuggur.

On the east, the following villages, viz.—Moeshahee, Koorkooraly, Goishpore, Oojailpore, Ebrainpore, Noshierpore, Khagdior, Hooshunnamkee, Chuk Rohinee, Chilnamonee, Kishorepore, Daookormohol, Dhormoda, Tajmohorompore, Tengra, Ghoorun, Chitakara, Madhubpore, Jasoobhoga, Faradpore, Baleeapoonjee, Talibpore Bhaga, Talibpore, Hydhurpore, Krishenpore, Luckheebasha, Roghoopore, Dursha, Bade Alle, and Rajeeabaree.

PARCOOL.

On the north, the following villages, viz.—Companygunj, Patna or Doolaergaon, Bhadehpore or Oomargaon, and Angarooa; then the Chengarkhal nuddee to the village Feringoora; and then the following villages, viz.—Feringoora, Sylhet, and Cachar Tea Company, Cherragong Tea Plantation, Mr. C. B. Jenning's grant, Butteshur, Chooabohar, Butteshur, and Golabnuggur; then the Soorma river to the village of Sheyrpore.

On the east, by the following villages, viz.—Sheyrpore, Chuttris, Chundunbhag, and Amrooa; then the Kooseeara river to village of Sooltanpore.

On the south, by the Kooseeara river.

On the south-west and west by thanas Tajpore and Chuttack.

GWINE GHAT.

On the north, by the boundary of the zillah.

On the west and south, by thanas Chuttack and Parcool.

On the east, by the eastern boundary of pergunnahs Paunchbaug, Durgaun, and Jafflung.

JYNTEAHPORE.

On the north, by the boundary of the zillah.

On the west, by thanas Gwini Ghat and Parcool.

On the south, by thanas Parcool and Soorma river.

On the east, by the eastern boundary of pergunnahs Baorbaug, Chotool, Churcutta, and Jynteah Pooraj.

MOLAGOOL.

On the north and east, by the boundary of the zillah.

On the south, by the Soorma river westward to the village of Coorormutty; and then the villages of Coorormutty, Rajpore, Shapore, Thakoormutty, Captainpore, Mownuggur, Mutteejarah, Sathparry, July, and Rampore; and again by the Soorma river down to the village of Kydgaum.

On the west, by thana Jynteahpore.

HINGAJEEAH.

On the north, by the following villages; viz.—Gramtollah, Ghoalshar, Koolaoora, Jamkundee, Aditmohal, Duttmohal, Russogram, Shooreekandee, Maijgaom, Buromoydan, Goghra, Mocheebhadkoora, Haor-Hakalookee, Oottur, Deotara, Makuroora, Shooreekandee, Deolee, and Khatkhal.

On the west, by thana Rajnuggur.

On the south, by the boundary of the zillah.

On the east, by a line passes through the Pathureah range of hills, nearly due north from that post to the Great Trigonometrical Survey station of Kulerai; and then along the limits of the villages of Burkhola, Dukhingool, Kechreegool, and Gramtollah, up to the northern boundary of the thana.

KURREEMGUNGE.

On the north, by thanas Jynteahpore and Molagool, and the zillah boundary to Budderpore masonry pucca pillar.

On the east and south, by the boundary of the zillah.

On the west, by the zillah boundary up to that post; and then by thanas Hingajeeah and Parcool.

NOTE.—The Pathureah range of hills, along which the boundary runs, has not been surveyed, and cannot be more clearly defined. It is represented to be uninhabited, covered with mixed forests and jungle, and that it was impossible to find either guides or tracks.

NOTE.—In the above description, all villages named as situated on the boundary lines of thanas are included in the limits of the thanas to which reference is being made.

H. REYNOLDS,
Offg. Secy. to the Govt. of Bengal.

CENTRAL RELIEF FUND.

Proceedings of the 17th Meeting of the Executive Committee of the Central Relief Committee on the 2nd July 1874.

PRESENT:

The Hon'ble V. H. Schalch, C.S.I., *President.*
" " John Inglis, C.S.I.
J. R. Bullen-Smith, Esq.

1. The proceedings of the 15th and 16th meetings were read and confirmed.

2. The Chairman read the following applications for relief grants, viz.—

	Rs.	
From Gya for the month of June	1,770	
" Patna	500	(a month f dispensaries long as the f mine lasts.)
" Beerbhoom for month of July	16,000	
" Bankoora	18,000	
" Hooghly	6,000	
" Rajshahye	20,000	
" Manbhoom	5,000	
" Jessore	500	

Beerbhoom had further asked for a special grant of Rs. 5,000.
Resolved that the above application be granted.

3. The Chairman read the cash accounts and statements of persons relieved from the following districts, viz.:—

Nuddea ... for April and May.
Burdwan ... " "
Beerbhoom, Shahabad, Hooghly, Bankoora, } to 31st May 1874.

Resolved that these be abstracted.

4. The Chairman read a letter from Mr. E. G. Man, forwarding a draft for Rs. 12,000, subscribed in British Burmah in aid of the relief fund.

Resolved, that the remittance be suitably acknowledged.

5. The Chairman read a letter from the Controller-General explaining, with reference to the 2nd Resolution of the 16th meeting, that the Government of India direct that the cost of all grain taken over from the Government stores by relief committees will be debited to the relief funds throughout the distressed districts, and this direction had lately been repeated in a letter from the Bengal Government to the address of the Controller-General.

Resolved that the Controller-General be addressed to the effect that the orders of the Government of India relate to Government Relief Fund, and not to the funds of the Central Committee. Also that he be informed that the Executive Committee have objected to the view taken in the letter from the Government of Bengal.

6. The Chairman read a letter from the Deputy Accountant-General of British Burmah forwarding Rs. 7,000 as a donation from the King of Upper Burmah in aid of the famine relief funds.

Resolved that the Committee send a letter of thanks in acknowledging the donation.

A bill of Rs. 13-1-6 for postage was presented and passed.

Proceedings of the 18th Meeting of the Executive Committee of the Central Relief Committee held on 6th July 1874.

PRESENT:

The Hon'ble V. H. Schalch, C.S.I., *President.*
" " John Inglis, C.S.I.
" " Rajah Jotendro Mohun Tagore.
" " T. M. Robinson.
J. R. Bullen-Smith, Esq.
Moonshi Amir Ali Khan, Bahadoor.
Baboo Doorga Churn Lah.

1. The proceedings of the last meeting were read and confirmed.

2. The Chairman brought forward one demi-official letter, which he had received from the Hon'ble C. E. Bernard, on the subject of the 1st Resolution of the 16th meeting, about the payment of grain in the very distressed districts. His Honor the Lieutenant-Governor wished to know whether the letter addressed to Government in the terms of the above resolution accurately stated the views of the committee, and if so, whether the committee would consider the matter further.

After a full discussion the following resolution was unanimously passed, viz., that—

The committee feel bound to say that they adhere to the former resolution, in virtue of which their funds were not made applicable to the purchase of grain from Government for charitable purposes in the very distressed districts. Such an arrangement was originally proposed by the Governor-General, at the conference in February last, has been acquiesced in by the committee all along, and is (they believe) well understood by the subscribers and the public at large. The committee are, however, willing to bear the charge for all Government grain expended in districts other than the very distressed ones. They hope that the Government will let them know the amount to which they are at present liable for grain hitherto expended in these districts. When they are by these means made aware of the extent of their liability on the account, the committee will be ready to consider to what extent they may fittingly repay to Government (on account of expenditure in supplying food in the very distressed districts) the money received under the promise that Government would double all public subscriptions.

3. The Chairman read a letter from the Lord Mayor of London advising a further remittance of £20,000, and inquiring whether further subscriptions should still be required.

Resolved that the Lord Mayor's remittance be acknowledged with thanks, and that he be informed that the committee, judging from the returns they have received, believe that the funds at their disposal will suffice to cover all requirements up to the end of the year.

4. The Chairman read a letter from the Collector of Burdwan asking for Rs. 35,000 for his district for the month of July, and another from the Collector of Midnapore asking for Rs. 2,000 for the same month.

Resolved that both applications be granted.

5. The Chairman read the cash account and statement of persons relieved in Midnapore during May 1874. The Collector seemed to have omitted a sum Rs. 635, received from Government, which omission caused a discrepancy of that amount between the balance in hand as shewn in this office and that shewn in the Collector's accounts.

Resolved that the Collector of Midnapore be asked to explain the discrepancy.

6. The Chairman read a letter from the Government of Bengal recommending for adoption by the committee two proposals of the Comptroller-General The first was that Government grain locally purchased for relief purposes should be locally paid for, *i. e.*, that the Relief Officer in accepting an issue of grain should send a cheque against the relief fund in payment of its value. The second was that in the cash accounts A and B the names of the Bengal districts should be retained.

Resolved, as regards the 1st proposal: that in districts where the grain given by Government for charitable purposes is chargeable to the Central Committee, the Relief Officer can send a cheque against the district relief fund in payment of any grain issued on account of the district local committee to the District Officer, and Commissioners will be asked to be careful that applications for sufficient funds are sent in good time to the Executive Committee, to admit of the necessary funds being remitted to the Collectors in good time.

As regards the 2nd proposal: that the Secretary to Government be addressed to the effect that cash forms A and B referred to in Mr. Mangles's letter, cash account A only, as sanctioned by Government letter No. 3492—V.S., dated 30th May 1874, has been substituted. The former are therefore obsolete.

In the cash account now in force provision is made for the entry of subscriptions received in the district for local purposes of that district. All such subscriptions are expended by the district local committee without reference to the central committee. They are merely noted in the papers as received for local purposes and distinct from receipts for central committee's funds.

Proceedings of the 19*th Meeting of the Executive Committee of the Central Relief Committee held on the* 13*th July* 1874.

PRESENT:

The Hon'ble V. H. Schalch, C.S.I., *President.*
" " John Inglis, C.S.I.
" " J. R. Bullen-Smith.
The Hon'ble T. M. Robinson.
" " Rajah Jotendro Mohun Tagore.
Baboo Doorga Charan Lah.

1. The proceedings of the last meeting were read and confirmed.

2. The Chairman read a copy of the revised estimates for the future requirements of the Bhagulpore Division, which amounted to the sum of Rs. 9,16,500; also a letter from Mr. Inglis, on the subject of the letter to the Lord Mayor about stopping subscriptions. This letter had been previously circulated by the Chairman.

Resolved that, in view of the figures placed before the meeting to-day, and pending further information, no action be taken upon the 3rd Resolution of the 18th meeting relating to the stoppage of further subscriptions.

Proceedings of the 20th Meeting of the Executive Committee of the Central Relief Committee held on the 14th July 1874.

PRESENT:

The Hon'ble V. H. Schalch, C.S.I., *President.*
" " John Inglis, C.S.I.
" " J. R. Bullen-Smith.
The Hon'ble T. M. Robinson.
" " Rajah Jotendro Mohun Tagore.
Baboo Doorga Charan Lah.

The proceedings of the last meeting were read and confirmed.

2. The Chairman stated that as the Executive Committee had had an interview with His Honor the Lieutenant-Governor on the subject of their resolutions against the paying for Government grain, charitably expended in the six very distressed districts, he had called this meeting that the matter might be again considered.

After a prolonged discussion it was—

Resolved that the committee feel themselves unable, for reasons given in the 1st re tion of the 16th meeting and the 1st resolution of the 18th meeting, to alter the purpo those resolutions. But the committee desire to notify to His Honor the Lieutenant-Gov of Bengal their wish to undertake all charges for money allowances given in addition to doles everywhere; for all clothes and petty comforts given to paupers; and for all relief ho charges in all districts. And also that the committee will notify to all relief comm and relief officers their readiness to make grants for rebuilding houses, for buying cattle, giving a small donation at the end of the famine to all absolute paupers.

DISTRICT RELIEF COMMITTEES.

AT a meeting of the Bankoora District Relief Committee held on the 27th ins

" Hari Lal Dobey.
Munshi Ali Zamin Saheb.
Baboo Kishna Gobind Goshami, *Member and Secretary.*

Read a letter from the Commissioner for the Division of Burdwan, requesting Committee to reconsider their proposal to sell rice to D class paupers at 20 seers the and resolved that, considering the small number of men, some 10 or 12, who have come fo to buy rice even at so cheap a rate, it would be useless to raise it.

Read a letter from Baboo Ram Tarak Mookerjee, Sub-Inspector of Schools, recomm that some aid be given to Bhoirab Gorain, of Biharda, for enabling him to rebuild his destroyed by fire, and resolved that a sum of Rs. 5 be given to him, and that Baboo Tarak Mookerjee be requested to see that the sum thus granted be applied for the pu indicated above.

Read a letter from Baboo Siva Dass Bhattacharji, Deputy Inspector of Schools, bring light certain irregularities which obtain in the Chooamasina Centre, and resolved th report be made over to Mr. C. P. Macaulay for disposal.

As Baboo Hem Nath Basu, member in charge of jute and hemp spinning, is about leave the district on transfer, it was proposed by the Chairman and unanimously carried that the thanks of the Committee be given to him for his valuable services, and that Baboo Mohesh Chunder Banerjee be requested to take charge of his duties.

Resolved that a second mohurir, on a salary of Rs. 8, be appointed for the jute spinning sub-committee in consequence of increase of work.

Resolved that Baboo Bankoo Bihari Ghosh be appointed member of the Committee, and that he be requested to join the jute spinning sub-committee.

W. R. LARMINIE, *Chairman.*

The Calcutta Gazette.

PART II.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

NOTICE is hereby given that the undermentioned plots of land, no longer required by the Government, situated in the district of Patna, will be put up to sale at the Collector's Office at Bankipore at 12 o'clock on Monday, the 7th September 1874, corresponding with 23rd Bhadro 1281 *B.S.*

The purchasers of these plots will be subject to the following conditions:—

1*st.*—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid down at once.

2*nd.*—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled, the sum deposited being forfeited to Government, and the estate to be again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.

3*rd.*—The plots will be sold revenue-free to the highest bidders.

4*th.*—The purchasers shall be put in possession on receipt of the orders of the Collector confirming the sales. But such possession shall be liable to be disturbed in case the final sanction of the Member of the Board of Revenue in charge should not be accorded to the proceedings.

W. HEYSHAM,
ریلوي ڈیپوٹي کلکٹر ضلع بھاگلپور

تحریر تاریخ سنہ ۱۸۷۴ع

NOTICE is hereby given that the undermentioned plots of class C land no longer required by the East Indian Railway Company, situated on the 74th, 105th and 106th A mile of the Main Line respectively in the Burdwan District, will be put up to sale at the Burdwan Collectorate on Tuesday, the 18th August 1874, corresponding with 3rd Bhadra 1281 B.S.

The purchasers of these plots will be subject to the following conditions:—

1*st.*—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid down at once.

2*nd.*—If the amount of purchase money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled, the sum deposited being forfeited to Government and estates to be again put up for sale, at the risk of the defaulting purchasers after issue of advertisement as in the case of original sale.

The plots will be sold revenue free to the highest bidder above the upset price.

Number in statement in Government estate.	Number on the district roll.	Name of estate and pergunnah.	Approximate area in acres.	Upset price.	REMARKS.

JESSORE COLLECTORATE, the 25th July 1874.

A. SMITH, *Collector.*

Notice

Is hereby given that the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the office of the Deputy Commissioner of Durrung, will be sold by public auction at the said Deputy Commissioner's office at Tezpore at 11 o'clock A. M., on the 3rd October 1874, unless in the meantime the sale is stopped, or postponed in consequence of claims or objections, under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands) or owing to any other cause.

For the conditions of sale, see detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Durrung.

SCHEDULE.

A lot of waste land consisting of 843·97 acres, situated in Mouzah Sakomatha in the district of Durrung, and bounded as follows:—

East.—By a line running from pillar B to C along the Majulighor, measuring 3,375 yards long.

South.—By a line from pillar B to pillar A and by Gorsunga Bheel, measuring 1,155 yards.

West.—By a line from pillar A to pillar D along the Khoraghor and the Dehingijhan, measuring 2,215 yards approximately.

North.—By Bengna Khawa Joory (stream), measuring approximately 2,665 yards.

The pillars are marked A B C D on the map filed in the office of the Deputy Commissioner of Durrung, Assam.

J. M. GRAHAM, *Deputy Commissioner.*

ZILLAH DURRUNG REVENUE DEPUTY COMMISSIONER'S OFFICE, the 16th *May* 1874.

Notice

Is hereby given that the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the office of the Deputy Commissioner of Cachar, will be sold by public auction at the said Deputy Commissioner's office at 12 o'clock on the 12th day of October 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (*to provide for the adjudication of claims to waste lands*) or owing to any other cause.

For the conditions of sale see the detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Cachar.

SCHEDULE.

A lot of waste land, consisting of about 1,030 acres 2 roods and 26 poles, situated in mouzah Bengalpore, pergunna Serispore, in the district of Cachar, and bounded as follows—

North—A line commencing from pillar No. 1, on Koya Khal, close to which is a pucca pillar on the other side of the said Khal, to pillar from 2 to 7 at a distance of 2,748 yards, in bearing 290.

West—A line from pillar 7 to pillar No. 12 at a distance of 1,832 yards, in bearing 188.

South—A line from pillar 12 to pillar No. 20, at a distance of 2,748 yards, in bearings 107 and 108.

East—A line from pillar 20 to pillar 32, along the bank of Serispore Khal, thence to pillar No. 1, along the bank of Koya Khal.

W. METCALFE, *for Offg. Dy. Commr.*

Notice

Is hereby given that the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the Office of the Deputy Commissioner of Durrung, will be sold by public auction, at the said Deputy Commissioner's Office, at Tezpore, at 11 A.M., on the 13th October 1874, unless in the meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to Waste Lands), or owing to any other cause.

For the conditions of sale see detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Durrung.

SCHEDULE.

A lot of Waste Land, consisting of 399·75 acres situated in Mouzah Shakomatha, in the district of Durrung, and bounded as follows :—

West—By a line running from pillar A to pillar B through grass jungle, bearing 140°30″ east, and measuring 2610 feet approximately.

South—By a line running from pillar B to pillar D through grass jungle, bearing 66°5″ east, and measuring 6178 feet approximately.

East—By a line running from pillar D to pillar C through grass jungle, bearing 148° west, and measuring 3140 feet approximately.

North—By a line from pillar C to pillar A through grass jungle, bearing 60°45″ west, and measuring 6168 feet approximately.

The pillars are marked on the map filed in the office of the Deputy Commissioner of Durrung, Assam, and have been erected.

J. M. GRAHAM, *Deputy Commissioner.*

TEZPORE, the 26th May 1874.

Notice

Is hereby given that the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the office of the Deputy-Commissioner of Nowgong, Assam, will be sold by public auction, at the office of the said Deputy-Commissioner, at 11 o'clock, on the 2nd October 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands), or owing to any other cause.

For the conditions of sale see the detailed notice, copies of which may be obtained on application to the Deputy-Commissioner of Nowgong, Assam.

SCHEDULE.

A lot of waste land, consisting of about 317 acres, situated in Mouzah Telia Chapori, in the district of Nowgong, Assam, and bounded as follows :—

North.—A line drawn from pillar marked G, on the side of a road to pillar H, and a stream called Dijoo Nuddee on the north-east, at a distance of 400 yards.

South.—A line drawn from pillar O to pillar A, on the south-west, at a distance of 1,580 yards.

West.—A line drawn from pillar A to pillar B on the north-west, at a distance of 240 yards; from pillar B to pillar C on the north-west, at a distance of 200 yards; from pillar C to pillar D on the north-west, at a distance of 220 yards; from pillar D to pillar E on the north-west, at a distance of 1,320 yards; from pillar E to pillar F on the north-west, at a distance of 600 yards; from pillar F to pillar G on the north-east, at a distance of 940 yards.

East.—A line drawn from pillar H to pillar I on the south-east, along the edge of the above stream, at a distance of 400 yards; from pillar I to pillar J on the south-east, along the edge of the above stream, at a distance of 200 yards; from pillar J to pillar K on the south-east, along the edge of the above stream, at a distance of 120 yards; from pillar K to pillar L on the south-east, along the edge of the above stream, at a distance of 200 yards; from pillar L to pillar M on the south-east, at a distance of 500 yards; from pillar M to pillar N on the south, at a distance of 820 yards; from pillar N to pillar O on the south-west at a distance of 500 yards.

Note.—The pillars are marked A to O on the plan of the land filed in the office of the Deputy-Commissioner.

J. F. SHERER, *Deputy Commissioner.*

DHAPPA TOLL COLLECTOR'S OFFICE, the 4th August 1874.

J. F. GALIFFE, *Collector and Supervisor, Calcutta Canals.*

MAPS OF THE SURVEY OF INDIA,

Published at the Office of the Surveyor-General of India, Calcutta, for the Quarter ending 30th June 1874.

Agents in Calcutta—MESSRS. THACKER, SPINK & Co.

Local Agents:

Allahabad—CURATOR OF GOVT. BOOKS.
Nagpore—CURATOR OF GOVT. BOOKS.
Simla—MESSRS. COTTON AND MORRIS, Commission Agents.
Bombay—MESSRS. THACKER, VINING & Co.
Lahore—MR. W. BALL, BOOKSELLER AND STATIONER.

N.B.—Maps are not sold at the Office of the Surveyor-General of India, Calcutta, but applications for maps on payment should be made to Agents. This Department only issues maps, *free of charge*, on the Public Service. It is particularly requested that the nearest local Agent as above be first applied to for any map required on the Public Service before indenting on this Department. The cost of postage of parcels must be borne by applicants themselves, as also such incidental charges as may be incurred at their request for mounting and binding maps. The best maps are invariably supplied in lieu of those asked for, which may not be available, and lists of all newly-published maps are periodically notified in the *Gazette of India* and of local Governments.

PAPER CURRENCY DEPARTMENT,
The 3rd August 1874.

L. BERKELEY,
Asst. Commr. of Paper Currency.

Bengal Civil Fund.

NOTICE—The number of Subscribers present to-day not being sufficient to form a quorum, the Half-yearly General Meeting of the Fund is postponed to Wednesday, the 12th August, at 10½ A.M., at the United Service Club.

By order of the Manager,
H. J. S. COTTON, *for the Offg. Secretary.*

CIVIL FUND OFFICE, the 6th August 1874.

(310—1)

Estate of William James Macdonald, deceased.

IN pursuance of Section 42 of Act XXVIII of 1866, notice is hereby given that all persons having claims against the estate of William James Macdonald, formerly of Upper Assam, and late of Litherland Park, Litherland, in the Parish of Lifton and County of Lancaster in England, a tea-planter, deceased, should send in particulars thereof to Cunningham Hudson of Calcutta, a member of the firm of Messrs. Balmer, Lawrie and Company, the administrator, with the will annexed to the estate of the said deceased, at No. 103, Clive Street, on or before the first day of October 1874, after which date the assets of the estate will be distributed.

CHAUNTRELL, KNOWLES and ROBERTS, *Attorneys.*

The 1st July 1874.

(266—3)

Estate of Henry Leadbeater Hollway, deceased.

NOTICE is hereby given that Thomas Mitchell Gibbon, of Betteah, Chumparun, and Charles William Carleton, of Sungrampore, Chumparun aforesaid, to whom as the Executors named therein Probate of the last Will and Testament of Henry Leadbeater Hollway, late of Seoraha Factory, Chumparun aforesaid, in British India, Indigo Planter, deceased, was, on the 14th day of July 1869, granted by the High Court of Judicature at Fort William in Bengal in its Testamentary and Intestate Jurisdiction, have, pursuant to the provisions of Section 31 of Act II of 1874 of the Legislative Council of India (The Administrator-General's Act 1874), by an instrument in writing under their hands bearing date the 20th day of May 1874, transferred to the Administrator-General of Bengal all estates, effects, and interests vested in them, the said Thomas Mitchell Gibbon and Charles William Carleton, by virtue of the said Probate. Dated this 5th day of August 1874.

The Hymns of the Rig-Veda, in the Samhita and Pada Text, by Professor F. Max Müller, M.A., in two Volumes. *Price Rs.* 24; *packing and postage, Re.* 1-12.

*** The Rig-Veda, the oldest book of Indian literature, has very properly been made one of the principal class-books for those who study Sanskrit in the schools and colleges in India, and though at present a scholar-like knowlege of the Vedic hymns is in the examinations required of the more advanced students only, yet, as soon as editions, translations, grammars, and dictionaries shall have rendered the study of these ancient documents more accessible, I doubt not that the time will come when no one in India will call himself a Sanskrit sholar, who cannot construe the hymns of the ancient Rishis of his country.—*Extract rom Preface.*

Office of the Superintendent Government Printing, No. 8, Hastings Street.

In Two Vols., foolscap folio.

Postal Notice.

No. 9216.

The 4th July.—It has been found necessary to reduce the weight at present conveyed by the passengers' carriages on the Darjeeling line. It is therefore notified that from the 1st proximo, only two adult passengers will be carried inside a carriage, whether ordinary or express, the outside seat remaining available as at present.

One passenger engaging on express will be allowed 4 maunds of baggage, two passengers 2 maunds, and 3 passengers 1¼ maund.

The mileage charge under clause (*e*) Rule (5) on page 74 will be reduced, for a seat in the ordinary, to eight annas a mile, and on the mail cart to 4 annas.

T. W. GRIBBLE, *Offg. Post Master General, Bengal.*

Postal Notice.

No. 9807.

CERTAIN sums of money have been deposited in Post Offices in the Bengal Circle as cash securities and are lying undisbursed standing in the names of the parties mentioned below.

The original depositors, or their heirs and representatives, are requested to submit their claims to the Postmaster General of Bengal, for adjustment within one month from date hereof, failing which they will forfeit all right and title thereto and the amounts be transferred to the credit of Government.

The 7th July 1874. T. W. GRIBBLE, *Offg. Postmaster General, Bengal.*

In Chancery.

In the matter of the Companies Act, 1862,
and
In the matter of the Nowgong Tea Company of Assam, Limited.

WHEREAS a dividend has been declared in the above-named matter by the Official Liquidator of the said Company, and sanctioned and approved of by the Judge, to whose court the winding-up of the said matter is attached by an order dated the 29th day of May 1874, of twelve shillings in the pound, payable to all the creditors of the said Company, who have proved their claims against or been admitted creditors of the said Company. Now this is to give notice that all the creditors of the said Company, who have proved their claims against, or who have been admitted creditors of the said company, are requested to apply to Samuel Lowell Price, the Official Liquidator of the said Company, at his offices, No. 13, Gresham Street, London, England, on or before the first day of February 1875, for payment of such dividend, otherwise they will be excluded from participating in such dividend.

Dated this 14th day of July 1874.

LEWIS MUNNS & LONGDEN, 8, *Old Jewry, London, Solicitors to the Official Liquidator.*

(316—3)

In the matter of Rajnarain Paul and Kissory Mohun Paul.

NOTICE is hereby given that on the 1st day of September next an application will be made to the Commissioner of the Insolvent Court on behalf of the Insolvent Rajnarain Paul for an order setting aside the order of adjudication made herein. Dated this 11th day of August 1874.

(319—2)

KALLYNAUTH MITTER, *Attorney for Rajnarain Paul.*

TWENTY-THIRD SPECIAL NARRATIVE OF THE DROUGHT IN [illegible] FROM THE 24TH JULY TO THE 6TH AUGUS[illegible]

THE Lieutenant-Governor (Sir Richard Tem[illegible] 3rd August the following remarks to be incl[illegible]

"I have no[illegible] test effectually [illegible] consu[illegible]tion c[illegible] narr[illegible] of [illegible] to th[illegible]

the anticipated rate of 60,000 tons. If this rate of expenditure should continue during August, the estimate of the 7th July may be somewhat exceeded. Some circumstances have occurred since July to improve the general case as made out on the 7th July, namely the early cessation of distress in parts of Rungpore, Bogra, and Maldah, and the disappearance of distress in most parts of Shahabad and Gya. On the other hand, things have happened to make the case slightly worse. Recent reports received by telegraph from North Tirhoot speak of the frontier store-houses being much depleted by reason of the recourse of large numbers of Nepalese to the Government grain stores. In some districts there are more persons (not able-bodied men, but women and children,) on relief works than were expected. The numbers on gratuitous or charitable relief have risen. In two important districts—Sarun and Manbhoom, and in some districts less important as regards distress—Burdwan, Bankoora, Rajshahye, and parts of Moorshedabad, affairs have had an unfavorable tendency. The rainy season, though almost perilously delayed in South Bengal, capricious in Central Bengal, and in North Behar threatening at one time from excess of water, has turned out well throughout Northern and Eastern Bengal; and in those parts where rain was most wanted, it has recently fallen. Thus on the whole the early (aous) rice crop is nearly secure, and the Indian-corn is already being cut."

"Thus there is still reason to hope that we shall have at the end of August a balance of something near 165,000 tons, as set forth on the 7th July. This quantity would be gross without allowing for wastage, and would be of course exclusive of the reserve with the Government of India at Calcutta. Of late, however, we have been obliged to draw on the Calcutta reserve for supplies to the southern districts, the Burdwan division, and other places. On the whole, the balance of grain in hand by the beginning of September in Calcutta and in the districts, though we hope quite enough, may not be more than enough for safety. Instructions to all relief officers have been reiterated to persevere in carefulness in administering relief in grain,—on the one hand distributing the grain fully to the distressed classes according to the rules and giving the people the benefit of the intentions of Government, yet on the other hand husbanding their supplies and striving to maintain some considerable surplus stocks against unforeseen necessity."

similar to those adverted to in the narrative of the 14th
ve arisen in respect to the policy of Government respect-
to the public, and especially doubts as to whether the
narrative have been adhered to. Certainly it is
so adhered to, and I trust that they will not

the 'wholesale' and the 'cargo' prices are strictly and
, and by no other. And it may be repeated that the sales
e rules as sanctioned by the Government of India as already
other."

s of Rungpore and Bogra did recommend further modifi-
but their proposals were negatived. The Collector of Bogra
d that in his district the Government price should be
market prices were fast becoming cheaper. He apparently
eople were entitled to this benefit, and that just regard to
prompt him to stimulate as much as possible the sale of
until all his stocks were exhausted. But it was imme-
to him that the cheapening of the market could only have
importations; that the people could well subsist on the
; that it was not the duty of Government to find additional
to promote sales for any purpose save the relief of necessity;
f Government grain would not be lowered; that if this caused
e result would be well; that if surplus stocks remained,
d be well, for the grain might be wanted elsewhere; but
surplus, the rules and the price as notified must not be

"The case of Rungpore and Bogra is an exa
are not deterred by Government sales from im
districts are well situated for water carriage early
on the rising of rivers and setting in of the southerly
in by trade to every mart accessible by water. In
quite suddenly, while it continued in places which,
could not be approached by water. In North Be
not so speedy; but there also trade will, it is hope
partly for this reason that we look for much diminut
of August. In Behar, however, the large supplies bro
in former narratives) have hardly, as yet, reached
being virtually intercepted by the semi-distressed
hand, and which are better able to buy. We trust
percolation of supply may touch ultimately the most

"Regarding advances to cultivators, there is no
added to what has been stated in former narrative
the spot has satisfied us that in the Sarun district
larger there than anywhere else) are the means of
ation, but considerable mortality among the lower
class. It is apparent in many districts that these
nearly exhausted, their slender stock of food, and
over even the short interval that must be passed befo
to come in."

"Notwithstanding that in the most distressed d
laborers have been transferred from the relief works to
for disappointment that the total number on these wo
has continued so large. In the northern and most di
women and children have in large numbers remained on
condition is such that the relief officers fear to send them
however, have been lowered to the lowest rate for bare exis
shall be no inducement to resort to the works if other em
got. In West Tirhoot, indeed, the case of these women and
the Collector to be such that he recommended some increa
but on consideration this was not sanctioned. We appre
some women may be on the works whose male relatives ar
wages elsewhere, though the relief officers seem confident t
case as a rule. Still a special warning has been addressed
to guard against any abuse of this sort. In the southern a
districts our officers still consider it necessary to admit
men to the works who would work in the fields if they could
though the cultivation is as large as ever, the cultivators
employ field labor, and therefore do all the work with
and so get on somehow. The advances to them of grain a
culty and afford them the means of giving wages in kin
away people from the relief works."

"Again, the very high number on gratuitous and char
aggregate exceeding our expectation—is a matter for disappo
is the admission of so many persons who from caste or other
in former narratives) cannot work and are yet brought t
continuance of high prices, despite the rains and the approa
has aggravated this difficulty. When the number rises r
circle, there is of course fear of imposture or of over-libera
this occurs, the Collector or other superior relief officer che
been repeated instances of the exercise of such check; sti
tion a general warning has been addressed to relief office
imposture. There is probably less ground for this appr
where the people had no previous experience of general rel
like Burdwan, where relief from causes other than scarcity
established, and where imposture, if not guarded against
practised."

"I am not yet able to state the average number of
assistance during July and August, as compared with the nu

narrative of 7th July, for the worst period in June. But though the number may perhaps prove higher than the anticipation, yet on the whole the distress probably will be kept within bounds until the middle of September, when the falling or the failing of the autumnal rains will decide the fate of the winter rice crop (amun), the cessation or the continuance of the scarcity, and the relaxation or the maintenance of the relief operations."

Weather and Rainfall.—The weather throughout North-East and South-East Bengal and the whole of Behar has been everything that could be desired; but in Burdwan, Hooghly, a small part of Midnapore, Manbhoom, Bankoora, parts of Beerbhoom, Moorshedabad, Rajshahye, Nuddea, Jessore, and Mymensing, rain is said to be urgently required.

Prospects of Crops.—The crops throughout Behar, North-East and South-East Bengal, Orissa, and the greater part of Chota Nagpore, are said to promise exceedingly well. Throughout the rest of the country it appears that in parts the yield of the autumn crops will be small, but there is no reason to apprehend much less than an average yield on the whole, even in the worst districts; while there can be little doubt that the yield throughout the greater part of the country will be unusually large.

Prices.—Prices have to a great extent followed the weather. Where the weather has been favourable, they have fallen; where it has been unfavourable, they have risen. There are some exceptions to this rule, but generally it holds good, as it might be expected to do. Prices have fallen slightly in Burdwan and Moorshedabad; more considerably in Howrah, 24-Pergunnahs, Dinagepore, Maldah, Julpigoree, Backergunge, Sylhet, Chittagong, and Tipperah; while in Bogra the fall has been especially great, rice having gone down during the fortnight from 13 seers 8 chittacks to 16 seers 8 chittacks for the rupee. Prices have risen in Bankoora, Beerbhoom, Midnapore, Hooghly, Nuddea, Jessore, Rajshahye, and Fureedpore, and have remained stationary in Rungpore, Pubna, and Moorshedabad. In Behar, prices have fallen in Patna, Chumparun, Purneah, and Monghyr. The fall in the last district has been especially great, rice having fallen from 12 seers 1 chittack to 13 seers 6 chittacks, while barley continues to become cheaper. The markets remain nearly stationary in Tirhoot and Sarun; in both these districts rice has fallen slightly, while barley has risen, though in Sarun the latter grain is very cheap. There has been a slight rise of prices in Shahabad and Bhagulpore, while they have remained stationary in Gya and the Sonthal Pergunnahs. In Chota Nagpore prices have risen in every district except Hazareebagh, but they still remain low everywhere except in Manbhoom, where rice is selling at 13 seers for the rupee. In Orissa prices are stationary and low in spite of the large quantities of grain which still continue to be exported.

Private Trade.—The usual note on the movements of food-grains is given in appendix A. The returns show an increase of 3,348 tons imported by private traders into Behar as compared with last fortnight. This increase was probably due to the anxiety of traders to take the utmost advantage they could of the half-rates of freight after the receipt of the notification that this concession would be withdrawn by the Government of India from the 1st August. The river traffic shows a considerable decrease; but the district narratives show that the internal trade shows signs of recovering, as the Collector of Rungpore reports that exports of the new rice from his district have begun, and the prospects of the autumn rice throughout North-Eastern Bengal are sufficiently good to warrant the expectation that several districts will have surplus stores to dispose of to those where distress still continues.

Tirhoot.—There is little calling for remark in this district. Supplies are still short in Mozufferpore, and sales of Government rice are still necessary in the town; but the prospects of the crop are everywhere excellent, except in certain limited tracts, chiefly in the Muddhoobunnee and Durbhunga sub-divisions, where considerable damage has been caused by floods.

Chumparun.—The remarks made with regard to Tirhoot apply equally well to this district. Distress is rapidly decreasing, as is shown by the reduction in the demand for labour on the canal works.

Sarun.—The giving of advances still forms the principal part of the work performed by relief officers.

South Behar.—Here all distress may be said to have ceased for the present, except in a few places, where it is by no means severe.

Bhagulpore Division.—The floods in Purneah, which were considered at one time likely to have caused much distress in that district, have subsided without doing much damage. From all parts of the division the reports as to future prospects are most cheering, except from Monghyr, where the Collector thinks the yield of the autumn crops will not be so good as was expected owing to the long continued rain, which hindered weeding.

Rajshahye Division.—Except in Moorshedabad and Rajshahye, where distress has somewhat increased, chiefly owing to a deficiency of rain, the prospects of the districts of this division continue to improve steadily. Distress is rapidly disappearing in Bogra, Rungpore, and Maldah; and in Dinagepore the Collector hopes that, from the time the autumn crops are reaped, distress will rapidly diminish, provided the prospects of the winter crop continue good: but he remarks that the Relief Commissioner does not take quite so sanguine a view of the case as he does.

Burdwan Division.—Distress continues to increase throughout this division, the chief cause probably being that in none of the distressed districts can the prospects of the coming crop be considered to be good, and hence the mahajuns refuse the usual aid to the poorer ryots, who are thus driven to seek relief from Government. The low state of health to which a large proportion of the population have been reduced by the fever prevailing for the past few years in most districts probably leads numbers of people to seek relief from charity rather than try to help themselves; and the result of these converging causes has been that the demands for Government assistance have been much greater than was anticipated, and have increased to such an extent that the local authorities have found it very difficult to exercise the supervision necessary to detect imposture and eliminate applicants not deserving of relief. The staff has been strengthened in Bankoora and Burdwan, the two worst districts; and it is hoped that from henceforth, if all goes well, the numbers in receipt of charitable relief will diminish.

Chota Nagpore.—Considerable apprehensions were at one time entertained as to the crops in Lohardugga, Singbhoom, and Manbhoom, but these have been quite set at rest in the two former districts by the recent rain. In Manbhoom the rainfall has not been so copious; and though there was no immediate fear on account of the autumn crops, yet there was still much rain wanted for the later rice crops.

Relief Works.—The following statement shows the numbers on relief works during the fortnight under report as compared with that preceding it:—

	Last fortnight.	This fortnight.
Patna Division	376,560	265,552
Gunduk Embankment	11,052	2,869
Soane Canal	28,530	28,455
Bhagulpore Division	58,647	48,349
Rajshahye Division	103,356	66,364
Northern Bengal Railway	8,578	5,795
Burdwan and Chota Nagpore	49,561	33,733
Cooch Behar	2,478	2,370
Total ...	638,762	453,486

The following table shows the numbers employed in each district, with details, as far as they are available, of those employed on piece or task-work and daily wages respectively :—

Divisions.	Names of Districts.	Laborers under Public Works Department.	Laborers under circle officers.	Total laborers.	Task or piece-work	Daily wages.
Patna	Tirhoot, North	20,020	24,557	44,577	26,887	17,690

(a.) Last fortnight's figures.

A comparison of the above figures with those given in the 22nd narrative shows that the decrease is universal except in Rajshahye, where there has been a considerable influx of labourers to relief works during the fortnight. In many districts the numbers employed are expected to increase somewhat after the weeding of the crops has been finished, and in the more important works an increase in the number of labourers will be most welcome.

Appendix C contains two minutes by Sir Richard Temple detailing the measures it is proposed to take for making the relief works permanently useful.

Gunduk Embankment and High Level Canal.—The work on the lower embankment has been almost entirely brought to an end during the fortnight, and there is nothing but dressing and turfing to be done. On the higher embankment 682,539 cubic feet of earthwork were completed, and 2,602,569 square feet of dressing and turfing. 1,549,964 cubic feet of earthwork were finished on the High Level Canal, six miles of the bed being in progress. 26 miles of the temporary road have been made.

Soane Canal.—About 42 lakhs of cubic feet of earthwork have been excavated during the fortnight, but more labour is wanted, and is expected as soon as the demand for field labour decreases.

Northern Bengal Railway.—The total amount of earthwork completed up to date is 69,614,000 feet, equal to 143 miles of 4 feet bank, with a top width of 15 feet. During the fortnight over 22½ lakhs of cubic feet were thrown up. 102 miles of feeder roads have been made.

Charitable Relief.—The following table shows the numbers in the receipt of charitable relief in each district as compared with those of the previous fortnight :—

Divisions.	Names of Districts.	Number of centres.	Number on Charitable Relief.	
			This fortnight.	Last fortnight.
Patna	Tirhoot, North	681	204,938	197,536
	Tirhoot, South		31,687	27,592

	Increase	.....	106,449	

(a) Includes labourers turned off the works with a supply of grain.
(b) Last fortnight's figures. None received for this fortnight.

From the above statement it will be seen that the only districts where the numbers have decreased are Maldah, Rungpore, Julpigoree, and Manbhoom. Bogra will probably show a large decrease during next fortnight, as a considerable number of those entered as receiving charitable relief were labourers turned off relief works with a supply of grain for their subsistence till they can get work.

The total numbers, independently of the recipients of advances and of the buyers of Government grain, receiving aid on relief works and from charitable relief recorded above, amount to 1,203,459 persons, showing a diminution in the numbers of 972,176 persons as compared with the maximum number of 2,175,635 persons recorded as working on relief works and receiving charity in the 20th narrative.

By order of the Lieutenant-Governor of Bengal,

J. F. K. HEWITT,

Offg. Junior Secy. to the Govt. of Bengal.

APPENDIX A TO THE 23RD SPECIAL NARRATIVE.

Movement of Food-grains.

1. As the Collector of Customs has not been able to furnish the complete monthly return for July of exports and imports from the Bengal Presidency, the figures for that month given in the last narrative, cannot be completed until next fortnight.

2. The following figures show (in tons) the quantity of food grains "sent up from stations below Rajmehal and Jamooee, and down from stations above Mirzapore, which was delivered at stations between Rajmehal and Buxar (inclusive)" between the 12th and 25th July, compared with the figures for the previous fortnight:—

	This fortnight.	Last fortnight.	Increase.
Up	11,516	5,554	5,962
Down	7,914	6,785	1,129
Total ...	19,430	12,339	7,091

The increase in the down traffic is all in private grain. Of that in the up traffic, 2,614 tons were Government and 3,348 private grain. The totals to date (from the beginning of November) of the returns on which the above figures are based, and which are for Behar only, are given below. The "up" figures are only approximately correct. Appendix B, however, shows in detail the destination of all the Government grain sent up from Howrah since the commencement of operations.

	Government grain.	Private grain.	Total.
Up	284,050	154,273	438,323
Down	39,330	199,426	238,756
Total ...	323,380	353,699	677,079

3. The importations of food-grains by the eastern canals from the 18th to 31st July were 8,438 tons (against 3,810 tons during the previous fortnight), making in all 201,938 tons since 1st October 1873.

4. The private traffic registered on the Ganges is as shown below:—

Stations.	Date.	Direction.	Tons.	To date from 1st November 1873. Tons.
Sahebgunge	19th July to 1st August ...	Up the Ganges ...	1,720	41,666
Ditto	Ditto ...	Down the do. ...	3,382	21,274
Goalundo	12th to 25th July ...	Up the do. ...	103	28,222
Kooshtea	Ditto ...	Down the do. ...	102	12,941

Compared with the figures given in the last narrative, there is a falling off in the up and down traffic of 370 and 577 tons respectively. The grain sent upward was chiefly rice; the greater part of that sent down was wheat and gram for the Calcutta market. The decrease in the river traffic appears to be due to the fall and general equalisation of prices in the distressed districts accessible by water communication.

G. TOYNBEE, C.S.,
On Special Duty.

APPENDIX B TO THE 23RD SPECIAL NARRATIVE.

Return of Grain despatched from Calcutta up to Monday, the 3rd August 1874.—(Gross Railway weight.)

Division in which to be used.	Station to which sent.	Up to date of last return.	During the fortnight.	Total to date.	Remarks.

G. Toynbee, C.S., *On Special Duty.*

Minute by the HON'BLE SIR RICHARD TEMPLE, K.C.S.I., *dated Durbhunga, the 2nd July* 1874.

HAVING had the advantage of discussing with Major Trevor (Additional Chief Engineer) and Mr. Pothecary (Superintending Engineer) the future management of relief works in the circle, which comprises the districts of Tirhoot, Chumparun, and Sarun, I have to record the following instructions.

2. Heretofore the pressure on our public works officers to afford relief to the people has been so great as to interfere with professional treatment of the works. Now that the pressure is, for the present at least, lightened or removed (inasmuch as the labourers have left the works and betaken themselves to husbandry after the coming of the rains), our officers have time and means of dealing with the works professionally and departmentally. I desire that this object should be carefully observed.

3. The relief works which during the past few months have been undertaken in these districts will be (1) works under the civil and the relief officers, and (2) works under public works officers, consisting of—

1st.—Old works, ordinary repairs.
2nd.—Old works extensively repaired or altered.
3rd.—New works.

4. The works under the civil officers have not as yet been overlooked at all by public works officers, and probably cannot be so to any considerable extent; still I desire that our public works officers should look at these works whenever and wherever they can, and explain defects to the civil officers concerned.

5. The works under public works officers—the first category (old works ordinarily repaired)—should be made over to the civil officers and occasionally looked at by the public works officers in the manner laid down in the foregoing paragraph. They are not considerable in number and extent in Tirhoot, but they are so in Chumparun, and specially so in Sarun, where indeed they form the great bulk of the relief works. The works in the second and third category should remain solely under the public works officers, and I will now state briefly how these last-named works should be dealt with. They consist partly of tanks, but chiefly of roads.

6 The tanks will, it is presumed, have been well planned and laid out. Doubtless the tanks and edges will need to be trimmed up. The approaches whereby drainage water is to enter the tanks will probably require attention. In works of this sort the question of providing escapes does not arise.

7. For the roads the selection of the lines will be found, I believe, to be good on the whole, and to be suitable according to consideration of local trade. The alignment having been frequently undertaken unavoidably without complete surveying and levelling revision, rectification will sometimes be required. This reconsideration is a matter of primary importance. The earthwork has been for the most part done, but it has to settle down during the rains, and will consequently be wanting large repairs. Wherever sufficient water-way may not have been allowed, there will be breaches to be examined. In Mudhoobunnee (North-East Tirhoot) the new roads have been provided with temporary wooden bridges (of cheap construction), which may last two years or more; elsewhere there has been but little bridging, and in some places (*e.g.* Durbhunga) none at all. The provision of such bridges is everywhere desirable, and in some lines (*e.g.*, that from Durbhunga to Buhera) is quite essential. The immediate preparation of plans and estimates for such bridges should be seen to. In the first instance, until the water-way has been tested by experience in a country so exposed to floods, it is better to have these wooden bridges, which can be repaired from time to time, than to undertake permanent masonry structures.

8. For none of the roads did time admit of regular plans and estimates being framed beforehand. These should be taken in hand, so as to be ready before the next open season commences.

9. The next point relates to establishment. The Special Chief Engineer should direct the Superintending Engineer to decide whether officers of all

grades should be retained in the special department of relief works for the purposes above described. Heretofore all the pre-existing public works establishments in these districts have been amalgamated with the relief establishment; such establishment may now revert to their ordinary duties relating to civil buildings, and the like. They can also render assistance in respect to all works under the civil officers. The remaining officers will constitute the staff under the Additional Chief Engineer and the Superintending Engineer for relief works. If any of these officers shall, in the opinion of the Chief Engineer, have been found to be unsuited for this special work, they should return to the general line of the department.

10. As regards work-people, some establishment and some labour must be kept up on every one of the roads above described. On no road is the establishment to be wholly discharged without the orders of Government being previously obtained; but for the present such employment of labourers should be limited as much as possible, and should be confined to the class (beldars and others) who follow this sort of labour as a profession. If there be any gangs (as in parts of Mudhoobunnee) of invalids and the like on any road, the Public Works had better make them over to the civil officers to be brought upon charitable relief. It is an object that the attention of our public works officers should be devoted to purely professional or departmental objects.

11. But the public works officers must bear in mind that although there will be a lull during July and August, yet in September and October the demand for employment will revive in all probability, and they must be prepared to re-admit such labourers to the roads if necessary.

12. The object of these instructions is to arrange for rendering the relief works (so largely undertaken during the last few months) permanently useful to the country, so far as this may be practicable within a reasonable cost, and to prevent their being left in a comparatively useless state by reason of incompleteness. To this the skill and consideration of our officers should now be exclusively directed.

R. TEMPLE.

Minute by the HON'BLE SIR RICHARD TEMPLE, K.C.S.I., *Lieutenant-Governor of Bengal, dated "Bhotas," the 20th July* 1874.

IN continuation of my minute No.———of the 2nd July, regarding the management of relief works in the Tirhoot-Chumparun divisions of superintendence, I have to record the following observations and instructions regarding the management of these works in the remaining divisions into which the distressed districts are divided.

With this view I have had the advantage of a conference with the Additional Chief Engineer, Major Trevor, and with the three Special Superintending Engineers (Messrs Barnfather, Pothecary, and Roberts).

2. The relief works in all three divisions of superintendence consist partly of tanks, but mainly of roads. The tanks are about 150 in number, and are exclusive of the numerous village tanks under relief officers. The roads which have been under operations for relief purposes since the commencement of the distress are about 3,100 miles in length, exclusive of the roads in the Sarun district.

The general condition of the works in the first or "Tirhoot-Chumparun" circle under Mr. Pothecary has been described in my minute of the 2nd July. In the second or "Bhagulpore" circle under Mr. Barnfather, comprising works in the districts of Bhagulpore, Purneah, Monghyr, and Sonthalia, there are about 500 miles of road, aligned, planned, and executed, so far as earthwork is concerned, in a professional and business-like way, but no bridging has been attempted. As the lines have been selected either by or with the assent of the local authorities, these roads are doubtless calculated to be permanently useful. The surveys have been roughly made in all cases; but in many cases they require to be completed according to departmental rules; and in nearly all cases the plans and estimates for the completion of the works have to be made. In this second division the engineering staff of all grades joined their

posts at an earlier date, and consequently set out the work sooner than in the other divisions, and were thus able better to maintain professional order in their operations when the period of severe distress began. Mr. Barnfather and his officers made excellent use of the opportunities afforded them, and have preserved much of the ordinary departmental system throughout their extraordinary operations.

In the third or "Dinagepore-Rungpore" division, including the districts of Dinagepore, Rungpore, Bogra, Maldah, Rajshahye, Pubna, and Moorshedabad, the relief works in the districts of Rajshahye and Pubna have been small, but have been, so far as they have gone, under professional supervision. The relief roads in Bogra have been executed fairly well under a professional system. A similar system has to some limited extent prevailed in Rungpore, Dinagepore, and Maldah; but in these districts the relief works have been mostly executed by the circle relief officers, with the assistance of overseers placed at their disposal by the Department of Public Works, and with the general advice of the Executive Engineer or the Superintending Engineer. It is hoped that most of these relief roads have been planned with some degree of professional skill, but it is known that some of them have not. There are several "feeder roads" connected with the Northern Bengal State Railway which have been under the railway staff, but which will now be transferred to the Relief Engineer of the civil districts.

4. The object now is, that advantage be taken of the recess, when the pressure of multitudes on relief is diminished, to render all these works permanently useful; and at the close of the extraordinary operations to hand them over to the ordinary departmental system of the country in a condition which, so far as it is goes, will suffice for use, but which will also admit of further development from time to time as means many permit. But the handing over of works incomplete and useless from the want of a completion, which may or may not be afforded hereafter, is to be carefully avoided.

5. To this end the three divisions of special superintendence as above described will be maintained, and will be by certain modifications rendered equal, as nearly as possible, in respect to length of relief roads, of which, as already seen, the works mainly consist. Thus each division will have about 1,000 miles, the three making up the total of 3,100 miles as already seen. In each division there will be three executive charges, arranged in the following order. The divisions of superintendence and the executive charges will always be termed "special," in order to distinguish them from the ordinary district divisions of the Department Public Works. Their limits will not always be the same as those of the regular civil districts, because the arrangements must be made primarily with regard to the position and condition of the relief works.

6. The first special division of superintendence—"Tirhoot-Chumparun"—excluding Sarun heretofore included (the relief works in Sarun consisting of repairs to old roads with only one piece of new road), will have the following special executive charges under the superintendence of Mr. Pothecary, Special Superintending Engineer, namely—

I.—"Chumparun," consisting of the greater part of the district excepting the north-eastern corner, which will be incorporated with the West Tirhoot executive charge: Mr. Handcock to be the Special Executive Engineer.

II.—"West Tirhoot," including the north-eastern corner of Chumparun, with the civil sub-divisions of Seetamurhee, Mozufferpore, and Hajeepore in the Tirhoot district: Baboo Madhub Chunder Roy to be Special Executive Engineer.

III.—"East Tirhoot," including the civil sub-divisions of Mudhoobunnee and Tajpore, and the sub-divisions of Durbhunga, exclusive of the Hattee tract of country, which will be transferred to the North Bhagulpore executive charge: Mr. Joll to be Special Executive Engineer.

7. The second division of special superintendence—"Bhagulpore"—will consist of the following special executive charges under the superintendence of Mr. Barnfather, Special Superintending Engineer, namely—

I.—"North Bhagulpore," consisting of those portions of Bhagulpore and Monghyr districts which lie north of the Ganges, together with the Hattee tract already mentioned: Mr. Atkinson to be Special Executive Engineer.

II.—"South Bhagulpore" to consist of the remainder of the Monghyr and Bhagulpore districts and the Sonthal Pergunnahs: Mr. Johnson to be Special Executive Engineer.

III.—"Purneah" to consist of the Purneah district, of the western part of the Dinagepore district as far as the river Tungun, and the Khurba tract of the Maldah district: Mr. Cordner to be Special Executive Engineer.

8. The third division of special superintendence—"Dinagepore-Rungpore"—will consist of the following special executive charges under the superintendence of Mr. Roberts, Special Superintending Engineer, namely—

I.—"Dinagepore," consisting of the greater part of the Dinagepore district, together with the north-west corner of the Rungpore district: Lieutenant Wright, R.E., to be Special Executive Engineer.

II.—"Rungpore," consisting of the remainder of the civil district of this name: Mr. Sheldon to be Special Executive Engineer.

III.—"Bogra" to consist of the relief works within the civil district of that name, together with the south-east corner of Dinagepore, and the north-east corner of Rajshahye: Mr. Foley to be Special Executive Engineer.

9. The relief works in the remainder of the Maldah and Rajshahye districts, and in the districts of Pubna and Moorshedabad, will now be made over to the ordinary district engineers.

10. The several special divisions of superintendence, and the special executive charges above described, will continue under the control of Major Trevor, R.E., Additional Chief Engineer, who will be good enough to settle with the Public Works Department of the Government of Bengal by the earliest date possible regarding the assistant engineers and the subordinate establishment to be employed in each of the special executive charges.

11. Such being the general outline of the machinery and the framework of the system, it remains only to sketch the nature of the work. Every relief road is to be examined as soon as possible, and its present condition, from a professional point of view, is to be recorded. As soon as the season opens, say towards the end of the coming autumn, a survey with levels to be made for each road, and then plans and estimates are to be prepared. Meanwhile such work is to be done to each road as may be needed for relief employment, in accordance, as much as possible, with the plan which the work will ultimately follow on completion of the survey. As fast as each survey is completed, endeavours will be made to do as much to the road as may place it in fair working order, open for ordinary traffic, even if not completed and bridged. This will be done from such resources as may be at the moment available. Whether the bridging can be done throughout is doubtful, but this end will be borne in mind with the view to its being attained so far as means may allow.

12. The subsidiary instructions to be based upon this minute will be prepared and issued by Major Trevor in communication with the Public Works Department of the Government of Bengal, as the matter is one demanding immediate attention.

No. A, dated Bankipore, the 26th July 1874.

From—A. C. MANGLES, ESQ., Collector of Patna,

To—The Offg. Secy. to the Govt. of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the following narrative for the fortnight ending Saturday, the 25th instant:—

A.—STATE OF THE COUNTRY.

2. The several bazars in the district continue to be well supplied with food-grain of all descriptions, and no deficiency has been reported from anywhere.

3. There has been a slight demand in the city during the fortnight for grain from the Punjab and the North-West, and this may be attributed to three causes—

1st.—To a large proportion of the 75,000 maunds ordered to be sent from Gya for Tirhoot and other districts where it may be required, having been drawn from our market, the Gya merchants giving it in exchange for Government grain given to them at Gya.

2nd.—On account of its having become known that the half-rates for railway freight would cease at the close of the month.

3rd.—Because of rumours which gained ground at the commencement of the fortnight, owing to the almost daily falls of rain, that the bhadoi crops were rotting as they stood, which last belief, I am glad to say, was utterly unfounded. This drain on our market, given as the first cause for the demand from the Punjab, has caused a slight increase in the price of grain here, but I am satisfied that this is only a temporary one, and that, with the continued favorable prospects of the bhadoi crops, they will soon go down again.

4. The new siding between the Patna city and ghât stations is still in an unfinished state; two sheds have certainly been erected and the work of drainage has been got on with, but the road still remains unrolled and the platform itself unlevelled. A new shed has been erected at the Patna city station, and one is in course of construction at the ghât, which, unless we have an extraordinary rush before the close of the month to obtain half-rates, should be sufficient to meet all requirements.

5. The following were the prices of food-grain obtaining in the municipal bazars of this district towards the close of the fortnight:—

	Rice, best.	Rice, common.	Wheat.	Barley.	Jenira.	Gram.
	S. C.	S. C.	S. C.	S. C.	S. C.	S. C.
Patna	12 0	14 0	16 12	19 12	17 0	19 12
Barrh	10 8	11 0	15 0	18 0	16 0	19 0
Behar	10 0	10 8	13 8	18 8	15 0	16 8
Dinapore	9 12	11 12	16 8	.....	17 0	18 8

6. We had during the fortnight 3·69 inches of rain in the Sudder station, 1·29 in Behar, ·35 at Barrh, and 4·65 in Dinapore; this, comparatively speaking, break in the rains has been most beneficial to the bhadoi crops, allowing the cultivators to get on to their lands to weed them, and has done no harm to the rice, the propitious day for commencing the planting out of which has not yet arrived; but in the course of the next week or so some heavy showers will be wanted to flood the fields for the young plants. Indian corn is already finding its way into the market, and I am glad to be able to report that the prospects of all the crops are as favourable as they well could be.

7. The condition of the people is favorably reported on from all parts of the district; they are busily engaged in their agricultural pursuits, so that the stoppage of our relief works, without in any way affecting them, has acted most beneficially on the prospects of our coming crops. No case of misery or starvation was reported during the fortnight.

8. There was no case of grain robbery during the fortnight; seven cases of theft were reported, but none of them were of an important character.

9. 74 emigrants were registered during the fortnight for British Burmah, and 16 for the Mauritius; whereof 56 were from Patna, 16 from Gya, 2 from Sarun, 4 from Shahabad, 1 from Tirhoot, 1 from Chumparun, and 10 from other districts.

B.—Relief Works.

10. None in this district.

C.—Transport of Grain.

11. The following are the figures showing the amount of food-grain received in this district during the fortnight ending the 18th instant, for which the latest returns have been received:—

	Rice.	Wheat, oats, and barley.	Jenira.	Other grain.
	Mds.	Mds.	Mds.	Mds.
By rail	36,502	57,010	26,194	37,788
By river	7,175	15	85	5,079
Total ...	43,677	57,025	26,279	42,867

or a grand total of 1,63,848 maunds, the whole of which was private importation, the Government operations at Barrh, Futwah, and Patna ghât having been closed.

It will thus be seen that, notwithstanding the 3 causes given above, as having operated to increase the amount of importation, there has been a considerable decrease in the receipts of previous fortnights, and I am satisfied that after the close of the month the imports will steadily fall off, not so much on account of the return to the old freightage rates, but because, as the prospects of the bhadoi crops become more and more developed, the demand for foreign grain will diminish.

D.—Storage of Government Grain.

12. I have only 1,139 maunds of rice left in this district at Pallygunge, an out of the way place in the south-west of the head-quarters division, from whence it is difficult to remove it; but I am endeavouring to see if I cannot effect an exchange.

13. The arrangements for the exchange of the Behar grain, reported on in paragraph 12 of my last narrative, were concluded during the fortnight. The grain merchant having consented to take 7,000 and odd maunds of rice stored in the several golas of that sub-division at Rs. 3 per maund, and to give me in exchange some 11,000 maunds of gram, and barley mixed with gram, at the current rate, *i.e.*, 20 seers per rupee. This he delivers at the Arrah station, from whence it is transported to Sarun by Mr. Chance, the agent for that district. More than 5,000 maunds have already been delivered, and the rest will be so in the course of the next few days, provided the Arrah authorities are ready to receive it.

14. Upwards of 40,000 maunds of the Patna and Gya grain has gone to Tirhoot, so that the demand in Sarun being apparently more urgent than in Tirhoot, I am despatching the remaining 35,000 maunds of the Gya grain to Arrah for the Collector of Sarun, as I get it from Mr. Palmer's contractors. Up to this time I have sent some 13,000 maunds, and hope to despatch the remainder by the end of the present fortnight.

E.—Advances to Private Parties.

15. None during the fortnight. Rupees 1,000 was refunded during the fortnight by one of the advance-holders for the purchase of grain.

F.—Charitable Relief.

16. None in this district; hence the statements called for in the Government circular letter No. 4640—S.R. of the 22nd instant are blank.

G.—Financial Results.

A. C. Mangles, *Collector.*

No. 1174F, dated Gya, the 27th July 1874.

From—A. V. Palmer, Esq., Collector of Gya,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Dept.

I have the honor to submit my fortnightly report on scarcity and relief in the Gya district for the fortnight ending Saturday, the 25th instant.

A.—State of the Country.

2. The district is fully supplied with food. The prices of food at the different marts is shown in the subjoined table:—

Bazars.	Wheat.		Barley.		Rice, best sort.		Rice, common.		Millet.		Maize.		Gram.	
	Week ending 25th July.	Week ending 11th July.	Week ending 25th July.	Week ending 11th July.	Week ending 25th July.	Week ending 11th July.	Week ending 25th July.	Week ending 11th July. 3. Prices are firm, with a tendency to decline.

4. What small stocks of grain there were in the district have now been brought out, the bhadoi crop being assured.

5. I annex in the margin a statement of rainfall during the fortnight. With the exception of Aurungabad, the rain elsewhere has been less than was anticipated. The weather has, however, been everything that could be desired for the growth of crops, and the bright, genial weather has brought on the bhadoi crops in a marvellous manner.

Gya	2·63
Nowadah	1·32
Jehanabad	1·32
Aurungabad	4·10

6. Famine was at no time anticipated by those best acquainted with the district, and scarcity has now almost ceased to exist. There is every appearance of a bumper crop.

7. The district has been thoroughly scrutinized by the supervisors and deputy supervisors. These officers have performed their duties well. Their work having been completed, I have applied to be relieved of them as well as of two overseers.

8. No cases of misery or starvation have been brought to notice. Individual cases of distress are occasionally discovered by the supervisors, and are at once promptly attended to.

9. All my sub-divisional officers concur in reporting the country to be well sown down with rice, and this is confirmed by independent inquiries I have made. This is fair evidence that no real scarcity of seed-grain existed, except to a very limited extent. I have from 1st August stopped any further seed-grain advances. Advances of grain to ryots on the security of their landlords will be continued where grain is available, but the applications will, I expect, be very few.

B.—Relief Works.

10. The subjoined statement will show the works in hand and numbers employed on each:—

Fortnight ending 15th July 1874.

Name of Work.	On Piece-work.				On Daily Wage.			
	Men.	Women.	Children.	Total.	Men.	Women.	Children.	Total.

Total ...	2,546	1,910	470	4,926	4,140	3,712	2,154	10,006

Total number employed during the fortnight 14,932

Daily average 1,066

11. The total number employed during the fortnight was 14,932 against 13,845 of last fortnight. Throughout the district the number of laborers have decreased, with the exception of Aurungabad, where the numbers have increased from 5,885 to 10,006.

12. I have repeatedly desired daily wage labor to be stopped, and I do not understand why the Aurungabad sub-divisional officer persists in continuing it. An explanation has been called for.

13. The laborers are all paid by food-grain and not by cash.

C.—Transport of Food-grain.

14. The quantity of private food brought into the bazars for sale during the past fortnight, is slightly in advance of the importation during the preceding fortnight:—

Bazars.	Wheat.	Barley.	Rice, best sort.	Rice, common.	Millet.	Maize.	Gram.	Total.
Gya	230	84	64	627	.....	.....	214	1,219

* Wastage, &c., including weight of bags.

17. Of the 75,000 maunds ordered to Patna for Tirhoot, I have already delivered 55,250. The balance will be delivered during the ensuing fortnight.

18. The golas at the places noted below have been emptied :—

Golas.	Stored.	Issued.	Weight of bags.	Actual wastage by rain, damp, vermins, &c.
	Mds.	Mds.	Mds.	Mds.
Urwul	6,958	6,517	108	333
Ticcaree	2,004	1,895	31	78
Bheloon	991	941	16	34
Futtehpore	991	971	16	4

19. The result is, in my opinion, highly satisfactory.

E.—Advances to Private Parties.

20. The annexed table will show what has been done under this head :—

Sub-divisions.	Number of applications received.	Rejected.	Granted. Number.	Cash.	Grain.	Pending.	Remarks.
				Rs.			
Gya	89	27	38	4,145	2,455	29	
Nowadah	76	66	2	35	20	8	
Jehanabad	19	.....	11	.....	1,400	8	
Aurungabad	228	27	.....	.....	.....	201*	* In 150 cases zemindars having declined to stand security, fresh security has been called for. Rest under inquiry.
Total ...	412	120	51	4,180	3,875		

21. Applications for seed-grain will cease to be received after 1st August, as the season has passed and the country is already well sown down. Applications for grain loans on the security of zemindars will still be granted where it appears necessary.

F.—Charitable Relief.

22. I submit a statement showing the transactions of the past fortnight:—

Sub-divisions.	B.	C.	D.	Total.	Daily average.
Gya	4,578	890	91	5,559	397
Bela centre	No return received.				
Sherghotty	1,964	805	.....	2,769	197
Nowadah	1,310	2,746	12	4,068	290
Jehanabad	1,251	1,104	.....	2,355	168
Aurungabad	8,028	3,356	14	11,398	814
Total ...	17,131	8,901	117	26,149	1,866

23. Many of those who have been relieved by cooked food at the houses of charity have now, having regained their strength, left for the more genial occupations in the fields.

24. Relief by spinning continues to increase at the Sudder Station. The jute spinning is being tried; but it is a novelty here, is unpopular, and is certainly unremunerative.

G.—Financial Results.

25. The total expenditure shown in last narrative, that is—

	Rs.	A.	P.
Up to 11th July	1,22,268	12	7
Expenditure during current fortnight—			
(a)—Final payments made, establishment and contingencies ...	552	11	6
Buildings and repairs	20	12	6
(b)—Advance repayable	7,477	0	0
Total ...	1,30,219	4	7

Statement showing the Storage and Consumption of Government Grain in the Gya District for the Fortnight ending 23rd July 1874.

Gya Collectorate,
The 27th July 1874.

A. V. Palmer,
Collector.

No. 662F, dated Arrah, the 28th July 1874.

From—H. W. Alexander, Esq., Collector of Shahabad,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Department.

I have the honor to submit my 17th narrative for the fortnight ending the 25th July.

A.—State of the Country.

Abundance or Scarcity of Supplies in the Bazars.

The bazars in the different parts of the district appear to be abundantly supplied. No scarcity is reported from any quarter.

Kinds and Prices of Grain selling at one or more specified Principal Marts.

For kinds and prices of grain selling at the principal marts in the district see Appendix A.

In the markets of the sudder sub-division prices have remained on the whole very much the same as when last reported.

In the Buxar sub-division a rise is noticeable in the prices of grain and barley, little change having occurred in regard to other articles.

In the Sasseram sub-division the fall in prices is marked, while in the Bhubhooa sub-division they have on the whole remained steady.

Rainfall.

At Arrah during the fortnight 3·36 inches of rain have fallen.

In regard to the rainfall at Buxar, the Sub-Divisional Officer reports:—"I do not see how the rainfall could have been more favorable up to date than it has been."

In Sasseram a fall of 2·01 inches has been registered, and 2·49 in Bhubhooa.

State of the Crops.

Favorable reports have been received with regard to the condition of the crops in the Arrah sub-division.

From Buxar Mr. Armstrong reports:—"During the fortnight there has been quite as much sun as was wanted for the bhadoi crops, and at the same time there have been occasional heavy showers, which have been good for all the crops; the prospects up to date are excellent."

In regard to the crops in the Sasseram and Bhubhooa sub-divisions, Mr. Eyre reports:—"The state of the crops continues promising. I have, since my last report, visited western Sasseram, Mohunia, Ramgurah, Bhubhooa, Bhagwanpore, Chynepore, Chand, Kudjura, and Durgawutti. The rainfall appeared to me to have been principally confined to the country lying between the hills and the Grand Trunk Road. In some places I noticed that the transplanted 'murwa' was being irrigated by hand; the transplanting of nursery rice had generally commenced. The rubbee high lands are everywhere being ploughed. In the Sasseram sub-division the crops are everywhere promising."

Condition of the People.

There is no particular change to notice under this head. All those who require it can find employment on the relief works, on field-work, and at the different indigo factories where manufacture has commenced. Those who from physical causes are unable to labor are relieved under the different modes of charitable relief.

No cases of actual starvation have been brought to light.

In the Arrah sub-division five grain-thefts have been reported during the fortnight; in one case 17 maunds of grain and in another 75 maunds of peas are said to have been stolen.

In the Buxar sub-division one theft of 11 maunds of wheat has been reported.

In the Sasseram sub-division six burglaries are reported as having occurred during the fortnight—two of 10 and 8 maunds of grain and four of other quantities, from 6½ to 2 maunds. Two cases of theft have also been reported—one of 2 maunds, the other of a small quantity of grain.

In Bhubhooa two cases of theft, in all of 19 maunds, are reported to have occurred during the same period.

B.—Relief Works.

Full particulars in regard to all relief works in progress, and the number of laborers employed, are given in Appendix B.

The quantity of Government grain consumed by the laborers employed on these works is given in a separate statement, as well as the amount of grain advanced to ryots.

C.—Transport of Food.

Private imports and exports by rail are given in Appendix C.

The imports into Sasseram are—

	Mds.
By rail	249
Interior	1,421
Exterior	396
Total ...	2,066

Imports into Bhubhooa—

	Mds.
By rail	24
Interior	634
Exterior	278
Total ...	936

These figures show a further decrease as compared with last fortnight.

D.—Storage of Government Grain.

During the fortnight 21,000 maunds of grain have been despatched from the Arrah and Buxar sub-divisions to the Collector of Sarun; thus making a total of 28,000 maunds despatched up to date. Mr. Armstrong hoped to despatch on Monday (the 27th) a further

consignment of 9,000 maunds, which will make nearly the whole amount I stated I should be prepared to send.

These consignments are irrespective of the Government grain which is coming here daily by rail, and which is being despatched by the Collector of Sarun's agent at Arrah.

E.—Advances to Private Parties.

In the Arrah sub-division during the fortnight 68 maunds 22 seers of grain have been advanced to ryots on the security of their zemindars.

In the Buxar sub-division 2,714 maunds of barley and wheat have been advanced to ryots in the Chousah pergunnah, either on the security of their zemindars or of landed property. Under this head Mr. Eyre reports from Sasseram:—"During the fortnight 475 maunds 27 seers of grain have beeen advanced to ryots on security, and on the conditions mentioned in my last narrative. These advances should, I think, be made debitable to charitable relief. I have, therfore, entered the number of persons so relieved under heading (*d*) of section F.

"Rs. 1,074 have been advanced on security from charitable relief funds for purchase of bullocks and seed-grain.

"The sale of grain to wholesale dealers commenced during the fortnight under review. In all 3,832 maunds 20 seers have been sold. I desire in future to confine the sale, at the liberal rates fixed, to zemindars as much as possible. These men will require credit. But the security will be good, and the grain paid to field-laborers in wage will do more good than if sold to wholesale dealers. It is obvious that 33,000 maunds of grain cannot go far in a population of over 700,000, and the labor being what is required to keep the poorer classes above water, the greater facilities we give for a liberal employment of labor, the more effectively will the demand be met."

F.—Charitable Relief.

In the Arrah sub-division the charitable relief operations are as follows:—

Heading B.—*Cooked Food.*

	Men.	Women.	Children.	Total.	Daily average.

Kinds and Prices of Grain selling at one or more specified Principal Marts.

For kinds and prices of grain selling at the principal marts in the district see Appendix A.

In the markets of the sudder sub-division prices have remained on the whole very much the same as when last reported.

In the Buxar sub-division a rise is noticeable in the prices of grain and barley, little change having occurred in regard to other articles.

In the Sasseram sub-division the fall in prices is marked, while in the Bhubhooa sub-division they have on the whole remained steady.

Rainfall.

At Arrah during the fortnight 3·36 inches of rain have fallen.

In regard to the rainfall at Buxar, the Sub-Divisional Officer reports:—"I do not see how the rainfall could have been more favorable up to date than it has been."

In Sasseram a fall of 2·01 inches has been registered, and 2·49 in Bhubhooa.

State of the Crops.

Favorable reports have been received with regard to the condition of the crops in the Arrah sub-division.

From Buxar Mr. Armstrong reports:—"During the fortnight there has been quite as much sun as was wanted for the bhadoi crops, and at the same time there have been occasional heavy showers, which have been good for all the crops; the prospects up to date are excellent."

In regard to the crops in the Sasseram and Bhubhooa sub-divisions, Mr. Eyre reports:—"The state of the crops continues promising. I have, since my last report, visited western Sasseram, Mohunia, Ramgurah, Bhubhooa, Bhagwanpore, Chynepore, Chand, Kudjura, and Durgawutti. The rainfall appeared to me to have been principally confined to the country lying between the hills and the Grand Trunk Road. In some places I noticed that the transplanted 'murwa' was being irrigated by hand; the transplanting of nursery rice had generally commenced. The rubbee high lands are everywhere being ploughed. In the Sasseram sub-division the crops are everywhere promising."

Condition of the People.

There is no particular change to notice under this head. All those who require it can find employment on the relief works, on field-work, and at the different indigo factories where manufacture has commenced. Those who from physical causes are unable to labor are relieved under the different modes of charitable relief.

No cases of actual starvation have been brought to light.

In the Arrah sub-division five grain-thefts have been reported during the fortnight; in one case 17 maunds of grain and in another 75 maunds of peas are said to have been stolen.

In the Buxar sub-division one theft of 11 maunds of wheat has been reported.

In the Sasseram sub-division six burglaries are reported as having occurred during the fortnight—two of 10 and 8 maunds of grain and four of other quantities, from 6½ to 2 maunds. Two cases of theft have also been reported—one of 2 maunds, the other of a small quantity of grain.

In Bhubhooa two cases of theft, in all of 19 maunds, are reported to have occurred during the same period.

B.—Relief Works.

Full particulars in regard to all relief works in progress, and the number of laborers employed, are given in Appendix B.

The quantity of Government grain consumed by the laborers employed on these works is given in a separate statement, as well as the amount of grain advanced to ryots.

C.—Transport of Food.

Private imports and exports by rail are given in Appendix C.

The imports into Sasseram are—

Exterior	278
Total ...	936

These figures show a further decrease as compared with last fortnight.

D.—Storage of Government Grain.

During the fortnight 21,000 maunds of grain have been despatched from the Arrah and Buxar sub-divisions to the Colllector of Sarun; thus making a total of 28,000 maunds despatched up to date. Mr. Armstrong hoped to despatch on Monday (the 27th) a further

consignment of 9,000 maunds, which will make nearly the whole amount I stated I should be prepared to send.

These consignments are irrespective of the Government grain which is coming here daily by rail, and which is being despatched by the Collector of Sarun's agent at Arrah.

E.—Advances to Private Parties.

In the Arrah sub-division during the fortnight 68 maunds 22 seers of grain have been advanced to ryots on the security of their zemindars.

In the Buxar sub-division 2,714 maunds of barley and wheat have been advanced to ryots in the Chousah pergunnah, either on the security of their zemindars or of landed property. Under this head Mr. Eyre reports from Sasseram:—"During the fortnight 475 maunds 27 seers of grain have beeen advanced to ryots on security, and on the conditions mentioned in my last narrative. These advances should, I think, be made debitable to charitable relief. I have, therfore, entered the number of persons so relieved under heading (*d*) of section F.

"Rs. 1,074 have been advanced on security from charitable relief funds for purchase of bullocks and seed-grain.

"The sale of grain to wholesale dealers commenced during the fortnight under review. In all 3,832 maunds 20 seers have been sold. I desire in future to confine the sale, at the liberal rates fixed, to zemindars as much as possible. These men will require credit. But the security will be good, and the grain paid to field-laborers in wage will do more good than if sold to wholesale dealers. It is obvious that 33,000 maunds of grain cannot go far in a population of over 700,000, and the labor being what is required to keep the poorer classes above water, the greater facilities we give for a liberal employment of labor, the more effectively will the demand be met."

F.—Charitable Relief.

In the Arrah sub-division the charitable relief operations are as follows:—

Heading B.—*Cooked Food.*

	Men.	Women.	Children.	Total.	Daily average.
Moulabag	276	297	884	1,457	97

Buxar	80	180	...	260	18⅔
Saraya	410	360	220	990	70½
Total ...	870	1,300	280	2,450	174½

Mr. Armstrong further reports under this head: "My three poor-houses have been open during the fortnight. It must be borne in mind that the tendency of established poor-houses is to check ordinary charitable relief, for people who are in the habit of relieving beggars are apt to refer them now to these institutions; but taking this into consideration, the number of those receiving relief of all kinds does not seem to be excessive. The Chousah Relief Inspector reports having visited 102 villages, the Buxar Relief Inspector 82 villages, and the Doomraon Relief Inspector 106 villages during the fortnight, and all report favorably on the state of the people."

In the Sasseram and Bhubhooa sub-divisions the relief operations are as follows:—

HEADING B.—*Cooked Food.*

	Men.	Women.	Children.	Daily average.
Sasseram	494	622	266	98·5

ARRAH,
The 28th July 1874.

H. W. ALEXANDER,
Collector.

No. 2092F, dated Mozufferpore, the 30th July 1874.

From—C. F. WORSLEY, Esq., Officiating Collector of Tirhoot,

To—The Secretary to the Government of Bengal, Statistical Department.

I HAVE the honor to submit my narrative of scarcity and relief in the Hajeepore, Tajpore, and Sudder sub-divisions, for the fortnight ending 25th instant.

2. In Hajeepore sub-division prices have not varied materially. The most noteworthy change has been a fall of one seer per rupee in the price of rice at Lalgunge, which may be attributed to the influence of advances made in that grain by the manager of Singhiya factory. At Hajeepore itself rice has slightly risen in value.

3. In Tajpore sub-division prices have fallen, and it is reported that "fair supply of rice still comes in from private sources." Large stores of "murwa" appear to have been boarded by the local mahajuns, and this grain is now chiefly expended in payment of field labour.

4. In the Sudder sub-division Government prices continue to prevail. The rates for common rice (15 and 14 seers per rupee), shown in the last two price-currents, were inaccurate. The rate for cleaned rice is still 13 seers per rupee.

5. The demand for Government grain is increasing day by day in the town, the average daily sales having exceeded 1,200 maunds during the fortnight. In the interior of the district sales have been comparatively small, owing partly to increased distribution of advances, partly to large payments in kind being still made to laborers on the relief works, and partly to the fact that several town bunneahs own shops in villages which they supply from head-quarters. The total expenditure of Government grain between 27th ultimo and 25th instant has been 1,75,845 maunds, or 20,845 maunds in excess of my estimate.

6. The subjoined statement shows the kind and prices of grain selling at some of the principal marts on 25th instant :—

Name of Mart.	Wheat.	Barley.	Common rice.	Indian-corn.	Gram.	Murwa.
	Sr.	Sr.	Sr.	Sr.	Sr.	Sr.
Hajeepore	13¼	19	9¾	...	18½	...
Lalgunge	15	19½	11	...	19	...
Muhowah	13¾	16½	8½	14	18	...
Tajpore	14	17½	9½	...	17	18
Mozufferpore	13	17	13	16	17½	...

7. The rainfall during the fortnight was as follows :—

Hajeepore	3·40 inches.
Jajpore	0·94 "
Mozufferpore...	3·10 "

8. The weather during the fortnight has been most favorable for the crops. "From all sides," writes the Hajeepore officer, "the reports are most favorable. Alternate sunshine and rain have brought the crops into an advanced state, and unless some unforeseen change takes place, we must have a splendid bhadoi crop here." Prospects are equally good in Tajpore sub-division, but "a little rain," it is said, "would now be desirable to enable the ryots to complete the transplanting of their dhan, and to freshen what has been transplanted." Cheena is giving a good outturn.

9. In the Sudder sub-division, except where the crops were lately submerged, prospects are very good. In parts of the western circles the makai is somewhat backward and requires rain. It has been ascertained that the damage caused by the inundations is not so great as was at first supposed, but more or less injury has been done to the crops in the Toorkee, Belsund, Rajkhund, Kuttra, Gaighatty, Sudder, Chajun, and Kantee circles. The Toorkee Superintendent states that "a great many cultivators who did not apply for advances before have now been forced to apply, as their crops have been completely damaged by the recent floods." In Belsund circle "comparatively little damage has been done. Where the makai was destroyed in most places rice has been put in its place." Some parts of the circle are still under water.

The Rajkhund Superintendent reports that 900 beeghas of crops have been entirely destroyed in his circle and that 2,500 beeghas have been damaged. "The water," he writes, "has not yet receded from the low land bordering on the river; and the rice sown at the bottom of the jheels, and which had not been transplanted, is of course destroyed; but it is still sufficiently early in the season for all the injury to future harvest prospects to be susceptible of remedy by the granting, and in some few cases the renewal, of advances to the ryots whose lands have been submerged. Grain to the value of Rs. 2,080 has already been advanced to those who have suffered the greatest loss."

In Kuttra circle about three-eighths of the crops in 40 villages have been damaged. In Gaighatty circle the area injured is not large. In the Sudder circle one-fourth of the crops is stated to have been lost in six groups of villages (about 90 villages in all), but this estimate, I think, is excessive. In Chajun circle the makai has suffered severely in the lower lands, and a large tract of country is still under water between Chajun and Mozufferpore, and in Kantee circle it is feared that nearly 10,000 beeghas of crops have been ruined. Probably the total area on which the crops have been destroyed or damaged does not exceed 30,000 beeghas.

10. In Hajeepore sub-division the condition of the people is good, and the sub-divisional officer considers that "the advances we are giving will prevent any distress until the bhadoi crops are ripe." The same remarks apply to Tajpore. In the Sudder sub-division the condition of the people generally is much improved, but the numbers of persons on relief works (69,601), or in receipt of charitable relief (20,592), are still very high, and indicate the continued existence of want and pressure among certain classes.

11. There have been no cases of deaths from starvation.

12. The circles in which the people still resort largely to the relief works are the Sudder, Ather, Toorkee, Kantee, Moteepore, Dooriah, and Jaintpore circles, of which five are administered by planters who have always paid low rates.

B.—Relief Works.

13. The number of laborers employed daily in the three sub-divisions is as follows:—

Hajeepore	5,328
Tajpore	9,300
Mozufferpore	69,601
Total ...	84,229

In the Mozufferpore sub-division the majority of laborers still consist of women and children. The Superintendent of the Sudder circle "would like to see all the men turned off the works, but this," he fears, "cannot be effected without raising the rate of wages for the women." I have no doubt that the men would gladly quit the works if they could obtain employment in the field, where wages are twice as high as Government rates, but the fact is that the small employers of labor cannot afford this year to take on as many hands as they want. The grain advances given during the last month have enabled many ryots and small zemindars to employ laborers whom they could not otherwise have hired, and as advances increase, it is possible that there may be a still further diminution of numbers on relief works. If it be conceded (and I submit it must) that at any time during the past three months there was real necessity for relief works, that this sub-division is densely populated, that the supply of labor has been largely augmented by women and children who do not ordinarily work, that employers can ill afford to maintain the minimum number of laborers required for weeding their fields, and that hungry men cannot be fed on green crops, I think it can hardly appear strange that our relief works have not been altogether deserted since the commencement of the rains.

14. A large number of useful village roads have been and still are being made or repaired by circle officers.

C.—Transport of Food.

15. Private trade continues active in some parts of Tajpore and Hajeepore sub-divisions. In Mozufferpore sub-division it is doing nothing, so far as importations from beyond the district are concerned. It is quite certain, however, that the two southern sub-divisions can now take all the grain that private traders may be willing to import, and that it would therefore be mere waste of time and loss of profit to send up grain to Mozufferpore. The Superintendent of Singhiya circle informs me that he could sell any quantity of Government grain at Lalgunge, but as that town is easily accessible from Patna, and is altogether free from distress, I am unwilling to send him grain, which is so greatly required for this sub-division.

16. All transport of Government grain, except from the reserve gola in Mozufferpore to circle golas in the interior, has now ceased.

D.—Storage of Government Grain.

17. The amount of Government grain that has been stored is as follows:—

	Mds.
Hajeepore	41,531
Tajpore	50,560
Mozufferpore	5,39,961

18. The expenditure of grain in the Ather, Kantee, Moteepore, and Jaintpore circles, has been so much larger than I expected, that I have been obliged, within the last few days, to arrange for replenishing them all from head-quarters. Supplies aggregating 50,000 maunds are now being despatched to them.

I have availed myself of the permission (conveyed in your demi-official letter) to take over 16,000 maunds of mixed grain from Monghyr, and the balance of the 60,000 maunds lying at Doollee. Colonel Macgregor is arranging for the transport of these supplies. "Jao-boota" is just now more in demand than any other kind of grain in this sub-division, being, from its cheapness, the most popular means of paying wages to field laborers.

19. I trust that, with this addition to my stores, there will be sufficient grain in the Sudder sub-division to last the people through next month, and to supplement the produce of the bhadoi crops in the three following months. After the experience of the last four weeks I cannot estimate my grain expenditure for August at less than two lakhs of maunds. There will thus be left about 1½ lakhs of maunds for the three remaining months. Up to the present time we have failed to weigh out grain at the town gola as fast as the bunneahs are prepared to receive it. Large as the opium godown premises are, the incessant arrivals of grain carts, the unloading and stacking of bags, and the large despatches of grain to the relief works, have seriously interfered with the weighments and deliveries of grain to the bunneahs. I understand, however, that latterly these sales have amounted to 2,500 maunds a day.

E.—Advances.

20. All circle officers are now busily employed in making advances. In some circles cultivators are coming forward for second advances; and as they absolutely require more grain,

and the original advances were fixed at the safe and moderate rate of two rupees' worth of grain per beegha of holding, I have sanctioned further advances. The total quantity of grain advanced in the three sub-divisions is as follows:—

	Mds.
Hajeepore	9,861
Tajpore	7,769
Mozufferpore	87,747
Total ...	1,05,377

21. From the care and discrimination used in making advances, I have every reason to think that they will be recovered in full, and I am quite satisfied that for the classes of cultivators and small zemindars they are the best form of relief that could have been devised. I have myself no fear whatever that advance-receivers will shirk or evade repayment.

F.—Charitable Relief.

22. The number of recipients of charitable relief has increased during the fortnight. The following are the daily figures and total for the three sub-divisions:—

Hajeepore	3,632
Tajpore	7,463
Mozufferpore	20,592
Total ...	31,687

G.—Financial Results.

23. The subjoined table shows our expenditure for Hajeepore, Tajpore, and Mozufferpore sub-divisions during the fortnight under review:—

	Rs.	A.	P.
Transport of Government grain	1,68,687	8	6
Salaries, establishment, and contingencies	11,743	14	3
Charitable relief (paid from Tajpore sub-treasury) ...	200	0	0
Storage	800	0	0
Total ...	1,81,434	6	9

MOZUFFERPORE SUB-DIVISION.

C. F. WORSLEY,
Collector.

No. 979F, dated Durbhunga, the 27th July 1874.

From—C. T. METCALFE, ESQ., Additional Commissioner, Durbhunga,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit my narrative for the fortnight ending 25th July 1874.

STATE OF THE COUNTRY.

1. The fine weather of the past fortnight has been most favorable to agriculture. The rainfall has not been excessive, but there have been occasional heavy showers. In Mudhoobunnee the low lands have been largely sown and the high lands weeded, and the bhadoi crops are fast approaching maturity. Cultivators are everywhere busy on their fields, and relief works are regarded as no longer affording attractions to any but women and children, except in a few localities where a superabundance of labor, as compared with the cultivable area, has led to the coolies remaining on the works. The Magistrate reports that the sowings, so far from being thinner as was anticipated in consequence of apprehensions of shortness of seed, have been on a more extensive scale than usual. He writes—

"The harvest prospects are most excellent, although there have been some losses in the lower lands from the earlier heavy rains: transplanting is still being completed. The bhadoi crops are said to be secure from further injury. Murwa, the (staple) food-crop of the country, is reported as especially good. Makai, sama, and some places even murwa, are already ripening, and fit for cutting.

"From Kachra Mr. Magrath reports the accounts are not so reassuring. The crops in the high lands are flourishing, and transplantation is nearly over; but much destruction has been caused by floods in the low lands of the Jerail pergunnah, and it has been calculated that as much as 2 annas of the murwa crop has been destroyed. This, however, is not an exceptional calamity. The crops in these low lands are destroyed by floods in most years; they are only sown in the chance of their escaping and yielding a handsome return to compensate for the losses of other seasons, and the cultivator never depends upon those crops alone. If the floods subside resowings will be attempted.

"From Umgaon reports came that the crops are extremely good, and that there is every prospect of the best bhadoi outturn known for years. Murwa, it is stated, will be ready for cutting in a few days. The overflow of the Kumla has slightly damaged it here and there. On the other hand, however, there is a particularly large and fine stretch of it along the Kumla from below Silanath as far as Deodha.

"In Bhukwa the weather has been favorable for the transplanting of paddy.

"In Jhanjharpore the crops seem to be generally excellent, and cultivation to have made good progress. Another week's fine weather, it is reported, will allow the whole of the Rewan sub-circle to be cultivated; and as the greater part of the fields have been cultivated before the commencement of the agricultural season called the *pokh nischattra*, the people are very sanguine of a full outturn. Of the lands belonging to the extensive village Mehrathpore, only 75 beeghas remain to be cultivated. In Futtehpore the murwa will, in many fields, reach maturity in a week or ten days.

"In Motipore the murwa has almost all been transplanted, together with a considerable quantity of rice. The janera and murwa, it is reported, will be most excellent, and the rice lately sown expected to succeed. The area under cultivation, Mr. Williams believes, is fully equal to that in other years, while in some villages he states it is greater. He knows no tract where cultivation is not being rapidly pushed forward except the low country to the north-east of Dugjuri, where there is still so much water that he fears a considerable area must remain uncultivated this year. The heavy rainfall noticed in my last narrative did injury in parts of

Motipore. The rice in the low lands suffered from floods. This occurred especially in Doomra, Paree, Audhra, Bijai, Haidarpore, and Hurari.

2. *Poopree.*—Sowings completed some time ago; planting nearly finished; prospects of harvest admitted by cultivators to be all that could be wished; sowings no thinner than usual; present crops unusually thick. The present fine weather has been most welcome. The murwa crop was at one time endangered by excessive soaking, but it has now been weeded, and has recovered its healthy condition. Here and there fields both of murwa and keoni are almost ready for cutting.

3. *Naraya.*—This fine weather, Mr. Mosley reports, has done a great deal of good; fields have been weeded, and whole tracts of country planted out. Indian-corn is here ripening; murwa in several localities is already ripe, and the general crops will be ready in this sub-division in about 20 days.

4. The narrative for the Durbhunga Sub-division shows that the heavy downpour of 18½ inches between the 3rd and the 10th had an injurious effect upon the crops, while the lower lands were altogether swamped. The Bagmuttee and Kumla overflowed their banks, and some 20 square miles of country were submerged; but the break in the weather has wrought lately a great change. Mr. MacDonnell, who has run over all his circles, reports the bhadoi crop to be excellent. In place of the broadcast dhan, which was submerged and destroyed, transplanted rice has been placed, and there is every prospect of an abundant rice harvest.

Mr. Tripe, an old resident in this district, expresses an opinion that the present bhadoi crop is the finest he has seen for thirty-two years.

5. *Rainfall.*—The following table shows the rainfall:—

Mudhoobunnee	3·38 inches.
Bhukwa	6·45 "
Matipore	3·90 "
Jhanjharpore	3·35 "
Durbhunga	8·50 "
Poopree	4·7 "
Naraya	5·05 "

6. *Price-current for the fortnight ending 22nd July 1874.*

Name of locality.	Wheat.	Barley.	Rice.	Indian-corn.	Millet.	Gram.	Remarks.
Mudhoobunnee	14	16	11	13	16	20*	* Government grains.
Andramut	14	24	16	22	21	16	
Khujowlee	15	20	15	20	20	20	
Naraya	11	14½	15†	16	13	12	† Government grain. Murwa of last year 16 seers.
Durbhunga	11¾	19½	10	17½	.....	16	
Rosserah	.....	19	12	.....	19	18	
Poopree	.....	.....	.....	.....	.....	.....	
Setamurhee	14	16	16‡	17½	17½	18	‡ Government rice.

7. *Public health.*—Public health continues good. In the Setamurhee Sub-division, fever is reported as prevalent and there have been some deaths. Dr. Williams, writing of the Mudhoobunnee circle, reports:—

"I find the state of health of the people satisfactory. A great improvement has taken place in their condition. On a cursory examination one might say that but few were otherwise than healthy, but on examining a number of cases I find a proportion of from 7 to 21 per cent. to be anœmic. The people appear to have received a certain amount of flesh and fat, which they had lost, though their blood has not yet recovered its proper healthy state."

8. The following percentages, mostly of women, are given:—

		Examined.	Anœmic.	Percentage.
Bhukwa	Women	102	19	18·627
Ditto	Children	75	11	14·666
Ladania	Women	65	14	21·538
Ditto	Children	40	7	7·5
Deodha	Women	223	17	7·627
Hurlakee...	Ditto	50	9	18·
Ditto	Men	39	8	20·513
Kachra	Ditto	89	9	10·112

The greater part of those examined at Ladania were Nepalese. The Bhukwa figures were of persons receiving cooked-food, several of whom were from Nepal, and not of persons in ordinary health.

At Kachra, which is some 17 miles south of the frontier, 10 per cent. were anœmic.

9. In the Hussunpore circle of the Durbhunga Sub-division, a few cases of sporadic cholera have been reported. In Poopree, small-pox showed itself in Cherout and Parihar.

9½. *Relief works.*—In Mudhoobunnee the numbers on relief works have dwindled down to the number 17,885, and consists principally of women and children A portion of men retained are skilled workmen, engaged in building golas, bridges, &c. &c.; there are still some persons employed in petty village relief works, such as construction of village paths. Tokens are found to answer conveniently as a medium of payment, people readily take and exchange them for grain.

For the amount of grain expended in payment of relief works *vide* paragraph 11.

10. The following statement shows the number of relief laborers in the three sub-divisions :—

Name of Sub-division.	Daily average of laborers on relief works.	Public Works.		Circle Officers		Court of Wards.	
		Task.	Daily.	Task.	Daily.	Task.	Daily.

Total ...	.....	.....	1,58,014	

State of Private Grain Stores.

12. The Government rice is the only cheap rice procurable in the market at Parihar : early murwa has appeared in small quantities in one or two hauts, but the average selling price in the Poopree Sub-division is still 13 seers. South of Durbhunga murwa has fallen as low as 20 seers, and it is expected will soon fall still lower as the new crop comes into the market.

Relief under headings B, C, D.

13. Large quantities of grain have been given away during the fortnight to persons belonging to the higher castes either as gifts or loans re-payable at pleasure. In some places the Brahmins refused these gifts till the gift was associated with the word paincha, *i.e.*, a loan without security. 8,000 maunds have in one circle alone been advanced to 1,431

high caste families comprising 10,864 persons. In the same circle 1,619 maunds have been advanced to 214 low caste families containing 1,606 persons. Amongst the high caste recipients are 22 pundits well known in native society. In the Bhukwa circle 5,293 maunds have been distributed among 1,727 heads of families. In Motipore, Jhanjharpore, Kachra, and Umgaon, similar measures have been taken to relieve distressed families.

14. *Storage of Grain.*

Names of Circles.	Allotment.	Stored.	REMARKS.
Durbhunga	1,10,000	1,17,569	
Mahomedpore	1,72,000	1,47,114	
Hyaghaut	1,46,000	1,34,878	
Warrisnugger	1,00,000	97,168	
Bundhar	85,000	58,836	
Lehra	54,000	54,000*	* Approximately a large quantity transferred to Mudhoobunnee from surplus delivered.
Total	6,67,000	6,09,568	
Dosowta	2,14,000	1,77,523	
Gungda	1,32,000	1,41,184	
Rohar	2,08,000	1,83,864	
Singhea	84,000	75,946	
Hirnee	64,000	64,546	
Hussunpore	34,000	37,934	
Total	7,36,000	6,80,997	
Grand Total	14,03,000	12,90,562	

The following statement shows the allotments and receipts in the Mudhoobunnee Sub-division :—

Mudhoobunnee	1,20,000	1,06,629
Pundowl	75,000	70,333
Kewan	40,000	40,043

Hurlakee	48,000	30,536
Phet	43,000	30,350
Deodha	44,000	30,250
Bempatte	1,10,000	1,08,460
Palei	60,000	45,161
Arer	10,000	13,636
Total ...	11,60,000	10,04,804

15. *Grain Expenditure.*—The usual statements are annexed. In the Poopree and Seetamurhee Sub-divisions there has been an expenditure of 4,02,515 maunds, leaving a balance of 4,31,496, of which a portion has been transferred to Mozufferpore; and a second transfer is being made to the northern golas in Mudhoobunnee, which sub-division has already consumed 4,94,219 out of 10,04,804, leaving an unexpended balance of 5,10,585. Durbhunga and Hathee have expended 6,19,103, leaving a balance, less wastage, of 6,71,459. Some further transfers have become necessary, thus: 20,000 must be sent to Singhea from Hathee, 10,000 to Hussunpore, and 12,000 to Dosowta.

Storage and Consumption of Grain in the Poopree Sub-division for the Fortnight ending the 24th July 1874.

KALEE PROSONO MOZUMDAR,
Persl. Asst. to the Executive Engineer.

No. 8836F, dated Sarun, the 31st July 1874.

Memo. by—J. S. Drummond, Esq., Offg. Magistrate and Collector.

Forwarded to the Secretary to the Government of Bengal in the Statistical Department, Calcutta, for information, with reference to his Circular No. 80 of the 17th November 1873.

Narrative of Scarcity and Relief in the Sarun District for the Fortnight ending the 25th July 1874.

A.—State of the Country.

Abundance or scarcity of supply in the bazar.—While private importation of grain has continued to fall off in the Sewan sub-division, the imports in the sudder sub-division are shown to have still further increased during the past fortnight. The supplies from the Shahabad dearahs have materially contributed to these latter imports, but the importations from Oudh still also keep up well. The supplies in the bazars in the north and centre of the district are reported to be deficient, and sales of Government grain to the public have been recently sanctioned, if found necessary. The imports into the district by means of private trade during the last eight months have amounted to nearly 15 lakhs of maunds, and it is very evident that, but for private trade and the importations of Government grain, there would already have been an absolute deficiency in the food-supply of the whole population for a period of upwards of two months, taking the consumption at the rate of ½ a seer per head. This seems a sufficient answer to those who deem the allotment of Government grain to have been excessive, as in the face of the general deficiency in the food-supply in other parts of the country also, it would clearly have been imprudent to rely on private trade.

2. During the past fortnight the imports mainly into the sudder sub-division were, at Chupra, 10,900 maunds, of which 4,000 maunds were rice; at Revelgunge 39,999 maunds, of which 2,100 maunds only were rice; at Dooreegunge 8,173 maunds, of which 4,200 maunds were rice; at Panapore 81 maunds, and at Roopan Chap (in the Burrowlea thana of the Sewan sub-division) 141 maunds. The rice principally came from Dacca, but of the other imports 16,400 maunds were from Shahabad, and all the rest from Oudh. The exports to Tirhoot and Chumparun amounted to 837 and 434 maunds respectively.

3. Regarding the Chupra sub-division, Major Jackson reports as follows:—

"There is still no lack of supply of food-grains at the principal marts. Grain of all kinds keeps coming in by river carriage both from up and down country, and distribution goes on by local conveyance to different parts of the district. Partial cessations of heavy rainfall have rendered the roads comparatively passable, and so facilitated the transport."

4. Of the Manjhee sub-division, Mr. Tonnerre writes:—

"In the neighbourhood of the Ramgurh circle, supplies in the bazar are scarce. The same is the case as regards Chainpore circle. These two circles are badly off as far as bazar supplies go.

"The bazars are better supplied in the direction of Revelgunge and Maharajgunge. I think that supplies are equal to the demand in most places because the demands themselves are very slight.

"The ryots, however, do not depend on bazar supplies for their existence, because grain advances are being made rapidly. I am anxiously looking forward to the arrival of further supplies to complete advances."

5. Mr. Barry, in charge of the Pursa sub-division, reports as follows:—

"I have received weekly reports from 17 bazars, and nowhere is scarcity of supply mentioned. The supply seems fully equal to the purchasing powers of the people; prices everywhere are nearly stationary. The rates prevailing per rupee are as follow:—

		Seers.		Seers.			Seers.		Seers.
Common rice from		11	to	13	Barley	"	14	to	20
Wheat	"	14	to	19	Jaukerao	"	18	to	21
Cheena	"	14	to	20	Jsnera	"	17½	to	20
Jaufunia	"	14	to	19½	Makai	"	16	to	20
Arhur	"	20	to	23	Peas	"	20		0
					Urid	"	17		0

"The higher rates are in the bazars along the north of the sub-division."

6. The following is Mr. Wright's report of the Sewan sub-division:—

"There is no deficiency of supplies in the bazars, but private importation of grain from other districts continues to decrease. During the fortnight under report the importations amounted to 6,842 maunds of grain of different sorts, principally wheat, rice, and barley. The reason assigned by traders and others for this great falling off in importations is the same as that noted by me in my last fortnightly report, namely, that the large quantity of Government grain that is being given out in advance to the public is deterring the traders from importing grain at their own risk."

7. The diminution of the demand on the markets caused by the large advances of Government grain must, of course, have affected the importations into Sewan as well as elsewhere; but the fact that the imports still keep up here notwithstanding the large issues from the Government golas, conclusively proves the extensive depletion of local stocks, and demonstrates the necessity that there was for advances of Government grain to the ryots.

8. Concerning the Hutwah estate, Mr. Hodgkinson writes:—

"The price of grain in the bazars has risen during the past fortnight. No deficiency of supply has been reported from any quarter."

9. The police, however, report that the supply of grain has fallen short in Kutiya bazar.

10. *Kinds and price of grain selling at the different marts.*—The kind and price of grain selling at the principal marts and at the thanas and outposts are given in the annexed statement.

11. Prices have fallen at Goldengunge, Gurkha, Mushrukh, Pursa, Mirzapore, Burharea, and Roghoonathpore. At all other places prices have risen, or are either stationary or nearly so.

12. *Stock of food in the hands of the people.*—Under this head Major Jackson writes of his sub-division :—

"It is evident, at least in thana Chupra, that the people for the present are not severely pushed. They have not lately been coming in any numbers to apply for assistance as they did at first. This may be due partially to such stocks as they hold having been supplemented by Government advances, partially to the lowering of bazar prices, the coarser grains selling at 21 and 22 seers per rupee, and partially to their time being engaged in agricultural operations now in full swing. Collateral evidences all go to prove that a much greater degree of ease now exists throughout the sub-division."

13. The latter remark hardly applies to the circumstances of the northern portion of the thana, as, to my knowledge, the people in some villages there are and have been for many months simply kept alive by the relief works and the Government advances. At Scoaree, along about a mile of road, there are now congregated some 3,000 people who are forced to remain on the works, even on the bare subsistence wages now given. This is an extensive rice tract where the people are dependent entirely on the one winter crop. These people cannot leave the works until there is sufficient rainfall to admit of the preparation of their lands, now lying unploughed.

14. Regarding the Manjhee sub-division, Mr. Tonnerre reports as follows under this head :—

"From enquiries made, and judging from the eagerness with which the ryots are asking for their advances, I think that there is but little left in their hands. In several places there are no more stocks at all.

"The Ramgurh Circle Officer reports that in his circle there are numbers of people who have consumed entirely whatever provision of food they had.

"From other circles I learn that the people are better off, but those that have most have enough only for their own wants, and but for Government advances they would be unable to carry on their agricultural operations."

15. And for the Pursa sub-division Mr. Barry writes :—

"The stocks cannot now but be very slender, and, in my opinion, totally inadequate to support the population till the next harvest. Some of the ryots have told me that they still have a maund or two in their houses."

16. The other officers do not notice the subject. From information derived from planters and others, and judging from the indication of prices, there can be no doubt, however, that there is but little private grain in the north and centre of the district, and that not much is done by trade in those parts.

17. *Rainfall and state of the crops.*—There has been but little rain during the fortnight (the registered rainfall here having been only 2·25), and the fine open weather has been of great benefit to the bhadoi crops, the weeding of which has been diligently prosecuted. The crops injured by the excessive rain have recovered to some extent, and though their outturn in parts may prove deficient, there is still every prospect of an abundant harvest on the whole. Rain is, however, much wanted for the aghani rice crop. The rainfall has been very partial in portions of the district. At Dhubowlea, for instance, I hear that there has only been a fall of about 9 inches since the commencement of the rains.

18. The following is Major Jackson's report of the Chupra sub-division :—

"During the past fortnight the heavy rains have held off, and occasional showers have been the rule. This state of the atmosphere has proved very beneficial for the highland crops, which, in the lower grounds, showed symptoms of being drowned had the previous downpours continued. They are now very flourishing. But the look-out for the rice crops is unfavorable. The planting out of the young seedlings is much retarded, though in the swampier lands it is reported to have been carried on to some extent. Generally, however, the ploughing cannot be got on with, and rain is much wanted."

19. Regarding the Manjhee sub-division Mr. Tonnerre writes :—

"During this fortnight there has been very little rain indeed. The cessation of continuous showers of the preceding fortnight was most timely, and the weather has been all that could be desired. Weeding, which was quite prevented during last fortnight, has been carried on everywhere with vigour. The growth of rank vegetation, which was so encouraged by the heavy rains, has greatly diminished with their cessation. To render secure every chance of a fine bhadoi crop, we ought to have showers within the next few days, followed by intervals of sunshine.

"The prospects of a fine *bhadoi* harvest have well-nigh been ensured, and a little more moisture is needed to accelerate the growth of the plants.

"The weeds which during the rains were choking up the crops have been cleared away almost everywhere.

"The coolies are leaving the roads to do the ordinary field-labor, and it is only from one circle that I received complaints of want of labor.

"The *aghani* or takhmerzee dhan is in need of more rain; so far it has progressed wonderfully well, but more rain is absolutely needed to render it strong and vigorous.

"The sugarcane has improved very much and promises to yield a good crop."

20. Mr. Barry reports as follows concerning the Pursa sub-division:—

"During the fortnight light showers fell on the 16th, 21st, 23rd, and 24th, alternate with sunshine, and there was rather a heavy fall for four hours on the 22nd instant. The other nine days were clear and bright, and the heat was excessive, forming a marked contrast to the previous fortnight.

"This interchange of sunshine and rain is bringing the crops rapidly on.

"Everything is in the best condition, and there is promise of a splendid harvest two to three months hence.

"During the long break of fine weather we have had, the people have swarmed into the fields weeding, so much so as almost to have left the relief-works blank; much good work has been done, yet much remains. The *makai* has thriven wonderfully, and after weeding the plough is being run through it. In many early patches close to villages it is near its full height, and will in a month or less be fit for food, though unripe. The crop generally will be ripe in six weeks or two months, and will afford an abundant supply of food to the people, as it is grown very extensively in this sub-division.

"Next in importance to makai came bhadoi, rice, kodo, sawan, and arhur, all of which are doing well.

"Murwa (a very coarse grain) is seen in a good many small patches; it is nearly ripe, and in eight or ten days or less the ears will be full. It is only used by the lower classes, and is grown to a very limited extent, so its effects on the food-supply can be but small.

"*Indigo* has improved greatly under the hot sun, having acquired greater height, color, and brilliancy, a great advance on the stunted and washed out appearance it presented during the previous fortnight. The manufacture commenced here on the 20th instant, and the produce is reported good. The later sowings (or assori) are looking very well, now that the grass has been weeded out.

"I have seen a good many fields under water being planted out with rice, but the planting out of the aghani rice-fields has not yet become general."

21. Mr. Hudson, in charge of the Mushrukh sub-division, writes:—

"The break that there has been in the rains has quite saved the 'makai,' and has benefited all the crops; so that I really think that it would be impossible to have conceived a season more favorable than the present for an abundant harvest. There is a lull just now in agricultural labor; but I understand that the great business of transplanting the aghani rice crop will commence in about 10 days. Weeding is always to be seen going on here and there, and lately there has been ploughing of the 'makai.' The indigo crops have not turned out so bad as was anticipated; and in spite of all their forebodings, the planters have now everywhere some manufacture on hand. This employs a large number of laborers certainly, but small in proportion to the enormous laboring population of this district. The first general demand for day labor will be made by the task of planting out the great winter crop of rice; and I would recommend that the relief works, in the Bussuntpore thanah at any rate, be closed for a week by way of experiment, from about the 4th or 5th of the month. Mr. St. Joseph, in charge of the works, is of opinion that this might be tried without much danger; and every Circle Officer would be prepared to supply food to those who, failing to find employment, were left without the means of self-support."

22. There seems no necessity for incurring the risk of closing the relief works altogether for a period as proposed by Mr. Hudson. The fact that the numbers on the works in his sub-division on the last day of the fortnight under report had decreased by one-half as compared with the mean daily number during the fortnight ending the 27th June, conclusively shows that the people will, as in other parts of the district, leave the works of their own accord when they can get employment elsewhere; while if through the inability of the ryots to hire labor, agriculture is anywhere retarded, Mr. Hudson has the remedy in his own hands under the orders (noticed in the last narrative) for the employment of the relief coolies in agricultural labor, the cost being charged to the villages and individuals concerned and the amount adjusted hereafter in the manner pointed out. The required number of laborers would in such case be told off to each ryot, and the requisite quantity of grain for their support would at the same time be furnished by the Public Works Department official in charge of the particular work from which laborers were so diverted. Every ryot, too, must know what laborers of his village or neighbourhood are employed on the relief works, and if he is willing and able to employ them, any number for whom he applies may be made over to him on the understanding that he will be answerable for their sustenance during the period for which he requires them. I would repeat that I do not apprehend that there will be any difficulty about the people leaving the works of their own accord, provided that they can really get employment in the fields; but in case the work of transplanting should anywhere be hindered through their not doing so, and owing to the ryots themselves not applying for laborers, it should also be the business of the group superintendent to report all such cases, and to furnish lists of those whose labor is needed within their respective groups with a view to such persons being turned off the works under arrangement with the villagers or individual ryots concerned. As the names of all on the works are registered, and they are all employed in gangs, village by village, there can be no difficulty about this.

23. The Sub-Divisional Officer of Sewan makes the following report:—

"There has been very little rain during the fortnight. The entire fall as measured at Sewan was only ·86 of an inch.

"The fine weather we have had during the fortnight has enabled the ryots to weed their crops, and the Indian-corn, murwa, tangooni, and other bhadoi crops are now in an excellent and most promising condition. Indian-corn has sprung up several feet with the favorable weather we have had, and it has even in places begun to flower. Murwa and tangooni are in ear, and in some fields have begun to ripen. Aghani paddy is being transplanted, but not to any great extent as yet; as soon as we get heavy rain, the transplantation of this crop will be fully carried out.

"The inundation of the Gunduk mentioned in my last report was entirely on the lands which lie between the embankment and the river. It is a thing that occurs annually, but owing to the earlier setting in of the rains this year, and to the great quantity of rain that fell in June and the beginning of July, the inundation was earlier this year than usual, and consequently did more damage to the crops. The inundation, however, went down very quickly, and owing to this a good portion of the crops have been saved. Villages like Salempore and Hussunpore, which are protected by 'charki bunds' or inner embankments close to the river, suffered very little, and I think it would be a good thing to have 'charki bunds' made all along the river.

"With the assistance of some of the zillahdars of the Opium Department, whose services were kindly placed at my disposal by Mr. Tytler, I have had an estimate made out of the damage caused by the flood to the crops in the villages in pergunnah Dangsi, which is the only portion of the inundated tract that lies within this sub-division, the lands in pergunnah Sipah being within the Hutwah sub-division, and those lower down the river in Bussuntpore. The accompanying statement shows, as nearly as can be made out without a regular survey, the damage done to the crops in pergunnah Dangsi. Mr. D. N. Reid, who is in charge of the Suddowah relief circle, is making advances in grain, and giving assistance to all who have suffered by the flood."

The following is from Mr. Rattray's report under this head:—

"There have been bright sunny days with passing showers very favorable to the growth of the crops during the past fortnight.

"Owing to the favorable change in the weather weeding has been extensively carried on. Transplanting awaits further showers. Indian-corn promises an excellent crop, and murwa is fast coming to ear. In fact, the state of the crops in general is most hopeful."

24. The statement furnished by Mr. Wright shows only 4,239 beeghas of crops as destroyed by the Gunduk inundation out of an area of 13,651 beeghas submerged, and refers to only 15 villages. Report is awaited from Messrs. Hodgkinson and Hudson as to the damage caused in pergunnahs Sipah and Murhul respectively.

25. Subjoined is Mr. Hodgkinson's report of the rainfall and state of the crops in the Hutwah sub-division:—

Rainfall at Hutwah, 12th to 26th July 1874.

	Inches.
July 16th	·29
„ 17th	·19
„ 20th	·08
„ 22nd	·29
„ 26th	·13
Total ...	·98

"The condition of the crops could hardly be more satisfactory than it is.

"A good shower of rain is now wanted to enable the transplanting of the dhan to be finished on the higher lands."

26. *Condition of the people.*—There has been no material change in the condition of the people during the past fortnight. It remains what it was; that is to say, the people are supported by the relief works and the Government advances of grain. The zemindars themselves are now, I hear, in many quarters sending in their ryots for Government grain and standing security for them.

27. Under this head Mr. Tonnerre reports, regarding the Manjhee sub-division, as follows:—

"I have been able to see more of the ryots during this fortnight, because the exhaustion of their stocks has made them more eager to obtain the Government grain. They go to their centres, and finding no grain there come to my head-quarters.

"Numbers have come to me in this way, and I have been able to judge pretty accurately of their condition. My opinion is that they exhibit signs of having been underfed, and I have seen men who, though young and strong, were decidedly thin.

"In the Ramgurh circle nearly the whole of the population is underfed, and cases of emaciation can be seen on going through the country.

"In a good season the ryots store away part of their harvested crop for their own use, and sell the rest.

"Last year the crops were so bad that but little was stored and none was left to be sold. The consequence was that, having consumed their stocks and having no money, the royts have found themselves without resources, and would have fared very badly but for Government measures taken for their relief.

"The little money some possessed enabled them to buy small quantities of grain at the artificially lowered rates in the bazar, and so to keep body and soul together. It is *now* that they are pinched, their own grain being consumed and their money spent.

"I said 'artificially lowered rates' because there is no doubt that if the whole population depended on the bazar supplies, even those with money would have found them beyond their reach.

"Here, at Ekma, I see daily numbers of men who can barely be kept from disputing amongst themselves as to who gets helped first."

28. Of the Pursa sub-division Mr. Barry writes:—

"The condition of the people is much the same as it was at the date of my last narrative, and I have noticed no marked change; many of the ryots look as if only half-nourished, and many of the coolies on the roads are in a deplorable condition, being quite unable to earn a living at piece-work. They are also unable to obtain remunerative employment at field-work (being rejected for abler men) or they would never consent to remain on bare subsistence wages on the roads. Many of these poor creatures are lame, half-blind, leprous, or infirm through old age or disease. Instead of able-bodied men, boys of 10 or 12 are employed to work with coolies. Altogether, the appearance of these gangs, more especially on the Makair road, is distressing. They are really *relief gangs*, and if the works were closed, I do not know where these infirm people would turn for a meal. As to the ryots, I do not think their condition is improving; I fear it will gradually deteriorate till the harvest is ready, even in spite of the Government advances of grain.

"The operations connected with the indigo manufacture, the planting out of rice, and weeding generally, ought to give employment to the laborers for hire, and will, I hope, leave very few on *relief works proper*.

"The Nunia class are well off, having taken to piece-work largely wherever available, and they can make a capital wage at the present rates. They work astonishingly hard, and are late and early at it."

29. The report of the Sewan Sub-Divisional Officer is as follows:—

"I have nothing to add to my former reports under this head. The people still continue in good condition, and no cases of serious distress have been brought to notice during the fortnight."

Mr. Rattray makes the following report under this head:—

"There is nothing requiring special notice as regards the condition of the people. Distress of a serious nature still keeps off, and the mass of the people seem able to cope with the high prices prevailing. Amongst the poorer classes the Government relief measures are ample for the prevention of distress or destitution."

30. Concerning the Hutwah sub-division, Mr. Hodgkinson remarks:—

"The condition of the people continues good, and as every one who could work in the fields has been earning daily for several days more than would be sufficient for two days' food, the poorer classes may be said to be in a somewhat better position than they have been for some time past."

31. *Known cases of misery and starvation.*—There have been no cases of starvation reported.

32. *Grain-thefts or robberies.*—There have been 20 cases of grain-theft during the fortnight.

B.—Relief Works.

33. The annexed statement shows the relief works in progress, and the numbers employed thereon. The mean daily number employed during the fortnight was 125,373, and the number on the last day was 83,009. The mean daily numbers both of the previous and of this fortnight, and the number on the last day of this fortnight, are shown below for each sub-division:—

Sub-Divisions.	Mean daily number of the previous fortnight.	Mean daily number of the present fortnight.	Number of persons employed on the last of the 14 days.
1. Chupra	22,801	24,048	20,211
2. Manjhee	17,272	13,101	10,526
3. Mushrukh	79,365	62,986	42,904
4. Pursa	4,980	5,056	4,577
5. Sewan*	25,722	17,675	2,720
6. Hutwah	4,206	2,507	2,071
Total ...	154,346	125,373	83,009

Now that the weeding operations are over, and until the transplanting of the rice crop becomes general, the numbers on the relief works may be expected to increase. The number on piece-work during the fortnight was 4,528.

34. The only complaint that the relief works interfered with agricultural operations that I have heard was from a Circle Officer near Durrowlee, a native indigo planter, who alleged that though higher remuneration was offered for field-labor, the people preferred

* It is feared that the extraordinary decrease at Sewan must be due to the coolies under Mr. Lennox having been driven off the works. Enquiry is being made. The strictest orders had been issued not to turn anyone off the works in the endeavour to introduce piece-work; but it is feared that there must have been some mismanagement or misunderstanding, causing the people to leave the works in a body.

remaining on the relief works, and he accordingly recommended that they should be closed altogether in that neighbourhood. The Sub-Divisional Officer of Sewan contented himself with bringing this complaint to notice *for orders*, though he had full instructions to act in the matter himself in such cases. I directed Mr. Wright to enquire into and deal with the case personally; though, considering that elsewhere the relief works had been freely deserted for field-labor, I had strong doubts of the truth of the statement, and its incorrectness would seem to be conclusively demonstrated by the fact that on the last day of the fortnight and before any action could have been taken on the complaint, the numbers on the relief works in that thana had decreased to 746 from a mean daily number of 6,618 during the fortnight. It is probable that the native planter concerned was anxious to obtain labor without adequate remuneration, and was desirous that the works should be closed as a means to that end.

35. Under this head Major Jackson reports as follows regarding the Chupra sub-division:—

"The group superintendents all report a sufficiency of labor in the fields, and in several instances give lists of the able-bodied who have returned to their villages. Only the weaker men, women, and children now remain on the relief works."

36. And the following remarks of Mr. Barry, in charge of the Pursa sub-division, may also be quoted:—

"I have not had time to inspect many works of this fortnight, but on those I have seen on the roads to Makair, Setalpore, Berway, and Jelalpore, the *relief gangs proper* have dwindled greatly in numbers, the coolies having been drained off to field-work owing to the fine weather, and the Nunia class have all taken to piece-work wherever available, so that none but boys, old women, and infirm men are left on subsistence wages on the gangs which I have been able to inspect.

"Piece-work has been taken up freely on the Setalpore road, and on the Berway and Jelalpore roads it is exclusively in force; but only strong men can earn a wage in this way. The feeble therefore who cannot get hire in weeding, &c., still congregate in small relief gangs on the roads."

37. *State emigration to British Burmah.*—There are 17 emigrants in the depôt here.

D.—Storage of Government Grain.

38. *Distribution and expenditure of Government Grain.*—The usual statement accompanies. The additional allotment of Government grain has been increased to 3,42,000 maunds, viz., 1,92,000 maunds from Chumparun, 65,000 maunds from Shahabad, 35,000 maunds from Patna, and 50,000 maunds from Calcutta. The fresh grain is coming in but slowly, and with the rapid exhaustion of the golas, besides shifting Government grain from different points, it was found necessary to purchase 15,000 maunds of private grain in the Revelgunge market, on the understanding that its value, together with the profit on the transaction, would be repaid in Government grain on its arrival. This grain was arranged for at Rs. 2-5 per maund, to be repaid at the market value at the time of repayment, together with a profit of 2 seers in every rupee. It is not found that the deficiency from wastage or theft in the quantities supposed to be stored at the different golas is everywhere great. For instance, at the Maharajgunge gola, out of 20,000 maunds stored there was only a deficiency of 143 maunds. In some cases there is actually an excess, as for instance at Bussuntpore, where with 40,000 maunds supposed to be stored there was an excess of some 600 maunds on the gola being emptied.

39. Under this head Major Jackson reports:—

"The amount of grain has been much reduced by the advances given, and my indents on some of the golas in Bunniahpore and Paighumberpore have come back refused from exhaustion of the supply. They were met from the gola at Chupra Serai. That and the one at Revelgunge are now very low; but as grain is coming in daily the requirements of this thana circle will be covered. Mr. Macrae has carted away about 5,000 maunds of coarse grain to Arwa, but will require more. His present supply will suffice for the demands made upon him until the arrival of more grain."

40. With regard to Manjhee, too, Mr. Tonnerre writes:—

"The grain allotted to this sub-division is all but exhausted, and advances are necessarily at a standstill till further supplies can be received.

"All the lists are ready except in Bugowrah circle, which I hope to have soon completed.

"The villagers are most unfortunate in asking for grain, which we have not to give.

"Take the case of the Ekmah gola. There were received at first 10,000 maunds 15 seers. That quantity, plus 5,454 maunds 31 seers received afterwards, makes up a total of 15,455 maunds 6 seers; but of that quantity 3,364 maunds 34 seers 12 chittacks have been distributed amongst those employed on relief works. This leaves 12,080 maunds 11 seers 4 chittacks for advances to ryots. I was obliged to send 499 maunds 12 seers to Bugowrah (a mere drop in the ocean); this leaves 11,581 maunds 10 seers 8 chittacks, out of which 8,809 maunds 5 seers 4 chittacks have been distributed, leaving a balance of 2,772 maunds 5 seers 4 chittacks. Grain is most urgently wanted to finish all advances."

41. More grain has now been sent and is being sent to the Manjhee sub-division as it comes in.

42. Mr. Hudson, too, reports as follows :—

"During the past fortnight, having been suddenly informed that the Burooah gola was exhausted, and that the golas of Maharajgunge and Syedpoora were approaching the same condition, I caused 3,000 maunds of rice to be transported from the Gopalpore gola to Burooah for payment of the coolies on the relief works. At the same time I issued orders to the goladars of Burooah, Maharajgunge, Gopalpore, and Mushrukh to issue no more grain upon tuccavee indents, until a fresh supply of grain had been imported into the district and stored with them. The Burooah gola is now amply reinforced, and the payment of advances has been resumed at Gopalpore. The cost of transport of the above quantity of grain has amounted to something more than Rs. 300. It was effected by Mr. Cosserat at the usual rate which is paid for carting in this district."

43. *Probable grain requirements.*—The accompanying statement, revised according to the latest date, shows the probable grain requirements so far as they can be now estimated, but it is too early yet to say whether the future requirements may not exceed such estimate. Should there hereafter be any necessity for sales to the public on any considerable scale a larger allotment may be needed in some places, and it is yet to be determined how long the relief works may have to be kept open. In any case, after the cessation of the rains, the roads which may be cut up by the continuous transport of grain throughout the rainy season will need considerable repair, which would have to be effected even if work was not required, as it is probable it will be, for the relief of the large surplus laboring population who, after passing through so calamitous a season, will certainly not, as in other years, have any capital to fall back upon whilst unemployed. It is to be borne in mind, too, that there are many tracts of exclusively rice land throughout the district where ryots will have to be supported until the winter harvest.

E.—Advances of Government Grain.

44. The statement accompanying exhibits the advances of grain made up to date. The requisite grain for the remaining distributions is still the great want. It is being pushed on, however, as fast as it arrives.

45. Regarding the Chupra sub-division Major Jackson writes under this head :—

"The advances made to the ryots have, I find, been very fairly dealt with by them, and the distribution made in accordance with the lists. Only two or three complaints have been made to me to the contrary, which have, however, been easily settled, and found to arise from mistake and no attempt to defraud. Applicants for advances have been falling off lately, probably in consequence of the people being engaged in tillage and not affording the time to come in. The remainder of the villages on the list will now, it is hoped, be soon all dealt with."

46. Of the Manjhee sub-division Mr. Tonnerre reports :—

"In the Jaintpore circle the villagers take the largest advances, and Mr. Harman, of Jaintpore Factory, on whose knowledge of the country entire reliance may be placed, assures me that every maund asked for is absolutely necessary.

"The rapidity with which Mr. Harman and the other Circle Officers have carried on their work, considering, that with the exception of two zemindars, they have also to watch their indigo preparation, is a matter of congratulation.

"I have nothing more to say about advances, but that everywhere the lists have been drawn up and the bonds signed by the ryots, and that grain only is wanted to complete these most important of relief measures. I have obtained collateral security from all the leading zemindars, and the smaller ones will, in a few days, have all given their security also.

"I do not apprehend any loss to Government in the way of non-recovery of value of the grain advanced, as, in my opinion, every village will pay up when called upon to do so."

47. It is satisfactory to find that Mr. Tonnerre has succeeded in his sub-division in getting the zemindars to go security for the advances.

48. Mr. Barry, in charge of the Pursa sub-division, writes as follows :—

"This is by far the most important work now on hand, and I have devoted the whole of my time, literally from morning to night, in examining village lists, passing orders, and granting cheques for grain. The bungalow here has been besieged by 3 or 400 persons daily, and not to keep the people away from their fields, I have been pushing on the work as fast as possible. Consequently I have not been absent from head-quarters for a single day during the fortnight, and have only been able to make short excursions to Bankerwa, Setalpore, Makair, &c., and back again before breakfast. The duty of verifying the bonds (before the cheque is granted) is a very heavy and important work, and took up much of my time. Baboo Tara Pershad has now taken up the work, and is doing well. I am sorry he has sent in his resignation at such a critical time. At the time of verification the bond is read over to the assembled ryots, and each man individually and separately is asked what grain he is to receive under the allotment list. They are all generally well instructed on this point; if not, they are told what they are to receive.

"The putwaree invariably signs the bond as a witness, and certifies that so many beeghas, &c., pledged are actually in the possession of the applicants. Thus, before signing the cheque on the gola, I have an opportunity of seeing all the ryots, asking them any questions, and, if necessary, increasing or diminishing the amount of grain sanctioned.

"Numerous lists have come in from the group superintendents, but, from various causes, most villages have one or more additional lists, and almost every tolah has a list to itself.

This no doubt multiplies the work, but in the limited time at my disposal it was unavoidable. Had I refused lists and applications because they did not include the whole of a village, I fear the work would have been still further delayed, and many persons' names included who really were not in want of help. It is also to be remembered that many putwarees, in the first instance, paid no attention to the calls made upon them for lists, and that group superintendents had to find out those in want the best way they could. But by far the greater portion of lists have been prepared and put in at the instance of the assamis themselves who have employed mukhtears here to do the writing. So, in point of fact, the people in want have themselves come forward to ask for the grain.

"Some little delay must necessarily occur in each case, but though the work has been very heavy, I have always got through each day's work without allowing arrears to accumulate, and have thus given cheques for the grain sanctioned as fast as the applicants came for them; so people are kept little waiting But at the gola here, it is otherwise; the complaints are loud and general that the goladar keeps cheque-holders waiting for weeks; this, I am satisfied, is too true, and I asked that the goladar should be superseded and an additional assistant appointed a week ago. I have again pressed for his removal. The signing the bond is not a mere formality. The ryots are fully alive to the fact that they will have to repay the value of the advance, and often at the last moment unanimously ask me to cut down the allotment by half a maund or a maund all round. In all the 256 instances in which I have made advances, I am satisfied that the security is sound and sufficient, and that there will be no difficulty in realizing the money when the time comes. Those in want who have not been able to give any security but their houses, and who are not day laborers, have received advances under heading D, as charitable advances, the recovery of which is doubtful. But the quantity advanced under this head is inconsiderable, all applicants who work for hire having been struck out. I have found it necessary to refuse a small number of applications for grain, made by zemindars for their own use, or by persons who were undeniably well off, and quite able to purchase grain for their own wants in the bazar. Such applicants (mostly isolated cases) merely wanted to get the Government grain at the cheap rate without interest, and were no way in distress. But wherever there was the slightest doubt the advance was always made.

"These advances have to be made on very imperfect evidence, and no doubt some persons have taken advantage of that circumstance to take advances when they could have done without them, and have thus abused the liberality of Government. But it is really very hard to ascertain the actual condition of an applicant, and, as a rule, we have only to take the putwaree's and group superintendent's word for it. The zemindar renders no assistance, but stands apathetically on one side when he does not show open hostility and obstructiveness.

"It has been brought to my notice in two instances, that a community of ryots, rather than take advances from their landlord, has preferred to go without grain advances altogether; from which it may be inferred that they are not badly off.

"During the fortnight I visited Setalpore, and I find that Shaik Abdool Ali has acquired more confidence and is making the advances freely. He has advanced 1,785 maunds in 31 villages, leaving 54 villages for disposal.

"The Moonsif reports that he has nearly completed his lists. Great credit is due to him for the rapid and satisfactory manner in which he has done the work. Mr. Llewhellin of Arwa, and Mr. Macgregor of Tehtee and Jelalpore, are still making advances to individuals and hamlets that were left out in the first lists from various causes. It is therefore difficult, if not impossible, to estimate how much more grain they will require. Mr. Tulloch, of Nowadah, is the only Circle Officer whom I have not seen during the fortnight, but his advances were all but completed at the end of the previous fortnight, and I have reason to know that everything in his hands will be well looked after. As regards the villages in my own hands I have advanced during the fortnight 9,976 maunds. Since the commencement of operations I have advanced 17,732 maunds in 120 villages and large tolahs, which leave about 50 villages for disposal out of the 170 in my hands.

"The number of separate advances made by me is 256, which is caused by the fact that there are two or three hamlets in almost every village. The above amount advanced falls at the rate of 145 maunds per village, so for the remaining 50 villages I shall probably require about 8,000 maunds; but during the last fortnight, in the prospect of the makai being ready for food within a month or six weeks, I have been slightly reducing the average amount advanced to each household; and the forward state of the murwa has been taken into consideration in the advance to the lower castes.

"The villages in Mr. Macgregor's two circles (by including the 42 small villages of the Lallapore talook) now amount to 134, in which he has advanced 25,059 maunds 35 seers up to date. He talks of giving a second series of advances in many of these villages, but in the promising and forward state of the crops, I hope this will not be required. In all 52,097 maunds have been advanced in 357 villages, leaving only 152 villages undisposed of."

49. Mr. Hudson thus reports the proceedings in the Mushrukh sub-division:—

"During the past fortnight I have made 43 advances of grain to villages, making 122 in all up to date; the quantity of grain advanced amounts to maunds 17,062.

"I have also made 38 'recoverable advances' under clause D of the Central Relief Committee's notification of 4th March last. These last-named advances amount to an expenditure of Rs. 3,856.

"Lastly, I have advanced Rs. 1,626, in sums of Rs. 25 per head, for the purchase of seed-grain and cattle, and the time for sowing and ploughing being by this time over, have closed this item of account. I have now some 25 tuccavee cases on my file, of which over 20 are ready for immediate disposal by payment of the advance prayed for, and only await the appearance of the applicants to be so disposed of.

"I have now asked each Circle Officer to take some additional villages, and have also created two new circles, which I have handed over respectively to Moonshee Gunga Pershad, Naib Tehsildar, and to Damree Lal, Canoongoe, both of whom have joined me within the last few days. I have thus reduced the number of villages on my own personal list to about 70, and these I shall further portion out to the 47 group superintendents who will proceed to investigate and report on their existence and whereabouts, and on their necessity for taking advance.

50. Regarding the Sewan sub-division, Mr. Rattray reports as follows:—

"The village lists have been all but completed. Out of some 1,200 villages, there remain about 95 villages in which the lists are under preparation. The grain allotted in accordance with the village lists already prepared amounts to 1,15,533 maunds 26 seers 8 chittacks, of which about 79,366 maunds 9 seers 6 chittacks of grain have been actually distributed amongst the people, and but for the fact that the Government stocks have been exhausted to the total amount already allotted, would now be in the hands of the people. When all the village lists have been completed the total allotment will probably amount to 1,35,000 maunds.

"Preparations are in force for the supply of a further quantity of Government grain for the requirements of this relief sub-division, and a small consignment has already been received.

"A sum of Rs. 2,000 was paid during the fortnight to Circle Officers for charitable relief within their respective jurisdictions."

F.—Charitable Relief.

51. The number receiving this description of relief is shown in the annexed statement. The numbers have now increased to 44,337.

52. Major Jackson remarks of the Chupra sub-division:—

"This remains very much the same, but a slight increase is visible in the Goldengunge circle of cotton given to purdah women. A large malik and zemindar of that part of the country named Ram Pertab Sing has come forward and expressed his readiness to distribute cotton to the outlying villages without constituting a fresh circle. I have advanced him cotton and Rs. 100 to commence operations, which will be reported hereafter."

53. Concerning the Manjhee sub-division Mr. Tonnerre reports:—

"Charitable relief operations have been extended during this fortnight, and pretty nearly all those who require help in this way are down in the circle registers. There are 2,293 persons receiving charitable gratuitous relief in grain, and 547 women receiving cotton for spinning, on the registers of the sub-division at present, but the numbers are increasing.

"Only those who *absolutely* require gratuitous relief get it, and it must not be thought that only 2,293 persons applied for it, because it is refused to many who can in one way or another provide for themselves.

"A native doctor, who has lately joined, is proving of great use in looking after the sick and diseased who come for help.

"The system of bringing help closer to the recipients by supplying village by village, is being developed as rapidly as possible, because there are in every village poor people quite unable to go to their respective relief centres for supplies.

"Owing to the slightly enhanced rate given to weavers for converting thread spun by purdah women into cloth, several 'Jolahas' have applied for the thread. The previous rates were far too small."

54. Mr. Barry, in charge of the Pursa sub-division, observes:—

"The system introduced is working quietly and smoothly, and I hear no complaints. I believe every person in real distress who applies is promptly relieved. The numbers on the registers have not yet begun to diminish. The higher rates for weaving cloth will prove acceptable to a considerable class. My time has been so fully occupied by the grain advances that I have been compelled to leave this subject very much in the hands of the circle officers, who are now familiar with the system, and quite competent to deal with it."

G.—Financial Results of the fortnight.

55. The financial results of relief operations are given below:—

	Rs. A. P.	Rs. A. P.	Rs A. P.

J. S. DRUMMOND,
Offg. Magte. and Collr., Sarun.

SYUD MAHOMED FUZL,
Manager.

No. 2587F, dated Motiharee, the 29th July 1874.

From—H. KEAN, ESQ., Collector of Chumparun,

To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit the fortnightly narrative for this district for the fortnight ending the 25th July 1874. Its preparation has been delayed owing to all the relief officers of the district having been summoned to meet the Lieutenant-Governor at Gobindgunge, and been unable to return from there till the afternoon of Saturday, the 25th instant. The Ramnuggur narrative has not yet been received, but will be sent on separately as soon as it comes to hand.

The state of the country, after the recent inundations, has made Mr. Howe's journey back to his head-quarters much slower than it would ordinarily have been.

A.—STATE OF THE COUNTRY.

There has been a long sunny break which has been of unmixed benefit in allowing weeding operations to be carried on, and, except where injured by inundation, the prospects of the crops are particularly good throughout the district; they are particularly forward in the Gobindgunge sub-division, but generally, except in the north, the harvesting of the lesser crops will begin some 15 days hence, and then will go on almost uninterruptedly till the staple crops come in.

The bazars continue to be supplied from local stores, which are being freely spent in view of the approaching harvest. All the Sub-Divisional Officers are of opinion that there is now very little grain in the country. The sales of Government grain have revived, which is a further indication on this point. The lighter rates lately introduced have of course something to do with this. The rates for local produce are, however, favorable as shown in the table annexed:

MOTIHAREE SUB-DIVISION.

NAMES OF BAZARS.	Rice, best.	Rice, coarse.	Wheat.	Cheena.	Barley.	Uritel.	Maize.	Kodo.	Urhar.	Gram.	Seed-rice.	Mosoor.	Moong.

Lowriah	.....	13	.....	21	.....	16	.....	12	.....	.....	.....	.....	13

The effects of the inundations reported in my last narrative have been very much less harmful than was anticipated. The floods passed off with surprising rapidity, and the sunny weather which succeeded them has restored many of the crops which had been given over as hopeless.

In the Motiharee and Dhaka sub-divisions the floods were due to excessive rainfall and the overflow of the local streams. In the Bettiah and Govindgunge sub-divisions the damage was caused by the Gunduk bursting the embankment. In both these latter places the injury so far appears to have been very slight. In the Dhaka sub-division also only the maize, which was planted at hazard on low lands in the hope of an early crop, has irretrievably gone. In the Motiharee sub-division the injury has been greater, the crop of about 1,000 acres in one tract having been submerged. This damage, however, is very local, and no special remedial measures are necessary beyond those already in force. The ryots who have suffered will receive some further advances. They decline to sow the submerged tracts at present, and are reserving them for winter crops for which their fertility will be much enhanced by the silt deposit. In both the Motiharee and Dhaka sub-divisions the flooded country was visited, as soon as it became traversable, by the two Sub-Divisional Officers. In one village only was seed-rice applied for; it is still procurable in the local markets, but is naturally very scarce now that the sowings have been completed.

A few cases of cholera have been reported from the Dhaka sub-division, and the Native Doctor is traversing the villages in which they took place. Otherwise this continues to be for the people of all classes an exceptionally healthy year.

B.—Relief Works.

The annexed table shows the works going on, and the attendance on them; those superintended by the circle officers and by the Department Public Works being given separately for each sub-division.

The numbers are still decreasing. In the Motiharee sub-division the circle officer's works have been closed altogether. Of the number shown on the Department Public Works over 50 per cent. are persons who are paid at ordinary rates or as skilled laborers; the relief laborers properly being paid at bare subsistence rates. There is still much to be done in the fields; in fact, the weeding of the rice has not been half got through, though that of the maize has been nearly finished.

Mr. Weekes reports from Gobindgunge that his laborers are very unwilling to leave the works, and that those which have been closed will have to be re-opened after the weeding is over. Mr. Weekes has a sufficient reserve of works for this purpose, as indeed have all the sub-divisional officers. The relief works afford the attraction of constant employment or rather of regular remuneration, and it is this contrast to field labor, where the employer retains and dismisses the work-people at his pleasure, that induces so many to cling to the works, though remunerated at a lower rate than is given for working in the fields. But of the relief laborers proper, by far the greater part is composed of women and children, whose adult male relatives are earning wages elsewhere.

I have accepted Mr. Weekes' figures which give the daily average of relief laborers under him as 6,888. These figures have not been attained by dividing the total number of laborers employed during the fortnight by 14, but (as far as I can see from the returns) when a work has been opened for one day only in the fortnight, the numbers employed on it in that day have been taken as the daily average. I have not had time to find out precisely on what principle the figures have been given, but from the total number of persons shown employed under Mr. Weekes during the fortnight, I make his daily average to be 472 only. Mr. Kilby, in the Dhaka sub-division, made an attempt to introduce village conservancy works, but failed, as he found that the laborers entered their names, then went to their fields, and reappeared only to get their doles. He has discontinued all these works, which are quite impracticable, as the number of laborers in each village is so small that it is impossible to supervise them except by an agency, the expense of which would be utterly disproportionate to the work to be done.

Owing to the nature of the work now being carried on, task-work has generally ceased, and only an estimate can be given of the laborers employed or not employed on task-work. Of those working under the Department Public Works, one-half are so employed, and under the circle officers none.

C.—Transport of Food.

The only private importer now is Mr. T. M. Gibbon, and it is not at all likely that private importation will revive so late in the season, and in the face of the prices now prevailing. Mr. Gibbon's grain is part of a consignment ordered some time ago, and is coming to Bettiah.

Nine thousand four hundred maunds of seed-grain intended for Ramnuggur are being sent from Gobindgunge to Sarun, while 5,000 maunds of rice have been moved up to the Motiharee sub-division.

In the Bettiah sub-division 18,000 maunds have been sent from the river-side gola at Rutwal to Sarun, and the rest of the grain ordered to be transferred to that district is being despatched as fast as possible.

D.—Storage of Grain.

The grain is still well distributed, with a reserve at each gola. In the four sub-divisions reported on the quantity now in hand will, it is calculated, just meet the exigencies of the next two months, leaving none to spare. An abstract of the transactions of the fortnight in each sub-division is subjoined, the detailed statement showing the expenditure as compared with the allotments and receipts being appended.

Up to date of last return.				During the past fortnight.

E.—Advances to Private Persons.

The systematic advances have now been generally closed, and further advances are being issued only to meet special instances, as in the case of the inundated tracts. In the Bettiah sub-division the private advances from the Raj and European residents have been on such a liberal scale that a very little Government grain has had to be issued direct in this way.

F.—Charitable Relief.

The advances have operated so favorably that there has been no increase under this head The results are appended.

Owing to the different periods for which relief is given, some of the relieved being daily recipients, while others get charity varying from a day's to a month's supplies, only an estimate of the number daily in receipt of charitable relief can be shown.

The Motiharee relief committee administers its own funds only, both for its home relief system, its poor-house, and hospital.

The attempt to introduce home-relief by spinning, and such light labor, has been generally a failure except in the towns and in Mr. Weekes' sub-division. This is due to the character of the people in the rice-growing tracts, all of whom pursue out-door occupations irrespective of caste, and almost irrespective of social status.

As the system of charitable relief accounts for this district has been entirely altered by Government Circular No. 4640—S.R. of the 22nd July, which was only received here yesterday, none are furnished with this narrative.

No. 2599F, dated Motiharee, the 30th July 1874.

From—H. F. J. KEAN, ESQ., Collector of Chumparun,

To—The Offg. Secy. to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor, in continuation of my No. 2587F, dated 29th July, to forward in original the last fortnightly narrative for the Ramnuggur Sub-division which has just been received.

The narrative calls for no remark, except that the expenditure shewn in it under heading G is only part of the details of the gross sum already shewn in the district narrative as made over to Mr. Howe, and included in the gross total expenditure up to date.

Mr. Howe has submitted no detailed returns under the heading Charitable Relief, but it is hoped that these can be supplied by all the sub-divisions in time to be submitted with the next narrative in the form lately ordered, and which will bear all details under this head from the beginning of operations.

Narrative of Scarcity and Relief for the fortnight ending Saturday, 25th July 1874.—*Ramnuggur Sub-Division, Chumparun District.*

A.—STATE OF THE COUNTRY.

DURING the fortnight the weather has been all that could be desired. At first there was heavy rain (10¾ inches were registered at Bagaha), but the much desired break has now fully set in. The bhadoi rice and inferior grain crops are in a very forward condition. Colonel Boulderson writes (and his remarks are applicable to a considerable portion of the sub-division also) : "More land has this year been sown with the inferior bhadoi crops than in ordinary years, the obvious reason being the desire to secure an early crop for immediate consumption, and to some extent the fear that possibly the aghani might fail, and the desire to be provided against such a calamity has induced people to sow as much bhadoi as possible." That the bhadoi crop will turn out splendidly is now almost matter of certainty, and the aghani prospects are excellent, though of course all depends on the continuance of the rains in September. Field operations for the winter crop are everywhere being carried on. Weeding now attracts large numbers of women to the fields. Practically the sowing may be considered as completed, though a few days still remain. Those, however, who could get seed have used it, and those who were too poor, and who have hitherto failed to obtain it, will have to leave their fields unsown.

The deficiency of seed-grain is principally confined to Butsura tuppa, where a good deal of land has been left unsown. In the east, seed grain has generally been procured from tuppa Ramgir and Nipal. This deficiency is felt only by the poorer class of cultivators—the petty holders of a few beeghas—and therefore the injury, however serious to a numerous class, will not affect the general outturn of the crop.

Statement A shows the amount of seed-grain distributed, *i.e*, *the degree to which people of this class have been assisted by Government.* Had the seed-grain arrived in time, I think it could have been fully distributed and any deficiency removed. But it began to arrive when the country was flooded and transport into the interior was impossible. A good deal was spoilt by the heavy rain on the road, and when it reached Ramnuggur could not be pushed on into the interior. The Statement C attached to this report shows the prices prevailing. There is not much to add to what I said as to the condition of the markets, and affairs will probably continue as at present until the cutting of the autumn crops, when food-grain will become more plentiful and cheap. Our sales have increased considerably, and this is due, first, to the extension of our wholesale system; and secondly, to our rates being assimilated to those of Bettiah, by which accidental competition was avoided.

On the whole, then, there has been no change during the present fortnight, the condition of the people continues good, the weather has been extremely favorable, and the prospects of the crops are excellent, especially those of the bhadoi, a plentiful harvest from which is almost a certainty.

B.—RELIEF WORKS.

For practical purposes these may be considered closed. No able-bodied men required in the field come to our works, which are kept open only in order to finish a few important lines of communication, and also with a view of affording employment should there be a rush in August and September. Statement B shows how largely the numbers on our works have diminished. Task work is exacted and payments continue in kind. Women and children argely predominate, though even these have latterly gone to weed in the fields.

C.

Under Commissioner's orders, and with the sanction of His Honor the Lieutenant-Governor, one lakh of maunds of grain is being sent by boat to Sarun. We are very busy in starting this large quantity, which is urgently required. The arrangement is that Mr. Drummond, Collector of Sarun, is to send boats to Bagaha, and that we are to load and start the grain. I propose in the first place to send from Bagaha, and to replenish that gola from the eastern ones, as Bagaha is on the river and the grain can thus more easily be despatched. The amount to be sent is large, and it may at first sight appear that we are too much denuding our golas. But the estimate has been carefully based on previous expenditure and present actual requirements, and I think while with what remains we shall

be safe; it will be an advantage towards the end of the famine to have less in so outlying a tract, especially if the grain is more urgently required elsewhere. As I have before given a reasons for my estimate, and as the matter has lately been discussed with the Commissioner and His Honor the Lieutenant-Governor at Gobindgunge, I need not advert to the matter more fully at present.

D.

The following Statement D shows the amount of grain at our golas :—

	M.	S.	C.
Ramnuggur	82,171	13	10
Bagaha	47,332	6	8
Hurnatar	12,589	28	0

Shikarpore	9,167	1	4
Bhoura	3,116	2	12
Chunhudia	7,875	24	0
Total ...	1,68,180	4	2

E.

There is nothing to be added on this subject to what I reported in my last narrative. The advances have been larger this fortnight, as final advances are being made, and villagers are coming in fast, but soon advances will be closed, and our account and registers submitted.

F.—Charitable Relief.

There has been an increase in the number receiving relief, chiefly owing to the almost entire cessation of our works, in consequence of which the weak and infirm have been thrown on our hands. Light labor is given to most of these. It is not a sign of increased distress, but is owing chiefly to the fact I have noticed, which is a necessary result to be expected on the setting in of the rains.

In conclusion, I trust that this rather brief report, and the delay in sending it, will be excused. I have only to-day returned from Gobindgunge, where His Honor the Lieutenant-Governor arrived on Saturday (the day on which this narrative was due). Were I to delay, in order to make a fuller report, I should not be in time for the district narrative, and I have therefore thought it better to confine myself to general remarks on the principal points required, so as to show the general condition of affairs and the progress we have made.

W. Howe,
Jt.-Magte., in charge of Ramnuggur Sub-division.

Fortnightly Narrative of Scarcity and Relief of the District of Monghyr, for the fortnight ending 24th July 1874.

There has been very little rain during the past fortnight, and the crops generally, which required sunshine, have been much benefited. Mr. Wilkins reports the crops in Begoo Serai, the chief bhadoi country, as being very strong and abundant. There has, he says, been plenty of fine, dry weather, with a hot sun lately after the heavy rains we had in June. More rain is now wanted, and Mr. Wilkins calculates that, with favorable weather until harvest time, an average crop will be cut. This estimate somewhat modifies his first remarks regarding the strength and abundance of the crops. Mr. Money, who took advantage of the fine weather to make a tour in the chief bhadoi-growing pergunnahs in the south of the district, says the crops look generally promising, and he remarks that an unusually large area has been sown with autumn crops. I have myself noticed this in the Sudder sub-division, but I think the anticipated yield is over-estimated. I have never before seen the crops so choked with weeds, and with the exception of what is growing round the ryots' houses, the Indian corn looks poor and stunted. The outturn per beegha, even if we have favorable weather until harvest time, will not, I think, exceed more than one-half what it should be. The kheri, cheena, sawa, kodo, murwa, and kowni, are, however, looking better than the Indian corn. From all I have been able to learn, it appears that the weeds have got the upper hand, partly in consequence of the unusually large area under autumn crops, and partly from want of energy in the farm laborers, who are chiefly low caste people, and have had a hard time of it during the recent season of scarcity. The recent fine weather has, however, brought laborers into the field, but I doubt whether they will succeed in cleaning the land effectually. The cattle in the district are chiefly fed on these weeds, and there is no fear of a cattle famine this year.

The bhadoi crop on the extensive dearas in the district will, I hope, be secured this year; last year it was entirely lost by a sudden rise in the Ganges. If it is secured, it will be an event which only occurs once in several years, and will affect the price of grain very considerably.

From Bucktearpore the circle officer writes that the recent fine weather has been most beneficial to the crops, and that every available inch of land is being sown with some kind of crop.

The bazars are, throughout the district, well supplied; and even at Bukhtiarpore, which was quite deserted by the traders, and depended almost entirely on Government rice, is now well

supplied. The prices continue much the same as in the last report; but if the present favorable prospects continue, we may, I think, look for a steady downfall until prices assume their normal condition.

Mr. Currie, who has been over a large portion of the country around Luckee Serai, states that the bhadoi, particularly the Indian corn, has suffered a good deal from excessive rain. He says that large advances of grain have been taken by the landholders in order to pay wages to their laborers.

The health of the district is generally good; and every one is now hopeful of abundant food before the end of September.

B.—Relief Works.

The annexed statement will shew the number of persons at present employed under Government and the Court of Wards. No new relief works have been opened during the fortnight, and I do not think any more will be required. The extensive irrigation works at Khurrukpore, and the roads now in course of construction under the road cess, will give employment to all persons who cannot find employment in their villages. The chief work before us now is to carry out Circular No. 4543, and to make the relief roads, which have been commenced, really useful, and, by bridging them, make them passable during the rains, when they are chiefly required. I do not anticipate much difficulty in the matter, as all the earth-work on these roads has been already finished.

C.

Of the 20,000 maunds indented for by Mr. Wilkins for Begoo Serai, 12,000 maunds have already been received. The 8,000 maunds which remains to be received is on its way. The private movements of grain are not considerable. Now that the prospects of harvest are so good, every person who had any grain concealed is bringing it out freely for consumption. The railway has carried 12,000 maunds of rubbee grain from the district; but, as I have said before, this is only a portion of the total exports, which are chiefly sent by the river to Calcutta.

D.

A large amount of bhoosa is being exported from the district to Durbhunga under Government orders. Colonel Murray kindly undertook the superintendence of weighing and despatching it, and the work consequently has gone on very smoothly and effectually.

E.

During the fortnight Mr. Manson has advanced 5,711 maunds of grain to 2,925 ryots. Mr. Currie states that "the ryots are very keen on getting advances just now, as the transplanting of the rice crop will commence very shortly, and they want the grain for rations for laborers. I have got off all except 4,500 maunds of jao-bhuut, which will be given out to-day and to-morrow; that is, the orders for issue of the grain have been given to the applicants, though the grain has not been altogether given out of the golas yet. I have kept a reserve of rice, but it is impossible to give the exact amount till the export from Sheikpoora is complete. There is no rice in Luckee Serai beyond some 50 bags for current expenses at the poor-house, as whatever arrives from Sheikpoora is in part given out to ryots and in part passed on to Jamooee. When this is over, there will be, according to my calculations, about 2,000 maunds of rice in reserve, and the same at Sheikpoora. At Secundra I have kept about the same amount. At the other golas the amounts are very small, and they will get re-stocked in small quantities as they require it from the three reserve golas."

Mr. Wilkins has advanced 10,606 maunds of grain to zemindars and respectable ryots.

Mr. Money does not state exactly how many maunds have been advanced by him during the fortnight, but he says his golas are empty.

In Sudder sub-division, I have advanced 500 maunds to zemindars and ryots on good security.

F.

Annexed is a statement showing the number of persons relieved at the relief centres and poor-houses. I think, directly the bhadoi harvest is reaped, we shall be able to close these centres all over the district, as the charitably inclined will then be in a condition to relieve their poorer neighbours. I accompanied Colonel Murray, who superintends the relief operations here, yesterday to the poor-house in the town, and saw about 800 wretched-looking creatures fed, and many, who had merely a few rags clinging to them, were clothed. The eager manner in which they took the pittance of grain dealt out to them showed how hungry they must be. Numbers of these people must have died but for the aid received from Government.

The following information is in accordance with Government letter No. 125:—

Committees.

Monghyr, Jamooee, and Begoo Serai.

Sub-Committees.

E. LOCKWOOD,

Offg. Collector.

No. 862—S.R., dated Bhagulpore, the 30th July 1874.

From—V. T. TAYLOR, ESQ., Collector of Bhagulpore,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor herewith to submit the 18th fortnightly narrative for this district.

2. In my last I noticed that there was every appearance of a break in the weather, and it is satisfactory to be able to state that in the fortnight under review there has been but little rain.

The total rainfall to the 30th at Sudder has been ...		...	...	29·75
Ditto	ditto at Banka ...	...	...	27·16
Ditto	ditto 23rd at Muddehpoora ...	...	...	29·73
Ditto	ditto 23rd at Soopool ...	...	...	33·50

The rainfall for July so far has been only 8·57 against 11·19 up to 31st of last year, but the fine weather we have been having was sadly wanted and has done a great deal of good to all crops, which now promise a wonderful yield. Of course it is too early to say anything of the aghani rice crop, which is being rapidly transplanted, and will soon require heavy rain, but the murwa, bhadoi rice, and indian-corn crops, are excellent.

3. The sub-divisional officers remark as follows regarding the state of the crops and condition of the people:—

Soopool—"There is very little variation in the state of supplies in the bazar. The weather during the past fortnight has been everything that could be desired; the intervals of fine weather have allowed the weeding to be pushed on nearly to completion, and the occasional falls of rain have been of general benefit both to the bhadoi and aghani. The transplanting of the latter is now in full swing, though murmurs are still heard of deficiency of seed. If, however, such were really the case, we should I think find a readier sale for our Government supply. It is on all hands admitted that a *fuller and more promising* bhadoi crop, both murwa and "aons" paddy, has not been seen for many years past, and it is, moreover, unusually forward, for the new murwa and other cultivated grasses—shama, kaoni, kheri, &c.—will be generally ready for the sickle in about 20 or 30 days. Though a comparatively large number of new cases for gratuitous relief are presenting themselves, to be attributed possibly to the closing to a great extent of some of our relief works, as the "grihists" are themselves doing a good deal, and not employing the usual amount of hired labor. The condition of the people generally is, I think, gradually improving, and I expect it will do so rapidly after the next 20 days are passed."

4. From the Pertabgunge side matters are still better, and new murwa is already in the market and selling at 24 seers the rupee, and when the crop comes well in, we shall see it selling at not less than a maund for the rupee, and it must be remembered that this grain is *the food* of the poorer classes and not rice. Early bhadoi paddy is also here in the market. The *dhan* is selling at 35 seers, and the Deputy Collector reports that before long it is expected that it will be as cheap as 2 maunds for the rupee. Should this be a fact, the time must be close at hand when all idea of any distress in this portion of the district must be given up.

5. *Muddehpoora.*—"There is ample in all bazars for all, as owing to the judicious lowering of rates and liberal advantages offered to large purchasers, grain is being sold at moderate rates throughout the sub-division. Private individuals, too, have bought grain for retail in these villages, and zemindars have also taken a good deal. This is very satisfactory, and I think clearly shows that there is no interference with trade in this sub-division, but also that there were not and are not any private stores with any one. Mr. Martin further remarks: The crops are looking exceedingly well everywhere, only the lowest lands have been so far flooded as to injure the crop on them. A zemindar who visited me the other day said he was astonished to find almost every field sown in this sub-division, and said he believed it was owing to fewer relief works having been started here than elsewhere. I have purposely lessened the works lately in this sub-division, in order to allow employers to get their usual laborers. I am glad the desired effect has resulted. The condition of the people is decidedly better; persons I have myself noticed have become stouter and healthier looking."

6. *Naradigur.*—The superintendent of this circle now reports for the first time, and the tehsildar of the Court of Wards there has complained that the circle works are keeping off petty cultivators from their fields. I have issued most positive orders to Mr. Kirkwood to reduce the rates to the lowest possible figure, and I very decidedly object to anything that makes our works more attractive than the works on which the people ought to be and would be in any ordinary years employed. If my orders are carried out there will be no further cause for complaint. The people referred to I understand to be petty cultivators, who have as yet failed to prepare their aghani rice land; they can have no excuse, as the Court of Wards have liberally *advanced*, and if lack of seed-grain is to be urged, there is ample of it at Soopole for any one in Naradigur who has not got it. The state of the country generally has so much improved now, and the prospects of the crop are so—I may say beyond precedent—good, that the time has arrived when aid should be given only to those absolutely in need of it, or else the people themselves will go on trusting to Government charity without the slightest attempt to help themselves.

7. *Banka.*—Everything in this sub-division is going on satisfactorily. The prices remain the same; the nature of the country and the character of the soil make the people anxious for more rain now, as no rain now would further injure the indian-corn, which has greatly recovered itself, and the aghani rice, now being transplanted, cannot live without it.

8. The following statement shows the difference in prices now and at the corresponding period of 1866, and it may be noticed that there never has been any Government grain in Bhagulpore itself—the prices then are in no way affected by Government rice. The prices of common rice fell one week to 12-10, and has gone up again to 12, but these prices will now rapidly fall. The Ganges is still falling and is unusually low for the time of year. Should the floods keep back for another fortnight, an indian-corn crop will be reaped on the dearahs and other lands contiguous to the river, off which a crop has not been taken for the last 5 years, having been annually destroyed by the floods. Cheena and kerhi is ripe and being rapidly cut, and these facts will undoubtedly affect present prices favorably :—

	Rice, common.		Pulses.		Indian-corn.		Wheat.

Head-quarters	8 3	12 0	8 13½	...	...	15 2	8 13½	14 8

9. There is but very little crime in the district—the statement for July shall be forwarded with the next narrative.

B.—Relief Works.

10. The usual statements are annexed, both Department Public Works and Court of Wards; both show a considerable falling off in numbers employed. These are not the works now said to be interfering with cultivation, but the light labor and circle works under the circle officers.

C.—Transport of Grain.

11. The only railway station at which anything is going on is Bhagulpore itself; the imports during the fortnight were 15,079 maunds against exports of only 4,569. Of this latter 2,980 maunds were wheat for Howrah, the rest gram and wheat local for Colgong, Caragolah, and Sahebgunge; of the former 12,505 maunds were wheat and gram from up-country, 1,755 maunds rice from Howrah, 688 maunds rice down from Barrh, and 131 maunds Indian corn from up-country. The Soopool officer remarks that the river route is now open from Khagaria, and boats with small consignments of pulses have gone up the Tiljooga and Dimra, but not as yet to any extent.

D.—Storage of Government Grain.

12. The usual statements are annexed. It has beenfound necessary to re-stock some of the golas, hence the difference in the amounts stored at several of them. The figures have been corrected also in some instances, as grain has erroneously been entered as disposed of from the golas, when it had only been sent to sub-golas; but the return shows a very fair disposal of the grain, especially in Soopool. Wholesale purchasers continue to come forward, and will do so until the new bhadoi rice is in the market—the bhadoi rice and the murwa being as a rule consumed by the people, and the aghani rice used for export and sale for payment of rents, &c.

E.—Advances to Private Parties.

13. The following advances in grain have been sanctioned during the past fortnight :—

Date of application.	Name of applicant.	Profession.	Residence.	Amount.	Date of sanction.	By whom sanctioned.
11th July 1874 ...	Durbary Singh	Zemindar	Lalgunge ...	Mds. 37-20 of rice worth Rs. 100.	20th July 1874 ...	Collector.
20th ditto ...	Rughoonath Narain Singh ...	Ditto ...	Rughoonathpore.	Mds. 75 in grain	22nd ditto ...	Ditto.
25th June 1874 ...	Rooder Narain Singh, Pursoram Singh and Bholanath Singh.	Ditto ...	Bhubria ...	Rs. 500 in grain	27th ditto ...	Ditto.
Ditto ...	Puramanand Singh Dass ...	Ditto ...	Bhowanipore	„ 225 in grain	Ditto	
Ditto ...	Seduch Singh Dass ...	Ditto ...	Ditto ...	„ 125 in grain	Ditto ...	Ditto.
Ditto ...	Mosstt Ginbutty	Ditto ...	Chilownee ...	„ 135-1-1½ in grain	Ditto ...	Ditto.
Ditto ...	Rajcoomar Singh	Ditto ...	Dhunhar ...	„ 300 in grain	Ditto	Ditto.
Ditto ...	Hemun Singh	Ditto ..	Sookhpoor ...	„ 1,000 in grain	Ditto ...	Ditto.
24th July 1874 ...	Ajub Singh Dutt	Ditto ...	Mudhoora ...	„ 300 in grain	28th ditto ...	Ditto.
Ditto ...	Nowbut Singh	Ditto ...	Burail ...	Mds. 47 in grain	Ditto ...	Ditto.
Ditto ...	Khedoo Singh	Ditto ...	Biswari ...	„ 30 of rice	Ditto ...	Ditto.

F.—Charitable Relief.

14. This is still being largely given, but I regret I am not in a position to give any figures this fortnight. I only received the Soopool report this morning, and Mr. Kirkwood's report has not yet reached me. I have detained this longer than I should have done, and cannot postpone sending it in a day longer. Mr. Kirkwood's report, which will arrive on Saturday or Sunday, will be sent to the Commissioner.

15.

G.—Financial Results of the Fortnight.

BHAGULPORE,
The 31st July 1874.

V. T. TAYLOR,
Collector.

No. 2379F, dated Purneah, the 30th July 1874.

From—W. KEMBLE, ESQ., Magistrate and Collector of Purneah,

To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my narrative for the fortnight ending July 25th.

A.

Private trade is now more active than ever, as the rivers have risen boats laden with grain have found their way from Dacca and other eastern districts.

At Kissengunge, the price of coarse rice has risen to 12 seers per rupee.

The new rice is also coming into the market; at Bulrampore it is selling at 24 seers per rupees and in Kissengunge at the same rate.

Mr. Craven says there are signs of improvement in the general condition of the people: they are gradually recovering from the distress which universally prevailed in May and the first half of June. Emaciated beings are not so frequently met with, and the cry for grain is not so general. He states that in Bahadoorgunge, owing to the difficulties of importing grain, the population are worst off, but from the recent diaries and reports received from Mr. Bertlesen, I find that he has been very active in getting up the Government grain by pack ponies and by small and large boats, and that relief is freely given. He has been making advances freely to persons whom, from (in almost all cases) personal inquiry, he found to be fit objects for relief in this form.

Mr. Bertelsen reports that small supplies of grain are again finding their way surreptitiously into our territory. This looks well, and I have no doubt that trade in this direction will soon revive.

Mr. Rattray, from the north-west part of the district, does not submit such a favorable report. I am about to start for Motiharee to see for myself what the state of affairs is; and I have deputed Baboo Rajoneenath Chatterjee, for whom there is not now much work in Kissengunge, to proceed to take charge, under Mr. Rattray, of the Motiharee thana.

I notice, however, that Mr. Rattray's reports only speak of a rush of applicants for charitable relief, and do not mention any specific cases of distress, so I trust that this is merely a panic which will soon be got over. The Motiharee gola is well stocked, and Mr. Rattray informs me that rice has been sent, not only to all the village groups, but to sub-groups which he has formed.

The state of the country is everywhere excellent: the floods have gone down without doing nearly so much damage as was anticipated, the heavy rain has been succeeded by fine showery weather, which is exactly what is wanted to enable the ryots to get on with their transplanting work.

From Kissengunge 18 annas bhadoi crop is expected. The early janera everywhere, and the bhadoi in many places, is being reaped. Makai is flourishing and murwa is coming on well.

The only crop which has really suffered from the floods is indigo.

The health of the people is everywhere reported to be good; though the weather has been intensely hot, no cases of cholera have been reported. Crime has also decreased, as the accompanying table will show.

Kosi Floods.—The following extract from a report dated 21st July, received from Mr. McQueen, Sub-Manager of the Dhurmpore, is very satisfactory. He says:—

"Owing to the very rapid subsiding of the river the loss of the rice crop has not been so great as reported by the people in the first excitement of the rush of the river, neither are there so many village sufferers as reported in my first letters. Wherever the flood went, there it of course destroyed the indigo and Indian corn, but the bhadoi rice, except where it was in exceptionally deep hollows or in the direct course of the stream, has in a great measure escaped, and if we continue having our present weather, a good harvest will yet be reaped from it.

Whilst out in the district I saw that the julle dhan was being reaped; the yield from this in the few villages to the east of the estate where it is grown, I estimate at about 12,000 maunds. Bhadoi is ready in some places, and in zillah Beernuggur its harvest will be general in a fortnight.

Prospects altogether are much brighter than they were last week, and the loss in rice, except in about 10 villages, inconsiderable, as ropa may be planted where the bhadoi has failed. The villages I put down as the sufferers by the flood are—

"Mujhoa, Khudawunagar, Bela Chumpabutti, Damailbari, Dharita, Jankiram, Domur, Busgura, Hutwara, Chohar, and Busgura."

In all these villages relief in grain has been sent.

B.

Mr. Cordner's progress report is annexed, and is, as usual, well and carefully drawn up. It shows a total of 38,713 laborers, against 66,444 last fortnight, and a daily average of 5,530, against 9,492.

The only work is dressing and turfing the slopes, &c., in fact, trimming up and consolidating the work of the past six months. Grain payments are everywhere made, and give satisfaction, as I hear from all sides that the road laborers generally manage to retail at a profit some part of their earnings.

No complaints of short supplies of grain have been made to me this week, and I find that the token system is working well and that the moodies have very quickly learned to take to it.

The relief officers' returns show an average during the month of 13,775 persons on roads and petty works, being about 3,000 less than were shown during the preceding month.

These are mostly women and children, who are employed on merely nominal work, but measures are being taken, as their condition improves, to induce them to revert to their former mode of life; this is at present rather difficult, as they do not as a rule work in the fields.

C.

Our arrangements for carriage have improved during the fortnight. From Dengrah boats now make their way up the river, and pack ponies and carts are waiting at the ghâts where the water becomes shallow.

Small boats are very difficult to procure. Mr. Craven, at Kishengunge, reports that in his sub-division the streams flow with terrific velocity, and owing to their uncertainty, large boats cannot venture into them, for they may be empty one day and full the next.

He has been constructing rafts of "dug-outs," and on these he has been sending rice about the country. Forty of them had been despatched to Mr. Bertelsen to be used in his circle. In Kissengunge he had carted a number of these small boats across country to be used as ferry boats.

During a recent visit to Arrareah I found that a complete system of communication with Dengrah and the north golas was working by boat, cart, and pony.

The pack ponies have this month proved most useful, and having been distributed over the district by Captain Anderson, each officer has got as many as he wants. A copy of Captain Anderson's memorandum on this subject is annexed.

The system of paying for the ponies in grain was first suggested by Mr. Perry, of Kudbah, and is working well.

I have been about the district, and still find, notwithstanding our requisitions, that pack ponies are being worked by private traders in large numbers, carrying grain from Purneah to the north. We have not yet interfered with private trade in this respect.

Copy of Captain Anderson's Memo., dated Purneah 29th July, 1874.

	1st Class.	2nd Class,
Purneah ...	...	270
Dengrah ...	307	35
Kusba Amour	170	300
Bulrampore	550	...
Kudbah ..	600	400
Kissengunge	540	400
Bahadoorgunge	859	115
Arrareah ...	1,500	400
	4,526	1,920
Total	6,446	

Bulrampore is made up by a draft of 400 ponies from Kudbah.

Arrareah and Bahadoorgunge are being increased by drafts from Purneah, Dengrah and Kusbah Amour.

Grain payments are working very satisfactorily.

D.

With respect to the golas I have nothing special to state.

They have all stood well, and have been found to have been generally well chosen, the only one difficult of access being Bibigunge.

The minor golas are all kept well stocked, and being under the charge of a group superintendent in the centre of a group of villages, supply food to a large number of persons.

Mr. Rattray says that, on the average, no one in his sub-division has to go more than three miles to buy food.

F.

From the returns which I have this month received from the circle officers, which have this month been prepared on, I believe, a more uniform principle, I have been able to calculate that the number of persons daily in receipt of charitable relief in some form or another is as follows:—

By cooked food 421
This shows an increase over last return.
By uncooked food 3,515
This shows a decrease which will be accounted for by the increase under village relief tickets.
In poorhouse 189
There is marked decrease here.
By village relief tickets 20,807

The large increase over the figures given last fortnight, 7,694, is due partly to errors in the last calculation and partly to advantage having been more generally taken of this mode of relief.

By light labour tickets—
The daily average 13,778

This is an increase over the daily average shown last fortnight but less than that of the preceding month. This is owing to the fact that during the first part of last month the people were engaged in weeding and hoeing their fields, by which means the males were enabled to support their families. Latterly field work has been less in demand, and the weather being

finer, women and children have again applied in large numbers for work on the roads. The numbers will probably again fall off when reaping is generally commenced.

By spinning—

The daily average is 112

This increase is chiefly in Bahadoorgunge and Kusba Amour circles, where in the wet weather, when road work was stopped, relief was largely given in this form.

Weaving, daily average 121

The same remarks apply as given below.

Other means 128

This comprises basket and mat-making, weeding, etc.

We thus have this month a total average of 39,071 persons on charitable relief.

The following points appear to me to be worthy of note in each circle :—

Sudder.—Mr. Meiklejohn reports that he has been taking measures to reduce the number of persons in receipt of purely charitable relief, which he believes has been too freely given.

All his minor golas being full, he has been helping Arrareah by sending his ponies there.

Dengrah.—Mr. Thornton says that just now, during this fortnight, before the cutting of the bhadoi, distress is severe, and that on this account he has had to increase gratuitous relief.

There had been three deaths in the hospital here; two were of travellers who were attacked with dysentery on the road, and one a little girl, who had long been an inmate of the hospital.

Kusba Amour.—The same remarks regarding the pressure during these three or four weeks are made by Mr. Gouldsbury. In ordinary years people are pressed for grain at this time.

The new crop will now soon be cut.

Bulrampore.—Here there was a fair crop of very early janera, and the bhadoi is more forward than in the two last-named circles, and private trade is brisker. Consequently there is less distress, and the demand for Government grain is decreasing every day, even among the traders.

Kudbah.—This circle and the last named are now, I consider, the best off in the district.

Mr. Perry has kept the distress well in hand throughout, and as private trade was always busy here, it never was so severe as in other parts of the district, though the failure of the crops was greater.

Kissengunge Sub-division.—I have quoted from Mr. Craven's report in the first part of my narrative. Everything is in good order in this sub-division, and the difficulties of transport have been overcome by hard work on the part of Mr. Bertelsen, and all the golas are supplied.

There has been a large increase on the list of village ticket holders, and advances have also been made.

Though in Bahadoorgunge there was comparatively no great failure of the crop, the distress has been latterly greater than in other parts, owing to the people having sold off their stocks improvidently, and on account of the inaccessibility of the locality.

Arrareah.—Just now the reports from this sub-division are bad. Mr. Rattray asked for more native assistance, which has been sent to him, Baboo Rojonee Nath Chatterjee, a good Deputy Collector, having been sent up to him. I start myself for this sub-division to-day.

G.—Financial Results of the Fortnight.

The expenditure reported last fortnight amounted to Rs. 802,177-4-7 × 4,430-14-1 =806,608-2-8.

PURNEAH, the 29th July 1874.

W. KEMBLE, *Magistrate and Collector.*

PURNEAH DISTRICT.

Progress Report of Famine Relief Works for the Week ending Saturday, the 18th July 1874

Numbers of works	Progress in marking out relief works	Progress in opening works	Number of laborers thereon				Supply of food thereat		Condition of laborers, and general feature of the country	Mode of payment	Rate of wages	Arrangement for tools	Disbursement during the week	
			Class I	Class II, A	Class II B	Total	Amount of Government grain sold to laborers	Proceeds of sale					In grain	In cash
							Mds Srs	Rs A P					Rs A P	Rs A P
No 1, Purneah to Keotgamah	The whole line of road about 40 miles in length, has been fixed and estimate in progress	2 parties	2,208			2,208	134 23	336 10 0	The number of laborers on this work is rapidly decreasing as their services are required in the fields We have considerably reduced the rates so that there may be no competition for laborers between the zemindar and Public Works' Department works The bhadoi crop which was sown in the low lands and where it has not been injured by floods will be reaped in a few days, the prospect of the aghani crop is good	The system of paying the laborers in grain in place of in cash has now been in force since the 23rd of May, and it is giving general satisfaction to the people on our works In fact, I believe that if the option was now given to them to choose between cash and grain payments, the latter would be almost universally preferred. The laborers are paid wholly in grain, and they find a ready and *profitable* sale for any that they may earn over and above that required for their own consumption The following arrangements have been made for paying the laborers in grain — The sircar or mohurir measures up the work done by each gang (our work being now universally carried on by contract), and gives a pay order to the duffadar for the amount of grain, according to the value of the work done The duffadar takes this pay-order to the nearest Government moodie's shop, and after receiving the grain distributes it to his gang	Orders have been issued to stop the earthwork and only to employ our laborers on the dressing and grassing of the banks that have been thrown up The rates for dressing the surface of the road and slopes vary from 4 seers to 12 seers per 100 running feet of bank, and depend chiefly on the way in which the earthwork has been thrown up The higher rates are only given in cases where the banks have been thrown up in a very rough way by unskilled laborers The rate for turfing the slopes is 12 seers per 1 000 superficial feet, an increase of one seer being given for every 100 feet extra lead beyond one chain The rates for Class II A are — Seers Men 1½ to 2 Women 1 Children 0¾	Every effort has been made to induce the laborers to bring their own tools, but it is to be regretted that this has not been attended with any very great success and especially so since we began to issue large quantities of Government tools to each of the works When the works were first started but very few Government tools were issued and most of the laborers who came to our works brought their own It was feared, however, that villagers were beginning to think that it was no use applying for work unless they brought kodalis so that, after a consultation with the Magistrate, tools were issued to each work and now, as a rule the laborers work with Government tools. These remarks only apply to the unprofessional laborers, as they and others, as a rule, have their own tools and bring them to the works	336 10 0	
No 2, Nathpere to Etwaree	The whole line, 82 miles in length laid out and levelled, estimate in progress	7 parties	15 076	2,134		17,210	950 0	2,533 5 4	The number of laborers on this road has decreased considerably since last report as the non-professional laborers are returning to work in their fields The break in the rains during the week under report has been of great benefit to the country generally, as it has allowed of weeding and transplanting being carried on, which was urgently required On this road about 50 per cent of the laborers are beldars, who are all now engaged in dressing and turfing the banks that have been thrown up				2,375 5 4	138 0 0
No 3, Kissengunge to Titalya	40 miles of old Ganges and Darjeeling road being repaired and estimate submitted	2 parties	789			789	46 20	124 0 0	The numbers on this road have slightly increased since last week All the laborers are employed on the dressing and turfing of the slopes Compared with other parts of the district, there is a less area under paddy, as the land is high and more adapted to such crops as pulse, &c				124 0 0	

Names of Roads.	Progress in marking out relief works.	Progress in opening works.	Number of laborers thereon.				Supply of food thereat.		Condition of laborers, and general feature of the country.	Mode of payment.	Rate of wages.	Arrangement for tools.	Disbursement during the week.	
			Class I.	Class II, A	Class II, B.	Total.	Amount of Government grain sold to laborers.	Proceeds of sale.					In grain.	In cash.

They are employed in dressing and turfing the banks that have been thrown up.	.....	.....	.....	37 7 5	.....

R. A. CORDNER,
Executive Engineer, Purneah District.

No. 765—S.R., dated Doomka, the 28th July 1874.

From—J. BOXWELL, ESQ., C.S., Offg. Dy. Commissioner, Sonthal Pergunnahs.

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit a narrative for the fortnight ending July 26th.

A.—STATE OF THE COUNTRY.

Reports are good everywhere. It is as difficult as before to give any very precise information about the supplies, either in the markets or out of them.

From Rajmehal Mr. Stewart writes: "Prices have not gone down; at Bario and Barhait the prices for common rice still remain unchanged, but these prices are merely nominal. The article itself is hardly to be procured."

From Jamtara Mr. Hand writes: "Grain is scarce in the bazar, and will be scarcer every day for the next three weeks." The important point here is that Mr. Hand puts the turn of the tide only three weeks off, or in the latter half of August, instead of the middle of September. Mr. Wood does not notice supplies. Mr. Grant writes from Godda: "Though the supplies brought to the various hâts are not much, more food is available about the country. The well-to-do large cultivators have opened out their stores and are paying their laborers in kind; and a few of the mahajuns, I hear, have made advances of grain." This sentence, perhaps because it suits my own notions, I think very well worth noting. All through the year I never believed the poor people were fed very much from the hâts; they were fed from their neighbours' houses. They could always get food a trifle cheaper from their comfortable neighbours than from the mudies.

Prices were always a tolerably fair index to the state of the country; supply reports never were.

Mr. Wilmot writes from Deogurh: "The cheapest rice in the jurisdiction remains at Bahman Gawan, where it is reported to be selling at 15 seers per rupee. The dearest is said to be at Garh Sora, where it is 10 seers. Grain still procurable in considerable quantities at 17 to 18 seers per rupee."

The cheapest country rice in Doomka is 13 seers. At this rate it easily beats Government rice at 16 seers. There is no talk of scarcity of supply here. Mahajuns lend and sell as well as can be expected.

In Godda Government rice has come into the bazar. Mr. Grant does not say at what price it is selling. With large advances and exclusive payment in grain this must result, as people must at least have salt. The weather is as good as it could be, without an arrangement for turning on and stopping showers in every field.

In Maheshpore it seems to have been as good even as this. There had been rain enough to flood all the rice country. Then a week of fine weather came, and now the rain is on again—heavy. The crops are all doing splendidly. Mr. Wood writes: "The indian corn is now commencing to cob, and is from five to six feet high, and promises a bumper crop."

Deogurh is nearly as well off. They have had heavy rain, a week of hot sunshine, and now are having clouds, fog, and rain again.

In Godda janera had been little damaged by excessive rain. It is now looking very well. People say the yield will not be so great as last year.

Mr. Stewart argues the weather case at great length, but his summing up is—"On the whole, then, I think it may safely be said that the prospects of the crops up to date are good, and that the weather has been eminently seasonable for agricultural operations."

Small crops and janera are coming into ear, and the cheena harvest has begun in the dharaes.

The Jamtara prospects are, what I should call, very fine. Mr. Hand writes: "The rainfall during the fortnight (from the 8th to the 20th) has been 5·7 inches. We have had no rain since the 16th. Cultivators are beginning to cry out that their prospects are gloomy. If we have rain within this week, I do not think the dhan can be materially injured." I do not know what the cultivators can want that they have not got. 5·7 inches of rain, and then four days hot sun, seems to me the perfection of weather.

In Doomka we have had, up to the 26th instant, 21·29 inches against 21·51 at this time last year. I have arranged the rainfall in two monthly columns—

	1873.	1874.		1873.	1874.
January	·26	·11	June	5·05	7·8
February	0·0	1·87	July	12·16	8·08
March	1·54	1·32			
April	·14	0·0		21·51	21·29
May	2·36	2·11			

I cannot ascertain that the slightly different distribution has made any difference. Last year prospects were considered almost as good as possible up to the middle or end of September. The one verdict all over the district was—a bumper crop lost for want of one shower.

By all accounts, we are slightly better off now all round than we were this time last year; therefore, I think I need pay no attention to little local grumbling for a field of dhan or makai the worse for either rain or sun.

About Doomka people say they want some heavy rain now to complete their highland planting. Since writing this heavy rain has come. The condition of the people I believe to be good everywhere.

As I reported some time ago, I have seen two extremely thin people, both children. There is a wide gap between this pair and the next lot; and I have been in every part of the district where distress was said to exist, though, I admit, not at the time it was said to be heaviest. I was always a day or two late to see the worst.

The sub-divisional reports are—

Godda.—"The general physical condition of the people is good, and I have not heard of any cases of death from starvation."

Mr. Wilmot makes no remark beyond saying that the health of his sub-division is unusually good. With him, this is as good as saying that there is no distress worth mentioning.

Mr. Hand says the numbers of "paupers and half-starved objects," which had decreased considerably, are increasing, now that works are being closed. I take this to mean that the poorest of the light-labor gangs are now swelling the numbers of the receivers of charitable relief.

Mr. Wood says nothing about the condition of the people. I also take this as a good sign.

Mr. Stewart's report is curious, and I don't understand a great deal of it. The pith of it is that the people have all along been in good condition, and that they owe it to the action of the Government. Here I am sure every one is very glad to agree with him; but I can make nothing of this—"I have no hesitation in saying that had we delayed much longer in commencing relief measures, the spectacle which some would apparently very much wish to have seen, viz., people reduced to the last stage of weakness by want, would have presented itself in a large portion of the distressed tract in this sub-division."

Putting aside for a moment all notions both of duty and good-feeling, and supposing a desire to prove oneself right to be the only, or much the strongest, motive anywhere, I fail to see any meaning in the words quoted. They are evidently directed against some foolish or malicious people who denied the existence of distress. But these same people would be extremely sorry to see the emaciated crowds which would at once prove them wrong. However, Mr. Stewart's verdict is that the people are doing very well, and that is really all we need care about.

Prices are almost stationary, and are a very small fraction over one-third higher than they were last year.

Twelve seers of common rice can be got for a rupee against 18 of this time twelve-months.

There is nothing to report about crime, misery, and starvation.

Cholera, generally of a bad kind, continues to break out in odd places.

B.—Relief Works.

Works are being closed as fast as we can. In Sultanabad there is nothing but the sloping and grassing of one little tank, which may drag on as work for old women. Jamtara works are also stopping fast, with the result of throwing more people over to charitable relief. Mr. Stewart is finishing off fast. He reports all his bunds safe after the late rush of water. Mr. Wilmot reports work very slack on his Wards' Estates bunds; but he has made the Modhupore coolies agree to take rice for payment.

I have not seen my Daman bunds lately. I hear one was carried away by the late flood—a little thing of no great value. The average daily total on all works is now 11,807; numbers are still decreasing fast. For the last four fortnights they are almost in geometrical proportion. I hope to have our bunds and tanks finished off very soon, and that work may continue only on our few great roads. I cannot give a satisfactory account of payment in grain. All relief officers report payment in grain general and universal where possible.

The Godda and Rajmehal figures show cash and grain payments mixed. Until I hear from these, the figures fail to shew the good results the officers report.

C.—Transport.

I have nothing to report.

D.—Storage.

I have had to ask for nearly the whole of the Calcutta store.

E.

Rupees 50 advanced during the fortnight.

F.—Charitable Relief.

A statement showing the daily average of charitable recipients in the district is given. The daily averages are as below:—

Rajmehal	...	... 161·9	Godda	...	... 692·2
Deoghur	...	... 1·5	Doomka	...	... 26
Jamtara	...	... 2164·25			
Moheshpore	...	... 157·5		Total	... 3203·35

G.—Financial Results.

A separate statement shewing the expenditure is appended. I have said all I had to say under B.

I may here remark that the sale of Government rice to the public up to date, 11,000 maunds in a million and a quarter of people, shows that each person has bought about six chittacks.

E. J. MEARA, C.E.,

Offg. Executive Engineer, Sonthal Pergunnahs District.

Narrative of Scarcity and Relief in the Moorshedabad District for the fortnight ending Saturday the 25th July 1874.

THE following remarks have been sent in by the Magistrate-Collector from Rampore Hât, where he is at present, for incorporation with the narrative :—

"During the past fortnight I have been over a considerable extent of country in thanas Mirzapore, Roghunathgunge, Pulsa, Nulhattee and Rampore Hât, in accordance with the instructions contained in Government letter No 4376 of the 10th instant. The general appearance of the country traversed by me, as regards the crops on the ground, is most satisfactory ; and it is certainly no exaggeration to say that, owing to the early falls of rain, matters are nearly a month more forward than in ordinary years. Even in the high lands of Mirzapore, in which transplantation is naturally later than in other parts, a somewhat considerable portion of the crop has been transplanted; while here as elsewhere an unusual extent of land has been sown broadcast, and this broadcast sown paddy is well forward and healthy in appearance. In the country between Jungypore and Mirzapore there is a good deal of aous on both sides of the Kurkuree river. A small portion of this had been submerged by the rapid rise of the rivers, but the loss appeared to have been very inconsiderable; and, as during the last few days the river has been falling, there is reason to believe that a very good crop will be reaped at an early date. The crops in the southern part of the Fulsa thana appeared to be very forward and of exceedingly good promise. In some villages hardly 5 per cent. of the fields remained to be planted out. In the north-eastern part of this thana there is a considerable extent of aous-producing country which I have not seen, but in which it was asserted by all whom I questioned at Jungypore that the crops were quite safe, and that there was good promise of an abundant outturn. In the parts of the Nulhattee thana that I saw, the work of transplantation was very well advanced, only a few fields being left in several extensive stretches. In this thana, too, there are tracts in which the aous rice is cultivated, the reaping of which was expected in some three weeks. In the Rampore Hât thana there is hardly any aous cultivation, but very good progress has been made in the transplantation of the winter crop, and all the fields that came under my notice were looking well.

2. It was obvious that in all the country seen by me there had been no deficiency of seed-grain. In fact, in some of the villages there had been an excess of seedlings above the requirements; and while in some places the seedlings not required by the cultivators have been sold to others whose supplies were insufficient, in some no sale was practicable, owing to the fact that neighbouring villages were equally well supplied. The weather was generally favorable at the time when the seed was sown and when the seedlings were growing, and in nearly all villages the lands sown had been well manured by means of the rich vegetable deposits in the dried up tanks. Many of the fields to which the seedlings have been transplanted were similarly manured, and if the weather be as favorable in the ensuing months as it has been hitherto, there is every prospect of a most abundant crop in this part of the district.

3. The general opinion of those with whom I have conversed, in which I myself quite coincide, is, that when the transplantation has been completed, as it will be very shortly in all but the very high lands, there will be a somewhat difficult time for those whose occupation will thus be gone, and that it is above all things necessary to give employment on relief works to many who cannot obtain it elsewhere. During the past fortnight the numbers of persons employed on the various relief works have naturally decreased, but with the cessation of agricultural operations they will, I believe, again increase. I propose, therefore, to continue the works on the roads as actively as before, in order to give the necessary employment. It is true that the season is not very favorable for the repair and construction of roads, but, at any rate, a good deal of earth-work can be done, which can be consolidated and dressed at a more favorable season of the year.

4. The question of making advances to zemindars and ryots has engaged much of my attention during the fortnight, and some few of the former class have come forward to accept the advances, especially in thanas Kulyangunge and Rampore Hât. There appears, however, to be no great willingness on the part of the body of the zemindars to take these advances, and it will, I believe, be necessary to make them direct to the ryots in certain parts, insufficient as the security for repayment may be. When at Jungypore I called a meeting of the zemindars residing in the neighbourhood, and explained to them how difficult it was for the few servants of Government in the district to deal with the vast body of ryots in a matter such as this; whereas the zemindars with their numerous subordinate agents, and with the knowledge of the condition of their tenants, could so well act as distributors to those really in want of an advance of Government grain. I have not heard the result of the operations of the sub-divisional officer of Jungypore (to assist whom I deputed an intelligent and experienced police officer in addition to the Sub-Deputy Collector, who is also engaged in making the necessary enquiries), but these will doubtless be noticed in the narrative written at head-quarters. I have now similarly deputed the Sub-Inspector of Rampore Hât, an officer in whom I have much confidence, to assist the sub-divisional officer in this matter, and also in the supervision of sales of Government grain to the public in certain localities.

5. In the case of the zemindars, it has been urged, and with some truth, that there are difficulties in the way of individuals taking advances, owing to the fact that so very many estates are held in coparcenary, and that some shareholders are absentees, or are unwilling to take advances, or do not pull with those that are willing. In one village that I went to I found that there were no less than 22 proprietors of fractional shares, very many of whom were

non-resident. Any attempt to deal with a body of this kind within a reasonable time was, of course, out of the question. My impression is that some of the zemindars are hanging back in hopes of getting still better terms, and that others finding that Government is prepared to make advances to ryots direct, prefer that the advances should be so made rather than that they should run any risk of loss

6. In the portion of the Bhurtpore thana bordering on the Burdwan district, deficiency of supply of rice was reported by the relief sub-divisional officer, though, strange to say, rice was selling at Khargram, an outpost in the vicinity, at 12 seers per rupee. I accordingly authorized him to advance small quantities of grain to the local traders, the supplies to be replenished on payment for the former supplies. A similar plan will now be followed in other parts of the district west of the Bhagiruttee, where it may appear to be necessary, at the rates fixed by the Commissioner, viz., 12 and 14 seers for cleaned and uncleaned, with one seer allowed to the dealers for transport and profit, or a larger amount in cases of long and difficult transport."

A.—STATE OF THE COUNTRY.

1. *Abundance or scarcity of supply in the bazar.* The supply of food-grains in the bazars and hâts throughout the head-quarters sub-division is reported to be sufficient. In the Jungypore sub-division the Dhulian bazar is reported to be abundantly supplied with rice and other food-grains. The Roghunathgunge bazar is also well supplied, but the supply in the markets of Mirzapore and Notungunge is deficient. In the Lalbag sub-division the supply in thanas Asanpore, Shahanuggur, Manullabazar, and Bhugwangola is quite sufficient; but as has already been remarked, the shops in thana Bhadurihât are very ill-supplied, and the sub-divisional officer intends to make advances of Government grain to shop-keepers of ill-supplied villages, to be sold at reasonable rates. At the head-quarters of the Rampore Hât sub-division there is still a sufficient supply of food-grains. In thana Khargram the markets are reported to be by no means so well provided, but no want of a serious nature has yet been felt. In thana Pulsa, too, the supply has been reported to be scanty. In the smaller bazars and hâts of thana Nulhattee it has been reported that although the supply is not abundant, still it is sufficient to meet the daily wants of the people.

2. *Kind and price of grain selling at one or more principal marts.* The price of common rice in the head-quarters sub-division is slightly higher than at date of the last narrative; the average is now 10$\frac{1}{12}$ seers per rupee. Taking twelve of the principal marts of the sub-division: it is dearest at Latooee and Kandee, where the rates are 9½ and 9 seers, respectively, per rupee; and cheapest at Jellinghee where the rate is 13 seers per rupee. Wheat is nearly the same as at the date of the last report, 13$\frac{2}{3}$ seers per rupee; but gram is dearer, being 14$\frac{2}{3}$ seers per rupee. In the Jungypore sub-division, in the Roghoonathgunge bazar, common rahri rice is 11$\frac{2}{3}$ seers, whilst purbi rice is 12½ seers per rupee. At Sooty, rice sells at 12 seers. At Dewanserai bhadoi sells at 12 seers, and purbi at 11 seers. Rice is cheapest at Dhulian bazar, where it sells at 13¼ seers; and it is dearest at Hazarpoora, where it sells at 10 seers. This difference is rather striking, considering that Hazarpoora is only 10 miles from Dhulian, and the means of transport by the Ganges are good. In the Lalbag sub-division the prices of best, common, and purbi rice vary from 8 to 10, 9¾ to 11, and 12 to 13 seers per rupee, respectively: those of wheat, barley, and gram, from 12½ to 14, 20 to 22, and 16 to 18¾ seers per rupee, respectively. In the Rampore Hât sub-division the prices of coarse rice vary from 11¼ to 12½, and those of best rice from 9¾ to 10½ seers per rupee. The sub-divisional officer states that in all the thanas the prices are remaining almost stationary, and among them Rampore Hât seems to be better off, the price of coarse rice there being 12½ seers per rupee. At Khargram, however, rice is selling at 11¼ seers per rupee.

3. *Any information obtained regarding the amount and kind of grain believed to be in stock in the hands of zemindars, traders, ryots, and others.*—It is reported from nearly all the stations in the head-quarters sub-division that the stock of food-grains remaining in the hands of zemindars and mahajuns is very small. As regards the Lalbag sub-division, no further information has been gathered since the submission of the last report. The sub-divisional officer of Rampore Hât states that the stock in the hands of mahajuns, zemindars, ryots and others, is not accurately known, but it is believed that it is insufficient to enable them to meet the demands of the poor ryots who are in want. The report for thana Khargram, as to the food-supply, still speaks of its insufficiency.

4. *Rainfall, if any.*—There was very scanty rainfall during the fortnight under report throughout the district, except in the Rampore Hât sub-division, where, the sub-divisional officer reports, there has been a considerable rainfall in almost all parts of the sub-division. It has greatly benefited the standing crops of aous, sugarcane, amun, and mulberry. It has enabled the cultivators to continue agricultural operations with vigour.

5. *State of the Crops.*—The present state of the crops in the head-quarters sub-division is reported to be good; but rain is very much wanted for their improvement. The sub-divisional officer of Jungypore reports that in the new chur formed on the site of old Noorpoor, in the bed of the Bhagiruttee, between Atpalgachi and Syedpore, and in the chur formed opposite Atpalgachi, a considerable quantity of bhadoi crop has been submerged by the rise of the river. The people of new Noorpoor cultivated not only a part of the old bed of the Bhagiruttee but a considerable part of the more dangerous and lower alluvium of the Ganges; so they have suffered more than their neighbours of Atpalgachi, Bahadurpore, and Syedpore,

The ryots of Gota, Ramakantapore, Lukhipore, Fatullapore, and Labanchoa have also suffered to some extent from the submersion. The bhadoi crop which has escaped, the sub-divisional officer reports, looks very fine, and promises an abundant harvest.' The total loss in these villages is estimated not to exceed 500 beeghas. The grass which yields the edible seed called kodo, had, for the most part, been reaped early in June; but the farinaceous shama grass has suffered as much as the bhadoi crop. The sub-divisional officer states that the cultivation of bhadoi and shama in the present year considerably exceeds that of any preceding year; and as the river has fallen about a foot or so, the prospect of early rice is, on the whole, a cheering one. Everywhere the dhan has begun to flower, and in some places it is ripe. Hoimonto dhan is reported to be good, except at Takshak, Banneswar, and a few other villages in Mirzapore, where the rainfall has been scanty. The sub-divisional officer of Lalbag reports that the crops throughout the sub-division are very promising. The transplanting of the amun paddy in thana Bhadurihât, though late, is progressing. More rain, however, is required for the young plants, especially those growing on the higher lands. The sub-divisional officer of Rampore Hât reports that the prospect of the crops are generally favorable, as previously reported. The amun, aous, and other crops are doing well, and all kinds of vegetables have turned out well, owing to the late falls of rain. Agricultural operations are not going on satisfactorily in thana Khurgram, as there has been a slight fall of rain during the last few weeks, but, generally speaking, the prospects of the crops are promising.

6. *Condition of the people.*—There is no change to be reported in the condition of the poorer classes; they still crowd in large numbers to the relief depôts and cook-houses. In the Jungypore sub-division the agricultural classes are busy in their rice-fields. In parts of Mirzapore the distress is severe, but the relief committees are doing all they can to alleviate it. The sub-divisional officer of Lalbag reports that no visible improvement has taken place in the condition of the poorer classes. The ryots in Bhadurihât are still much pinched, as the zemindars and mahajuns refuse to advance them either grain or money. The sub-divisional officer of Rampore Hât states that there is very little change to record in the condition of the poor people.

7. *Actual facts as to any known cases of misery and starvation.*—No such cases have come to light during the fortnight under report.

8. *Grain-thefts or Robberies.*—Eight cases of theft of grain were reported during the fortnight in the head-quarters sub-division; in one, paddy worth Rs. 40 was stolen; the rest were petty cases. Only one case of grain-theft occurred in the Lalbag sub-division,—a coolie was seized by the police while taking away rice stolen from the Lalbag gola. There have been three petty grain-thefts during the fortnight in the Rampore Hât sub-division. A crime statement is annexed.

9. *Condition of any special tracts.*—In the head-quarters sub-division cholera is still present in Sujagunge and Burwa, but there are very few cases. Small-pox appears to have disappeared for the present. In the Jungypore sub-division the sub-divisional officer states, as reported in the last narrative, that Mirzapore and Western Sooty are the only places where the dearth is keenly felt. Distressed people from Mirzapore constitute the bulk of those who attend the cook-house of Roghunathgunge. The sub-divisional officer of Lalbag reports that small-pox has re-appeared slightly in Baluchur. In the Rampore Hât sub-division cholera and small-pox have almost disappeared; cholera is said to be still lingering to a slight extent in some parts of thanas Rampore Hât and Pulsa, but it is fast dying out owing to the falls of rain. There is no special tract in this sub-division suffering distress which deserve notice. Statements submitted by the Civil Surgeon are annexed.

B.—Relief Works.

As far as reports have been received, the average daily number of people at work during the fortnight has been 3,800. The condition of the people has been reported to be good. Food is easily obtainable, except in a very few places. Payments are made in rice. The number above given shows a great falling off as compared with that given in the last narrative. The decrease is observable on almost all road works, but the numbers employed on the Gorabazar drain has more than doubled since the last narrative. The reason is, I believe, that the men are now engaged in agricultural operations. A statement showing the expenditure in *money* on relief works is annexed, with explanations for cash payments.

C.—Transport of Food.

Very little information has been obtained under this head. It cannot be doubted that there is considerable importation going on in consequence of the facility offered by the rise of the rivers. Purbi rice has been imported into the Jungypore sub-division, as last reported. From a return received from the station-master at Azimgunge, it appears that 558 maunds 30 seers were exported, and 11,061 maunds were imported into the Lalbag sub-division. Of the latter 9,382 maunds 20 seers were imported from Howrah, and 1,613 maunds 10 seers were received from the Burdwan district. From the statements received from the Traffic Manager, East Indian Railway, it appears that the total amounts of exportation and importation during the fortnight in the Rampore Hât sub-division were 4,119 maunds and 14,030 maunds, respectively. The sub-divisional officer states that importation seems to have been very brisk during the last few weeks.

D.—Storage of Government Grain at Relief Works.

There has been no change in the place previously selected for the storage of Government grain. The arrangements at first made for the management of the Government golas are still adhered to. Much difficulty is still experienced in keeping circles in the interior fully supplied with grain, owing to the difficulty of procuring either land or river transport. There is a sufficient supply of grain in the district for present requirements. Mr. Toynbee has promised to send a cargo from Calcutta by steamer this week, which will enable us to give a month's supply to all the golas on the banks of the Bhagiruttee. Annexed is a statement showing the storage and consumption of Government grain in the district. The figures shown in this return are, I think, tolerably correct, though somewhat under the mark.

E.—Advances to Private Parties and their Results.

There were eight cases pending at the close of the previous fortnight in the Sudder sub-division; nineteen fresh applications were received during the present fortnight. Out of the total, twenty-seven, twenty cases are under investigation; in five cases order for payment has been made; in one case the applicant has refused to take the advance, and the remaining application has been rejected. Cheques for payment of rice in lieu of cash have been issued to the amount of Rs. 840. Numerous applications for loans have been received from ryots in the Sudder sub-division, and inquiries are being made by the several relief assistants into each case. Loans will be granted to several; but most of the applicants, excepting those residing in the Kulliangunge thana and portions of the Gokuru thana, appear to be well-to-do ryots, who can well support themselves even at this season. The poorer ryots have not been so importunate as these men in their applications; but cases of distress among them which have come to light during the inquiries now being made, have been relieved by gratuitous grants of rice varying from one maund to two maunds from the relief committees, and will be dealt with in the same manner in future. In many cases where the number of applicants in each village is large, the zemindars have been called upon to take advances of rice from Government for the relief of the applicants. An advance of Rs. 4,000, to be paid in rice, to Baboo Chandra Shikur Ghosal of Kamtulla, in the Kulliangunge thana, has been sanctioned by the Commissioner, and will be completed in two or three days. In the Jungypore sub-division 193 maunds and one seer of rice were given to ryots, and 70 maunds to a zemindar as advances. The sub-divisional officer does not mention the result of his measures for the advance of rice to zemindars on behalf of their ryots. The sub-divisional officer of Lalbag intends making advances to ryots in small quantities under the head of charitable relief, and gradually exacting repayment by labor on the relief works. Each ryot will be supplied with a hâthchitta, and the days he works without remuneration, for the liquidation of his debt, will be entered on this back of this hâthchitta. In the Rampore Hât sub-division 1,098 maunds and 35 seers of Government grain have been advanced to six persons.

F.—Charitable Relief.

The statement prescribed by Government No. 1251—S.R., dated the 5th March last, is annexed as regards each sub-division separately.

The cook-house started for Mahomedans at head-quarters, is now in operation. The number resorting to this is much less than that attending the Hindu cook-house, as the majority of the inhabitants of Berhampore are Hindus. During the fortnight under report 20 persons have been relieved under heading (*d*) at the head-quarters.

There are eight relief works going on in the special sub-division of Kandi, employing, as far as reports have been received, 543 persons daily; and there were 2,731 persons in receipt of gratuitous relief daily in the sub-division. The numbers have been incorporated with the entry in column "total" against head-quarters. In the Lalbag sub-division there are annachatras for Hindus and Mahomedans at Shahanuggur and Mohimapore, and charitable relief under (*d*) is now being administered on revised lists submitted by the members of the sub-divisional relief committee. In thana Bhadurihât relief roads have been opened wherever the people were in distress, and rice is distributed to persons who are unable to work. Out of the numbers shown in the statement, 1,997, 682, and 459 persons were relieved under headings (*b*), (*c*), and (*d*), respectively. The total receipts of the sub-divisional relief fund are Rs. 6,018-7-5, and the total expenditure Rs. 1,315-11-9, leaving a balance of Rs. 4,702-11-8. In the Jungypore sub-division the number shown in the statement represent those relieved at the annachatra started at Jungypore. In addition to this, 642 men were employed on two embankments from the 15th to the 21st instant. During the fortnight under report four women were relieved under heading (*d*). The total receipts of the sub-division amount to Rs. 4,055-7-7, and the total expenditure Rs. 3,275-8-7, leaving a balance of Rs. 779-15 at the close of the fortnight. The sub-divisional officer of Rampore Hât reports that many of the sub-committees under him appear to have allowed the recipients of gratuitous relief to increase unnecessarily. The total amount of receipts of the sub-divisional relief fund is Rs. 2,084-11-7⅓, and the total expenditure Rs. 1,088-7-4½, leaving a balance of Rs. 996-4-3 at close of the fortnight.

G.—Financial Results of the Fortnight.

Berhampore,
The 27th July 1874.

(Countersigned.)
C. W. Bolton,
Asst. Magte. and Collr., in charge.

J. A. Dawson,
District Grain Officer.

No. 1594—S.R., dated Dinagepore, the 27th July 1874.

From—E. E. Lowis, Esq., Offg. Magistrate of Dinagepore,

To—The Secretary to the Government of Bengal, Scarcity and Relief Department.

I HAVE the honor to submit my narrative for the fortnight ending 27th July.

A.—STATE OF THE COUNTRY.

The health of the people during the period under review has been on the whole good; cases of cholera and small-pox have been reported in a few localities, but there has been no general sickness. When I last wrote, we had had a most seasonable and continuous fall of rain, the rivers were then full, and the fields flooded; what was wanted was sunshine to enable the seed in the seed-beds to germinate, and the ploughing for the winter crop to be pushed on; warm sun was also required to bring the bhadoi towards maturity. Such weather have we enjoyed during the past fortnight; we have had four or five days of hot sun, now alternated by showers. The weather has been all that could be desired, and the prospects for the future are most encouraging. The earliest species of bhadoi are being reaped, more is in flower, and will be cut in another twenty days, and as as a whole, the early rice crop will, we may confidently expect, be most successful: at least twice the usual area has been sown with this crop, and the yield will be above the average. Besides early bhadoi, murwa and other grains are here and there dropping into the market, in small quantities, it is true, but still their appearance, in a small way, tends towards reducing prices, and keeping up the food-supply. The cutting of jute has been commenced, and new jute is already in the market; the crop is a very fair one, and towards the north, where the cultivation is pretty extensive, will go far towards supplying the ryots with the means to purchase food. Sugarcane is everywhere looking remarkably well, and promises a good outturn. As regards the great staple of the district—winter rice—the prospects so far are most encouraging. The greater portion of the winter rice is "ropa," or transplanted; the sowing of the seed in the nurseries has been completed; and the plants may be seen round the ryots' houses in various stages of development, in some just showing above ground, in others several inches high. The broadcast sowings, which are made on lower lands, were completed some time ago. The rain of a fortnight ago flooded the country most completely, and enabled the villagers to push on with their ploughing and other preparations for transplanting; in many places rice has already been transplanted, and I have seen a good deal of it in a most thriving condition. The transplanting season lasts, properly, till the 1st of September, but plants can be put out till the end of Bhadro, corresponding with the 8th or 10th of September, it will be observed, therefore, that agricultural operations are for the season well forward, and if the seasonable weather we have had continues, all operations as regards the winter crop will be completed before the 1st September. A larger area than usual of this crop will not, perhaps, be cultivated this year, because the ryots have sown such an unusual breadth of bhadoi, that they have taken up some lands generally devoted to hemanta or winter rice; and in so doing have acted wisely, securing a larger amount of the early grain, which is wanted for home consumption instead of a later crop, which is to some extent grown for exportation. We are almost certain of an unusually large return of bhadoi, and of a good crop of jute, while from the seasonable weather and the advances and promising state of the cultivation there are good hopes for the winter rice. This promising state of the country, combined with the presence of Government stocks, has induced a fall in prices, and country grain can be purchased at many places at from 11 to 12 seers per rupee; the supply, however, is everywhere reported to be scanty. Towards the north, the sale of Government grain has, to a certain extent, cased the market, but prices still rule very high in Thakoorgaon, ranging from 8 to 10 seers per rupee. As noted in a prevous narrative, distress was not expected in this quarter; the demand for rice, however, is now undoubtedly great,—a want we are striving to supply. I visited this part of the district myself a few days ago, and witnessed the eagerness of the people to buy. Owing to heavy rain, supplies had not come for a day or two, and when I went there was a crowd of some thirty paikars round the gola at Thakoorgaon, who had been there a couple of days, waiting to carry off supplies for different hâts. As soon as news came that the carts were at the ghât half a mile off, away went the paikars and returned with the carts, as many as could, with their hands on particular bags, which they claimed a right to buy. The want in this part of the country is of grain, the stocks having been sold out. Of actual distress there is not much, for most of the ryots realized good profits by sale of rice, though of course high prices tell on all who have no land, or who were unfortunate in not reaping a fair harvest. That relief operations—by which I mean sale of Government grain, as well as charitable relief—were started only just in time, is testified to by Dr. Gregg, who lately made a tour through Beergunge and Thakoorgaon as well as other parts of the district. He reports that while he found no signs of emaciation or distress in those parts of the district where there was a failure of the crop, he did remark some cases to the north; relief, he observed, had been afforded, but there were signs of privation having been gone through, before relief operations were opened.

B.—Relief Works.

Work on the roads has not been entirely closed, for it has been found impossible to get rid of all our coolies, even of all the able-bodied. The gratuity of grain for fifteen days' supply, has in very few instances been given, for it was found that the coolies were only too glad of an opportunity of returning to their own employments, and it seemed quite useless to give a coolie fifteen days' supply of food, when he was unlikely to get work elsewhere; it seemed better to reduce him to subsistence allowance, exacting in return a fair day's work. By advancing grain gratuitously to all our coolies indiscriminately, we would indirectly have interfered with the market for agricultural labor; for as long as the gratuity lasted, the recipients of our bounty would not have sought work, but have preferred eating the bread of idleness at home. As it is, with their pay reduced to six pice per day, any coolies that remain on our hands have every inducement to look for employment elsewhere, and in fact the greater portion have provided for themselves. Nor do those coolies who remain draw subsistence allowance for doing nothing, otherwise their employment in light labor gangs might have attractions. The gangs are employed in turfing, filling in breaches, and in some places completing lengths of road where the land is high enough to admit of operations being continued; all such work is done by the piece—a certain length of turfing so much, and so on. The busiest agricultural season is now coming on, but even then I do not expect the labor market to absorb all our coolies; in some circles they will go, in others not, a good deal depending on the locality. Again, the weather will, to a certain extent, determine the demand; if we have a spell of dry weather now, and fall of rain only just before, it is too late to transplant; the work to be done being compressed into a shorter space of time, there will be a greater demand, than if transplanting can be carried on regularly, from now to the end of the first week in September. Under any circumstance, however, we may expect all our coolies in Patiram, Porsha, Patnitola, and Tamboolee, to be absorbed, when work in the fields cannot be found for all, in Bindoil, Raneesonkoil, and Bochagunge. In the former thanas there are fewer laborers as compared with cultivation, and there are many better class agriculturists, who employ labour; in the latter, there are fewer well-to-do ryots, and more persons who live either entirely, or partly, by labor. Agricultural labor is paid for in this district partly in money, partly in food; a laborer getting his three or four annas, and his food twice a day. With rice so scarce and dear, many ryots who have hitherto employed field hands, do with less help, supplementing the deficiency by their own personal efforts. It happens, therefore, that this year there is not the same demand for agricultural labor as usual. Every year the agricultural market in Patnitola and Porsha is supplied by laborers from Bindoil and Raneesonkoil, who may be seen all July going through the station in troops to find work down south in transplanting the rice, and afterwards in cutting it. This year smaller numbers of laborers have passed through, as it is understood that there is no demand for their services; at their own villages there is even less field for their employment; the consequence is that in Bindoil and one or two of the neighbouring circles men are only too glad to get work at 6 pice per day. I may add that laborers are now paid for field-work from Rs. 2-8 to Rs. 3-8 per month, with their food twice a day given them; it is evident, therefore, that none come to us who can obtain employment elsewhere. To prevent all chance, however, of mistake, the circle officers of Patiram, Patnitola, &c., have been directed to enquire particularly whether there are any complaints of lack of labor; if there are, men will be sent down from other circles, their travelling expenses being allowed them as charity. The supply of Government grain in the market, but more especially the system of granting advances of grain, has done much to enable the labor market to absorb our coolies. Laborers expect part of their wages, in the shape of food, and many ryots who required help to till their lands, were in difficulties as to the necessary supply of rice, without which they could not engage laborers; advances of grain could not be obtained from mahajuns, the stocks being much exhausted; while money to purchase was not always available and could not at one time be raised. To such men advances of Government grain were a great boon, and these advances have, I am convinced, done much in enabling our coolies readily to obtain work.

C.—Transport.

The demand for rice still continues at Beergunge and Thakoorgaon; the former is now being supplied from Patiram and Patnitola by boat up the Atrai, while the latter is being supplied by cart from Raneesonkoil and Hurreepore. As our stores at the station are beginning to run short, I am getting up 10,000 maunds from Porsha, and the surplus from Tamboolee. Out of the 60,000 maunds to be sent to Purneah, 33,000 have gone from Raigunge, and 20,000 are to go from Chooramon; part only of the latter has yet gone. It was intended that 40,000 should have gone from Raigunge, but I do not think more than 33,000 can be spared.

D.—Storage.

Out of our total allotment, some 70,00,000 maunds have already been disposed of, and the balance distributed over a number of golas, shows no large stock in any one place. Rice has not always, as it has turned out, been stored exactly where it was wanted, but sites

expect the price of grain by the first week in September to fall as low as 20 or 22 seers per rupee. I anticipated this myself; for although the villagers will only sell their surplus, reserving enough for their own eating, the market is certain to be glutted with grain, as soon as it ripens, as every one will try and be the first to secure a sale, before prices fall; demands on account of rent and for debts, too, have to be satisfied, and this will increase the amount thrown on the market. Altogether we may expect grain to be very cheap during September, and perhaps October; though as Government stores will then consist of country rice only, some persons may yet purchase from us, new bhadoi being unwholesome as food. The exact selling price of rice at this period it is difficult to predict, but it is not likely to be above 20 seers per rupee. During November, the first rush being over, it is quite possible prices may rise again, but the prospects of the winter crop, whether for good or bad, will then be a certainty, and if good, no slight rise in prices can do any harm; for with a good harvest in prospect, money can always be raised. Our stocks are sufficient to last us till the bhadoi comes in, and after that, if the weather continues favorable, I do not consider there is any cause for anxiety, though I am bound to add that the Relief Commissioner does not altogether share in this hopeful view of the case.

E.—Advances.

I subjoin the remarks by the district relief officer on this head:—

"During the past fortnight, as was expected, there was a great falling off in the amount given out in advances. In fact, this measure has almost been completed in all the districts, except in the extreme north and in Patnitola, Patiram, and Gungarampore circles, where only a portion of the amount allowed for a particular village was in the first instance given out to the applicants. This course was adopted with a view to prevent waste. In Beergunge, Thakoorgaon, and Raneesonkoil circles there is still a considerable demand for advances, but the supply of grain in those circles has not been sufficient after providing for the consumption on relief works and charitable relief, and the heavy demand for sales to the public to afford a surplus for advances. The want of advances in Beergunge directly affects the pauper rolls, as is plainly shown below. In these three circles, and in those where a second instalment remains to be given out, we may expect a further expenditure of 40,000 maunds.

"During the present fortnight the issues have been—

"This, added to maunds 2,33,115 17-11¼, accounted for last week, gives a total of maunds 3,05,412-4-12¼, with a prospect of further demands for about 40,000 maunds.

"During the past fortnight, since it has become known to the public that the advances were to be considered as given on such favorable terms both as to the rate and the periods at which the advances were to be repaid, something like a rush has been made by the villagers to get larger quantities than had been first determined on as sufficient to meet their legitimate requirements. Only in very few cases has it been found on enquiry advisable to give further aid: only in cases where the first estimates were palpably inadequate. Likewise, in the cases of new applications, particular care has been taken in sifting the applications; indeed, they have nearly all been rejected, and the zemindars of this district cannot possibly say that advances have been unnecessarily given to their ryots. It seems certain that without the advances a considerable portion of the country would have been left uncultivated, and many thousands of ryots, with their families, would have been now on our pauper rolls. Reports have been received from two circles to the effect that the zemindars have already begun to attach the standing crops of their ryots for rent, so as to forestall Government in recovering the advances given. Much work remains to be done in altering the agreements first filed, and adjusting the amounts, and time of payment of the instalments to meet the more liberal orders recently received, also in shaping the agreements to meet the requirements of the Registration Act."

Regarding what Mr. Nicholls has noted about advances not having been given in Raneesonkoil and Thakoorgaon, I may remark that advances to a certain extent have been given in the former circle; in the latter there is very little demand for advances; the ryots have means, and feel they do not require help in that shape: the applications in Thakoorgaon, only come from the western portion of the thana, where there was a failure of the crop. It is worthy of remark that where the ryots are not badly off, they have abstained from applying for advances, not because they were refused, but because they did not like to incur unnecessary debt. I would call attention to the remarks, anent the conduct of the zemindars, who are showing less and less inclination to help their ryots in this pinch. I need not repeat what I wrote in my last narrative, but I would again press on Government the necessity of making the recovery of the money due for these advances a matter within the jurisdiction of the Collector, thus doing away with the necessity for registration, a measure which cannot be enforced.

for our golas having purposely been selected, in many places on the banks of rivers, grain has been moved about without any trouble; distribution also being much expedited by our system of selling through the local paikars or dealers. If we continue to enjoy favorable weather, the Government stocks will suffice for all our requrements, though there will not be much left on our hands, when we close our operations. Now that we are almost sure of a very good crop of bhadoi, calculations as to the outturn tend to show that we may

F.—CHARITABLE RELIEF.

I subjoin the remarks by the district relief officer. I regret that severe illness has prevented his completing his report by describing in full the organization for charitable relief.

"At the end of the last fortnight there were in round numbers 82,500 people in receipt of charitable relief. This included a great number of people, who had previously been employed on relief works, unable to find employment elsewhere, or who were kept on to finish some particular work.

"It will be seen from the subjoined statement that in the first week of this fortnight the number ran up to 1,13,600 while in the latter week it again fell to 84,870.

"Some of the circles show very great changes, while others have, during the previous five weeks varied but slightly. Circles in which Europeans are the relief officers, are decidedly in the latter class, and so far as I understand, the figures shown by some circle officers are greatly at variance with the supposed status and requirements of their people.

Phulbaree shows—

First week 1,382, second week 5,117, third week 7,334, fourth week 5,300.

Habra is adjacent to these two circles, but shows 1,306, 1,465, 2,265, 2,410, 944, as its numbers during the past five weeks.

In Patiram, 2,038, 2,209, 2,327, 4,348, 2,582.

In the sudder circle, 3,001, 3,210, 5,261, 5,247, besides about 200 maintained by a zemindar.

"This seems to show that the officers entertain different ideas of the orders issued to search out paupers requiring relief, and some over-zeal may have been shown in this matter.

"By communicating to each circle officer what are the results in other circles, and reducing the rates of payments for light labor, it appears probable that a very great diminution will be shown in the next fortnight.

"It will be noticed that out of the total 95,139 paupers, the mass of them belong to—

"Beergunge	19,472
"Bochagunge	8,538
"Durgapore	8,532
	36,542

"Probably the excessive numbers in Beergunge are owing to the later period, at which operations were commenced. In the early month signs of distress were not observable, but by the time that relief measures had to be taken in hand, the condition of the people was more reduced than in the southern circles. When operations were begun in them again, the 1st July overtook the relief officer with several valuable roads incomplete, and he naturally allowed people to stay till he could consider them safe against expected floods.

"To this must be added the difficulty of supplying the golas in this circle with grain, especially after the first fall of rain. Owing to this advances could not be given out in any quantity large enough to lighten the pauper rolls.

"Bochagunge also is, to a lesser degree, affected by the same causes. The work-people on the roads were particularly wanted at that time. The decrease in this circle from 11,201 to 8,538 would be satisfactory; but the real decrease is still greater, for some 750 out of this 8,538 are shown only, as they happened to have some arrears of pay due to them, which they received during this week.

"The numbers in Doorgapore have always stood high. The relief officer (Mr. Pollen) has satisfied himself that but very few of these people can find any employment near their homes, and they are willing to work, or at least to attend on our light labor works for one seer of rice a day. He complains, indeed, of their excessive idleness, but considering the good pay given to agricultural laborers throughout this and adjacent circles in comparison with the small subsistence allowance now given by Government, it seems that their laziness must far surpass that of all other Bengalis, or that it is certain that there is no private employment available for them.

"The adjoining circles of Bindoil and Chooramon have 3,348 and 3,186 paupers respectively. Enquiries are now being made to find out whether there is any demand for laborers in the south, with a view to sending off the adult male paupers from the north.

"I regret that severe fever prevents my describing to-day in detail the organization of charitable relief, and the system of advances as carried out."

DINAGEPORE MAGISTRACY,
Dated the 27th July 1874.

E. E. LOWIS,
Offg. Magistrate.

No. 859, dated Maldah, the 27th July 1874.

From—F. WYER, ESQ., Offg. Magistrate-Collector of Maldah,

To—The Offg. Secy. to the Govt. of Bengal, Statistical Department.

I HAVE the honor to forward my narrative for the fortnight ending the 24th instant.

A.—STATE OF THE COUNTRY.

During the past fortnight the weather has been most favourable for the crops. During the first week there was a good deal of rain, then came three or four days of hot steamy weather; this has been followed by showery days. The Mohanunda has gone down about 1½ feet, so that the loss of bhadoi by submersion will, I hope, not be very great. In Shibgunge the circle officer reports that the loss from the rise of the Pagla river will be $\frac{6}{16}$ths, but this loss will be counterbalanced by an equal proportion having been sown this year in excess of ordinary years, and since there has been no further rise in the river for the last few days and the crop on the higher land promises very well, even now the outturn may exceed that of ordinary years. In Nawabgunge the bhadoi is very forward, some of that which was sown early is being reaped and nearly the whole of the remainder is in ear.

In Gomastapore circle about one fourth of the bhadoi crop has been destroyed by the rising of the river, but the remainder of the crop is very good.

The prospect of the hymunti crop is so far good. The cultivators have, as I anticipated, managed to get seed without Government furnishing them with the means, and cultivation is going on briskly throughout the whole of the Bhurind. In the west part of the district a good deal of Indian corn has been sown and is now coming into ear, and will be cut during the next fortnight. This crop is a very good one.

The import of rice at headquarters during the past fortnight was 6,030 maunds, and of paddy 530 maunds. During the last few days the price of rice has gone up slightly at headquarters; at Rohunpour it is now the same as it was last fortnight, but it rose slightly at the beginning of that period. At Nawabgunge it is now 14½ seers for the rupee, and the circle officer reports that the supply is well maintained by imports from the eastern districts. The Shibgunge circle officer gives the same report for his circle. So that the time has now come when relief operations may be contracted. A beginning has been made by closing two centres in Shibgunge circle, two in Nawabgunge, and two in Chanchal. The Shibgunge circles will be amalgamated withthe sudder circle on the 1st proximo, the whole being put under charge of Mr. Livesay. This arrangement has received the approval of the relief commissioner.

The Gazole circle has been united with the Maldah under Baboo Hem Chunder Kerr, who says that he will be able to close the Maldah centre about the middle of next month. I have ordered those centres to be closed where the daily average number of persons relieved is less than 20. The pauper being presented with a month's supply of rice, *i.e.*, 20 seers. I have ordered each circle officer to personally superintend the distribution of this dole, and to have proper registers kept of the names, &c., of the recipients.

In Chanchal little or no bhadhoi has been cut, but the crop is looking excellent, and will be fit to cut in nine or 10 days.

The following tables give the latest prices of paddy and common rice at the principal marts in the district, and the quantity imported to English Bazar and Maldah during the past fortnight:—

	Paddy.	Common rice.
Nawabgunge	.....	14½
Shibgunge	... ..	12¾
Rohunpore	18	11
English Bazar	.....	12 to 13
Harjinagor	.....	12½

Imports.

	Rice.	Paddy.
From Dacca	5,270	215
„ Sylhet	610	225
„ Rohunpore	150	90
Total	6,030	530

RAINFALL.

During the fortnight a fall of 4·79 inches of rain was recorded at headquarters, and at Chanchal, 3·81.

The health of the people has been very good, there having been only a few cases of small-pox, and two cases of cholera. In the Maldah circle there have been a few cases of *gowbasant* (rinderpest), and foot and mouth disease. I have told the police to advise the people to segregate the diseased cattle.

B.—RELIEF WORKS.

The number of people on relief works has now decreased to a daily average of 1,954 under the circle officers, and of 1,089 under the Department Public Works. The daily average increased in Chanchal during the last week of the fortnight from 241 to 711.

The following table shows the number of persons employed under the Department of Public Works and under the circle officers:—

NAMES OF SUB-DIVISIONS.		Number of Public Works Department laborers.			Number of laborers under circle officers.			
		Men.	Women.	Children.	Men.	Women.	Children.	Total.
SUDDER SUB-DIVISION	Sudder circle ...	3,180	1,860	330	.....	... ..	.....	2,534

	Grand total	42,622

Daily average number of laborers employed in the Sudder sub-division was—	
Under Department of Public Works	1,088
Under circle officers	1,478
Total	2,566
In the Chanchal sub-division under Department of Public Works ..	1
,, ,, circle officers	476
Daily average of the whole district	3,043

Amount disbursed in wages by Department of Public Works during the fortnight was—

In grain tokens.	In grain.
Rs.	Rs. A. P.
1,297	422 13 1

C.—Transport of Government Grain.

There is nothing to say under this head, except that some of the boats which were sent up to Dingra with grain for Purneah stuck fast at Sonepore, near Dingra, owing to the boatmen having tried to take a short cut. I hear that these boats have got off, and have reached the main stream.

D.—Storage of Government Grain.

During the fortnight 6,176 maunds were sent out to the several centres. The following figures show the quantity sent to each :—

	Amount of rice sent. Mds.	Srs.	Ch.
From English Bazar—			
To Natheenaggor	7	20	0
,, Gomalti	192	20	0
,, Nawabgunge	1,930	2	0
,, Shibgunge	1,882	17	0
,, Kansat	649	38	0

,, Maldah Jait	15	0	0
,, Baboo Hem Chunder Kerr, circle officer, for advances to ryots ..	400	0	0
,, Maldah chuttee relief centres	45	17	0½
,, English Bazar centres	48	17	0
,, P. W. moodies	37	14	0
From Maldah ditto ditto	234	4	0
Grand Total ...	6,176	18	0½

The quantity sent to Dengra Ghât for Purneah was 4,864 maunds and 8 seers.

E.—Advances to private parties.

No advances of money have been made during the fortnight. The quantity of grain advanced to ryots was, for the Sudder Sub-division 2,800-18-12 maunds, and for Chanchal 1,897; total 4,697-18-12 maunds, making the total, exclusive of the Shibgunge circle, advanced up to date 18,709-30-4 maunds.

Only one zemindar, Srimuti Wooma Sundri Dabi, wife of Lakenath Roy, of Singabad, has taken rice to advance to her ryots. The quantity she has taken is 400 maunds.

These 400 maunds are not included in the 18,709-30-4.

F.—Charitable Relief.

During the past fortnight the daily average number of people relieved was 10,698, against a daily average of 12,079 during the previous fortnight, The greatest decrease was in the Maldah circle. There has been an increase in the number in Gazole circle and in the Chanchal sub-division, where the number relieved is now larger than in any other circle—the number will probably decrease there in the course of another fortnight, since the bhadoi will be cut there in the course of nine or ten days.

The following tables will show the number gratuitously relieved, and the number relieved by light work at each centre :—

Names of Circle.	Number of people relieved.	Rice distribution. Mds.	Srs.	Ch.	On light work.	Number of people. Men.	Women.	Children.	Rice distribution.		
Maldah	26,384	391	12	11	Note. The numbers shown in the second table are included in the first.	1,288	... ..	.....	43	10	5¼

F. Wyer, *Offg. Magistrate-Collector.*

No. 1837, dated Bauleah, the 30th July 1874.

From—W. H. D'OYLY, Esq., Collector of Rajshahye,

To—The Secretary to the Government of Bengal, Statistical Department.

I HAVE the honor to submit herewith my narrative for the fortnight ending 25th instant. The Nattore narrative has not yet been received.

A.—STATE OF THE COUNTRY.

The supply in all markets has been sufficient; rice was imported from the eastern districts almost daily during the fortnight at the several markets on the Ganges. There has been little or no alteration in prices. They are still higher in parts of Tannore and Manda than elsewhere. Mr. Manisty reports that, in his sub-division, mahajuns have brought rice from Branteah to the local markets, the price being about 20 per cent. higher than at Beauleah. The state of the crops is still satisfactory, though not in all parts quite so good as it was previously. The weather has been clear, and the ryots, who at first complained of excessive rain, are now anxious for more. Only 2·64 inches were registered in Beauleah, but the fall has been greater in Nattore and in Tannore. In the Sudder sub-division, especially in the southern portion of it, the aous or autumn rice is in excellent condition, and comparatively forward; in the north of the sub-division it is less forward, and, before the last rain, was beginning to show the effects of too much sun, and want of rain. In parts of Nattore some aous has already been cut. A "bund," put up by the cultivators across the Nundangatchee khal, has saved a large area of aous cultivation from floods. The river is now falling, and there is no longer any reason to fear that any of the aous crop will be submerged. The amun promises to be a good crop. Mr. Manisty says that in parts of his sub-division the aous has suffered from want of weeding, the ryots not having been able to afford to pay for that operation. Maize is growing well in the Godagaree Bhurind. A large and important silk bund is now about commencing; the bright weather has been very favorable for this; and if it progress favourably, a great deal of distress will be alleviated.

The condition of the people generally is undoubtedly worse in many places than it has been hitherto. The numbers of persons flocking to the poor-houses ready to work have considerably increased. This is especially the case in the middle of the district; viz., in the east of Tannore, in the north of Beauleah, and Pooteah, and in Bagmarah. I have visited several poor-houses in that part of the district, and have satisfied myself that distress is more severe than it was a fortnight ago, and I can safely assert, that, had it not been for the relief afforded, there would have been many deaths from starvation. I have seen several persons so emaciated and pulled down that they could hardly walk. At Burgutchee there was a large number of boys and girls collecting *kunker*, and getting daily relief under the personal superintendence of Mr. Wilcox; these had all suffered from want of food, being thin, and their bones showing in a way not natural. They were, however, beginning to improve from the food supplied to them. From the large quantity of cloth made by the weavers, *dhoties* have been supplied to those who were in rags. It has been found necessary to burn the rags, as persons receiving new clothes were in the habit of coming again in rags and of lending their rags to others to appear in. This last plan was proved, for, when the rags produced by one woman were being placed in the fire, another rushed out of the crowd and claimed the rags as belonging to her. At Khoorshadanga the number of persons relieved has far exceeded that at any other poor-house. In fact, the numbers reported have been so great that I have deputed Mr. Hawkes with a superintendent to make enquiries. From what I have learnt it would appear that the sub-committee at that place have been giving relief indiscriminately, so that they have attracted many who live nearer to other poor-houses, and who would probably have been refused relief elsewhere, not being proper objects for charity. At Pannanugger factory, not far from Khooshadanga, Mr. Walton, who has afforded relief to a large number, reports most favourably on the silk and rice prospects, and believes that the numbers of applicants for relief will rapidly fall off.

No authenticated deaths from starvation have been reported, though one case appeared at first sight to have been caused solely by want of food It was ascertained, however, that the deceased was a very old woman, and though undoubtedly emaciated had received rice regularly at Burgutchee. Shortly before her death she was returning alone from the poor-house, and heavy rain coming on, she slipped and fell and remained exposed to the cold and wet for hours till her son fetched her home. Her son was in good condition, her grandchildren living in her house were plump; and they had two cows in the house; two other members of the same family had received cotton from Dhooroil poor-house and rice in exchange for the thread they spun. Fifteen cases of grain-theft and numerous cases of theft of jack fruit have occurred. I have no doubt that distress from want of food has been the cause.

B.—RELIEF WORKS.

See Statement.

C.—TRANSPORT OF GOVERNMENT GRAIN.

See Statement.

D.—Storage of Government Grain.

In consequence of the rapid consumption of grain since the sudden development of distress in the middle of the district, the Commissioner has, in consultation with me, decided to increase my stock by 20,000 maunds; this will be stored chiefly at Beauleah, Charghat, and Godagaree. The want of a small steamer is much felt. It would be of the greatest importance with a barge to convey rice from one golah to another as the supplies run short.

E.—Advances to Private Parties.

Advanced up to end of previous fortnight—

W. H. D'OYLY,
Collector.

No. 1907, dated Beauleah, the 3rd August 1874.

From—W. H. D'Oyly, Esq., Collector of Rajshahye,

To—The Offg. Secretary to the Govt. of Bengal, Statistical Department.

In continuation of my narrative for the fortnight ending 25th ultimo, I have the honor to submit herewith financial results of Nattore, and the number of persons relieved in that sub-division.

Nattore Sub-division.

G.—Financial Results.

Paid to J. R. Scott, Executive Engineer, Northern Bengal State Railway, No. 2 Division, on his cheque, Rs. 5,020.

F.—Charitable Relief.

Name of poor-house.	Number of persons relieved daily.	
	Gratuitously.	Doing light work.
Nattore	446	97
Galimpore	163	...
Kashimpore	11	15
Total ...	620	112

No. 1282, dated Pubna, the 28th July 1874.

Memo. by—W. V. G. Tayler, Esq., Magistrate of Pubna.

Submitted to the Secretary to the Government of Bengal, Scarcity and Relief Department, for information.

Fortnightly Narrative ending the 27th July 1874.

A.—State of the Country.

During the last fortnight the state of the country has become considerably worse; the expected bumper crop of aous can no longer be looked for; a great portion of the country has been flooded by the very unusual and rapid floods, especially towards the east and in the low lands. The aous, too, in the high lands have been slightly injured by want of rain. During the last few days, however, the rivers have greatly subsided and are still subsiding, and about 12 annas crops may be now expected. The amun crop, for which some fears were entertained in consequence of the floods, is doing fairly well. Prices of food-grains have been slightly affected by the above circumstances, but I trust that this slight rise is only temporary. The health of the people is on the whole good; some cases of fever have occurred, but such is usual about this time of the year.

B.—Relief Works.

Relief works still continue at the following places, against which the numbers on the works are also given :—

Sujanuggur	95	Chatmore	131
Fureedpore	6	Dulai	72
Ataikula	49		

D.—Storage of Government Grain.

No grain stored during the fortnight.

E.—Advances to Private Persons.

No advances made during the fortnight.

F.—Charitable Relief.

2,577 persons received gratuitous relief during the fortnight. It is somewhat difficult to check the sub-committees in this respect; but every endeavour is being made to put a stop to gratuitous relief. The sub-committee at head-quarters refused all such relief last week, and the consequences are being carefully watched.

G.—Financial results.

No private subscriptions promised or realized during the fortnight.

Expenditure as detailed below :—

	Rs.	A.	P.
Pay of four road sirkars for June 1874, at Rs. 7 per month, (one for 11 days and the remaining three for whole month)	23	9	0
Contingencies of two supervisors from 26th April to 30th June, at Re. 1 per month	4	5	0
Cost of sending medicines, &c., to Golam Nabby, native doctor, in Ryegunge	8	4	0
Pay of three mohurirs attached to sub-committees for June 1874, at Rs. 10 each per month (two at Rs. 10 each, and one at Rs 8) ...	28	0	0
Pay of eight mohurirs attached to sub-committees for June 1874, at Rs. 10 each per month	80	0	0
Total ..	144	2	0

The following payments have been made in kind :—

	M.	S.	C.
Paid to Maligacha road coolies	37	24	14
Charitable relief given in sudder sub-committee	25	0	0
Paid to Ameer Khan, native doctor, for giving charitable relief ...	1	0	0
Paid to Maligacha road coolies	47	21	2
Sent to Chatmore sub-committee	100	0	0
Sent to Ataikula sub-committee	40	0	0
Total ...	251	6	0

Thirteenth Fortnightly Narrative of Scarcity and Relief in Serajgunge Sub-division from 9th to 22nd July.

A.—State of the Country.

The immediate pressure of distress on the body of the cultivating classes has been, for a time, removed during the present fortnight by the cutting of the aous crop, the harvest of which is half completed. Rice, however, continues to be imported both by steamer and by country boat. The aous crop would have been a 14-anna one if it had not been for the flood, which I reported in my last narrative. This inundation is higher than any which ever occurred at this season, and within 10 inches of the flood of September 1870. The amount of damage done by it in Ryegunge has been inconsiderable, but in the other three thanas it seems to have been very destructive. About 5 annas of the aous crop has been thus destroyed in Ullapara and Serajgunge, and about 3 or 4 annas in Shazadpore. This would leave a crop of something over 10 annas, enough to carry us on until the amun was reaped; but unfortunately the yield is most unequally distributed. The highlands have benefited by the flood, while on the churs and in the beels the loss has been nearly complete.

The gradual fall in prices which had been going on until the flood has been checked, and has been followed by a moderate rise, as will be seen from the following figures :—

Name of the station.	Number of seers sold per rupee last fortnight.	Number of seers sold per rupee this fortnight.
	Seers.	Seers.
Serajgunge	13⅞	13½
Shazadpore	12¾	12⅝
Ullapara	13½	12⅝
Ryegunge	12	12
Taras	11¼	10½

On the whole, though the harvest has brought immediate relief, our prospects have become much darker during this fortnight. The rainfall during the fortnight has been 2·60.

B.—Relief Works.

All relief works have been closed on account of the flood, except some road work in the west of the sub-division, where 262 coolies are employed.

C.—Transport of Food.

I have during the fortnight sent 1,000 maunds of rice to Taras, where there is most distress.

D.—Storage of Government Grain.

There are 15,951 maunds 17 seers 9 chittacks of rice in the sub-district, according to my returns, distributed as follows :—

Name of station.	Date.	Quantity in hand. Mds.	Srs.	Ch.
Serajgunge ...	22nd July 1874 ...	5,791	0	10
Vilapara ...	10th ditto ...	3,450	10	5
Ryegunge ...	10th ditto ...	4,108	3	8
Taras ...	7th ditto ...	1,602	3	2
In transit ...	....	1,000	0	0
	Total ...	15,951	17	9

This stock is sufficient. I estimate the consumption of grain during the next fortnight at 2,000 maunds.

E.—Advances to Private Parties and their Results.

During the fortnight I advanced maunds 410-9-6 of rice to zemindars, and maunds 131-11-4 to ryots on the khas churs. The disbursements under the latter heading are likely to increase, as a large portion of the flooded country is Government property or under khas management.

F.—Chritable Relief.

The number of persons receiving relief has been reduced from 10,274, entered last fortnight, to 5,038. This result has been the effect of the kodo and aous harvests. I do not anticipate any considerable changes in the numbers on our lists for some time, as the reduction in prices partly in the villages on high lands will be counteracted by the necessity for giving assistance in the flooded tracts. Of the total number 400 were relieved, on the daily average, at unnochatras for the distribution of cooked food. The others, 4,638, are assisted on the village system, receiving bi-monthly doles of uncooked grain. They are classified as (*a*) persons receiving gratuitous relief as paupers, (*b*) persons doing light work, and (*c*) respectable persons to whom the rice is given as a loan to be repaid. 2,962 belong to the first class, 1,292 to the second, and 384 to the third.

G.—Financial Results.

Statement shewing the Storage and Consumption of Government Grain in the Sub-district of Serajgunge for the fortnight ending 10th July 1874.

Name of circle, Serajgunge; date for which figures are given, 26th June 1874 to 10th July 1874; total allotment of Government grain, 5,298 maunds 13 seers 8 chittacks; total quantity of grain stored, inclusive of grain transferred to other districts, 5,298 maunds 13 seers 8 chittacks; by sale to the public or to labourers, nil; by gratuitous distribution in any shape, 1,280 maunds 32 seers 8 chittacks; by advances to ryots, 541 maunds 20 seers 10 chittacks; by payment in kind to laborers, 177 maunds 13 seers 4 chittacks; total, 1,999 maunds 26 seers 6 chittacks; estimated grain receipts of the ensuing fortnight, nil; estimated grain expenditure of the ensuing fortnight, 2,000 maunds consumption; 1,000 maunds remittance to Pubna.

Remarks by Magistrate.

Ever since submission of his report the rivers have considerably subsided, judging from the reports on the papers, and the state of the rivers in the head-quarter sub-division, and I am, therefore in hopes that the next fortnightly report will be more favorable.

With a 10-anna crop, recipients of gratuitous relief ought, with care, to be reduced.

Pubna,
The 28th July 1874.

W. V. G. Tayler,
Magistrate.

No. 18.

Narrative of Scarcity and Relief in the Rungpore District for the Fortnight ending Saturday, the 25th July 1874.

A.—State of the Country.

Supplies, abundant before, are more abundant; and prices, already easy, are easier. The markets are full of new aous rice. Importation has ceased in Govindgunge, and exportation has commenced to Pubna and Nattore. Up the Teesta supplies from the south still come in a less degree, and find their way together with local rice from Sundergunge to Ghoramarah and elsewhere in the north where the aous is not yet reaped. Even in Dimla and Durwani, however, the new aous has made its appearance and is selling at 15 seers the rupee; elsewhere the rates are 20 to 26 seers. The supply of amun is scarce, and the better classes are glad to get that portion of the Government stores which consists of clean country-rice, which is however a comparatively small quantity.

Market quotations.

	Of 80 tolahs weight per rupee.

Head-quarters	14	18
Govindgunge	16	13 to 22
Peergunge	16	20
Sadullapore	20 to 25	20 to 26
Molung	18	20
Mahigunge	16	20
Kumargunge	15	16
Borobari	13	13
Durwani	12	12 to 15
Dimla	10	15
Kallygunge	14	14

The rainfall has been moderate, 4·45 during the fortnight. The previous floods did some damage, but as the water rapidly subsided the damage was slight. The people now have been taking full advantage of the fine weather to get in their aous. Harvesting is going on everywhere; in some parts three-fourths have been already gathered. In the backward parts, the red lands especially, the plant is not fully in ear, but everywhere the safety of this crop is assured, and the yield will be far more than average.

Transplantation of amun rice is now especially active. More rain is now wanted, mainly to the south. In Peergunge a dry week has made the people anxious, as the cessation of the rains last year commenced about the same time. In some tracts here owing to the want of rain the amun cultivation has not made much progress, but there is no present cause for anxiety. From two divisions (Sadullapore and Mahigunge) I have reports that the amun plants have been attacked by an insect called "khaur" (খাড়), a species of caterpillar which feeds on the tender shoots. I am having inquiries made in the other divisions whether this is the case elsewhere. All other crops look well; jute is especially flourishing.

In the condition of the people there is little change to note. In two divisions—Borobari and Sundergunge—relief operations have closed. Down the east of Molung and south and east of Govindgunge all is safe and satisfactory, and the people are being left to themselves. On the west of Molung and in the Kamdya tract of Govindgunge help will be needed for three weeks longer. In Mahigunge the large number of recipients of relief has been reduced one-half. In Dimla distress will last till the aous is reaped, but there it is only a small pauper class that is being cared for. The health of the people is in its normal state: cholera has appeared in Durwani and a few other places, but not of a severe type. The great heat has been the cause of much sickness; and in Molung fever is said to have appeared in every village. As a matter of fact, however, it is never absent from a village. Dr. Coates has just made a tour of the district from the Dinagepore boundary to the southern extremity at Govindgunge, and I am given to understand that the result of his observations shows an extremely low state of health to be the common characteristic of the people, but I have not yet received from him any memorandum on the subject.

B.—Relief Works.

This department remains the same as before. The Jelalgunge road is still approaching completion, and the executive engineer is employing some laborers on roads in the north. The road overseers are now busy, surveying the roads with a view to taking up the land for public purposes. In Govindgunge 130 miles of new road have been constructed. I have not particulars yet from other circles.

The anticipated expenditure of 50,000 maunds has been all but attained, and 30,000 maunds more will probably be used during the next fortnight. Of the Govindgunge balance, a large amount will be used for advances in Peergunge in excess of the allotment of that circle and a good part of the remaining balance will be sold. I have received information in advance of the return that some of the gola buildings and all their contents have been disposed of to local mahajuns, but I have no particulars of the transactions which will be shown in the next report. The Mahigunge balance will be all used locally, as a demand for advances has sprung up there. Weevils have attacked the Borobari balance, half of which has already been moved to Chillakhal and sold there; and as transport is now difficult and costly from that division, and the remaining rice would probably be much damaged and reduced in value by the time it reached Chillakhal, I am selling it on the spot at a wholesale rate, varying according to the state and quality of the grain.

The only large stocks remaining undisposed of will be those at head-quarters—Rungpore and Chillakhal, and the reserve at Premgunge about to be moved up to Chillakhal. Durwani sales have now come to a stop, and so has the Dimla wholesale trade, as the local rates now are everywhere cheaper than the Government rate of 14 seers for clean rice. If we can keep a reserve for emergencies in October and November, we shall not have more left than we want, but if our head-quarter stocks are to be cleared out and the Cooch Behar reserve at Kallygunge is to be sold, prices must be still further materially reduced. I have separately addressed the Relief Commissioner on this subject.

E.—Advances to Private Parties.

	Rs.	As.	P.
For purchase of food	7,500	0	0
To zemindars for advances to their ryots	1,50,844	0	0
To jotedars " " "	27,706	0	0
Add advances sanctioned but not taken	19,700	0	0
Total ...	2,05,750	0	0

Great progress has been made under this head during the fortnight. 28,000 maunds have now been issued in advances, and in Peergunge and Mahigunge further large quantities will be used in this way. In Peergunge the red soil is more extensively diffused than in any other thana. The relief officer thus reports: "This is the time when, even in years of plenty, the cultivators are assisted by mahajuns, and in this year the mahajuns are either unable or unwilling to help the ryots with loans; the latter have no other alternative than to ask for Government aid." This is being freely given. In Mahigunge the people at first refused advances, even though they alone in the district had a bad aous crop. They saw large stores of rice, and thought that by holding out for a while they would get it cheaper; but as soon as I began to transport the stocks to Rungpore for sale, the ryots came forward, and are eager for the advances which will enable them to make up for the deficiency of their early crop. In

the smaller divisions also—Kumargunge (whose advances are drawn from Rungpore gola), Sundergunge, and Sadullapore—advances are being given. In Sadullapore the ryots are careful not to take more than they need. In one case a cultivator with a large family applied for an advance of grain to last for a week only, urging that his own rice crop would be ready at the expiration of that time. In a few cases advances have been taken, and the rice sold in the market to get money for seed, but most of the ryots have saved some seed, or got money to purchase it in other ways.

F.—Charitable Relief.

(Prepared by the District Relief Officer.)

Fifteen Government food-relief centres and eight private food-relief centres were closed from the beginning of the fortnight under notice. Distress was reported among the laboring poor of Dimla, and a special inquiry in that neighbourhood led to the opening of Government food-relief centres at Dimla and Jaldhaka for the benefit of the pauper classes there in addition to the road work recently provided as a relief measure in that part of the district. There are now nineteen Government food-relief centres and one private food-relief centre of Maharani Sornomahi's at Naldanga. This last has just been closed. Baboo Ramoni Mohun Ray, Chowdhry, zemindar of Tushbhandar, has reported to the Magistrate that there is now no distress in this part of the district, and the price of rice has fallen considerably, and his distribution of rice to the poor has been discontinued. From the 12th April to July 15th, during which time rice was given, 41,155 people were relieved by the distribution of 510 maunds of rice at Tushbhandar.

The recipients of charitable relief under all heads have fallen from 32,777, as shown in the last return, to 16,154.

In Sadullapore there has been an increase of numbers charitably relieved, as in closing the operations the relief officer has relaxed the former stringency of the rules, and is dealing liberally with applicants for assistance. Clothing has been given to 536 persons, and donations to the extent of about 400 maunds of rice have been made among the poor ryots and laborers of that circle. Sufficient grain for subsistence for a reasonable time, according to circumstances, has been advanced to all those who have been dependent upon relief works or organised food-relief, and clothing has also been given where it seemed expedient. Provision is everywhere, as far as possible, being made for the wants of those who have hitherto become dependent on organised relief, and for any others who can show that they are deserving of charitable assistance.

Rungpore,
The 25th July 1874.

E. G. Glazier,
Offg. Magistrate and Collector.

No. 1746, dated Bogra, the 27th July 1874.

From—E. J. Barton, Esq., Offg. Magistrate and Collector of Bogra,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I have the honor to submit the fortnightly narrative of scarcity and relief operations which is now due.

Condition of the Country and People.

2. Ever since I came to this district it has been my good fortune to be able to report to the Government, fortnight after fortnight, that the state of the country was getting better and better; that the condition of the people was improving; that the rainfall had been propitious; that the season was favorable; that the growing crops were all that could be desired; that all the bazars were well supplied with food-grains; and that the price of rice was steadily falling everywhere. This fortnight has been no exception to the favorable aspect which has characterized its predecessors. The singularly seasonable nature of the weather has continued. As in previous fortnights the rain fell just when it was wanted, so in this one we have had a most propitious sunshine, which has conferred great benefits upon the country by ripening the aous, and permitting the people to hurry on the transplanting of the amun crop. Very great progress has been made with the latter operation. The seed time and the transplanting time have been alike favorable. Everywhere the ryots may be seen in their fields from morning to night, and the surface of the country is getting gradually covered with plantations of amun rice.

3. A considerable tract in the south-east of this district towards Dhunat, Madhupore, and Shariakandi, was inundated by the overflowing of the large rivers which intersect that region. The damage which this inundation would have caused was very materially lessened by the fact that before it happened much of the aous had become ripe and the ryots had cut it. Some of the aous was spoiled, and the planting of the amun will be retarded. That much general injury has not been inflicted, is clear from the fact that clean rice is selling in that part of the country now at 18 pucka seers the rupee. There have, however, been cases of individual hardship, where ryots, who had been impoverished by the previous scarcity, lost all their crops. These men were relieved by loans of Government grain.

4. The fall of prices which has characterized all previous fortnights since the 1st of June has also been a prominent feature in this one. In the margin I give figures contrasting the prices which prevailed during the fortnight ending 1st June with those which obtain now. The figures speak for themselves, and show a very marked improvement in the food-supply of the country. The cutting of the *aous* is just beginning, and the earlier *species* of that rice have already appeared in the markets. The greater part of this crop is still uncut, but is rapidly approaching maturity. When this, too, gets into the market the prices of food will fall lower still. I should not be surprised if they fell to 20 *pucca* seers i the rupee, which also is the opinion of very intelligent mahajuns.

Name of Circle.	Number of pucca seers of rice per rupee in fortnight ending 1st June.	Number of pucca seers of rice per rupee in fortnight ending 25th July.
	Seers. Seers.	Seers. Seers.
Bogra	9½ to 10½	12 to 15
Sirajgunge	9 to 10½	15 to 17
Khetlal	10½	12 to 13½
Sherpore	7½	14 to 20
Adamdighi	10½	12 to 14
Panchbibi	9	12

5. It has been a very marked feature in the bazars for some weeks past that large quantities of old rice, the produce of the last amun crop, are being offered for sale. These are the stores which the better classes of people were holding for use in the event of the *aous* failing and the scarcity continuing. Mahajuns also, who had been holding on for higher rates, have been getting alarmed before the prospect of perpetually falling prices, and are now, and have for some weeks been placing their stocks of old rice in the markets.

6. In connexion with this it may not be out of place to remark here that in ordinary years Bogra is a rice-exporting district, and that as much as three-eighths of its amun harvest are usually carried out of it and expended elsewhere.

Relief Works.

7. In my last fortnightly narrative I pointed out that for some time past these works had in this district been gradually contracted with a view to shutting them up speedily; that certain of them had been shut up altogether, and that a process of weeding out and discharging inefficient laborers had been persistently but cautiously pursued. Our numbers, which stood at a daily average of 37,147 as reported in my fortnightly narrative of the 1st June, had been gradually diminished by these means till they stood at the daily average of 16,371 on the 6th July—(See appendix E of my last fortnightly narrative.) During the whole of this period the works were managed with the smallest possible expenditure of cash. I introduced grain payments with all the despatch I could, and for weeks past the laborers have been paid in this way. I added in the last narrative that preparations had been matured for closing the works altogether.

8. These preparations have, during this fortnight, been carried into complete effect, and I am now in a position to report that every relief work under the executive engineer has been finally closed.

9. There can be no doubt that the 16,371 people who were still upon these works on the 6th of this month belonged to the most destitute classes—to those classes who had been impoverished in the greatest degree by the scarcity and the great dearness of provisions

which has prevailed now for many months. The whole of them were living from hand-to-mouth. Among other grounds which I had for concluding that these people were in most abject circumstances, I may mention that, when I was closing works in previous fortnights, troops of them who were turned off came into Bogra and assured me that their destitution was very complete, and that if they were turned off the works, they did not know how they could obtain a livelihood.

10. Being well aware of the great anxiety of the Government that all destitute persons should be relieved, and that the local officers should be most careful to see that no one in their districts should perish from starvation, I was naturally solicitous that, in shutting up relief works by which tens of thousands had been supported for many months, everything should be done towards securing that this very delicate measure should be carried out with the least possible danger to the lives of those who were affected by it. Large numbers of aged men and women were among our laborers. There was nothing before me to show that they had not been forced upon the relief roads by dire necessity. Altogether it seemed to me to be a dangerous thing to turn these abject people adrift in the middle of the rainy season without giving them some provision sufficient to support them till they could procure other means of livelihood. I therefore proposed to give them, on their dismissal from our works, a full supply of food for one month on a liberal calculation. The Relief Commissioner, being anxious that nothing should be left undone to ensure their safety, thought they might get up to a three months' supply, and wrote to me accordingly.

11. I did not interpret this order to mean that in all cases this very liberal supply was to be given, but I supposed that this was a maximum which the most deserving cases would be permitted to reach. I therefore, on the 13th instant, issued the following instructions to relief officers on the subject of the subsistence allowance to be given to dismissed laborers :—

"Regarding the Relief Commissioner's order or suggestion that an allowance of grain for three months should be given to each laborer turned off the roads, I beg that you will work it with some discrimination. I should think that, as a general rule, a two months' supply should be the maximum given. Plainly there are cases where more grain should be given than in others. You may have destitute people who may have been working on your roads for months, and you may have others who may have been working for only a day or two. To the former a two months' supply might be given, and to the latter a smaller quantity.

"I beg that you will on no account empty your golas by a too lavish distribution of grain to the laborers who are being turned off the roads."

12. I have every reason to believe that these instructions have been very carefully followed.

13. In order to lessen as much as possible the strain upon our interior golas, and limit the expenditure in this way of grain for the transport of which a heavy cost had been incurred, I directed that in all practicable cases the people should be sent into Bogra, where they could get their rice, and whence they would themselves carry it to their homes. This has been done. From the 16th up to the 21st instant no less than 11,163 people who had been turned off came into Bogra and got their subsistence allowance of grain. They carried away 8,935 maunds, being an average of about 32 seers a head, or a very liberal supply of food for one month or six weeks. All the laborers have not yet received their grain, and some expenditure under this head will therefore appear in my next fortnightly narrative.

14. These grain payments were made on a simple system of printed cheques (foil and counterfoil) which worked very smoothly, prevented anything like imposition, and has secured a very exact record of the whole transaction for account purposes.

Transport and Storage of Government Grain.

15. The great demands upon the golas, which have formed a very prominent feature of the fortnight, necessitated a considerable movement of grain during this fortnight. Many of the interior golas had become nearly empty, and it was necessary to fill them again partially; consequently 10,329 maunds were despatched from the central depôt at Bogra into the interior, and I have called up from the Chandanbasia reserve 20,000 maunds, in order to replenish the almost exhausted stores at head-quarters. A good part of this latter quantity has already arrived. It is very necessary to keep the central depôt at Bogra well supplied, for upon it nearly all the interior golas depend. The transport was mostly done by boats, which is much cheaper than overland by carts.

16. *Sales of Government Grain to the Public.*—The marginal statement will show the transactions under this head. The sales to the public are higher this fortnight than they have ever yet been, but they are still very low. As I have repeatedly pointed out, it is impossible that with country rice selling at the rates which have prevailed in the bazars for many weeks past, we should sell large quantities of Government grain. The rates which I have quoted in paragraph 4 of this narrative will be sufficient to show that our grain must to a large extent be excluded from the local markets, unless we cheapen it very considerably.

Name of Circle.	Amount sold last fortnight.	Amount sold this fortnight.

Bogra	532 25 4	421 11 12
Adumdighi	590 9 7	1,163 39 14
Sherpore	102 26 4	332 14 12
Shibgunge	9 14 4	354 38 8
Khetlal	228 24 2	133 38 13½
Panchbibi	1,307 16 3	1,060 36 14
Total ...	2,770 35 8	3,467 20 9½

17. I had the advantage of meeting the Relief Commissioner at Hilee, near the northern boundary of this district, on the 15th instant, and

conferred with him on the subject of sales of Government rice to the public. He agreed to the following instructions which I issued to all my circle officers on the 16th instant, viz.—

(a).—"Clean rice of all qualities to be sold to the public at 14 pucka seers the rupee, and mixed rice at 17 pucka seers, whether the sales are made from our golas direct or through bunnias.

(b).—"All rice with any, even a small quantity of paddy in it, is to be considered mixed, and sold at 17 pucka seers the rupee. The old rule, whereby rice with less than two annas of paddy in it was considered clean, is cancelled.

(c).—"Mahajuns living at or near the gola will be allowed a profit of 3 seers in the rupee; and mahajuns taking Government rice for sale at places in the interior, which are distant from the gola, will be allowed a profit of 5 seers in the rupee. This large profit is to compensate them for expenses of transit, wastage, and other charges. Mahajuns are to sell this grain to the public at the rates fixed in rule I."

18. As my sale figures come down only to about the 21st instant, the effect of these rules upon the returns for this fortnight is probably not large, and could not be so.

19. Although these concessions are very considerably greater than any I have yet been able to obtain, I am still of opinion that they are not sufficient. The rule binding bunnias to sell clean rice at 14 seers, and mixed rice at 17 seers the rupee, will certainly limit our operations in this direction very considerably. Country rice is now in several places selling cheaper than this, and this fact will effectually exclude our grain from the markets. I therefore do not anticipate that our sales to the public will increase. In fact, unless we cheapen still further, they will cease altogether soon in many places. I have duly represented these opinions to the Relief Commissioner.

Panchbibi	5,708 7 3	5,201 12 10
Adumdighi	3,660 30 0	4,973 13 0
Total ...	15,626 23 11	19,877 26 14

20. *Rice Loans.*—These loans have been prosecuted very actively during this fortnight, as the marginal figures will show. The closing of all relief works has given them an impetus. The cultivators are devoting all their energies to their fields and the planting of the amun crop. This, too, has had its effect, for it has withdrawn numbers from extraneous remunerative labor. The inundations in the south-east of the district stimulated loans in the Sherpore relief circle.

21. *Gratuitous relief, and the payment of a subsistence allowance to the people turned off from the roads.*—The Relief Commissioner has directed that all the grain expended upon the charitable allowance given to laborers dismissed from relief works should be credited under the heading of gratuitous relief; therefore the statistics of this grain expenditure find their place here.

22. I give below the figures showing the numbers gratuitously relieved and the grain thus expended:—

Name of Circle.	Last fortnight.		This fortnight.	
	Number relieved.	Expenditure of grain.	Number relieved.	Expenditure of grain.
		Mds. Srs. Chs.		Mds. Srs. Chs.
Bogra	1,401	1,084 33 0	14,154	10,513 8 0
Adumdighi	2,860	652 36 12	5,206	1,520 17 0
Sherpore	4,940	485 29 0	7,464	895 39 0
Panchbibi	2,183	601 14 7	1,645	1,428 36 0
Khetlal	3,019	323 2 0	699	3,054 2 0
Shibgunge	2,159	657 21 10	5,946	4,191 27 0
Total ...	16,562	3,805 16 13	35,114	21,604 9 0

23. These figures (for this fortnight) include not only those who have been gratuitously relieved in every way, but also all laborers who have been turned off relief works. The latter supply the majority of the figures in columns 4 and 5 for the relief circles of Bogra, Shibgunge, and Khetlal. I empowered the Shibgunge and Khetlal circle officers to give the dismissed laborers cheques on their own golas, as these places are distant and somewhat difficult of access now. The principal portion, however, of this work, and of the grain expenditure connected with it, was done at Bogra.

24. *Relief by Spinning and Weaving.*—Considerable numbers, chiefly women, continue to be relieved in this way, as will be seen from the marginal figures. I think the time has now come when this form of relief also may be discontinued, and the women thus employed be got rid of on terms somewhat similar to those granted to laborers on the roads. It is an expensive form of relief. The raw material has to be bought, and is somewhat costly. The manufactured articles, chiefly cotton-thread, yarn, and jute twine, have hitherto remained on our hands. Payments, however, are made in grain only.

Name of Circle.	Number relieved last fortnight.	Number relieved this fortnight.
Shibgunge	969	1,643
Khetlal	2,216	2,205
Sherpore	200	119
Panchbibi	841	177
Adumdighi	680	433
Bogra	535	318
Total ...	5,441	4,895

When the raw material at present in the hands of circle officers has been worked up, I shall close this form of relief.

25. *Village Visitation and Registration.*—All the circle officers have been sufficiently active during the fortnight. The condition of the country now does not seem to me to require anywhere the special treatment of the group system of relief; I have therefore ordered that the services of all the group mohurirs should be dispensed with.

Name of Circle.	Number of annachatras-open.	Number fed at them.
Khetal	2	547
Panchbibi	1	.. ...
Bogra	1	2,232
Sherpore	5	5,034
Total ...	9	7,813

26. *Annochatras.*—The figures of relief by means of kitchens where cooked food is distributed are given in the margin. Three of the Sherpore *annochatras* are conducted at the expense of private individuals. When the laborers came in vast crowds into Bogra from the roads, we re-opened the Bogra *annochatra* and gave them a meal there. During the fortnight two *annochatras* in the Panchbibi circle were closed.

27. *Total Grain Expenditure.*—I show below, fortnight by fortnight, the amount of grain which has been expended in relief operations in this district down to about the 21st instant :—

		Mds.	Srs.	Chs.
(*a*).	Total amount of grain consumed in the district up to 2nd May 1874 ...	487	0	0
(*b*).	Total grain expended in the fortnight ending 16th May	6,772	34	0
(*c*).	Ditto ditto ditto 30th May	8,656	11	0
(*d*).	Ditto ditto ditto 13th June	13,702	9	0
(*e*).	Ditto ditto ditto 27th June	17,164	0	0
(*f*).	Ditto ditto ditto 11th July	32,487	39	13½
(*g*).	Ditto ditto ditto 25th July	46,640	33	15
	Total ...	1,25,911	7	12½

28. *General.*—The total grain expenditure up to date has thus been 1,25,911 maunds 7 seers 12½ chittacks, leaving a balance of 1,32,479 maunds still available. I do not think that the condition of the district at present is such as requires the continued prosecution of relief with the energy and activity which have prevailed during the last eight weeks. The relief officers think that all in their circles requiring relief have received it. I fully expect that prices will rise again towards the end of September or the beginning of October next, when the effect of the aous harvest will probably be disappearing from the markets. If the amun crop show any prospect of being seriously deficient, this rise in prices will probably be very great. These are contingencies which are worth taking into consideration, and it might be well to economize our present stocks in order to be able to meet them.

Financial Result of the Fortnight.

Total ...	725 5 3	282 1 6	49 12 0	1,060 4 0	526 8 7	2,643 15 4

a.—A great part of the expenditure under this head was incurred on account of relief kitchens.
b.—This sum represents payment of the group superintendents in the Shirbati sub-circle. These men have been now discharged, as the improved condition of the country has rendered unnecessary the group system of relief.
c.—This represents relief in cash which was given to a few families of high caste who were found to be in a state of distress. This relief falls under heading (*f*) of the committee's rules, and the sum so disbursed will be recovered. The whole of the sum, Rs. 540, was not expended this fortnight. The greater part of it was spent in previous fortnights.
d.—This represents payments made for cotton and jute, which were purchased by the circle officer of Adumdighi in May and June
e.—This cash payment was it seems made a long time ago. I have received no particulars of it, but have called for them.

APPENDIX B.

Table showing the Expenditure of Grain by the Relief Officers for purposes of relief during the Fortnight.

1	2	3	4	5	6	7

E. J. BARTON,
Offg. Magistrate and Collector.

No. 17, dated Rungpore, the 13th July 1874.

From—E. G. GLAZIER, Esq., Offg. Magistrate of Rungpore,
To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

Narrative of Scarcity and Relief in the District of Rungpore for the fortnight ending Saturday, the 11th July 1874.

A.—STATE OF THE COUNTRY.

The price-current below will show at a glance the great fall in prices that has occurred all over the district. Supplies are abundant. In the north-west tract only is any deficien still reported, namely, at Durwani and Dimla, where 12 and 10 seers respectively are quot as the local rates, and keen demand exists for Government rice both on retail sale and fo passes to the trade. The new aous rice is brought in large quantities to market, while a good supply of imported amun is still forthcoming. New kawn is produced in less quantities, and there is little demand for it. The poorer agriculturists who eat it have their own stocks of it now, and do not need to frequent the market as buyers. Importation still continues much the same, but a falling off may speedily be expected. Govindgunge is largely supplied from the southern marts, and the Teesta trade keeps up in a less measure, although about 25,000 maunds of rice have been registered as imported from the south, against an equal quantity locally produced from the new crops. This import trade, however, cannot last much longer; already in Sundergunge, where the crops have been splendid, exportation has been commenced.

	MARKET QUOTATIONS.	
	Last fortnight. Seers per rupee.	This fortnight. Seer of 80 tolahs weight.
Head-quarters	11¼	14
Govindgunge	10	16
Peergunge	10	16
Sadullapore	12	20 to 25
Sundergunge	16	20
Molung	11	18
Muhigunge	11¾	16
Koomargunge	12	15
Borobaree	13	13
Dimla	...	10
Durwanee	10	12
Kallygunge	12	14

The rainfall has been more than copious, 18 inches during the fortnight, and the country has been flooded in parts. Of the above quantity, 14 inches have fallen within the last week, and 5 inches during one night (that of the 8th). Damage has been done in places, the crops being drowned, and the Brahmapooter has overflowed at Kallygunge and washed away some fields. The same large quantity of rain has not fallen generally; in Sadullapore and Peergunge they still want rain in order to plough the high lands. The crop of aous is however assured, and the harvest will be a brilliant one. It will be reaped continuously till the end of August.

Sowing and transplanting of amun rice are being prosecuted with eagerness. The prospects of all other crops, jute, sugarcane, &c., are good.

The improvement in the condition of the people continues. In Mahigunge, where distress had been widely extended even up till the date of last report, the relief officer finds it gradually disappearing, and there is aous in almost every house. In Govindgunge operations will shortly close all over the greater portion of the thana that lies east of the Kurotoya. It is clear that no anxiety need be felt on behalf of the people here, as they have a supply of aous amply sufficient to last them beyond the time of the next amun harvest. On the Kamdya side there will be need for help for some little time yet. Generally relief operations are coming to a close, and matters are reverting to their former footing. With a view to this winding up, I have lately addressed relief officers, directing them to deal liberally with all recipients of charitable relief when discharging them, and to give them food supplies for some time, in order that there may be no distress caused to them in the transition from this public poor-law relief to their former means of livelihood. Provision will also be made for the poorer laborers who have worked steadily on the roads to the last, and for all needy agriculturists. During the height of the distress we had to work on somewhat strict rules in order to prevent abuse, but now at its close I considered that we should best fulfil the oft-expressed wishes of the subscribers to the Charitable Relief Fund by dealing liberally with the recipients of their bounty. All these out-goings, however, are in rice, as cash payments have been absolutely stopped in all cases; but if the late resolutions of the Central Relief Committee, published in the last *Gazette*, that they will not pay for the Government rice expended, are to take effect, the poorer classes of this district will have the Government to thank instead of the charitable public for the assistance rendered to them.

B.—Relief Works.

Road works have now stopped. I issued general orders to this effect on the 1st instant, and all works, with a few exceptions, were stopped on the 5th. The exceptions are—one road in Mahigunge circle, which is a very useful one and requires little more work to finish it, and a few roads under the Executive Engineer to the north of the district, where the ground is high and the people need employment for some time longer. All payments are in grain. A few bamboo bridges, half finished, I have allowed the officers to complete, as in many cases the roads would be useless without them. Thirty thousand grain tokens were received here a few days since, but they will not be of any use.

C.—Transport of Food.

Nothing to report.

D.—Storage of Government Grain.

Except at Durwani, the sale of Government rice to the public has almost come to a stop, owing to the sudden fall of prices. On the 2nd July the circular telegram was received directing the clearance of the rice stocks by affording a liberal margin to wholesale dealers, but the old retail rate of 12 seers per rupee was still maintained. However, on the 4th, permission was obtained to lower the rate to 14 seers the rupee, but at even that rate there are no retail purchasers, as the local rates are almost everywhere cheaper. Immediately on receipt of the Government orders I fixed very liberal rates for wholesale transactions, graduating up to 20 seers clean rice, and 30 seers cargo, according to distance that the rice had to be transported and the quantity taken. I anticipate that I shall be able to clear out the large Govindgunge balance, but the Mahigunge, Sundergunge, and Borobaree balances must be brought to head-quarters for disposal. I have made liberal allowances to induce traders to fetch the rice for sale at head-quarter markets, and for zemindars and others to store in large quantities, but the heavy rain has for the present impeded operations, though I expect a good quantity will be taken up in that way, and the transport to head-quarters to that extent spared.

The sales to the public during the fortnight have taken place either at Durwani itself or at Chillakhal in supply of traders from that circle. The fortnight commenced with a very brisk sale. On one day 700 maunds were sold. The demand has somewhat fallen since, but now that the new rates have been sanctioned there it will probably rise again. Traders, too, have brought rice from Chillakhal and sold it in every market in the thana; on one day 1,290 maunds were thus taken. The heavy rains have interfered with this trade, but there is every prospect of its reviving, and a large demand from this quarter and also from Dimla thana taking place during the ensuing fortnight.

The consumption of Government grain shown since last return has nearly come up to my estimate of 50,000 maunds, and I expect fully that a similar quantity will be shown as used during the next fortnight.

E.—Advances to Private Parties.

	Rs.
For purchase of food	7,500
To zemindars, for advances to their ryots	1,50.844
To jotedars, ditto ditto	27,706
Add advances sanctioned but not taken by the parties	19,700
Total ...	2,05,750

I have found, since writing my last fortnightly report, that a good deal of misapprehensic exists regarding the matter of advances in this district; the figures at the head of this have not hitherto been further explained, as no necessity for it was apparent. These show a total of Rs. 1,78,550 taken in this district from Government by zemindars and jotedars for helping their ryots during the months of March to May, and they may be taken roughly as the equivalent of 90,000 maunds of rice. In addition to this the large zemindars have given liberally advances without taking any Government loans. The result of this action is that the majority of the people have now such a bumper aous crop as has not been seen for years, and they do not need and will not take further Government advance. In Molung, Peergunge, and Govindgunge, and in parts of Sodullapore alone, are found those kheor soils where the aous is late and scanty, and the people need help at this time. Up to the date of last report all in need were provided for by road work, but lists had been under preparation, and during the present fortnight the bulk of the work of giving advances has been done. In the three principal divisions—Molung, Peergunge, and Govindgunge—13,726 mannds have been advanced up to date, and a commencement of the small amount that may be needed has been made in Sadullapore. In Mahigunge, where some of the aous rice was withered, some advances will be made where the people are willing to take them, and in other divisions the relief officers have received clear instructions to give liberally wherever required. Molung shows most advances, 7,595 maunds, but that circle contains the largest quantity of the red land. Govindgunge shows a very small amount, 1,400 maunds only, but here the tract of the kheor soil is comparatively small, with only a population of 12,000, though it has been grievously distressed. The relief officer thus explains his proceedings:—

"I have given my best attention to the subject of advances, and the statement appended shows the progress made. The quantity advanced seems small, but it must be remembered that the people to the east of the Kurotoya, that is in nine-tenths of the thana, have nearly all reaped some aous, and do not need or ask for advances; on the Kamdya side too the zemindars of Babanpore, Rajahar, and Radha Govinda Roy of Dinagepore, and the Cooch Behar State, have all advanced to their tenants, so that the number of persons requiring advances is very small.

"I have made advances to almost every one who has applied. I find the people near Kamdya very unwilling to take more than they actually want. In several instances they refused to take as much as I offered them, saying they would manage with less; they, most of them, owe two years' rent, and are in debt to their mahajuns, so that they are naturally unwilling to burden themselves more than is actually necessary. Not the slightest fear need be entertained that the cultivation will be less than usual, or that people have been or will be kept back from cultivation for want of advances on the Kamdya side. Cultivation will not, I think, be more

than usual, as the people have been much pinched in getting seed-grain; it will be, I believe, fully up to the average, and in the rest of the thana will exceed the average."

The conditions of circular No. 3266, dated 18th June 1874, have been extended by the relief committee to this district, and I have, on the authority of Government telegram, received 3rd July, fixed the rates for advances at 15 seers dhani rice, 18 seers cargo. In several cases it has been found that the people propose to pay back the whole of the advances in March next, and refuse to take the three instalments offered by the above circular, as they wish to get rid of some of the burden of debt which oppresses them on every side—to the Mahajuns, the zemindars, and now the State.

F.—Charitable Relief.

Prepared by the District Officers.

The numbers have fallen from 40,346, as shown in the last return, to 32,777. Two Government and seventeen private food-relief houses have been closed during the last fortnight. The reduction of 7,569 people will be found mostly under heads 4 and 5—public and private food-relief, and head 7—cotton relief.

The food-relief houses have been willingly left. Where those remaining were few, grain enough was given to last them till the next late rice harvest, so that needless establishments might be got rid of, and the almost empty poor-houses closed. Where there were resident paupers, in no case as many as ten, those who have friends have taken them home, or else they have been sent to the nearest poor-house still kept open. The cook-food relief centre at Sunkamari, some three miles from head-quarters, as a central poor-house, with Hindu and Mahomedan lodging-houses and a pauper hospital attached, will be available to the last for any transfers that have to be made as the out poor-houses are gradually abandoned and closed.

The substitution of a present of grain for a present of money, and the shorter time given for spinning out the cotton, has checked the applications for this kind of relief.

The numbers might have been still very considerably reduced, but great care is being taken, so that relief may not be withheld until inquiry has satisfied the circle officer that assistance cannot really be required.

Under the grain advance system, by which the relief operations are being brought to a close, when it is found that cultivators are unable to give security or too poor to be expected to pay back the price of the grain, an advance of grain is made to them gratuitously at the charge of the charitable relief fund.

During the past fortnight, much help towards present and future wants has in this way been provided for the village-poor through means of the charitable fund's allotment.

(Mean.)

RUNGPORE,
The 11*th July* 1874.

E. G. GLAZIER,
Offg. Magistrate.

No. 1577, dated Bogra, the 13th July 1874.

From—E. J. BARTON, ESQ., Offg. Magistrate and Collector of Bogra,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to send you herewith the fortnightly narrative of relief operat which is now due. The operations have been conducted in the same way as in the pre fortnight, and all the circumstances of the district remain much the same. The only m which distinguishes the period under report from those which have preceded it is, that t has been a much larger expenditure of grain than in any previous fortnight.

2. *Condition of the country and people.*—There is really nothing new to report un this head. Prices of rice have continued much same, and they now stand throughout the distr as marginally noted. The bazars are well suppli everywhere with food-grains at these quotatio The aous crop still continues to be of excelle promise, and its yield will in all probability b weight of grain unprecedented for years. T early aous rice in the pali lands is already bei cut, and the ryots in these lands even now ha ceased to give anxiety. The weather contin very propitious for the planting of the am crop. There has been a total rainfall during the fortnight of 7·92 inches. The supply food in the bazars is further increased to a very appreciable degree by importations of gr in boats, which have now become possible by the rise of the rivers and the filling of *khals* everywhere.

Names of place.	Prices last fortnight.	Prices this fortnight.
	Pucca seers.	Pucca seers.
Bogra	11¼ to 12¾	10½ to 15
Shibgunge	9¾	12 to 13½
Khetlal	10½ to 11¾	11¼ to 12
Sherpur	13	13 to 15
Adamdighi	12	12 to 13
Panchbibi	13 to 14	10½ to 12

3. *Relief Works.*—As reported in my last narrative, many of these have been sto altogether, the laborers paid off, and the sub dinate establishment which was entertained superintending them discharged. It is, howev neither practicable nor safe to stop sudde extensive works like these, and we have procee therefore in this direction with safe and cauti steps. The figures noted in the margin will sh the progress which has been made and the grad diminution of the laborers. These, however, not show the work actually done. Our preparations are now matured for turning the labo off very many roads, and I hope to show a very considerable reduction in the numbers du the current fortnight.

For what week.	Average daily number employed.
Ending 30th May 1874 ...	32,000
„ 27th June „ ...	17,192
„ 4th July „ ...	15,560

Names of month.	Cost of subordinate establishment.
	Rs.
May	7,489
June	5,000
July	3,000

4. The figures noted in the margin will further show the reductions which have been made in the subordinate establishment under the Executive Engineer. The Government will see that there has been a steady reduction and cutting down. I hope very soon, probably during this fortnight, to be able to get rid of the whole of this establishment.

5. Similarly, the shutting up of road works under the circle officers and the dismissal of their establishments have been ordered.

6. The order of Government to make only grain payments, and to cease cash payments even on the 7th day, was received during this fortnight and duly communicated to all officers concerned. I believe that it was carried out universally and without delay wherever it was received. The Government will observe that there has been a slight cash expenditure. This was effected before the Government order was received. The cash expenditure shewn by the Executive Engineer represents payment of his subordinate establishment and not of laborers on the roads. I find that many supervisors, hajiree navises, and others, have been kept in arrears with their pay. The Executive Engineer explains that he allowed their pay to fall into arrears, as that was the only hold he had on these temporary men. These arrears have to be paid now. Much of the cash expenditure shewn in the last fortnightly narrative also represented the payment of these arrears. It was a mistake to suppose that all this cash was spent on the laborers. These payments, being arrears due to men with whom we cannot possibly settle in grain, are inevitable.

7. By a recent order of the Relief Commissioner, each laborer turned off the relief roads is to receive a three months' supply of food.

8. As grain payments for all kinds of work—roads, tanks, jungle-cutting, cotton, jute-weaving, &c.,—were in full force during the fortnight, the expenditure of rice in this direction was heavy. I find that a total of 10,276 maunds 20 seers 5½ chittacks was expended in the payment of labor of all kinds throughout the whole district.

9. *Transport and Storage of Government Grain.*—This has been finished long ago. The only thing done in this direction now is the movement of grain from gola to gola to suit the exigencies of particular localities.

10. *Advances.*—Advances remain in much the same state as last fortnight. There have been a few small advances of grain to zemindars. Advances in cash have long ceased.

Names of Circle.	Sales last fortnight.	Sales this fortnight.
	Mds. S. C.	M. S. C.

Panchbibi	934 28 13	1,307 16 3
Total ...	2,106 13 14	2,770 35 8

11. *Sales of Government Grain to the Public.*—The marginally noted figures will enable a comparison to be made between the sales of this and the last fortnight. The figures show a slight increase in sales, but they are still far from satisfactory. As I have been reporting for a full month past, the cause of the smallness of our sales is simply that our grain is too dear. Had I been allowed to conduct sales in the way proposed by me a month ago, I should have been able to sell ten-times the amount I am now doing.

12. During this fortnight the Relief Commissioner sanctioned the sale of clean rice at 14 seers the rupee. I am now selling the various kinds of rice in our golas at the appended rates, which have been graduated by me, taking 14 seers the rupee for clean red *ushna* rice as the basis of value. The Government have further authorised a larger profit than 1 seer in the rupee to be given to mahajans, and I have accordingly fixed this at 2 seers the rupee. Information regarding these measures reached me too late, and they could not be introduced in sufficient time to show any marked effect upon sales during the past fortnight. They are now in force, and I am sanguine that they will produce a good effect next fortnight.

Kind of rice.	Rate per rupee.
	Seers.
Best country atab (clean)	12
Country ushna rice ,, ...	13
Burmah atab rice ,, ...	13
Red ushna rice ,, ...	14
Country ushna (mixed)	16
Burmah ,, ,, ...	17

13. I do not, however, think that the rates are yet cheap enough to produce really extensive sales. The bazar rates of rice, the produce of the country, which I have quoted in the 2nd paragraph of this letter, will show the Government that even at these lower rates our grain has but a poor chance in many places of being sold in large quantities. This chance is lessened by the early *aous*, which is now being cut and brought into the market. When the great *aous* is cut, it is expected that prices will fall to about from 16 to 20 *pucca* seers the rupee.

14. In order to stimulate sales, I have removed nearly every restriction. I have resolved on one important measure, which will, it is thought, have an effect in increasing sales, viz., merchants will now be allowed to sell up to a maximum of three rupees' worth to one individual at one time. This is equivalent to removing every limitation. The bazar, however, is so

easy, and is so well supplied with country grain, that I do not think there is a chance of a great rush of buyers to our golas.

15. *Rice Loans.*—During no previous fortnight has this form of relief been so actively worked. The marginally noted figures will show what has been done in this and the previous fortnight. It is not to be forgotten that this rice has been lent to the ryots direct on their own personal security or that of the village munduls. The zemindars have steadily declined (with one or two exceptions) to be security for the ryots. It is no use disguising the fact that the security we have for the re-payment of the greater portion of this grain is of a fragile nature, and that the value of much of it may be irrecoverable.

Names of Circle.	Amount lent last fortnight.	Amount lent this fortnight.
	Mds. S. C.	Mds. S. C.
Bogra	404 10 0	2,984 20 8

Adamdighi	1,477 30 0	3,660 30 0
Total ...	5,445 28 13	15,626 23 11

16. The very liberal terms offered by the Government letter No. 3966 of 18th June last, to zemindars who would take loans for their ryots, were duly promulgated here, and a few small loans were effected. But the zemindars as a body continue to hold aloof.

17. Most of these loans have been given to ryots on the *khiar* lands. For the last six weeks I have been actively urging the relief officers to work loans energetically, and during this fortnight nearly all of them have done so. For the next week or two there will be no relaxation, and loans will be strenuously made to ryots, especially those on the *khiar* lands who are pinched.

18. The closing of relief-works is a further incentive to the energetic prosecution of loans as a measure of relief. I have accordingly repeatedly urged the circle officers not to relax their exertions in this direction.

19. In the Sherpur circle the people are now reported to be so well off that they do not care for loans.

20. *Gratuitous Relief.*—The statement below will show that in this direction also there has been considerable activity on the part of the relief officers, and that the outturn of work is greater than in the last fortnight. There will probably be no diminution of gratuitous relief for the next three or four weeks, as many of those who will be turned off our roads will become recipients of this form of charity :—

Khetlal	756	349 37 14	3,019	323
Shibgunge	1,533	500 10 8	2,159	657
Total ...	11,738	3,066 25 2	16,562	3,805

21. *Relief by Spinning and Weaving.*—[illegible] still continues to afford assistance to very [illegible] families, but the number of applicants is in [illegible] parts reported to be diminishing. The mar[illegible] figures will show the numbers who have [illegible] thus relieved both this fortnight and the last.

Names of Circle.	Number relieved last fortnight.	Number relieved this fortnight.
Shibgung	1,509	963
Khetlal	1,729	2,216
Sherpur	229	206
Panchbibi	509	841
Adamdighi	1,597	680
Bogra	460	535
Total ...	6,024	5,443

22. This form of labor is paid solely by gr[illegible] I have just increased the remuneration about o[illegible] third, and this measure will show its effects ne[illegible] fortnight. The previous remuneration seem[illegible] too low.

23. Improvements in the qualit[illegible] of the manufactured cotton-thread and jute-twi[illegible] are reported from most places.

24. *Village Visitation and Registration.*—The circle officers everywhere have bee[illegible] moving about actively within their jurisdictions. I find that during the fortnight nearly 500 villages were visited. The registration of people to be relieved in the worst tracts is finished everywhere. There does not seem to have been any remissness in the execution of this work.

25. *Annachatras.*—The marginal figures give the statistics of annachatras or relief-kitchens for this fortnight, and show the daily average number fed at them. They require no comment at my hands.

Names of Circle.	Number of Annachatras open.	Daily average number fed at them.
Khetlal	2	1,069
Panchbibi	3	658
Bogra	1	.....
Sherpur	5	950
Total ...	11	2,677

26. *General.*—I have said that in no previous fortnight has the grain expenditure bee[illegible] so heavy as in that under report. In order to bring this fact out prominently, and to show the steadily progressive increase in the distribution

of the Government grain, I append a statement which I have compiled, and which shows what has been done in this direction before the 13th of May, the date when I joined my duties here, and what has been done since.

		Mds.	S.	C.
(a)	Total amount of grain consumed in the district up to 2nd May 1874	487	0	0
(b)	Total grain expended in the fortnight ending 16th May	6,772	34	0
(c)	Ditto ditto ditto 30th „	8,656	11	0
(d)	Ditto ditto ditto 13th June	13,702	9	0
(e)	Ditto ditto ditto 27th „	17,164	0	0
(f)	Ditto ditto ditto 11th July 1874	32,487	39	13½
	Grand total of grain expenditure ...	79,270	13	13½

27. These figures represent an expenditure of about two months only. Should we continue to expend and distribute the grain with the activity which has characterized the last fortnight, we should come to the end of our last maund in about eight weeks; as it is, several of the interior golas are already almost depleted, and it will be a work of trouble and expense to fill them again with rice.

E. J. BARTON, *Offg. Magistrate and Collector.*

No. 1564, dated Dinagepore, the 21st July 1874.

From—W. LeF. Robinson, Esq., Relief Commissioner of the Rajshahye Division,
To—The Offg. Secy. to the Govt. of Bengal, Scarcity and Relief Department.

I have the honor to report that in consequence of a telegram received from His Honor the Lieutenant-Governor, Bengal, regarding sales of rice in Bogra, I arranged to meet the Magistrate of that district at Hillee last week to consult whether it was necessary to take any further measures than those which had already been taken both before and after the receipt of the telegram alluded to.

2. I accordingly left this on Wednesday last, met the Magistrate of Bogra on Thursday at Hillee, and went over the whole subject with him. I must premise here that the Magistrate is afraid that he is being blamed for want of energy and activity in carrying out orders; but, as I pointed out to him, that I am convinced is not the case, as what he has done since he took charge at Bogra shows considerably, I hope, that he has not let the grass grow under feet, and he cannot be in any way responsible for what occurred before took charge at Bogra, and this is a view which I feel quite sure acquiesced in by Government.

3. The allotment for Bogra was 2,40,000 plus 50,000 for Ghora of the latter only 26,194 maunds were sent from Bogra to Ghoragha being made up from Rungpore. This gives a total for Bogra of 2,66,19 but the amount of grain actually received in Bogra was 2,84,584 m that Bogra really has about 18,000 maunds in excess of its allotmen

4. Mr. Barton assumed charge of Bogra on 26th May, and th figures will show what the disbursements of grain have been both since that date:—

			Mds.	Srs.	
Total amount consumed in the district up to 2nd May ...			487	0	
Ditto	ditto	16th „ ...	6,772	34	0
Ditto	ditto	30th „ ...	8,656	11	0
Ditto	ditto	13th June ...	13,702	9	0
Ditto	ditto	27th „ ...	17,164	0	0
Ditto	ditto	11th July ...	34,993	39	0
		Total ...	81,776	13	0

These figures show that since Mr. Barton took charge there has been a v large increase in the distribution of grain. I have not yet received the figu for last week, but Mr. Barton told me that they would be expected to be consid ably in excess of any that have preceded them, and if the expenditure goes on the same rate, the whole supply would be exhausted in another couple of mont

5. The principal alterations which I made in the arrangements in fo were to sanction higher wholesale rates than those hitherto allowed, and remove the scale which Mr. Barton had fixed for the sale of Burmah ri according to several degrees of cleanness. The wholesale rate fixed by Mr. Bart were one and half seers only for sale at a head-quarter gola, and 2 t 3 seers, according to distance, for sale in the interior of a circle. This, I think, is too small, and I authorised him to allow 3 seers and 5 seers respectively, which I trust will be approved of.

6. The bulk of the Bogra allotment is stored on the banks of the Bengalee river, and I authorised him to sell there wholesale only at 20 seers clean, and 25 seers cargo for retail sale in the interior of the district, and this I hope will also be approved of.

7. With regard to the sliding scale which Mr. Barton had fixed for the sale of Burmah dhanee rice, I think it was a mistake going into such great detail, and that it is much better to have only one distinction between clean and cargo rice. It gives endless trouble in sorting the grain and in keeping the accounts, and the amount to be saved by it is trifling in the extreme. It also leads to haggling and disputations with purchasers regarding the quantity of the rice, and I therefore deemed it better to order all dhanee rice to be put in one category, and to be sold at one price, and I think it will be found that this will give a considerable stimulus to sales during the next fortnight.

8. The Burmah rice is not in such very great favor that it can be weighted with any conditions likely to make the purchase of it less popular than it actually is.

9. There can I think be no doubt that since the opening of the rivers very considerable supplies of country rice have been imported by private trade into the eastern portion of Bogra, from which they are gradually getting distributed westwards, and this of course has affected the demand for Government grain.

10. The Magistrate of Bogra is, and always has been, very strongly of opinion that the price at which Government rice is offered for sale is not sufficiently low to create a demand for it in the market, especially when country rice is being imported into the district. He has several times urged that the Government rice should be sold at a cheaper rate since his first application to that effect was submitted by me to Government and rejected as contrary to the rules laid down on the subject, and such being the case, I of course declined to forward his subsequent recommendations on the subject.

11. He still, however, urges this as the best method of quickening sales; and in a letter to me (demi-official) of 10th July says—

"I beg again to propose what I proposed a month ago, viz., to empower me to sell at a maximum of 16 seers for clean and 20 seers for mixed rice."

I do not however, I confess, advocate this course myself, as I think it a mistake to be constantly changing the rates, and also that it would be a direct interference with private trade. The real cause of the comparatively small amount sold in Bogra I attribute principally to the slowness of the former Magistrate, Mr. Kelly, in making arrangements for transport and pushing forward his supplies of grain into the interior of his district. Had he been in a position to commence sales early in May, I have no doubt whatever that there would have been a very much greater sale of Government grain, but he was all behind hand, and by the time the present Magistrate got things straight, private trade had begun again, and as Mr. Barton says in the same letter from which I have previously quoted, "the markets have been falling ever since the 29th May until now, good clean country rice is selling for 13 pucka seers the rupee, where it was once selling for 8."

12. I think, however, myself that a good deal more rice will yet be required in Bogra, and I think the expenditure will probably exceed a lakh and a half of maunds by the end of August. It may be more, but I don't think it will be less. If this rough estimate of mine turns out to be correct, there will be a surplus of Government rice in Bogra certainly (unless anything unforeseen occurs) of some ninety thousand maunds, allowance being made for some portion of the original lot having been damaged by rain or other causes. I enclose a copy of a letter from the Magistrate of Bogra on this subject regarding the reserves at Chandunbassia and Shariakandi.

13. It is of course a question for the Government to decide upon the course to be taken with regard to this rice, whether it is required more elsewhere or not, whether it shall be disposed of on the spot by lowering the price, or whether it shall be kept till we are perfectly certain that it will not be required, and then disposed of to the best advantage. If I may venture to give my own opinion, I should say the last course was the best, unless the grain is really wanted now somewhere else, and my reasons are these: I say that we are not certain, and that nobody can be certain, that we are out of our difficulties yet; that things are promising is true enough, but there is plenty of time for a change to occur, and it is, I maintain, quite possible that every maund of it will yet be required. If it is not, there is still a good chance of disposing of it hereafter, as the bulk of it is stored close to the Brahmapootra, and it might probably be disposed of for export to Assam.

No. 1541, dated Bogra, the 10th July 1874.

From—E. J. Barton, Esq., Offg. Magistrate of Bogra,
To—The Relief Commissioner of the Rajshahye Division.

I have the honor to call your attention to the marginally noted stores of grain in this district.

	Mds.
Shariakandi	30,000
Dhunat	3,000
Madhupore	3,000
	36,000
Reserve at Chandunbassia ...	57,000
	93,000

2. At Shariakandi, Dhunat, and Madhupore, rice is selling at 15 pucka seers per rupee. Generally in all the country commanded by these golas rice is selling so cheap that it is now, and always has been, impossible to effect sales at the Government rates.

3. Three things may be done with the grain, viz.—

(a)—It may be sold at such rates (say 29 seers for clean, and 25 seers for mixed grain) to the public as will ensure our getting rid of it.

(b)—It may be transferred to other districts where there is more distress.

(c)—It may be retained where it is as a reserve for this district.

With regard to this plan, it is to be observed that there is a probability of prices rising again about October next, but I do not believe they will rise high if the prospects of the amun crop continue good.

4. I believe it will continue to be impossible to dispose of this grain at the places where it is lying at the rates now fixed, as the aous crop in this part of the country is one of superlative excellence, and the bazars will certainly grow cheaper still.

5. I lay the matter before you for your orders. Meanwhile I suggest that no harm would be done if I were allowed to sell the Madhupore and Dhunat rice, and a few thousand maunds of the Shariakandi grain, at the rates quoted in paragraph 3 (a) of this letter.

No. 4839—S.R., dated Calcutta, the 3rd August 1874.

From—The Offg. Secy. to the Government of Bengal, Scarcity and Relief Dept.

To—The relief Commissioner, Dinagepore.

I AM directed to acknowledge the receipt of your letter No. 1564, dated 21st July, reporting upon the sales of, and the demand for, Government grain in the Bogra district. As Mr. Barton's letter of the 10th July, and his remarks at paragraphs 12 to 14 of his narrative of the 13th July, would show that he may have misunderstood the policy of Government as to sales of grain to the public, and as Mr. Glazier's remarks at section D. of the Rungpore narrative show traces of the same misunderstanding, I am again to explain, for the guidance of those officers, the rules under which sales of grain are regulated.

2. The instructions by Government to Relief Committees direct that the retail price of Government grain, where it is sold to the public, must be regulated by the prices ruling at the nearest large mart accessible by rail or river. Under this rule 12 seers per rupee was settled, and for some months remained as the retail price of clean Government rice in the districts under notice. Afterwards prices fell somewhat in the marts near these two districts; but the district officers at the same time held that Government sales ought to continue. And therefore it was (on the 2nd July) decided that in accordance with the rule above cited, the retail price of Government rice should be 14 seers per rupee.

3. As you will recollect, the Rungpore and Bogra transport arrangements were not, at first, so successful as elsewhere. Government grain ha been delivered in considerable quantities on the banks of the Berhampoote and it was emergently wanted in the interior of the district. Accordingly th Lieutenant-Governor sanctioned your selling Government grain on the river t wholesale dealers in the interior at a considerable discount on condition tha they carried it into the interior.

On the same principle the Government authorized you to grant libera discount to wholesale dealers in these districts who would, during the months of July and August, take the Government grain from the river-side depôts, carry it into the interior, and so save the Government the cost of distribution durin the rains. Your action, as described in your letter under reply, has been quit within these orders.

4. You were, I am to add, quite right in declining to support Mr. Barton' proposal that the price of Government rice should be lowered in order t under-sell the rice privately imported. The Lieutenant-Governor's orders o the 5th July (copy of which is forwarded for facility of reference) are quit clear on this point. I am to request that a copy of the present letter, with the orders of the 5th July, and copy of your letter of the 21st idem, may be forwarded to the Magistrate-Collectors of Rungpore and Bogra for their guidance.

5. If there should be any surplus Government grain in Bogra, it should for the present be kept as a reserve against the possible requirements in neighbouring districts, and it should not be thrown on the market at retail rates lower than can be sanctioned under the standing orders of Government.

6. So also the Collector of Bogra (doubtless with the best intentions) writes of his wish to stimulate sales to the utmost, apparently supposing that if there be a prospect of surplus in Bogra, the Government would desire to begin to sell off the stocks. Now, on the one hand, Government does desire that grain should be distributed among the people in the several manners prescribed in the rules, so far as may be absolutely needed, and no further—so far as it cannot be otherwise supplied by private trade and the like—and no further; on the other hand, Government desires to avoid selling, where the need does not absolutely and especially exist, where private trade either brings in, or is likely immediately to bring in supplies. As to anything like competition on the part of Government with traders, it is the very thing which is most strictly prohibited.

7. Moreover the local authorities would be quite mistaken in supposing that there is at the present time any large quantity of disposable surplus grain. Whatever surplus may be found in any district, is much needed for the reserve supply, which we ought to have in hand for meeting contingencies or emergencies.

No. 190—S.R., dated Burdwan, the 29th July 1874.

From—C. T. Buckland, Esq., Commissioner of the Burdwan Division,

To—The Offg. Secretary to the Govt. of Bengal, Scarcity and Relief Department.

1. I have the honor to forward in original the accompanying district narratives for the fortnight ending Monday, 27th July.

2. *Hooghly.*—The report of the Collector is remarkable chiefly for the apprehensions arising from the want of rain, as the rainfall during the fortnight had been scanty and partial. So much misapprehension, coupled with a want of observation and recorded experience of the annual variations in agricultural processes seems to prevail, that I cannot attach much weight to these remarks on the prospects of the crops. Possibly the heavy rain of the last two days may have allayed some anxiety, but the Collector requires "twelve inches of rain at least, and in a short time, and fair showers afterwards, if the main rice crop is not to be a failure." Unfortunately the condition of the people is said to have much deteriorated during the last week in consequence of the want of rain, and the daily number of people receiving charitable relief has risen from 5,061 in the previous fortnight to 8,194 during the fortnight under report. On the other hand, the total daily number of laborers employed on relief works of every description has fallen from 3,555 in the last report to 2,851 in the fortnight under report.

3. The imports of Government grain appear to be well in advance of the local expenditure. Out of 20,438 maunds received, only 4,429 maunds had been expended up to date. Only 383 maunds have been expended in payment to laborers, and the road contractors decline to take the Government grain in part payment of their contract laborers, except at 20 seers for a rupee, as has been separately reported. The price of common rice has fallen in most parts of the district, and is at 14½ seers at Jhinkrapotagunge (French Chandernagore), where the Collector states that the merchants are anxious to get rid of accumulated stores for which they failed to find a market up-country.

4. *Howrah.*—The report for Howrah is similar to that for Hooghly in its tone regarding the want of rain. With regard to the cutting of Government embankments for irrigation purposes, I have instructed the Collector that this is only to be done with the approval, and under the direction of the executive engineer, and on the deposit by the applicants of the cost of cutting the embankment and refilling the cut. If this precaution is not taken, the Government is left exposed to every risk of loss, whilst the cultivator is to have all the gain.

5 *Beerbhoom.*—The Collector's report is brief; but he states that there is no material alteration in the state of the country since the last report, though pauperism is gradually increasing. The average price of rice is the same as before throughout the district, with only slight local variations. The export of local grain still continues to the amount of 3,222 maunds during the fortnight, whilst the imports of Government grain amounted to 13,868 maunds. The average daily number of laborers on public works has fallen from 8,683 to 5,322, as shewn in the Collector's statement C. The daily average number of persons receiving charitable relief had risen from 20,154 in the previous fortnight to 24,515 in the fortnight under report.

6. The narratives for Burdwan, Bankoora and Midnapore will be forwarded as soon as they are received.

No. 267, dated Hooghly, the 27th July 1874.

From—F. H. Pellew, Esq., Officiating Collector of Hooghly,

To—The Commissioner of the Burdwan Division.

I have the honor to submit the narrative for the fortnight ending 25th July 1874.

A.—State of the Country.

2. *Abundance or scarcity of food-grain in the bazars.*—There is no scarcity of food-grains in the bazars.

3. *Kind and price of grain selling at certain specified marts.*

1	2		3		4		5		6	
	QUANTITY BY THE SEER OF 80 TOLAHS.

Bhudressur	12¾	12½	19	18½	.....	.....	13¾	11¾ „ 13	16	14

4. On the whole, there appears to be a further fall in the price of common rice, but the price is higher in some parts, viz., as much as 10 seers at Haripal. The fall in price is probably occasioned by the fact that the merchants of Jhinkrapotta (French Chandernagore) are anxious to get rid of accumulated stores for which they fail to find a market up-country.

5. *Information as to the kind and amount of grain in stock in the hands of zemindars, traders, &c.*—No reliable information available.

6. *Rainfall, if any.*—There were slight showers of rain during the fortnight in many parts of the district as shown below. The rain has been insufficient. Transplantation of the late rice has ceased for the present. It is fortunate that very little has been transplanted up to date, as most of what has been transplanted has withered. 12 inches of rain at least, and in a short time, and fair showers afterwards, are urgently required if the main rice crop is not to be a failure. At the same time heavy rain as above described would still restore the prospects of the crop. Other crops, including the early rice, are doing fairly :—

	2·52	1·93

At Serampore the fall has been 2·20 in the fortnight.

7. *Prospect of Crops.*—Given under last head.

8. *Condition of the People.*—There is little doubt that distress is gradually increasing amongst the poor, sick, and infirm. The critical state of the main rice crop has made people apprehensive. There is little or no tillage left to do, and the only agricultural work remaining to be done for the present, viz., the transplantation of seedlings of late rice, is at a standstill for want of rain; hence the agricultural laboring population is out of work temporarily. I have been much engaged during the last week in providing work for able-bodied men and women of this class. Heavy and continuous rain would still, I believe, remove all cause for special anxiety, but it must be borne in mind that the country ought to be 6 inches deep in water, whereas the ground has been merely softened. On the 16th instant I rode over what are generally rice swamps in July, at full gallop, in Thana Dhunyakhally. On the whole, I am to report that owing to the unfavorable weather the condition of the people has deteriorated, especially in the last week, and the number of the recipients of relief is rapidly increasing. There have been no deaths from starvation, nor is there any danger of such.

9. *Grain-theft.*—There are two cases of grain-theft reported—one in Bansberya, and one in Ballagurh. The cases are under police inquiry.

10. *Condition of special tracts.*—There are no tracts here which can as yet be said to be in a specially distressed condition.

11. B.—RELIEF WORKS.

B.—Statement of relief works during the fortnight ending 25th July 1874.

Names of Roads.	Number of coolies.	Supply of food.	Condition of laborers.	Mode of payment and rate of wages.	Arrangement for tools.	REMARKS.
Hooghly Sub-division.						
Dhunyakhally road	216	Plentiful...	Fair ...	Under contract; coolies are paid by task labor, also at a daily rate of annas 3-3 each, taking Government rice in advance for khorakee.	Supplied by contractor.	Greater portion are imported skilled coolies. The road is under contract.
Sahagunge and Tribany road ...	.....	.....	.....	.....	.....	No return.
Tribany to Gooptiparah road ...	.....	.....	.....	.....	.....	Ditto.
Pundooah to Culna road; metalling.	56	Plentiful ..	Fair ...	Under contract; coolies are paid by task labor, also at a daily rate of annas 3-3 each, taking Government rice in advance for khorakee.	Partly by contractor and the rest by department.	All local. Greater portion are imported skilled coolies. The road is under contract.
Muggrah to Tribany road ...	6	Ditto ...	Ditto ...	Ditto ...	By contractor ...	Ditto ditto.
Moolye to Jamgram ...	11	Ditto ...	Ditto ...	Paid in Government rice only.	Ditto ...	Ditto ditto.

Total ...	1,035					
Serampore Sub-division.						
Branch Grand Trunk Road ...	20	Plentiful...	Fair ...	Partly in Government rice.	Partly by contractor and the rest by department.	All imported. The circumstances under which cash is still paid partly for this road have been reported.
Sheakhalla road; metalling ...	68	Ditto ...	Ditto ...	Employed in task labour, taking khorakee 1 seer rice and rest pice.	By contractor ...	13 local, all the rest imported skilled laborers; the work is under a contract and the contractor has agreed to take a part in rice only.
Bydabatty feeder-road; metalling.	30	Ditto ...	Ditto ...	Ditto ...	Partly by contractor and the rest by department.	12 local coolies, all the rest imported skilled laborers; the work is under a contract and the contractor has agreed to take a part in rice only.
Old Benares road; metalling ...	62	Ditto ...	Ditto ...	Ditto ...	Ditto ...	Nearly 32 local, all the rest imported skilled laborers; the work is under a contract and the contractor has agreed to take a part in rice only.
Bhola to Nalicool and Junction of old Benares road.	14	Ditto ...	Ditto ...	Under contract, employed in breaking old metal at 9 annas per 100 cubic feet.	By contractor ...	All imported coolies; the work is under a contract and the contractor has agreed to take a part in rice only.
Bydabatty Strand road	7	Ditto ...	Ditto ...	Under contract ...	Partly by contractor.	Ditto ditto.
Connugger to Jonye road ...	3	Ditto ...	Good ...	¾ of the work will be paid in rice if the contractors agree.	By contractor ...	Coolies scarce.

Names of Roads.	Number of coolies.	Supply of food.	Condition of laborers.	Mode of payment and rate of wages.	Arrangement for tools.	REMARKS.
Bora to Nucibpore road	98	Ditto ...	Ditto ...	Partly paid in Government rice.*	.....	Under Baboo Anoorup Chundra Mookerjee.
Jonye to Bora road	92	Ditto ...	Ditto ...	Ditto ...	.....	Ditto ditto.
Jonye to Barasot	.....	.....	.....	.....	.....	Return not received.
Harida to Baksah...	.....	.....	.....	.....	.....	Ditto ditto.
Kristonugger to Sitapore ...	174	Plentiful...	Good ...	Partly paid in Government rice.	.....	Under Baboo Kartic Chundra Dirbango.
Dirghango to Durgarampore ...	61	Ditto ...	Ditto ...	Ditto ...	.....	Under Baboo Sarat Chundra Banerjee.
Bhadressur to Nucibpore ...	.....	.....	.....	.....	.....	Return not received.
Atpur to Rajbalhat	99	Plentiful...	Good ...	Partly paid in Government rice.	.....	Under the Canoongoe of Serampore.
	728					
Hooghly ...	1,035					
Total ...	1,763					

* I have called on the sub-divisional officer for explanation as to why cash payments as well as rice payments are still made to coolies on these roads which are not under contract, and on which the sub-divisional officer can stop cash payments at pleasure. These payments have been made in disobedience to repeated orders from me.

12. The Collector of Howrah will give the Howrah figures separately.

13. The following laborers were employed daily on tanks and works in the municipalities, towns, and unions :—

Hooghly and Chinsurah	262
Serampore	No return.
Kotrung	26
Muggrah	57
Total ...	345

14. Under the Executive Engineer, Northern Drainage and Embankment Division, the following work is in progress :—

Thana.	Name of work.	Daily average number of coolies during the fortnight.	Condition.
Bydabatty	Kananuddee and Surrosutty canal ...	185	Good.
	Ordinary embankment repairs ...	about 73	Good.
	Total ...	258	

15. The returns of works on tanks which are being dug or improved from tuccavi advances which have been received show a daily average number of 485 coolies employed, of whom 84 are local. Almost all the tanks are completed.

16. I give here a comparative statement of coolies employed on relief works as shown in the last and present report :—

		Last report.	Present report.
Roads, &c., under chairman of the road cess ...	Sudder Sub-division ...	1,403	1,035
	Serampore Sub-division ...	663	728
Municipalities, towns, and unions	Hooghly and Chinsurah ...	425	262
	Serampore	Not received.	
Under the Executive Engineer, Northern Drainage and Embankment Division		197	258
Employed on works executed from tuccavi advances ...		730	485
Total ...		3,555	2,851

G.—FINANCIAL RESULTS.

23. The disbursements to executive engineer and other officers in charge of relief works are as follows:—

During the fortnight.

To executive engineer	Nil
Advances for the purchase of food	Nil

* Returns from three committees were unintelligible and are not included.

Disbursements to officers in charge of transport arrangements—

	Rs.	A.	P.
To nazir for transport of Government grain for Government relief works (up to commencement of fortnight) ...	420	0	0
During the fortnight	58	1	10
Payments on account of establishment for storage golas ...	0	0	0
Miscellaneous	5	0	0
	483	1	10

24. On account of advances for purchase of food :—

Advances made during the fortnight to trustworthy residents for purchase of grain	Nil		
To traders for purchase of grain	Nil		
To municipalities	Nil		
To zemindars and others for land improvement during the fortnight	1,150	0	0
	1,150	0	0

25. Local subscription to relief committee—

Up to date of last narrative	7,295	15	0
In fortnight	165	0	0
Total ...	7,460	15	0
Government contribution up to date of last narrative	7,100	15	0
In fortnight	145	0	0
Total ...	7,245	15	0
Received from the central committee up to date of last narrative ...	18,000	0	0

26. The disbursements are as follows :—

Up to date of last narrative	17,152	7	10
During the fortnight	1,715	10	3
Total ...	18,868	2	1

F. H. PELLEW,
Offg. Collector.

No. 283, dated Howrah, the 27th July 1874.

From—J. B. WORGAN, ESQ., Offg. Covenanted Deputy Collector of Howrah,

To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit the weather, crop, and prices report for the fortnight ending on Saturday, the 25th instant.

2. The civil surgeon's sudder statement *rainfall report* for the first week of the fortnight shows very light showers on four days out of seven, only amounting to ·29 for the week. The district superintendent's report for the same period shows that this was general, and that much need of water existed in the mofussil, and he stated that irrigation from the canals and the rivers Hooghly, Damoodur, and Roopnarayan would have to be resorted to. The rainfall of the second week is shown by the civil surgeon as 1·73, there having been showers every day for the last five days of the week. The district superintendent reports of this week that there was "some rain during the week throughout the district," but that much more is wanted.

3. I fear that *the crops* have, from the above mentioned insufficiency of rain, suffered a good deal, and that, unless heavy rain should fall soon, they will be seriously damaged. Near the rivers and canals aid can of course be afforded to the ryots by permitting cuts to be made in the embankments. On this subject I have been in correspondence with the executive engineer of the northern drainage and embankment division, and it has been arranged that applications for cuts in the embankments be entertained and acted on, on certain conditions, agreeably to instructions already received by Mr. Whitfield from Government in reference to cases that have occurred in the 24-Pergunnahs. These arrangements have been communicated to the Deputy Collector of Mohesrakha.

4. The *price of common rice* for the first week underwent very slight variation, rising 2 annas in Khanacool and 6 pie in Doomjoor per maund. In the second week it fell 2 annas in the Sudder Station, Bagnan, and Oolaberiah. The highest price continues to be at Juggutbullubpore Rs. 3-10 per maund, the highest at Bagnan and Oolaberiah Rs. 2-12-6 and Rs. 2-12 respectively.

5. The district superintendent submitted an account of *relief expenditure* on the 24th, showing that by the amounts received by him up to that date Rs. 4-14-9 had been expended on 29 persons since his last preceding report, or an average of 2 persons relieved per diem. The Deputy Collector of Mohesrakha gives figures (only up to the 17th) as Rs. 7-5 spent by the Khanacool relief committee. Accounts of expenditure up to the end of June, as called for in Government letter No. 4640—S.R. of the 22nd July 1874, will be submitted as soon as received from the district superintendent and Deputy-Collector.

6. The executive engineer's fortnightly statement shows 310 men employed in the Sudder and 159 in the Mohesrakha Sub-divisions: laborers reported as scarce.

7. One case was decided under Act XXVI of 1871 during the fortnight; no fresh applications were filed, and none are pending.

Extract from the fortnightly return of coolies employed on the ordinary district road works during the fortnight ending 22nd July 1874.

Name of road.	Number of coolies.	Supply of food.	Condition of laborers.	Mode of payments and rate of wages.	Arrangement for tools.	REMARKS.
Howrah Sub-division.						
Old Benares road*	80	Coolies purchase their own food.	Good ...	Generally 2 annas per day given to each coolie to find food. Payment made at the end of the week: men at 4 annas per day and women at 3 annas 6 pie per day each; ⅔ths the value of work to be paid in rice from henceforth if contractors will take it.	The contractors supply the tools.	Coolies scarce.
Howrah and Doomjoor road...	130	Ditto ...	Ditto ...			
Connuggur and Jonye road*	3	Ditto ...	Ditto ...			
Branch Grand Trunk Road*	70	Ditto ...	Ditto ...			
Mohesrakha Sub-division.						
Ampta road	22	Food is supplied by the coolies themselves.	Ditto ...	Rate of wages in average 4 annas: payment made in advance and also daily.	Tools are supplied by the contractors.	Local coolies.
Juggutbullubpore road ...	137	Ditto ...	Ditto ...	Ditto	Ditto ...	Government rice has been sent to the contractor of this road for payment of coolies, but the result is not yet known.

* Contractors of these roads are unwilling to take rice as already reported.

W. H. WELLS,
Exe. Engr., Hooghly and Howrah District.

No. 426, dated Soory, the 27th July 1874.

From—R. D. HIME, ESQ., Offg. Collector of Beerbhoom,
To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit my district narrative for the fortnight ending 25th July 1874.

A.—STATE OF THE COUNTRY.

There is no material alteration in the state of the country since last report to notice. Pauperism gradually increases, and will no doubt go on increasing till the end of August, when the harvesting of the aous crops in other districts, and the near prospect of the harvest in this, may be expected to cause a general fall in prices; but no great diminution in the numbers on the relief list can be hoped for till the end of October, when the reaping of the first early crop of any importance in this district commences. The crops continue to promise well, cultivation is going on energetically, and there is no sign of any check to agricultural operations from want of means to carry them on. There has been no failure of the markets or considerable rise in prices; no death from starvation during the fortnight has been reported, and the public health continues to improve steadily. Three grain robberies occurred during the fortnight. Prices are given in appendix I.

B.—RELIEF WORKS.

No new relief works have been opened during the fortnight. The returns show a large reduction in the number of laborers since the introduction of payment in grain.

C.—TRANSPORT OF GRAIN.

Exportation continues, 3,222 maunds of rice having been exported against 3,238½ maunds of the preceding fortnight. The Government imports of the fortnight amount to 13,868 maunds.

D.—STORAGE OF GRAIN.

The imports of the fortnight have been stored.

E.—ADVANCES TO PRIVATE PARTIES.

Are shown in appendix, Statement II.

F.—CHARITABLE RELIEF.

Vide appendix, Statements III and IV.

G.—FINANCIAL RESULTS.

Rupees 125 were paid to the zemindar in charge of the Naguri road on account of brick-burning and masonry, skilled laborers refusing grain payment, and the road being useless, unbridged; Rs. 1,000 were paid to Messrs. Farquharson and Campbell on back accounts of weavers and spinners, and Rs. 2,790-4-3 were expended in the purchase of cotton. With these exceptions, and transport and storage charges, all payments connected with scarcity and relief during the fortnight have been made in Government grain.

APPENDIX RETURN II.

Statement showing the storage and consumption of Government grain in the District of Beerbhoom for the fortnight ending 25th July 1874.

1. Name of Circle—Beerbhoom
2. Dates for which figures are given—11th and 25th July 1874.
3. Total allotment of Government grain—uncertain.

		Mds.
4.	Total quantity of grain stored	13,868
TOTAL QUANTITY OF GRAIN CONSUMED UP TO DATE.	5. By sale to the public or to laborers	...
	6. By gratuitous distribution in any shape	3,637
	7. By advances to ryots	...
	8. Drawn by zemindars under concession G.	1,950
	9. By payment in kind to laborers	1,469
	10. Total	7,036
	11. Estimated grain receipts of the ensuing fortnight	15,000
	12. Estimated grain expenditure of the ensuing fortnight ...	10,000

APPENDIX STATEMENT III.

Statement showing the progress of charitable relief in the District of Beerbhoom for the fortnight ending 25th July 1874.

1.	Number of committees and sub-committees as yet appointed	12
2.	Ditto of special relief sub-divisions opened and officered	23
3.	Ditto of regular relief circles opened and manned by special officers	14
4.	Ditto of relief circles opened and manned by planters, zemindars, and other residents	13
5.	Ditto of work-houses or centres for the distribution of food and gratuitous relief ...	27
6.	Ditto of men, women, and children in receipt of gratuitous relief in any shape through the charitable relief organization daily as on the 18th July	24,515

REMARKS.—Of the total number of recipients of charitable relief, 4,636 are spinners and weavers, and 1,440 are employed in light labor on village tanks, roads, and conservancy, leaving 18,439 in receipt of purely gratuitous relief. These numbers do not include a daily average of about 100 pauper patients in receipt of rice at the dispensaries.

APPENDIX STATEMENT IV.

Statement showing the number of Persons relieved up to July 1874, submitted with reference to Government No. 3216—S.R. of the 19th May 1874, paragraph 5.

	B.		C.		D.			
Total number of meals given up to 18th July 1874, i.e., persons fed for one day.	Total number of persons receiving gratuitous relief in rice at present on the 18th July.	Total disbursements up to 18th July, including cost of laborers employed on light out-door work.	Total number of weavers and spinners supplied with thread and cotton and advance on the 18th July.	Total disbursements to 18th July—weavers and spinners only.	Total number of families relieved under heading D on the 18th July.	Total disbursements up to 18th July. REMARKS.—*Vide* appendix return V of the fortnight ending 30th May 1874.

R. D. HIME,
Officiating Collector.

No. 192—S.R., dated Burdwan, the 31st July 1874.

From—C. T. BUCKLAND, ESQ., Commissioner of the Burdwan Division,
To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

IN continuation of my No. 190—S.R., dated 29th instant, I have the honor to forward in original the district narratives from Burdwan, Bankoora, and Midnapore, for the fortnight ending 27th instant.

2. *Burdwan.*—The Collector's remarks on the condition of the people are important. There is undoubtedly a considerable amount of distress and want among the crowded population of this district, in which there is always a large proportion of sickly and unhealthy and weakly beings, whom we are now absolutely preventing from dying in the ordinary course of nature. I was at Cutwa with the Collector and Dr. French, and I think that the people there were no worse than the people in Bood-bood. There were fewer lepers, but there was more ophthalmia. The marks of cautery for spleen are, I fear, to be seen on eight persons out of ten throughout the Hooghly and Burdwan districts; but this is as much due to the ordinary local fever and ague of a low marshy country as to the recent migratory fever, which has been more promptly fatal to its victims. With such a radically hopeless material to operate upon, it is in fact the verification of the Bengali proverb of carving rotten wood when we attempt to do good to these poor people.

3. With regard to the Collector's remarks on the difficulty of preventing impostors obtaining relief, I have no doubt that the best remedy is to be found in vigorous European supervision; but with the small European staff at our disposal, European supervision cannot stay long enough at any place thoroughly to sift the claimants for relief, and any hasty mistake in rejecting those who really need relief would have very disastrous consequences. The Collector does not state what use he has made of Captain King-Harman's services, but he proposed to employ him at Sonamookhee, so as to supervise the southern or trans-Damooda part of the Bood-bood sub-division. Dr. French has been very useful, but his visits are made chiefly with the view of providing relief and seeing that none are neglected who require aid on medical considerations, and he cannot stop to eliminate unworthy applicants for relief. Unfortunately Dr. French has suffered severely from fever in consequence of the fatigue and exposure which he has undergone. I should be glad if another special relief officer could be added to the Burdwan staff, especially if an officer like Mr. Macaulay, who has been sent to Bankoora, can be found.

4. The number of laborers on public relief works has fallen from 7,711 in the previous fortnight to 3,334 in the present fortnight, but the number of persons receiving charitable relief had risen from 50,677 to 52,771 during the fortnight.

5. *Bankoora.*—The report from this district seems to shew a general tone of improvement, but not so much as may be expected in the next fortnight, when the work of the special relief officers will have produced its effect.

6. *Midnapore* calls for no remarks.

No. 810F.R., dated Burdwan, the 27th July 1874.

From—E. H. WHINFIELD, ESQ., Officiating Collector of Burdwan.
To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit the fortnightly narrative due to-day.

A.—STATE OF THE COUNTRY.

2. The Raneegunge Sub-divisional officer says that there has been quite enough rice in the bazars; that the prices are 11 seers 4 chittacks ramsal rice per rupee down to 14 seers 4 chittacks coarse Midnapore rice per rupee; that the condition of the people is very fair, though they lost heart to some extent during the latter part of the fortnight in consequence of the absence of rain; that the total rain-fall in the fortnight was 3 inches; that the crops are doing very fairly; that there has been no starvation or real misery; that a death from starvation of an old woman of 80 was reported, but on local enquiry by the sub-divisional officer proved not to be due to that cause; that thefts are numerous.

The Bood-bood Sub-divisional officer says that the supply of rice in the chief bazars is deficient; that the prices range from 12 seers 11 chittacks to 11 seers 13 chittacks; that the traders hold large stocks, but hold on for better prices; that the rain-fall at Bood-bood was 1·85 inches, but it was not general throughout the sub-division; that in some parts the crops have suffered and the transplantation of the amun has been delayed in consequence of the want of rain; that the condition of the people is better owing to the abundant relief given; that no cases of misery or starvation or grain thefts have come to light.

In the Sudder Sub-division the continued cessation of the rains has caused much anxiety and increased the rush of people to the food depôts. In the crowds of applicants for advances who daily throng my cutcherry, the number appearing really to require relief has increased. Instead of only one here and there, I find perhaps one in 20 or in 25 who may be reasonably supposed to be in want. Most of the distressed cases are found amongst the chowkeedars, and the rest amongst the poorer ryots. The rain-fall during the fortnight has been 1·25 inches, all of which has fallen within the last few days. Previously to that the crops—and more especially those in the east of the sub-division—were looking badly. Prices of rice now range from 11 seers 4 chittacks to 12 seers per rupee. No deaths from starvation have occurred.

No narrative has been received from Cutwa. During the fortnight I spent some time at Cutwa and inspected various parts of that sub-division in company with Dr. French. There is no doubt that distress has increased there. In almost every village visited by us, we found more or less distress. Some of the poorest persons were found to be eating grass seeds, and nearly every crowd appeared to contain a larger or smaller admixture of lean and badly nourished persons. The condition of the crops appeared to be fair throughout Thana Ketugram and the east half of Cutwa, but not so good in the west of Cutwa and east Munglecote. Irrigation seemed to be going on most actively throughout the sub-division, which is a most unusual thing at this time of the year. The population is decidedly, on the whole, a sickly one. The number who have scars on the left side of the stomach, indicating that they have undergone the native operation for cure of enlarged spleen, is very considerable. Eye diseases are also prevalent, not to speak of small-pox and other ordinary disorders. The rain-fall at Cutwa in the fortnight was 1·35 inches.

The Culna Sub-divisional officer says that the condition of the people is worse, though prices continue the same, ranging from Rs. 3-8 to Rs. 3-4 a maund; that the rain-fall at Culna was 1·62 inches; that the prospects of the amun crop are far from good, though the aous is doing better; that though the lower classes are undergoing great privations, no deaths from starvation have been reported.

During the fortnight I visited the three Culna thanas—Poorbustholi, Montessur, and Culna. The state of the crops along the bank of the Bhagiruthee seems to be as good as could be wished, but those inland, further to the west, are in anything but a satisfactory condition, and a good deal of the land is not cultivated; moreover, the tanks seem to have very little water in them. In several of the villages we passd through, we saw some lean and emaciated persons in the crowd, over and above the normal admixture of aged and diseased persons. Distress is certainly increasing in Culna.

The Jehanabad Sub-divisional officer reports no change in the condition of the people. He states that the rain-fall has been only 1·60 inches against 6·57 inches in the corresponding period of last year; that great anxiety is felt for the safety of the aous crop in the Jehanabad Thana; that the crops in Kotulpore and Roynah are doing well; that the absence of rain still keeps up prices; that there is no deficiency in the supply of rice in the bazars; that no cases of starvation or grain thefts have occurred.

The Executive Engineer, Northern Drainage and Embankment Division, reports that the supply of labor throughout the district is less than the demand. He quotes his sub-engineer as saying that the indiscriminate distribution of Government rice in unnochattras (food-depôts) has made some people quite independent. Before the establishment of these food-depôts the rate for earth-work was Rs. 2 to Rs. 2-8, and coolies were easily obtained; whereas now, though the rate has been raised to Rs. 3 and Rs. 3-8, there is very great difficulty in getting coolies. The small indigo-planters are said to experience similar difficulty. The executive engineer remarks on this: "The rice-planting season, no doubt, has a good deal to do with the difficulty in procuring local coolies, but the gratuitous distribution is fast converting a large portion of the population into mendicants." The executive engineer concludes by recommending sales of Government grain where employment is obtainable instead of gifts and advances.

After the alarmist reports that relief was insufficiently given, &c., received in the last fortnight, it is somewhat consolatory to encounter a piece of criticism of the above tenor. That relief is somewhat indiscriminately given must, I am afraid, be admitted. Discrimination is a faculty which appears to be absolutely non-existent amongst the members of the rural sub-committees, and to be very imperfectly developed even amongst the Rs. 50 relief inspectors. If we could secure the exercise of proper discrimination, I believe our expenditure on relief would be at once very largely curtailed; but as that is impossible, it is likewise impossible to avoid relieving a large number of impostors along with the persons in real distress. Every increase of real distress seems to be attended by a proportionate, or perhaps a more than proportionate, increase of imposture, and this element of imposture it is impossible to keep out. There are superior relief officers who visit the depôts and check the admittances; but, as I have myself found by experience it is not by any means an easy matter to discern the proper recipients of relief in the midst of a crowd all pressing and clamouring for relief, the stoutest individuals and those least requiring it clamouring loudest, and the weaker ones hardly able to make themselves seen or heard. Though the crops are, on the whole, in an unsatisfactory condition, I may note that seed-grain appears to have been forthcoming everywhere, and the alarmist stories about the want of it have been utterly exploded.

B.—Relief Works.

3. The relief works are shown in the statement annexed. All the laborers, except those in town committee, chowkeedary union, and embankment works, are now paid in grain. The new roads in Cutwa appear to have been very fairly made; they are now being turfed.

C.—Transport of Food.

4. The export of grain, public and private, by rail in the week ending 18th July was 2,498 maunds, and the import in the same week was 12,981 maunds. The import of grain into Bood-bood from the south appears to have stopped, owing to the rise of the Damoodah.

D.—Storage of Government Grain.

5. The quantity of Government grain now in store, the localities of the golas, and the consumption, are shewn in statement II.

E.—Advances to Private Parties.

6. Advances under the Land Improvement Act have now ceased to be made, as the season for tank-digging and earth-work is over. The total sum advanced is Rs. 68,959 on 216 applications. Applications are now coming in freely for the remission of one-third of the debt in each case in which the money has been used in improving the general water-supply of a village under paragraph 23, Government circular No. 80, dated 17th November 1873.

The advances of grain are shown in statement III. The Bood-bood Sub-divisional officer reports that some of those who have already received advances once are now applying for more; I have directed him not to comply with any such second applications till he has disposed of all the first applications. It is becoming clear that every one is asking for these advances, and many more than once. I have impressed on the sub-divisional officers the necessity for careful personal examination of all applicants, and I hope they will exercise proper discrimination in making these advances. The applicants in the Sudder Sub-division I examine myself. Advances of grain are being freely made to weavers, to be repaid in cloth.

F.—Charitable Relief.

7. The particulars of this are shewn as usual in statements Nos. IV and V. The numbers are increasing, and I am afraid will increase. During the fortnight Captain King Harman, appointed to assist in relief matters, has joined.

G.—Financial Results.

8. These are shewn in statement No. VI.

The new statement required by Government letter No. 4640—S.R., dated the 24th instant, will follow.

I.

Statement showing Progress of Works in the Burdwan District for the fortnight ending 25th July 1874.

NAME OF ROADS.	Average daily number of laborers.	Rate of wages.	Price of rice.	REMARKS.
		Rs. A. P.

BURDWAN COLLECTORATE,
The 27th July 1874.

E. H. WHINFIELD,
Offg. Collector.

No. 748, dated Bankoora, the 27th July 1874.

From—W. R. LARMINIE, ESQ., Offg. Collector of Bankoora,
To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit my report for the fortnight ending 27th July 1874.

STATE OF THE COUNTRY.

2. The price of rice has varied but little except in Moheshra, but it has shown a general tendency to rise. The supply is sufficient in the chief bazars, but in the more out-of-the-way villages, especially in pergunnah Moheshra, it is sometimes difficult to procure grain. Prevailing rates are given below :—

	Wheat.	Barley.	RICE. Best sort.	RICE. Common ordinary.	Gram.
	Mds. S. C.	Mds. Srs. Ch.	Mds. S. C.	Mds. S. C.	Mds. S. C.
Bankoora	0 12 12	0 21 0	0 10 8	0 12 8	13 12 0
Chatna	0 13 8	0 17 8	0 12 12	Coarse. 0 13 12 0 13 8	0 13 0
Bishenpore...	0 12 0	0 22 0	0 11 8	0 14 0	0 14 0
Oudah	0 13 0	0 22 0	0 11 0	0 13 0	0 14 0
Gungajulghatty	0 13 0	0 16 0	0 10 8	0 11 0	0 14 0
Burjorah	0 14 8	.....	0 11 0	0 12 0	0 13 0
Saltora	0 10 0	0 16 0	0 10 0	0 11 0	0 8 0

3. During the last fortnight the rainfall has been not only scanty in general, but uneven in its distribution. Great anxiety has been experienced, but there have been some good showers the last few days, and the situation is improved. The aous crop is in many places very good, and is a more extensive one than usual. The late showers have rendered this crop almost safe. Very little progress has been made in transplanting the amun seedlings, and unless heavy rain fall within the next week or ten days, I fear the crop will be a short one. Mr. Macaulay reports that the prospects are extremely bad in the west of Channa, but the rain of yesterday and the day before must have done much good.

4. Distress has not abated. The continued want of rain has thrown the laboring classes out of work, and of course the condition of the weavers and other manufacturing classes cannot yet be expected to improve. There have been no serious cases of grain theft or robbery reported.

I am glad to say we have had no further reports of deaths by starvation either true or false.

The fourth case mentioned in my last report turned out to be as unfounded as the others.

Relief Works.

5. The number of laborers is given below. I fear it will be necessary to commence some new roads. Those in progress are rapidly approaching completion, and although our rates are very low, coolies are not being absorbed by cultivation. This is partly caused by want of rain and partly by the fact that many cultivators, who, in ordinary years, pay laborers, are this year, in consequence of straitened circumstances, obliged to do the work themselves. The decrease in the numbers shown in the statement annexed is doubtless due to the gradual completion of the different works.

Advances to Private Parties.

6. The total amount of grain advances sanctioned up to date is about Rs. 54,000, representing about 22,000 maunds. This is still being given in instalments in consequence of the insufficient supply of Government grain, but although some inconvenience is caused in this way to the recipients, we secure an increased chance of testing the securities pledged. I have already had several applications from creditors of those to whom grain had been advanced, alleging that the property pledged to Government was already encumbered. Where such statements are substantiated, additional security is called for. In one case I handed over to the criminal courts some persons who deliberately asserted that they were in possession of property to which they had no claim. Their punishment has acted as a warning to others. It has been asserted that the temptation of getting a loan from Government without interest is very great, but I think Government conditions are severer than those of most mahajuns. The latter, as a rule, lend grain and demand 50 per cent. interest in grain; we lend *grain* say at 13 seers per rupee, and demand repayment at that rate in cash when grain may be selling at 26 seers per rupee. From the ryot's point of view this is a payment of 100 per cent. I feel quite sure they are sensible of this fact, for in several cases in which I had sanctioned an advance of grain the applicants, before getting their certificates, appeared and stated that having succeeded in getting grain from their mahajuns, they did not wish to receive their advances from Government.

7. The Ghatwals have received from me through their sirdars advances to some considerable extent, many of them being very badly off, and no mahajun being willing to lend on the security of tenures which are held at the will of Government.

Transport of Food.

8. There is nothing worthy of note under this head, except that rice is still being imported from Raipore in Manbhoom.

Storage of Government Grain.

9. The annexed table will show the amount received and expended. The supply is, of course, inadequate for our needs, but the amount imported will be largely increased now that a regular transport service has been organized, and in a few days I hope to be able to meet all demands in every part of the district. This it would be impossible to accomplish without the aid of the transport officers who have been entrusted with the duty of getting the grain across the river Damudah. I thought at one time of importing into the north-east of the district from Durgapore Railway Station, but after consultation with Captain Grant, it appeared to me that the extra expense that must be incurred in doing so would not be compensated by the saving in cartage. I have, therefore, abandoned the idea. Our present arrangements are as follows:—

10. Two large golas will be established, one at Mejia and one at Bankoora. Captain Grant will pour as much grain as he can into these, and an independent carting agency will supply all other relief centres. In this way, I think most work will be done.

11. As already reported, the expected consignment from Balasore will not exceed 350 maunds.

Charitable Relief.

12. It will be seen from the statement annexed that there is an increase in the numbers relieved under classes (*a*) (*b*) and (*c*), and a decrease in class (*d*). The total increase is, however, less than that observed in the preceding fortnight. Mr. Macaulay has commenced work on the

western side, and has already effected considerable improvement in the centres which he has visited, enforcing the labor test as far as possible, and weeding out those who do not require relief. It is perfectly clear that thorough and constant European supervision is necessary, and I have no doubt that succeeding reports will shew a great change in the proportion between classes (*b*) and (*c*), but any weakening of my relief staff would, doubtless, undo all the good I anticipate from the work of the special officers how placed at my disposal.

Statement of Charitable Relief.

1. One central committee.
2. Thirty-five sub-committees.
3. Thirty-eight.
4. None.
5. Thirty-eight.
6. Statement showing average daily number relieved during the fortnight.

Bankoorá Collectorate,
The 27th July 1874.

W. R. Larminie,
Offg. Collector.

No. 206, dated Midnapore, the 27th July 1874.

From—H. L. Harrison, Esq., Collector of Midnapore,
To—The Commissioner of the Burdwan Division.

I have the honor to submit the fortnightly report for the period terminating on July 25th.

2. In the beginning of the fortnight I made a brief tour for three days into the thanas of Salbunny, Gurbeta, and part of Beenpore; the fields were then getting dry from short rainfall, and from that date up to the 22nd no rain of any consequence fell in the greater part of the district, though very heavy and ample but partial rain fell in one or two places. Had this report only extended up to the evening of Wednesday the 22nd, it would have been a very gloomy one, as the aous crop was reported from all quarters, except those specially favored with rain, as beginning to suffer, the people were clamouring for work, the numbers at the food depôts were increasing, and prices were rising rapidly. Worse than that, all those who had stores were holding them back, and in many quarters it was reported that rice could not be procured. Dr. Phillips at Beenpore in West Salbunny (not Beenpore thana) could not purchase it for his orphans, and begged the committee to send him rice from their stock.

3. All the relief roads were set working again at full power, and those in charge received orders to refuse no one who would give a full day's work. The Jambonee estate rice, which was being sold, was readily purchased at 12 seers the rupee, *i.e.*, 2 to 3 seers less per rupee than the price a fortnight before; but the availability of this rice stopped all panic in the west of the district. I ordered 100 maunds of the committee's rice to be sent to Dr. Phillips for sale, and I hope that this will suffice to bring out further stores in that neighbourhood. In the north-east of the district the temporary Deputy Collector reported that rice was almost unprocurable and asked for 500 maunds; but I know that large stocks are held in that neighbourhood; and as the rain has since come down copiously, I hope that it will bring an ample supply into the market, and have asked if it has done so before sending any from here.

4. From the 22nd to the 26th we have had an abundant rainfall in the Sudder Station; it is known that it extended to the south-east of the district, and partially at least to the west; but I shall not, till after this report goes, obtain complete information. If it has been abundant everywhere the threatened crises will be averted, except that in parts the aous crop will have permanently suffered somewhat, and the amun will be rather too late to give a very full crop unless the rains continue up to November.

To-day's news shews that it has been abundant everywhere except in the north-east. Some rain has fallen there, but less than might have been wished.
It is probable, however, that rain has fallen there during this day. H. L. H.

Reports give an average of 3 annas loss of aous.

5. The information called for in Government orders No. 4640—S.R. of the 22nd July cannot be given in this report, it will be sent separately afterwards.

6. The financial condition of the relief fund is as follows :—

	Rs.	A.	P.
Opening balance	15,116	15	3
Subscriptions collected	443	0	0
Central Committee's donation	2 000	0	0
	17,559	15	3
Expenditure	2,187	0	0
	15,372	15	3

7. I enclose the reports from Gurbetta and Tumlook. The latter gives the statistics of the Rajnagore food depôt. The statistics of those at Chunderkona, Keerpoy, Radhanagore, and Dasspore, have miscarried and I am unable to give them.

No. 2441, dated Chota Nagpore, the 23rd July 1874.

From—Colonel E. T. Dalton, c.s.i., Commissioner of Chota Nagpore,

To—C. Bernard, Esq., Secretary to the Government of Bengal, Scarcity and Relief Department.

I have the honor to submit my half monthly narrative for the fortnight ending Monday the 20th instant. I have delayed three days to obtain all the information I could up to that date.

2. From all the districts except Palamow, comes the cry of "more rain wanted." Up to the 17th July, in the Hazareebagh district, the prospects of the crops were excellent, but during the week ending on that date, only 1·89 inches of rain was registered; and from some of the police reports it appears that owing to want of rain transplanting of paddy, which had commenced, had been suspended; still no apprehensions of any failure were entertained. There was time for transplanting if the rain has since fallen sufficiently or soon comes, and the crops on the ground were uninjured. The gondli, which in some places will be ready for the sickle by the close of the month, is represented as particularly luxuriant; murwa, which will be ready a few days after the gondli, is also expected to yield abundantly, and the makai, though reported from some quarters to have suffered from the heavy rain in June, is on the whole fair.

3. In the Sudder sub-division of the Lohardaggah district, the bhadoi crops are at present in first rate order, but transplanting of the great rice crop is, in the neighbourhood of Ranchi, postponed for rain; and the paddy in the seed-beds is rather overgrown, but that which has been planted broadcast in low lands, and the gora, or early rice, on the high lands, are still in excellent condition. Gondli and murwa well-advanced, and makai luxuriant. In the remote quarters of the Sudder sub-division I hear there has been sufficient rain, and transplanting is reported to be progressing favorably; nevertheless, the lull in the rain during the last week has affected the market. On Saturday last rice was selling at Ranchi at 17½ seers for the rupee; yesterday it rose to 15½.

4. The Palamow reports are quite satisfactory, as will be seen from the half monthly narrative* of the sub-divisional officer, received on the 21st and submitted herewith.

* No. 548, dated 18th July 1874.

5. The Manbhoom people, except those in the Govindpore sub-division, where the weather has been seasonable, are becoming most anxious in consequence of the long intermission of rain. The Deputy Commissioner's report of the prospects up to the 17th instant, is in the hands of Government. In that, he stated that the hopes of a bountiful harvest from the early crops were unabated, but the deficiency of rain during the fortnight had put a stop to the transplanting which had commenced. Writing on the 22nd, Colonel Rowlatt says:—"In continuation of my demi-official of yesterday, I regret to report that for the last eight days, no rain whatever has fallen in this part of the district, whilst for the weeks ending 11th and 18th, only 0·50 and 1·14 fell; the consequence of which is that the crops on the high lands, consisting of gora (aous), gondli, kodo, Indian corn, and pulses (beri and mung) are now suffering from want of moisture and are beginning to dry up; the gora has apparently suffered the most, and the others in a less degree. The most serious effect of the drought is that the seedling (called "afar" in this district) has, when sown on high lands, partially withered, and on the lower lands is becoming so tall as to be a good deal injured for transplanting." This is a very gloomy account; he, however, adds, "should rain fall within a day or two, not very much damage will have been done." I append a copy of the letter* from which I have extracted the above. These bad prospects are in the Purulia and Manbazar relief circles; the central and south east parts of the district, the large pergunnahs of Burrabhoom, Patkum, and Bagmundi have not suffered. The Purulia market is sharply affected by the cessation of rain. Rice was at 14 seers in the previous fortnight; it fell to 11 seers on the 22nd.

* No. 1668, dated 22nd July 1874.

6. The reports from Singbhoom, though less gloomy, are of the same hue. Captain Garbett:—on the 15th writes, "The rain is still holding off, and matters begin to look serious. The fields are beginning to look dry, and the dhan to look bad; but what I like least is, our Kols are getting frightened and discouraged. They flock to the bungalow every day to ask if the rain is coming, and when."

7. Since yesterday, we have had here indications of a change. There was a smart shower in the evening, and to the west there was heavy rain; and I trust that I shall soon hear that the crisis is past, and find prospects more favorable in Manbhoom when I go there.

8. The Hazareebagh report for the month of June, I received since the despatch of my narrative for the fortnight ending the 6th instant. I have not obtained any later statistics from Mr. Beadon. His sub-divisional officers and the managers of the Wards Estates are objectionably slow in transmitting intelligence. The report above referred to is an unnecessarily voluminous production, with its four sets of weekly reports from police stations, all of which so resemble each other that the information might have been compressed into a very brief space in Mr. Beadon's own narrative.

9. From that narrative we learn that the rains set in on the 22nd June, and from early in the month, the payment of laborers in rice at 11 seers for the rupee, commenced. This change, and the agricultural labor now open to the people reduced the numbers engaged on relief works to about one-fourth of the number previously employed.

10. I have approved of the proposal in Mr. Beadon's 17th paragraph, to the effect, when the advances now being made to ryots and others of rice are brought to a conclusion, and the stocks of grain on the Grand Trunk road exhausted, that Major Preston and Mr. McCarthy's services be dispensed with.

11. The average number of work-people continuing on the road and other works, was 2,569 adult males, 2,278 females, and 901 children; total, 5,748. Those who had withdrawn from the works had, for the most part, obtained employment in the fields.

12. The persons employed on roads in the west and south of the district where there was no Government rice, had been paid in cash; altogether Rs. 3,734 had been thus disbursed, but the payments in kind were equivalent to a cash disbursement of Rs. 8,617. In addition to the above, nearly 9,000 maunds of Government rice had been given out in loans, and applications, for such are still complied with.

13. On the whole Mr. Beadon is quite justified in considering that all danger is now past in the Hazareebagh district. For the main cost incurred in relieving distress, we shall have good and useful lines of roads to show and some fine reservoirs; and when the advances are recovered, the cost of relieving distress in the Hazareebagh district will appear moderate, though in very few districts have the prices of all kinds of food-grain risen higher.

14. Throughout the Hazareebagh district, at the various centres, beggars and all feeble paupers are still fed by the relief committees. Ths disbursements by relief committees accounted for up to the 20th instant, have altogether amounted to Rs. 5,406, leaving a balance to credit of 15,658, which is considered sufficient.

15. I am very glad to be able to submit on this occasion an unqualified favorable report on the Palamow sub-division by Mr. L. R. Forbes. It leaves nothing to be desired. The crops on the ground are luxuriant. There is full promise of an unusually fine bhadoi crop. The weather has continued favorable, and the usual field operations of the season are going on satisfactorily, and in regard to the destruction of embankments by heavy floods which was the dark shade in the last narrative, Mr. Forbes has, during a recent tour, visited several villages and found that the breaches in the embankments "had, for the most part, already been repaired." Relief operations have been all closed, except those carried on by relief committees. The quantity of Government rice disposed of during the fortnight appears small, but Mr. Forbes hopes to sell 15,000 or 16,000 maunds before his next narrative is due. I have authorized sale of cargo rice at 16 seers, under orders of Government No. 4265—S.R. of the 4th instant.

16. *Singhboom.*—In this district all goes well except that anxiety is felt in consequence of the discontinuance of rain; during the week ending 19th instant, only 1·19 inches had been registered, and apparently there has been no more since, but prices were not affected, common rice was selling at Chaibassa at 20 and in Dhalbhoom at 24 seers for the rupee, and the condition of the people is reported to be very good. The only relief work now open in the Kolhan is clearing out a large tank at Chaibassa, on which there is an average daily employment of 118 persons, and finishing irrigation works opened in Dhalbhoom, 1,976 persons. These laborers are now paid in grain from stores laid in at the commencement of the season. The Deputy Commissioner has about Rs. 1,000 worth of rice in the Kolhan which he wishes to dispose of to the Kols, and I have told him to do so.

MANBHOOM.

17. The untoward withholding of rain reported above has clouded, temporarily I hope, the prospects of Manbhoom, but Colonel Rowlatt's report of the 17th instant, which is now in the hands of Government has some interesting features.

18. I demur to the account given of the effect of the reduction in wages of persons employed on minor and local works by Mr. Hare, the relief officer of the Purulia Circle. This was ordered by me, because I believed that the rates paid were higher than those which it was customary for farmers to offer for field labor, and I was right, but it has this good effect: those who remain on the works find they can make more at piece-work than on daily wages, and many now take to piece-work in preference; even some who have been employed on light labor gangs. It is necessary now to be careful that the piece-work of 2 annas for 100 cubic feet of earth is a fair rate, considering that the earth is now soft and easily removed. I have called for information on this subject; Colonel Rowlatt's statistics are up to 4th July only. It was then shown that the numbers employed on the roads had

fallen from 12,082 to 6,832, the number employed for minor works, from 3,993 to 3,243, but since that time the payment for one day's work in pice instead of rice has stopped, and his, it is said, has caused a further reduction.

19. But it is unsatisfactory to find that the number now in receipt of food from the sub-committees has risen in the same period from 6,470 to 8,843, and the number now reported as in receipt of uncooked food, has gone up to 11,222. The figures in previous narrative are too incomplete for comparison, but the increase appears excessive, though in the previous report Colonel Rowlatt informed us, he had addressed the relief officers, pointing out the absolute necessity of reducing the numbers as much as possible, but Colonel Rowlatt says that he can only attribute the increase in the number of persons relieved by the committees to many of those who maintained themselves by working on minor relief works having come to the sub-committees when they found the rate of wages had been so much reduced. I have requested him to cause inquiries to be made on this point, and to direct the sub-committees and relief officers to give no charity to persons in health who leave honest labor of any kind to get fed for nothing.

No. 548, dated Daltongunge, the 18th July 1874.

From—L. R. Forbes, Esq., Officiating Assistant Commissioner of Palamow,

To—Colonel E. T. Dalton, c.s.i., Commissioner of Chota Nagpore.

I have the honor to submit herewith, my eleventh fortnightly narrative of scarcity and relief in the Palamow sub-division for the fortnight ending Saturday, 11th July 1874.

2. All relief operations except those under the charitable relief committees having closed, I presume there is now no longer any necessity for a detailed report under the several heads; I shall therefore confine myself to what is actually going on and of interest.

A.

Kind and prices of grain selling in one or more principal marts.—The table below will show that there has been a further fall in the price of grain during the fortnight, and with the large stocks in hand and the early millets nearly ripe, there is every reason to expect a still further fall in prices.

Names of Marts.	Quantities per rupee by the seer of 80 tolahs.						
	Wheat.	Barley.	Rice.		Murwa.	Indian-corn.	Gram.
			Wholesale.	Retail.			
Daltongunge	12·	.....	14·06	12·94	60·75	15·75	15·62
Garwah	12·36	16·75	14·62	13·50	60·75	16·81	15·18
Hosainabad	13·50	18·60	12·36	11·24	.....	.....	15·18
Satberwah	13·50	20·25	14·75	13·63	61·	16·62	15·75
Manka	.....	16·25	14·75	13·63	67·	16·	15·25

Rainfall.—The amount of rain registered during the fortnight was 11·27 inches, making a total to date of 37·04, or very close upon the total fall of last year.

State of the crops.—I have just returned from a tour in the district and can speak confidently as to the state of the crops. Where it was sown early, the makai crop is well advanced, and in splendid condition, but where otherwise, the constant rain has been too much for it, and the plants are rather stunted, and in some places turning yellow. The fine hot sun of the last 7 or 8 days has, however, gone a long way to invigorate the crop; all the other rainy crops, particularly oorid and cotton, are all in excellent condition; sawan and gondli in many places are ripening, and will be ready for cutting in a week or 10 days. To the south-west the bhadoi crops are described as being really splendid. Some of the farmers of Simah tell me that they have not known such a bhadoi for years. The prospects of the dhan crop are everywhere said to be most favorable. With regard to the destruction of bunds and embankments reported in my last, I am unable as yet to give details of loss, as I have not yet received the thana returns. During my recent tour, however, I visited many villages, in fact I observed every where I passed that the breaches in the embankments had, for the most part, already been repaired; and the probability is that only in the cases of large embankments, where the damage has been very extensive, the work of repair will have to stand over. I was informed by Mr. Charles Davies of Akbarpore, whom I met at Hydarnuggur, that such a flood of rain as passed over the country on the 20th and 27th June had not been known for 26 years, when he remembers just such another fall. We registered only eight inches of rain in Daltongunge on those two days, but from the heighth to which the Amanut river and other rivers to the north of it rose, I estimate the fall of rain within the cycle of the storm to have been something like 24 inches in the 48 hours.

Condition of the people.—Everywhere excellent; a few stray cases of small-pox still reported.

B.—The works on which laborers were employed during the fortnight.—No. 1, Daltongunge Station road; 2, Chandwa road; 4, Maharajgunge road; 9, petty irrigation works

10, Baloomath road ; and the number of laborers on each was, No. 1, 29 ; 2, 18 ; 4, 72 ; 9, 495 ; 10, 39 ; total 653.

With the exception of those on relief work No. 9, who are engaged in completing the petty repairs to irrigation works in Government Farms, the others, 158 in number, were employed in assisting masons on bridge work, and since the close of the fortnight all bridge work has been closed. The establishment is now engaged in clearing up accounts.

Petty repairs to irrigation works are being done by contract according to pergunnah rates ; and the professional nuniahs are paid in cash. Rice, and nothing but rice, has been paid to other laborers, at the rates mentioned in my last narrative.

C.—Transport of food.

Though the rice arrived after the close of the fortnight under report, I may state that Mr. Hodges brought up by boat from Dehri to Japla about 6000 maunds of rice for storage at Hosainabad. I went to Japla myself to arrange for the proper storage. I am in hopes that the Government telegram directing the rice to be sent to Sarun reached Dehri in time to prevent its being despatched to this.

D.—Storage of grain at relief works.

The accompanying statement, 1, exhibits all necessary information under this head. The sales during the fortnight were only half what I estimated, but since the close of the fortnight they have been much brisker, and I trust to be able to show in my next that some 15,000 to 16,000 maunds have been disposed of. The zemindars are freely accepting responsibility and taking rice wholesale for distribution to their ryots. The rice in the Panki-Parassia kote and Nowa golas has been all got rid of, and a large quantity in Belounjah and Japla has also been disposed of. The following exhibits the disposal of rice during the fortnight under review.

	Mds.	Srs.	Chs.

Condition of storage houses.—These are all in good order

E.—Advances to private parties and their results.

The Bisrampore Jagirdar, Babu Latchmi Baksh Rai, has refunded the unexpended portion of his advance.

Advances to private parties for land improvements.—The circle officer in charge of this work is now employed in preparing his final report, and I expect to receive it in a day or two, when, by order of the Commissioner, he will proceed to Ranchi. Some few inquiries as to work done remain, these will be made by the Sub-Deputy Collector.

F.—Charitable relief.

The following exhibits the amounts subscribed and realized during the fortnight :—

Subscribed.	Rs.	A	P.
Amount subscribed up to preceding fortnight	8,139	12	0
During the fortnight	59	0	0
Total ...	8,198	12	0

Realized.	Rs.	A	P.
Realized up to preceding fortnight	6,741	12	0
During fortnight	119	0	0
Total	6,860	12	0

and the expenditure for the half month ending 30th June—

Total ...	193	4	4

The average number of persons relieved were—

Under heading B	284·73
" " C	84·61
" " D	...
Total	369·34

During my recent visit to Hosainabad, the committee brought to my notice that some of the respectable Mahomedans in receipt of relief were almost destitute of clothing ; I saw

some of the men and they were in rags; I directed the committee to give them a suit of clothing each; some few of them who are possessed of a little landed property are, I believe, about to apply for small loans to enable them to live decently till they can collect their rents at the time of the Dassahara; as they promise good security the loans may be safely given.

G.—FINANCIAL RESULTS OF THE FORTNIGHT.

Daltongunge,
The 18th July 1874.

L R FORBES,
Offg. Asst. Commissioner.

No. 1668, dated Purulia, the 22nd July 1874.

From—Colonel E. A. Rowlatt, Deputy Commissioner of Manbhoom,

To—Colonel E. T. Dalton, C.S.I., Commissioner of Chota Nagpore.

In continuation of my demi-official letter of yesterday, I regret to have to report that for the last 8 days no rain whatever has fallen in this part of the district, whilst for the weeks ending the 11th and 18th, only 0·50 and 1·14 fell, the consequence of which is that the crops on the high lands, consisting of gora, gondli, kodo, Indian corn, and pulses (biri and mung), are now suffering from want of moisture, and are beginning to dry up and wither away; the gora has apparently suffered the most, and the others in a less degree, the most serious effect of the drought, however, is that the seedling (called afar in this district) has, where sown on high land, partially withered and dried, and on the lower lands, is becoming so tall as to be a good deal injured for transplanting, as when too old it does not form itself into bunches of 7 or 8 stems, but shoots up singly; the produce of grain from which is very small. Should rain fall within a day or two, not very much damage will have been done, but on the contrary, should there be none for the next week or ten days, the most serious consequences will result, I therefore report the matter at once, as I consider the state of the country to be very critical, and present prospects very gloomy. The best reports come from the northern part of the district, but those from the central and south east are alarming, the large pergunnahs of Burrabhoom, Patkum, and Bagmundi do not yet appear to have suffered.

2. Rice which was selling in Purulia at 14 seers per rupee a fortnight ago, is now at 11 seers, with every prospect of a further rise in price taking place if rain does not fall.

No. 1742, dated Purulia, the 31st July 1874.

From—Colonel E. A. Rowlatt, Deputy Commissioner of Manbhoom,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

With reference to paragraph 3 of Government circular No. 154—S.R., dated the 16th January 1874, I have the honor to submit my fortnightly narrative up to the 25th instant.

A.—State of the Country.

During the past fortnight, owing to the want of rain, the prospects of the crops, which were so good up to the end of the previous fortnight, have become very seriously imperilled. Only 1·25 inches of rain fell at Purulia between the 11th and 24th instant, and during most of this time a scorching hot sun shone out, which withered and dried up the crops to a most alarming degree. The early rice (gora) and Indian corn suffered the most, but the gundli, kodo, and pulses were all injured to a certain extent. The seedling paddy was also beginning to die out, and had this kind of weather continued another week or ten days, all would have been lost; but happily rain began to fall again on Saturday, the 25th, and continued on Sunday, during which two days 1·58 inches fell, which for the present had saved the crops on the high lands, and will prevent any further destruction of the seedling paddy taking place; but there has only been rain enough to admit of the very lowest lands being planted out, and more is still urgently required. From Manbazar the Relief Officer writes: "The distress is much greater than in June; there is no work to speak of being done in the fields, and altogether matters are looking very black." In the Govindpore and Roghoonathpore circles more rain had fallen and less damage has been done by the drought than further south, but even there the effects of the dry wheather were beginning to be felt. Mr. Gupta, the Relief Officer of the Roghoonathpore eastern circle, reports: "The want of rain during the greater part of the past fortnight threatened serious injury to the early crops, but I am glad to report that the showers which have set in since the day before yesterday have removed all cause of apprehension for the present, and as the sky still continues cloudy more rain is expected. The temporary drought rendered cultivation very slack; the ploughing of land and the transplanting of paddy were brought to a standstill, and the demand for labor in the fields became very much less: the inevitable consequence of this was, that large numbers of laborers who had left the relief works for the fields migrated back to our tanks and roads in spite of the very hard terms offered them." The district has, I may say, but just escaped a far worse famine than that it has just passed through. The crops will not be full ones, but should the weather now continue favorable to the close of the season, ample grain will be secured to provide for all the wants of the people, with probably something to spare.

The public health is good. Cholera has now quite disappeared, and small-pox is diminishing, and no other forms of disease are at all prevalent.

It is very satisfactory to be able to report that no grain robberies, or other crimes due to the scarcity and high prices of food which have prevailed, have taken place. The country is, in fact, remarkably peaceable and crime is less rife than usual, which can only be attributed to the complete and all-sufficient amount of relief which has been afforded to the people by the employment afforded them on the roads and tanks, and the distribution of rice by the group officers and sub-committees.

The usual table showing the price of rice and pulses, as given by the police up to the 25th instant, and those of the previous fortnight, is given below :—

Name of Bazars.	Coarse Rice.		Fine Rice.		Pulses.	
	Last report.	Present report.	Last report.	Present report.	Last report.	Present report.
	Srs.	Srs.	Srs.	Srs.	Srs.	Srs.
Raipore	16½	14	15½	12	12	12
Manbazar	12½	12	11	11	10	10
Burrabazar	14	13	11	12	11	11
Echagurh	18	18	16	16	12	12
Jhalda	14	13	13	12	11	11
Purulia	14	14	12	12	12	12
Govindpore	13	13	12	12	11	11
Roghoonathpore	13	13	11	11	11	11
Nirsha	12½	12	11	11	10	11
Gourandih	12	12	11½	11	10	11

It appears from the above that prices have risen in 5 out of 10 of the places named, which, there is no doubt, was caused by the paucity of rain which fell during the past fortnight, as this induced those who have only small stocks in hand to withhold them from the markets for their own consumption, and those who have larger, in hopes that prices would rise still higher; in Purulia the price of coarse rice rose to 11 seers per rupee on the 23rd instant, but fell again on the 25th to 14 seers per rupee.

Exportation to Ranigunge still goes on, but only on a small scale.

B.—Relief Works.

Owing to the want of rain and the consequent stoppage of field-work, the number of people who were still seeking employment on the relief works was large; many of those who had left the relief works again returned to them, as work in the fields had ceased to be procurable; on some of the roads, notably that opened out as a relief work from Manbazar to Rughunathpur, there was no diminution of laborers on account of the change in payment from pice to rice. On the Jhalda and Chandil road, however, the people all struck work early in the fortnight, and subsequently those on the Purulia and Chass road have all left it, so that the work on these two roads is now closed. The number of roads being constructed as relief works is therefore now reduced to 16, and during the ensuing fortnight it is probable that some others will have to be discontinued, as now that rain has again come on, work will no doubt be procurable in the fields. This, however, will only last for about a month, after which, that is, from the beginning of September to December, work will again be required to enable the laboring classes to support themselves, until the great harvest time comes round.

The average number of persons employed on the roads during the fortnight under report was 5,285 against 6,382 during the previous fortnight, showing a decrease of 1,097.

The number of minor relief works carried on by the Relief Officers is entered in the margin. They now number 52, which is 7 less than were under construction during the past fortnight. The numbers employed on them have increased by 16 only, and on an average amounted to 3,227 persons daily, of whom 1,456 were men, 1,303 women, and 468 children.

Name of Circle.	No. of tanks.	No. of laborers.
Govindpore Circle... ..	9	480
Roghoonathpore West Circle.	5	206
Ditto East do.	16	1,529
Purulia Circle	20	748
Manbazar	2	264
Total ..	52	3,227

The laborers were all entirely paid in grain, the money wage being converted into grain at the rate of 12 seers per rupee, clean rice. At this rate a man working on daily wages of 1 anna 6 pie per diem could only make 1 seer 2 chitacks, a women getting 1 anna, 12 chitacks, and a child on 9 pie, 9 chittacks, this being found insufficient to live upon; one-half employed on these works have taken to piece-work by which they can, by working hard, of course make much more, and according to the returns it is now found that out of the total number of persons working on these tanks, 1,601 were doing task-work, and 1,626 taking daily pay. This effect is certainly a desirable one; it teaches the people the advantage of industry—a lesson they very much require;—and instead of idling away their time on a daily wage, now give a good day's work for what they are able to earn.

The quantity of grain expended during the fortnight in payment to laborers on these tanks amounted to 1,042 maunds 26 seers 13¼ chittacks in the Purulia and two Roghoonathpore circles. The returns from Govindpore and Manbazar do not show what has been expended.

C.—Transport of Government Grain.

The transport of the whole allotment of Government grain, with the exception of about 3,000 maunds for the Manbazar circle, was completed during the fortnight. Each of the

other four circles had received its full quantity, but the previous allotment of 2,10,000 maunds was found to be insufficient, and 30,000 maunds more were therefore applied for, which have been ordered, and which is now on its way to Burrakur by rail, and by cart to Roghoonathpore, half being required there and half at Purulia; it is expected that the transport of the whole of this quantity will be completed in fifteen or twenty days.

The Relief Officer of the Govindpore circle having reported that he would probably have a small surplus of grain, he has been directed, in communication with the Relief Officer of the Western Roghoonathpore circle, to transfer 3,000 maunds to Mahal, which is now being done; from Mahal this grain will be conveyed to Arta, in Pergunnah Khaspel, belonging to the Purulia circle, by the Assistant Relief Officer there, where it is urgently required, for loaning out to the ryots in that direction, to enable them to go on with their cultivation.

The distance from Burrakur to Arta *viâ* Govindpore is about the same as by Roghoonathpore and Purulia, by which the grain to Arta had previously been sent, so that no extra carriage has to be paid for by the means which have been adopted of adjusting the supply as required in each circle.

D.—Storage of Government Grain.

The total quantity of Government grain received and stored in the five circles into which this district has been divided is given below:—

	Mds.	S.	C.
Govindpore circle ...	68,182	5	10
Roghoonathpore, west circle ...	46,621	36	4
Ditto east „ ...	44,767	33	14
Purulia circle ...	28,106	10	0
Manbazar „ ...	18,272	26	5

The Manbazar circle had therefore to receive 2,727-13-11 maunds to complete the allotment of 21,000 maunds, which is all fully required; of that which has reached, 1,000 maunds was sent to Raipore in that circle from Bankoora.

E.—Advances to Private Parties, and their Results.

No further advances had been made during the last fortnight.

The loaning out of the Government grain to cultivators and others on security, and the quantity given to the chowkidars and paid to tabedars employed on relief duty up to the 25th July, was as follows:—

	Mds.	S.	C.
To cultivators—			
In the Govindpore circle ...	46,365	8	0
„ Roghoonathpore, west circle ...	29,049	3	0
„ „ east „ ...	34,796	20	0
„ Purulia circle ...	20,619	22	0
„ Manbazar „ ...	11,944	31	10
Total ...	1,42,775	4	10
To non-cultivators—			
In the Govindpore circle ...	308	11	14
„ Roghoonathpore, west circle ...	628	28	0
„ „ east „ ...	526	0	0
„ Purulia circle ...	87	0	0
„ Manbazar „ ...	Nil.		
Total ...	1,549	39	14
To Chawkidars—			
In the Govindpore circle ...	284	0	8
„ Roghoonathpore, west circle ...	260	20	0
„ „ east „ ...	316	0	0
„ Purulia circle ...	255	8	0
„ Manbazar „ ...	81	20	0
Total ...	1,197	8	8
To tabedars whilst employed on relief duty ...	194	10	0

In most of the circles the cultivators are applying eagerly for further advances of Government rice to enable them to get the seedling rice transplanted out into the fields. Owing to the late long drought this important operation has been unusually delayed, and it is therefore necessary that no time should be lost in carrying it out, which the additional allotment of 30,000 maunds of Government rice, will, I hope, enable them to do, and thereby give employment also to the laboring classes, who look to this work to enable them to purchase clothes for themselves and their families, and pay off any debts they may have contracted during the previous months.

F. (*a*)—Charitable Relief by Government.

There has been no actual change in the number of groups since last report, into which the distressed pergunnahs have been divided, which number, correctly, 235 instead of 241 as entered in the last narrative. In the margin the number of persons receiving uncooked rice from the group officers during the past fortnight is given for each of the 5 circles, and amounts altogether to 10,706, and the quantity of grain expended to 1,587 maunds 20 seers 8 chittacks. The numbers relieved are not quite correct, as reports from several of the group officers had not been received by the Relief Officers up to the date of their making up their returns. Compared with the returns for the last fortnight, there has really been a decrease, though what this decrease has actually amounted to cannot accurately be given, as the figures from Manbazar are incorrect, and the remaining 15 groups in the Roghoonathpore west circle have only since the date of

Govindpore circle ...	1,855
Roghoonathpore west circle ...	1,885
Ditto east circle ...	2,465
Purulia circle	2,545
Manbazar „ ...	1,956
Total ...	10,706

the previous report, taken over the distribution of uncooked food from the sub-committees. The people supported in the several groups are, I may say, all of them quite unable to earn their own livelihood, and until their relatives and others, who usually contribute to their support, are able to do so again, they must continue to be provided for by the group officers. A large number are children, whose parents are barely able to support themselves. The Relief Officers are, however, quite alive to the necessity of reducing the numbers as much as possible, and are gradually weeding out all those who have now become strong enough to labor for their own maintenance.

Govindpore circle ...	52
Roghoonathpore, eastern circle	19
Purulia circle	775
Total ...	846

In the three circles in which there have been no changes, and the returns have been received correct, there has been a decrease in the numbers supported in their groups, as per margin, amounting in all to 846.

F.—(*b*) Charitable Relief by Relief Committees.

The Relief Committees having now been entirely relieved by the group officers of issuing uncooked food to those who are unable to work, the relief now dispensed by them consists of providing cooked food at the poor-houses, and relief in other forms to such persons as are classified under *c* and *d* in the returns prescribed by the Central Committee.

Classified as directed, the sums expended during the fortnight, according to the returns submitted up to the 25th July, are as follows:—

	B. Rs. A. P.	C. Rs. A. P.	D. Rs. A. P.
In the Govindpore circle ...	603 5 3	.....	.....
„ Roghoonathpore, west circle	199 5 9	19 5 0	14 0 6
„ Ditto east „	382 0 0	57 6 9½	.....
„ Purulia circle	338 1 9	575 2 0	61 12 6
„ Manbazar „	151 4 0	195 1 3	271 7 0
Total ...	1,674 1 9	846 15 0½	347 4 0

The numbers receiving relief according to the above classification during the fortnight under report amounted to—

	B.	C.	D.
In the Govindpore circle ...	527	.....	...
„ Roghoonathpore, west circle	909	633	30
„ Ditto east „	1,341	143	...
„ Purulia circle	642	232	119
„ Manbazar „	260	86	586
Total ...	3,679	1,094	735

From the above and the returns of the number of persons being provided for by the group officers, it appears that there are 14,385 persons being supported in this district who are totally unable to provide for themselves. There can, I think, be no doubt but that there are at least 20,000 persons in this district who are permanently incapable of supporting themselves, and therefore have to live on the charity of others; it is a large number, and amounts to about 2 per cent. on the total population, and is, I believe, a larger percentage of destitution than is to be met with in most other districts.

G.—Financial Results.

	R. As. P.
Total expenditure from the district and sub-divisional treasuries as shown in the last narrative Rs.	2,36,229 7 11

PURULIA,
The 31st July 1874.

E. A. ROWLATT, *Colonel,*
Deputy Commissioner, Manbhoom.

No. 42M.A., dated Calcutta, the 28th July 1874.

From—LORD H. ULICK BROWNE, Commissioner of the Presidency Division,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

IN continuation of my No. 38M.A., dated 15th July 1874, submitting the fortnightly narrative of the Collector of Nuddea for the fortnight ending 13th July 1874, I have now the honor to submit the Collector's report* for the fortnight ending 25th July 1874.

* No. 846—S.R., dated 27th July 1874.

2. The rain which is still falling will do much good over the whole division, and I expect the aous rice crop to be a very good one. If the rain continues a little longer, which seems likely, there will be enough for transplanting the amun.

No. 846—S.R., dated Kishnaghur, the 27th July 1874.

From—C. C. STEVENS, ESQ., Collector of Nuddea,

To—The Commissioner of the Presidency Division.

I HAVE the honor to submit my narrative of scarcity and relief for the fortnight ending Saturday, the 25th July 1874.

2. The bazars have generally been sufficiently supplied with food-grains to meet the local wants. The insufficiency of the stock in thanas Kaligunge and Nakasiparah has been made up by the importation of Government rice. The stock of food-grains in certain portions of thanas Karimpore and Tehatta, in sub-division Meherpore, and in thana Jaguli, in sub-division Ranaghât, is reported to be low; but I expect that, with moderately favorable weather for the coming crops, it will be all either lent or thrown into the market without reserve. This, with the aid of importations by private traders, will prove sufficient for the localities till the *aous* crop is gathered.

The subjoined statement shows the kinds and prices of grain selling at some of the principal marts of the district :—

	Common rice per maund.											
	Rs.	As.	P.	Rs.	As.	P.		Rs.	As.	P.	Rs	As.	P.
Kishnaghur	2	12	0	to	2	14	0						
Santipore	2	14	0										
Ranaghât	2	12	0										
Chogda	2	12	0										
Kooshtea	2	12	0	to	2	14	0						

	Common rice per maund.											
	Rs.	As.	P.	Rs	As.	P.		Rs	As.	P.	Rs	As.	P.
Comercolly	2	12	0	to	2	14	0						
Chooadangah	2	12	0										
Bongong	2	10	0										
Alumdanga	2	12	0										
Jeebannaggur	2	8	0										

3. The price of rice during the fortnight under notice shows a little downward tendency. The fall would doubtless have been greater had it not been for the drought. Now that the rain has fallen, holders of rice will be more ready to part with their stock, and lower prices may be anticipated.

4. No additional information has been received regarding the actual stock in hand, so that I have nothing to add to what I said in my last narrative.

5. *State of the Crops.*—Nearly all the joldhan, bhuro, and china, have been harvested, and a fair yield secured. I regret to report that the want of rain has done some damage to *aous* paddy, which had been previously so promising. The prospects of the *amun* crop had also become very gloomy. But very little transplanting has taken place, and the young seedlings are said to have dried up in places. In Kooshtea the *aous* crop has sustained damage by the unusual rise in the rivers. The sub-divisional officer of Kooshtea reports that he has not been able to ascertain the extent of the damage done; but it is satisfactory, he says, to find that the river is falling once more. The drought now seems to have come to an end. Rain is known to have fallen in several parts of the district, and from the state of the weather for the last two or three days it seems probable that the rain has been general. On Saturday it rained here (at Kishnaghur) for four or five hours, and more rain still may be expected. We have now good grounds for hoping that, though the *amun* crop has been thrown back, no very serious damage has been done to the *aous*. The indigo is being manufactured, and promises a good outturn. Jute is doing very well; sugarcane and chillies are being transplanted.

6. Though the drought has produced great anxiety, I do not think that upon the whole distress has increased. No special cases of misery or actual starvation have yet been brought to light. Seven grain-thefts have been reported by the police during the fortnight; the total value of the grain stolen being Rs. 26-8. There is no doubt a certain amount of pressure felt all over the district, but not enough, to the best of my judgment, to require relief at the hands of Government.

7. No marked decrease in excisable articles is observable, but I have no doubt that the high price of food-grains has had some effect in diminishing consumption.

8. All classes of people expect that the pressure which they feel will cease in about a month more, when the growing aous crop has been harvested. I do not think it likely that any tracts in the district will need relief measures, except those in which such work has been already undertaken; but all means in our power are being used to watch the state of the country.

9. The steps which the sub-divisional officer of Meherpore has taken to alleviate the distress in certain portions of thanas Karimpore, Tehatta, and Ganee, have proved adequate. The aspect of affairs there has improved, and no fresh measures will be necessary. I apprehend nothing serious in those parts of Bongong where it was reported that distress to some extent prevailed. Since my return from a visit to Debogram, and some of the distressed tracts in the neighbourhood, everything has been going on satisfactorily. Mr. Dutt, in whose energy I have much confidence, has now immediate charge of relief operations. Cooked instead of uncooked rice is now being distributed at Debogram to all persons requiring relief who live within a circuit of two miles, and a necessary consequence has been that candidates for gratuitous relief have greatly decreased in number. In order, however, to provide for the cases of respectable persons, Mr. Dutt has arranged that they shall receive their relief apart. This he has been enabled to do by the help of Baboo Bamundass Mookerjee, who has kindly permitted the distribution to be made at his house: the recipients are content with this.

10. In the distressed tracts, roads (chiefly village roads) and embankments are being resorted to by increased numbers. The numbers may be expected to continue to grow till the reaping of the *aous* and the transplanting of the amun have fairly begun. The number of persons employed at present may be estimated at 3,000 per diem.

11. Traffic has increased in sub-divisions Ranaghat, Kooshtea, and Sudder, owing to the rise of water in the several rivers.

12. As previously reported, the distribution of charitable relief is going on both in the Debogram and Mooragatcha circles. In addition to the 5,000 maunds of rice already received from Government for charitable relief, a further supply of 2,000 maunds for general purposes has been sanctioned, and I hope by this time has reached Kaligunge. This supply I hope will be quite sufficient to carry the people of the distressed tracts through till the coming *aous* crop is harvested.

No. 540, dated Julpigoree, the 3rd August 1874.

From—CAPTAIN R. C. MONEY, Deputy Commissioner, Julpigoree,

To—The Offg. Secy. to the Government of Bengal, Scarcity and Relief Dept.

I HAVE the honor to submit herewith my fortnightly narrative report from 15th to 28th of July 1874.

Special Narrative of Julpigoree District for fortnight ending 28th July.

A.—STATE OF THE COUNTRY.

There has been no great change to report this fortnight, but what change there is, is indicative of the steadily improving condition of the people.

2. Cutting of bhadoi has commenced, and this crop is now coming into the market, though not as yet in sufficient quantities to affect the rates.

3. Taking the same hâts as I mentioned in my last fortnightly, the following table will show that in north and south the prices are gradually falling. The rates given are the quantity obtainable per 1 Re. in seer of 80 sicca weight :—

Name of place.	13th July.	28th July.
	Srs.	Srs.
North of District.		
Julpigoree	10½	12
Titalya	11	11
Siiligooree	10	10
Sannyasikata	9	10
South of District.		
Mulkadoho	14	14
Sonahar	10½	12½
Chengti	14	14
Chuckla Boda	12½	13
Debigunge	10	14

4. The bhadoi will not be regularly in the market for another fortnight.

5. Though not belonging to this fortnight, I must notice with regret that we are now having too little rain. I write on the 1st August. We have now for 8 days not had a full half inch of rain. So far this has done no harm, but it now begins to delay hymanti transplanting, and a continuance of this weather would most seriously affect the whole hymanti crop.

6. The jute crop does not now promise as well as it did; the rain which has been so beneficial to the dhan has been too much for the jute, and a comparatively poor crop may now be looked for.

7. Physical condition of the people is every where good; cholera has ceased in Patgram, and health of people all over the district is very good.

RELIEF WORKS.

8. There is a slight numerical decrease only in the number employed daily this fortnight as compared with the fortnight before; there being 2,370 at work on the latest reported date of this fortnight to 2,478 of the week before.

9. The following table will, however, shew that there has been a very considerable decrease in the number of men on the works, and that it is the increased number of women and children which counterbalance this :—

	Last fortnight.	This fortnight.	Decrease.	Increase.	Total decrease.
Men	1,740	1,038	672	.....	.....
Women	431	675	.....	264	.....
Children	337	637	.....	300	.....
Total ...	2,478	2,370	672	564	108

10. It would seem that the men who left the works for field labor had sent in their place women and children, and this is very probable, as until the bhadoi is well in there will be a class who can only obtain rice by work; a few days now should alter this, as daily the bhadoi is ripening and being cut.

Relief Work Table.

Month and date.	Name of work.	No. of people employed.			Total.

	Total	1,038	695	637	2,370

Transport of Grain.

11. Barring the removal of rice from one gola where not needed, to another where needed, transport is closed.

Storage of Grain.

12. The following table shows in the south a very small decrease in sales to the public, but a great decrease in the total of grain disposed of during the fortnight as compared with last. Thus the total disposed of this fortnight has been 10,451 maunds to 15,290 maunds of last. This is significant of the gradual self-closing of all our methods of relief.

13. The end of the fortnight finds us with only 32,032 maunds in stock, both in north and south ; of this, judging by what we have seen of short weight, 6,000 may at least be put down to wastage, and the balance is little more than it will be well to keep in hand as a reserve for possible wants in October and November.

14. I am about to order wholesale sale of rice to be stopped, also to limit the retail sales, and have recommended that no more advances be made to ryots in Boda.

Gola Table.

Golas in Boda.

No.	Name of gola.	Stock in hand.	Sold to those on works.	Charitable relief.	Sold to public.	Loans to tenants.	Total expenditure.	Balance in hand.

Advances to Private Persons.

15. The amount advanced to ryots by the manager of Chucklajat is only 2,912 maunds this fortnight to 6,686 maunds last. This is owing to the fact that the ryots no longer feel the pressing need for those advances, and do not therefore come forward for them as before. This branch of relief will shortly be closed.

Charitable Relief.

16. I regret, owing to the neglect of Mr Jones, relief superintendent, who has not submitted his returns, I can only give returns of a few of our Boda relief committees. This is the second return running which I have had to send in without returns from these committees owing to this officer neglecting to supply them.

Relief Committees.

No.	Names of places where committees have been established.	Latest date of return.	Description of paupers relieved.			Total.	Remarks.
			Men.	Women.	Children.

10	Bhojonpore	Ditto ...	.....	.....	.....	.....	Not received.
	Total ...	.....	184	300	233	717	

17. This shows a decrease of 555 on the total of last week. The charitable relief we give is small, and I believe that as the people begin to cut their own crops, the number of applicants for it will rapidly decrease.

18. In fact everything now indicates that the time for closing our relief works has just arrived. One road I have closed this fortnight, and in my report for the fortnight now passing, I shall be able to report the closing of several others.

19. We have tided the people over their time of distress, during which they have been well fed and supported either by advances, sales, or work, and with the new bhadoi crop, they should all be in a position to provide for themselves once more without help.

ADMINISTRATION REPORT OF THE CALCUTTA MUNICIPALITY FOR 1873.

RESOLUTION.

JUDICIAL DEPARTMENT.

MUNICIPAL.

Calcutta, the 5th August 1874.

READ again—

The Administration Report of the Calcutta Municipality for the year 1872.

Read—

The Administration Report of the Calcutta Municipality for the year 1873.

RESOLUTION.—The Lieutenant-Governor observes that Mr. Stuart Hogg, Chairman of the Justices of Calcutta, was absent on leave for nearly ten months of the year 1873, and was therefore unable to record any personal experiences of the subjects under report. The thanks of Government are, however, due to Mr. S. Hogg for a [illegible]r, able, and suggestive report compiled from information derived from the [illegible]s of the office, as well as for his vigorous and efficient administration [illegible] affairs of the Calcutta Municipality since his return from leave.

2. In more than one passage it is remarked that the Justices are, as a body, taking a more active interest and part in the control and executive management of the town of Calcutta, especially in details connected with financial arrangements. The Lieutenant-Governor considers this a healthy sign, and will be glad to hear of the further development of this feature of the administration.

3. The great progress made in the drainage works, so that nearly 56 miles of sewers have been completed out of a total of 112½ miles, is a matter for sincere congratulation to all inhabitants of the town. It is very important that all the main drains should be completed, as expected, before the close of the cold season of 1875, and it is to be hoped that the residents in the northern division will have applied by that time for the extension of the drainage scheme. The Lieutenant-Governor can, from personal observation, fully corroborate the statement that the improvement effected by the thorough drainage of a considerable area round the Medical College Hospital is very great. He has noticed the opinion formed by competent persons in favour of departmental over contract work in drainage matters.

4. The connection of 1,286 houses during the past year with the water-supply works, bringing the total number up to 7,160, is satisfactory. With respect to the increasing demand for filtered water, and the schemes under discussion for the supply of the additional water required, the Lieutenant-Governor would be willing to consider the feasibility of doubling the water-supply at Pultah and providing a second main from Pultah to Tallah But as this measure would necessitate a large outlay of money, His Honor would not be disposed to sanction it before other alternative schemes have been thoroughly investigated, and until the bearing of the project upon the finances of the municipality shall have been examined.

5. The roads have been allowed to be opened to make 1,562 water-supply and 1,130 drainage connections, and in 920 different places for repairing or laying down gas-pipes. This work was supervised by the Road Department. These facts are accepted by the Lieutenant-Governor as encouraging.

6. Conservancy must always be a difficult, expensive, and harassing branch of the administration of a large town. The Lieutenant-Governor believes that the Health Officer, with his staff of overseers, has the subject thoroughly at heart, and is indefatigable in his supervision. He desires, however, that caution may be exercised in the institution of petty prosecutions, lest they be turned into an engine of oppression. He fully concurs in the opinion held by the Chairman in common with many members of the corporation, that petty prosecutions are of small avail, and that the proper system is to inflict adequate fines on refractory persons only. His Honor will hear with much pleasure that some of the Justices are willing to accept the general supervision of sections of the town and dispose of conservancy cases within that area.

7. The subject of the *bustees*, or native villages, in the town, is one that should specially commend itself to the numerous wealthy native gentlemen residing in Calcutta. The idea of forming *model* villages out of them is an excellent one, though the work, under this name, scarcely comes within the legitimate functions of the Municipality. Sir R. Temple desires that the subject may be pressed on the attention of leaders of the native community.

8. The remarks made in the concluding portion of paragraph 93 of the Chairman's report, regarding the construction of cheap urinals, are very important to the well-being of the crowded parts of the town. He should give this matter his early consideration.

9. The Lieutenant-Governor deems it satisfactory that six new markets were licensed during the year. He cordially thanks the Maharajah of Burdwan and Baboo Damoodar Doss Burmun for the extensive improvements carried out by them in the Postah Bazar and in Choonee Beebee's Postah in Durmahatta street respectively. He trusts that their excellent example will be extensively followed.

10. Although the promoters of the proposed Company for the reclamation of the Salt-water Lake were unable to carry out their schemes, notwithstanding the concessions they obtained from the Justices, the Lieutenant-Governor is of opinion that this very important object should be borne in mind; and he would wish to hear what the Justices now propose to do with the property, which is again thrown on their hands by the inability of a lessee to carry out his part of an agreement. The municipal line from the town to the Salt-water Lake His Honor believes to be an excellent work.

11. The Lieutenant-Governor has perused with regret the account of the failure of the Municipal Tramway as explained by the Chairman, but observes that this need not prevent Government from reconsidering the best means of introducing tramways on an improved and more comprehensive plan. Meanwhile certain preliminary steps have been taken before proceeding further with the negotiations with Mr. Macallister, who was prepared to accept on certain conditions the franchise for laying a tramway through the thoroughfares.

12. The Lieutenant-Governor thinks that the sum—upwards of Rs. 20,000—expended by the Justices in order to convert the Sealdah market building into a suitable pauper hospital was well spent, as it is a capital building for the purpose. He understands that "The Campbell Medical School and Hospital" at Sealdah are working well under Dr. Woodford's supervision.

13. His Honor would be glad to hear what prospect there is of an organ being obtained for the Town Hall. He has heard complaints from time to time of the dimness of the gas lamps in the town, and desires that the Chairman will report whether the lighting has recently been giving more satisfaction.

14. It is important that the working of the Jute Act should be carefully watched, and convictions obtained, if possible, for wilful infringement of its provisions.

15. The revision of the assessment of the town by Mr. Rowe appears to have been effected with tact, equity, and considerateness, and to have proved satisfactory even to the rate-payers. His merits, as a valuable officer to the corporation, are fully acknowledged by the Government of Bengal.

16. The Lieutenant-Governor cannot close this report without placing on record his high appreciation of the valuable and lasting services rendered to the corporation and residents of Calcutta by Mr. W. Clark, late Engineer to the Municipality, whose name will be ever honorably remembered in connection with the great schemes for water-supply and drainage of the town.

ORDER.—Ordered that a copy of the above Resolution be forwarded to the Chairman of the Justices of Calcutta for information and guidance.

Ordered also that the above Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

RIVERS THOMPSON,

Secretary to the Government of Bengal.

ADMINISTRATION REPORT OF THE HOWRAH MUNICIPALITY FOR THE YEAR 1873-74.

RESOLUTION.

MUNICIPAL.

Calcutta, the 11*th August* 1874.

READ—

The Administration Report of the Howrah Municipality for the year 1873-74.

Read again—

The Annual Report for 1872 73.

RESOLUTION.—*Income.*—The total income of the Municipality amounted to Rs. 1,67,456-2-4, as compared with Rs. 1,49,182-0-5 in the previous year. This increase is due partly to the imposition for the first time in the past year of a lighting rate, which produced for the part of the year for which it was levied Rs. 5,715-0-9. The collections on account of house rate were on the whole successfully realized, leaving a smaller balance than in the previous year. The question of the levy of tolls in the Municipality is the subject of a separate correspondence which is still pending. There has been a slight diminution of the receipts under this head, due, it is said, to the correction of an abuse which existed in the levy of toll on carts, &c., plying only within the town. The receipts on account of fines were Rs. 6,274-8-6, against Rs. 3,736-0-6 in the previous year. It is explained, however, that the fines imposed by the Municipal Commissioners were actually less than in the previous year, the excess arising from receipts from the Magistrate, of fines levied by him under Act XXI of 1857. The question whether the fines under this Act, which were credited to Government from 1869 to April 1873, should be placed to the credit of the Municipality, will be further considered on receipt of the Commissioners' application. A sum of Rs. 6,939-8-9, the surplus receipts under the Jute Warehouse Act, have been placed to the credit of the Municipality. It is explained that a separate account of this is kept, so that the fund cannot be encroached upon for general purposes, and the manner of the application of these funds will be disposed of on the receipt of further information which has been called for from the Municipality. The introduction of a new scale of fees for licenses to carry on obnoxious trades, in place of the objectionable uniform rate of Rs. 25 formerly charged, has resulted in no loss to the town, the receipts under this head showing some increase.

Expenditure.—The total expenditure of the Municipality was Rs. 1,51,188. One of the heaviest charges, that of lighting, will in future be met by the special rate under Act V (B.C.) of 1873. On the roads, was spent Rs. 21,628-3-6. The report, paragraph 62, would seem to show that the results attained were not commensurate with the outlay, seeing that the improvements effected extended only to 4½ miles out of 58 miles of roadway in the municipality. The rates at which the brick-metalling of the roads was executed appear extravagantly high, and the matter deserves the attention of the Commissioners. The expenditure on conservancy amounted to Rs. 28,941, a proportion of which would seem to be properly debitable to the head of roads; the repair of cutcha-roads and of the margins of pucca-roads being executed by the Conservancy Department. The increasing strictness with which the conservancy rules as to the disposal of night-soil are enforced is satisfactory. The practice, however, of disposing of the sweepings of the streets in tanks and hollows within the town is objectionable and should be discontinued. The cost of the Police, so far as it was a charge on the Municipality, was Rs. 30,392, or somewhat less than the estimate. The miscellaneous expenditure is put down at Rs. 13,715-13-2. Of this, however, Rs. 6,277-1-3, which is debitable to the drainage works, should appear under the head of Local Improvements. So far as the works have been executed, the result appears to have been satisfactory. The next yearly account should show clearly an increased expenditure on them, the means having been provided by the Government loan.

Mortuary Returns.—The improvement in the method of collecting these statistics is satisfactory. The result is to show a death-rate of 30 per mille, which is a heavy rate of mortality, attributable in great part to the prevalence of fever and cholera. The Lieutenant-Governor would wish to know whether all deaths in the Howrah Hospital are taken into this account.

The thanks of Government are due to Messrs. S. H. Robinson, R. Pearce, and Dr. R. N. Burgess, and to Baboos Kedar Nath Bhuttacharjea, Tara Prosunno Mookerjea, Raj Mohun Bose, Nundo Gopal Chunder, and Gour Dass Bysack, for the attention they have given to Municipal business and the disposal of cases tried under the Municipal Act. Baboo Raj Mohun Bose has been particularly conspicuous for the number of municipal cases which he tried, and Messrs. Reily and Kiernander also took a large share of this work. There seems no just ground for complaint on the score of the severity of penalties imposed. The Lieutenant-Governor notices the favorable mention which is made of Mr. Donnithorne, the Secretary, for his thorough knowledge of his duties and the zeal with which he discharges them. His attention should be drawn by the Commissioners to the not unfrequent recurrence of frauds in the Account Department, and the special necessity for its careful supervision. His Honor would wish to know whether any steps were taken to prosecute the Accountant and his Assistant for their criminal proceedings.

ORDER.—Ordered that a copy of the above Resolution be forwarded to the Commissioner of Burdwan for information and for communication to the Municipal Commissioners of Howrah.

Ordered also that it be published in the *Calcutta Gazette.*

By order of the Lieutenant-Governor of Bengal,

RIVERS THOMPSON,
Secretary to the Govt. of Bengal.

STATEMENT OF THE BURDWAN MAHARAJAH'S RELIEF OPERATIONS FOR THE FORTNIGHT ENDING 25TH JULY 1874.

BURDWAN.

Relief House.—The daily average of applicants for food at the annachattra at Burdwan has continued high, but a slight decrease in the number was beginning to be perceptible during the last two or three days of the fortnight. 1,450 have been daily fed, among whom there were a good number from the outlying villages, particularly those on the other side of the river Damooda. Though some of these, when they first come in, declare that they have been in great distress, there is nothing like starvation visible in their appearance.

About 100 persons are still employed on the tanks in Burdwan, but, as before stated, there is no demand for employment.

CULNA.

Relief House.—The average number receiving relief at the Culna Sudder Butea has been 630, of whom about 300 work for their food and the rest are old, infirm people, and young children. In addition to this number, about 70 respectable persons are receiving uncooked rice, and it is anticipated that this number will be considerably increased as pressure is increasing on the middle classes as the season advances.

BOOD-BOOD.

Bood-bood returns show a decrease in the number of applicants for relief at the annachattra, but severe distress is reported among the middle classes, and orders have been sent to feed all respectable persons whom the relief superintendent may certify as requiring aid. These persons will receive uncooked food in rations for five days at a time. It is anticipated that the number will be very large.

KEDMAH.

The numbers at Kedmah have increased and are daily increasing. 875 has been the daily average during the fortnight, and 105 respectable persons have received raw rice daily.

A tabulated statement is annexed.

Statement showing the Number of People relieved during the Fortnight ending 25th July 1874.

Number of people employed at different relief works—	
Rassan Bagh	44
Tara Bagh	15
Ryan Tank	40

Published for general information.

R. Knight,

Asst. Secy. to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 8th August 1874.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.				
		Western Districts.		
BURDWAN DIVISION	1	Burdwan, 10th* Aug. 1874	1·32	Rainfall at Culna 4·99, at Cutwa 1·40, at Jehanabad nil, at Raneegunge 1·17, at Bood-bood 3·12 inches. More rain wanted. Prices higher at Sudder. Public health fair. Fever as before.
	2	Bankoora, 8th " "	1·92	Rain has fallen more or less heavily in the greater part of the district, but there has been no general rain. The aous or early rice crop is a fine one, and is doing well. The prospects of the amun or late rice in the east and south are improved. The Janar or Indian-corn crop in the east is very good. Indigo is also fine. More rain is wanted, especially in the north, to complete the transplantation of the late rice. Telegraphed on the 10th. Heavy rain yesterday and to-day reported from all sides. Prospects much improved.
	3	Beerbhoom, 8th " "	3·41	Showery during the greater part of the week. The state and prospects of the crops are generally excellent; in some parts in the east of the district the crops are comparatively backward, owing to want of rain. Export by rail of week ending 1st August, 2,538 maunds, chiefly to the Bhagulpore Division. Prices stationary.
	4	Midnapore, 8th " "	2·58	Alternate showers and sunshine; very favorable everywhere, except in the north, where the rainfall continues insufficient. Indigo has suffered much in yield from the rain, but the early rice has benefitted, and transplanting of the late rice have been facilitated. The present week shows a decided improvement, but more rain is wanted in the north, and prices continue to rise all over the district.
	5	Hooghly, 8th " "	2 30	Cloudy, with occasional smart showers; east and southerly breeze. Rainfall at Serampore 6·08. Less rain in the interior than at Hooghly. Early rice and miscellaneous crops are flourishing, but the condition of the main rice crop is rapidly becoming very critical. Very heavy rain is required to save it. Little or none as yet has been transplanted.
		Howrah, 8th " "	2·31	There has been rain during the week throughout the district. Weather sometimes cloudy and sometimes clear, wind from south and east and once north varying. The rain has done much good to the crops. The ryots are preparing lands for transplanting late rice, and transplanting has commenced in some parts, but more rain is wanted throughout the district. Jute, sugarcane, and early rice are good, and have been greatly benefitted by the late rain.
		Central Districts.		
PRESIDENCY DIVISION	6	24-Pergunnahs, 10th† Aug. 1874	4 70	Warm and showery. The prospects of the aous or early rice are favorable. Transplanting of the late rice continues backward With the exception of the Sudder and Barripore Sub-divisions, there was no heavy fall of rain in the district during the week. More rain is still required, particularly in the Satkhira Sub-division. Jute being cut. Fever of an ordinary type prevailing in Satkhira, Busseerhaut, and Diamond Harbour. Malarious fever continues in Barripore. A few deaths from cholera reported from Bankipore; a few cases of small-pox from Kalaroa. The outbreak, however, appears to have subsided.
	7	Nuddea, 8th Aug. 1874	1·68	The rainfall has been very insufficient. In the distressed part of the district the early rice has been so much injured by the drought that *at the most* not more than half a crop is expected. In the rest of the district, some damage has been done, but not so much. The crops on low grounds will give good returns. The late rice crop is thrown back very much for want of rain. Prices nearly stationary.
	8	Jessore, 8th "	2 33	Generally cloudy and overcast with a south-east wind. The light showers that have fallen have done good, particularly to the early rice, and prospects are generally favorable.
RAJSHAHYE DIVISION	9	Moorshedabad, 8th Aug. 1874.	0·66	The rainfall of the week has been quite inadequate for the late rice crops in the Sudder Sub-division. The Sub-divisions of Lallbaugh and Rampore Hât have been somewhat more favored, and the heavy rain which fell on the 7th at and about Jungipore, will do a great deal of good in that sub-division. The prospects of the amun or late rice crops in the thanas of Bhurutpore, Gokurn, and parts of Kulliangunge are gloomy. There has been no improvement since the last report, and unless heavy rain falls very soon, there will, it is apprehended, be greater failure in these thanas than last year. The showers of the past week were of benefit to the aous. Prices stationary except at Goas, Jellinghee, and Nowada. At the two former places there has been a fall of 3 seers, and at Nowada a rise of one seer. In the two former hardly any winter rice is grown. In the last named, late and early rice are grown in about equal proportion.
	10	Dinagepore, 7th Aug. 1874.	2·9	Showers all over the district of varying duration. Bhadoi or early crops being cut; in many places the crop is a very good one. The transplanting of the late rice on *khear* lands nearly completed, on *polie* lands being pushed on. The weather has been on the whole favorable for both crops.

* Telegram of the 10th August, received on the same day, shows rainfall during the seven days immediately preceding.
† Report of the 10th August, received on the same day, shows rainfall during the seven days immediately preceding.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Contd.*)				
		Central Districts.—(Contd.)		
RAJSHAHYE DIVN.—(*Contd.*)	11	Maldah, 8th Aug. 1874	0·61	Cloudy and sultry with occasional rain. The prospects of the bhadoi or early crops are still very good and reaping has begun in several places. Some of this crop has been destroyed in the low lands, but less than was anticipated. Indian-corn has begun to ripen, and promises very well. The cultivation for the hymunti or winter rice is going on. The sudden fall of the Mohanunda has damaged this crop slightly, but the river is rising again. Rice is selling at head-quarters from 12 to 13-8 seers.
	12	Rajshahye, 8th " "	2·95	There has been rain generally in all parts; in many places so much as to be very beneficial. The aous or early rice is being cut; the yield is generally very good. The amun or late rice crop is growing well, but more rain is necessary, and unless it falls more plentifully than it has within the last three weeks, this crop will be very seriously affected. Jute, sugarcane, mulberry, and arhur (pulse) are all thriving. Prices have fallen almost everywhere, in the town of Beauleah considerably. In a few places there has been no change. Public health very good.
	13	Rungpore, 7th " "	0·53	Very stormy and threatening, and occasional slight falls of rain. Rain is much wanted; transplantation of the late rice is being retarded on the high lands, and some plants are withering, but in many parts there is abundant water in the fields, and active operations are in progress. There has been a good fall of rain to the north, and prospects there have much improved. Aous or early rice harvest is approaching completion, and is ample.
	14	Bogra, 8th " "	·43	There is nothing to complain of. The transplanting of the amun or late rice crop is nearly finished, and aous or early rice of unprecedented excellence, is being cut. Crops should, however, be better off if there were good heavy rain now, as the rivers and tanks have fallen very low and the fields are getting dry.
	15	Pubna, 8th " "	0·80	Slight rainfall on the 3rd and 5th, and a strong east wind blowing. The greater portion of the aous or early rice and bhura and kowni (millets) crops is cut, and they have been of much use to the people. Prospects of the late rice are good. Fever prevails.
COOCH BEHAR DIVN.	16	Darjeeling, 7th " "	4·73	A little more rain than there was last week, but still a deficiency for this time of the year. In the plains, the janera or early paddy is being reaped in some parts, but this is a very insignificant crop. The bhadoi to be reaped in about a month or three weeks, is progressing favorably. There are, however, complaints of want of rain In the hills the early maize and kowni (millet) is being reaped, and a good outturn is expected The early potatoes have come into the market, and are very fine and abundant.
	17	Julpigoree, 7th " "	3·51	Bhadoi or early crop is now being cut everywhere, and fully comes up to the expectation that it would be a first-rate crop. Heavy rain set in on the morning of the 7th, and if it continues, all apprehension as to the late rice crops will be removed. So far the late rice promises well. The rain will enable the transplanting, which has been suspended for a few days, to go on well.
		Cooch Behar, 6th " "	3·51	Hot at the beginning of the week, afterwards cool and showery. Same as last week. Very good. Jute will be less than an average crop.
		Eastern Districts.		
DACCA DIVISION.	18	Dacca, 10th* Aug. 1874	0·45	Weather hot and little rain, rivers falling fast Crops not injured as yet.
	19	Fureedpore, 8th " "	1·91	Rain on Monday and Tuesday (3rd and 4th), accompanied by strong wind, the rest of the week bright and sunny with alternations of cloudy weather. The rivers continue falling, and unless copious falls of rain occur very shortly, the late rice crop, weakened previously from rapid growth, will be seriously injured. Price of coarse rice has fallen at Fureedpore, Goalundo, Bhanga, and Gopalgunge owing, in some measure, to the aous or early rice, which is in course of being reaped, coming into the market, but it has risen at Madareepore from 16 to 12 seers per rupee, owing to the strong wind preventing boats from coming to the bazar. No sickness.
	20	Backergunge, 6th " "	2·02	Plenty of rain without, however, the weather being cloudy for any length of time and with ample sunshine. Prospects of crops good. The aous or early rice harvest has begun in places.
	21	Mymensingh, 7th " "	0·27	Three and one-fourth inches of rain in the east, and two inches in the western portion during the week. The prospects continue satisfactory throughout the eastern portion of the district as well as in the Atia Sub-division, but the want of rain in the centre and north is a serious matter, since the time for planting out seedlings is nearly past.
	22	Sylhet, 4th " "	5·	Oppressive nearly all through the week. Prospects of crops good. Aous or early crop is being cut. Sali or late rice transplanting commenced. District still a little unhealthy. Fever prevalent. The rivers have fallen a good deal.

* Telegram of the 10th August, received on the same day, shows rainfall during the seven days immediately preceding.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Concld.*)			
	Eastern Districts.—(*Contd.*)		
CHITTAGONG DIVN. 23	Chittagong, 6th Aug. 1874.	1·36	Showers daily, but no very heavy fall. 15·22 inches reported from Cox's Bazar to 3rd instant. The aous or early rice is being reaped all over the district. Transplanting of the amun or late rice is going on. Prospects generally favorable. Cholera not reported the last few days.
24	Noakholly, 6th Aug. 1874	7·74	Cloudy, rainy, and windy. The rain has done good to the crops, but more is wanted. Reaping of the aous or early rice has commenced in places.
25	Tipperah, 7th " "	2·55	Cloudy and showery; cooler than last week. The aous or early rice is being harvested, it promises to yield a good outturn. The prospects of the amun or late rice are also good up to date.
26	Chittagong Hill Tracts, 4th Aug. 1874.	2·92	Hot during the first part of the week, cool and pleasant during the latter part. Seasonable weather; the falls of rain during the week have generally improved the prospects. The early crops are now ripening in the jooms. More rain is wanted by the plough cultivators for transplantation.
	Hill Tipperah, 5th Aug. 1874.	2·38	Rainy and cloudy during the latter part of the week. Reaping of the aous or early rice crop, and planting of the amun or late rice going on. More rain wanted.
BEHAR.			
PATNA DIVISION. 27	Patna, 10th* Aug 1874	...	Weather most favorable for the bhadoi or early crops, though in some parts of the district more rain is wanted to allow of the transplanting the paddy. Health of the district generally good, though cholera has made its appearance in some parts.
28	Gya, 8th " "	4·46	Seasonable weather. Murwa (millet) ripening. Bhadoi or early crops exceedingly promising, and rice strong and healthy.
29	Shahabad, 8th " "	2·57	Cloudy with heavy showers at intervals. Extremely heavy rain on the morning of the 8th August. Prospects of the crops generally good. The rain this week has enabled the cultivators to transplant their rice in all directions. The bhadoi or early crops promise well. More rain still required for the late rice. Public health on the whole good. Cattle disease here and there in the Sasseram Sub-division, but not in a severe form.
30	Tirhoot, 7th " "	0·09	Cloudy and hot. In the Durbhunga Sub-division the continued drought, which, with but an insufficient break, has now lasted nearly three weeks, has had an injurious effect on the prospects of the bhadoi crops, which in places are assuming an unhealthy color. Transplanting winter rice has also been checked by want of moisture. Clouds have been gathering for the last two days. In the Mudhoobunnee Sub-division early murwa (millet) and sama (grass seed) are being reaped in a few places. The other bhadoi or early crops, that were sown early, are reported to be in a good condition, except "gumrhi" or "sathi," which requires more rain. The later sown bhadoi is drooping for want of rain, and the drought has stopped transplantations of paddy in the high land though much remains to be done. If rain keeps off much longer, very serious damage will be done. In Seetamurhi Sub-division the crops are apparently thriving, but zemindars complain that rain is much wanted to bring on the sati, sama, and murwa. Mr. Tripe of Amooah writes—"the bhadoi will be next thing to a failure, unless we get four or five inches of rain within three or four days." There has been no heavy rain for a fortnight, and rain is needed to ripen the crop which will be cut after next week. Fever of ordinary malarious type prevails in a few villages. In the Tajpore Sub-division the continuous dry weather has seriously affected the crops. There is no chance whatever now of the full bhadoi crop once promised; later rain may yet ensure a 10-12 anna crop, but every day's drought cuts about an anna off the outturn. Much of the makai or Indian-corn is coming to flower before it has obtained its full growth, and the cobs forming on that full grown are shrivelling from want of moisture. Kowni (millet) and sama (grass seed) are in fine ear, but much will fall away without rain. Murwa is looking burnt, and in some places comes prematurely into ear. Dhan is backward, and there is still some to be transplanted. The prospects of bhadoi crops are deteriorating in the Sudder Sub-division. Public health good. In the Hajeepore Sub-division rain is much wanted for the low-lying dhan crops. Gunduck has risen very high, and done some slight damage near Hajeepore.
31	Sarun, 8th " "	1·10	Cloudy since Wednesday; east wind prevailing. Partial showers throughout the district, generally of a slight nature. The bhadoi or early crops are all thriving very well and promise an abundant harvest. Steady and heavy rain is much required for the rice crop in all parts. Manufacture of indigo is going on, but the outturn is small. Three-fourths of the lands in the Dighmarah Thana as well as the Dearahs of the Chupra Thana are stated to have been submerged, owing to a rise of the River Ganges, and the crops are still under water. The extent of damage done will be reported on the subsidence of the flood. Prices have slightly risen in consequence of the falling off in the importation. Cholera in a mild form has broken out in the town, and also of a more virulent type in parts of the interior.
32	Chumparun, 7th " "	0·45	Very slight showers with sunny breaks in the north. Elsewhere rain threatening and not falling. Some injury has been done by the prolonged break in the rains. A few crops have withered and transplanting has been impossible. On the 7th a very heavy shower has fallen, and looked as if it were general and more was coming.

* Telegram of the 10th August, received on the same day, shows rainfall during the seven days immediately preceding.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BEHAR.—(*Contd.*)				
BHAGULPORE DIVN.	33	Monghyr, 8th Aug. 1874	2·97	Showery and seasonable. The rain has been generally beneficial. The rivers in the district have risen very high during the week, and large tracts of land under bhadoi or early crop have been flooded and the crops damaged. The rain has been very beneficial for transplanting rice, which is going on all over the rice tracts of the district. On the whole the prospects are good.
	34	Bhagulpore, 10th* „ „	2·30	Rainfall at Soopool over 4·50, Banka, 2·32, Muddehpoora about 3 inches. The rain is just what is wanted for the late rice. No rain could now harm the early crop which is splendid. Ganges in very high flood and still rising. Prices falling. General health good, but fever and cholera are still hanging about.
	35	Purneah, 8th „ „	4·99	Light showers in the beginning of the week; weather most seasonable. Heavy rain on the night of the 7th; weather cooler. State and prospects of crops excellent. A 16-anna bhadoi, or early crop is being reaped: yield excellent. Late rice being transplanted everywhere.
	36	Sonthal Pergunnahs, 8th Aug. 1874.	7·10	Very heavy rain in Doomka on the night of the 6th. Deoghur 2·97 in showers. Godda not received. Rajmehal unintelligible, but rain was wanted in both places. Makai or Indian-corn splendid in Doomka, not so good in Godda. Everything good in Deoghur and Moheshpore, except a little *sathi dhan* in Moheshpore suffering for want of rain. If the late Doomka rain goes north, nothing could be better than general prospects.
ORISSA.				
ORISSA DIVISION.	37	Cuttack, 10th* Aug. 1874	7·80	Rainfall at Jajpore 3·85. Heavy rain throughout the district till end of the week, when the weather cleared a little. Floods in all the rivers. Crop will not suffer from being under water, provided the floods dry up soon as seems probable. A little cholera still in some places.
	38	Pooree, 6th „ „	5·05	There has been general and ample rain. The rain has done good. The weeding of the early rice crop is going on well. Transplantation of the late rice is progressing satisfactorily. Sugarcane is thriving; cotton being gathered. Mandia is being planted and also partly weeded. Arhur (pulse) castor and teel (oil-seed) plants are growing well. Prices are stationary in the mofussil. Cholera and fever continue, especially in the city, but are much diminished.
	39	Balasore, 7th „ „	6·21	The flood-spill of the different rivers throughout the district is gradually subsiding. The rain has ceased, and the earthing up of the crop is being actively carried on.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
	40	Hazareebagh, 7th Aug. 1874.	4·21	Abundant rain and sunshine. The millet is being reaped, it is a splendid crop, and the other bhadoi or early crops are expected to be as good. There is a good deal of cholera in the Pachumba Sub-division and small-pox in the district. There has been also typhoid fever in the European barracks for some time. The season is doubtless unhealthy.
	41	Lohardugga, 8th Aug. 1874.	6·90	Seasonable; alternate rain and sunshine. Rain has fallen plentifully. The high land crops have been revived and transplanting has been carried on vigorously during the last fortnight. All the crops now promise well. The goondli (millet) is being harvested and is reported to be a full crop. In Palamow, the weather has been very favorable for the crops, and the prospects both of the bhadoi or early and late rice crops are excellent. The rainfall there was 3·11. Prices falling. General health good.
	42	Singbhoom, 7th Aug. 1874.	5·43	Cloudy and damp. Rain most abundant all over the district. Agricultural operations active. Transplanting of rice in full swing. Fields full of water and appearance of the crops excellent. General health good, but cholera here and there in some villages. Condition of the people satisfactory.
	43	Manbhoom, 8th Aug. 1874.	3·15	Seasonable. Since the date of last week's report, the weather has continued very favorable, and all the high land crops have very much benefitted thereby. The goondli (millet) is being cut and Indian-corn is nearly ready for being gathered. The gora paddy has greatly recovered and will probably produce a 14-anna crop. The pulses, mung and kuri could not be doing better. Altogether state and prospects of the crops on high lands are very good indeed; transplanting is now going on vigorously all over the district.

* Telegram of the 10th August, received on the same day, shows rainfall during the seven days immediately preceding.

Published for general information.

NOTE.

The peculiarities of the present season thus far, are almost as marked as were those of 1873. The season of tillage (January to April) was characterized by a rainfall above the average in almost every division, and conspicuously so in Rajshahye, Dacca, and Chota Nagpore. In the Behar, Bhagulpore, and Orissa Districts, the rains during this period were a little below the normal fall, but to no very material extent. On the other hand, the rainfall of the sowing season (May, June, July,) has been abnormally and almost dangerously scanty in the Burdwan, Presidency, Rajshahye, and Dacca divisions, but a little better than average in Behar and Bhagulpore. Tirhoot however, has been again most unfortunate. It is the July fall in particular—the month for transplanting the late rice—that has been so deficient [pp. 2726-2727.]

R. KNIGHT,
Asst. Secy. to the Govt. of Bengal.

CALCUTTA,
The 11*th August* 1874.

	5th	·628	88·0	78 0	140·0	82·1	79·9	78·4	·89	S S E & S	0·5	145·1	1·43	☽	Overcast, cumuli and clear. Rain after intervals.
	6th	·653	86·8	80 0	144·0	82·6	80·6	79·2	·90	S S E	...	150·3	0·40	...	Cumuli, and clear. Thunder at 3 P.M. Sheet lightning on west at 11 P.M. Slight rain at 7, 8, 12½ A.M., and from 1½ to 3 P.M.
	7th	·669	90·0	79·5	141·2	83·6	80·6	78·5	·85	S S E & S E	...	162·0	0·03	...	Clear, cumuli and cirri. Sheet lightning from 6¾ to 11 P.M. Slight rain at 7½ A.M. and 4½ P.M.

The mean barometer, as likewise the dry and wet bulb thermometer means, are derived from the twenty-four hourly observations made during the day.

The dew-point is computed with the Greenwich constants. The figures in column 10 represent the humidity of the air, the complete saturation of which being taken at unity. The receiver of the lower rain gauge is 1½ feet, and that of the anemometer 70 feet 10 inches above the level of the ground. The velocity of wind, as indicated by Robinson's anemometer, is registered from noon to noon.

		°
The extreme variation of temperature during the past seven days	...	12·0
The maximum temperature during the past seven days	...	90·0
The maximum temperature during the corresponding period of the past year	...	92·0

NOTIFICATION.

The 17th August 1874.—Under the provisions of Section 83, Act V (B.C.) of 1870 (An Act to appoint Commissioners for making Improvements in the Port of Calcutta), the following additional Bye-law for the landing and delivery of goods at the jetties, as proposed by the Commissioners, is published for general information :—

BYE-LAW No. 14A.

When iron, drainage-pipes, or other goods, from their want of description or want of proper distinguishing marks, or from any other cause, are landed in a mixed condition, the Master or Agent of the vessel will be allowed two clear days to sort and make over the goods to the Commissioners ; and until the goods have been made over and the usual receipt granted, they will remain on the wharf at the risk of the vessel. Such goods, if not made over to the Commissioners within the two clear days, will at the expiration of that time be subject to wharf-rent at the schedule rates, the rent incurred being payable by the vessel. After receipt of such goods by the Commissioners, consignees will be allowed two clear days to take delivery before incurring wharf-rent charges. This exemption shall not be extended to goods the consignees of which refuse or neglect to forward their invoices within 24 hours after the vessel commences to discharge.

H. J. REYNOLDS,
Offg. Secretary to the Government of Bengal.

DECLARATIONS.

The 10*th August* 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction and repair of a road from Maltipore to Hyatpore, it is hereby declared that for the above purpose a strip of land measuring 46,200 feet, more or less, in length, 50 feet, more or less, in breadth, lying in the villages Kashipara, Noorpore, Burnah, Gourshand, Maltipore, Jitarpore, Anaitnuggur, Anundgunge, Malahar, Mohunpore, Bhobanipore, Ranghat, and Bhalookaroy, is required.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction and repair of a road from Tulshigunge to Chanchal, it is hereby declared that for the above purpose a strip of land measuring 42,000 feet, more or less, in length, 50 feet, more or less, in breadth, lying in the villages Raneekhamat, Konooan, Kabilkhaly, Eshadpore, Dabigunge, Koner, Luckhunpore, Jabra, Rarial, Shalalpore, Jote-Bohorum, Kamarta, and Tulshigunge, is required.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction and repair of a road from Maltipore to Noorpore, it is hereby declared that for the above purpose a strip of land measuring 71,400 feet, more or less, in length, 50 feet, more or less, in breadth, lying in the villages Maltipore, Kashiparah, Gobindparah, Shumbhunugger, Shumshi, Binudpara, Chundipore, Nokorum, Baliabinodepara, Kakot, Bhado, Rotooah, Shakepore, Boyriah, and Jote-Luchmun, is required.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction and repair of a road from Khurbah to Chanchal, it is hereby declared that for the above purpose a strip of land measuring 32,040 feet, more or less, in length, 50 feet, more or less, in breadth, lying in the villages Singhia, Kollygram, Bhaktipore, Rajapore, Pooria, Dadpore, Jamgachee, Chota-Panchrakah, Bassilhaut, Khurbah, Assapore, Sooktiar, and Sudderpore, is required.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction and repair of a road from Sorupgunge to Chanchal, it is hereby declared that for the above purpose a strip of land measuring 38,640 feet, more or less, in length, 50 feet, more or less, in breadth, lying in the villages Khalunpore, Shehipore, Sujagung, Asral, Kushiarbary, Masutypara, Paikpara, Situlpore, Bussuntapore, Mukdumpore, Sherepore, Copilhaut, Bistoopore, and Sorupgunge, is required.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz for the construction and repair of a road from Sorupgunge to Bulrampore, it is hereby declared that for the above purpose a strip of land measuring 79,800 feet, more or less, in length, 50 feet, more or less, in breadth, lying in the villages Sorupgunge, Nonatore, Mullickparah, Duckinpacka, Koyatola, Mohanundpore, Hareeal, Doybhatah, Danghee, Autote, Shungolah, Arriarpore, Panchhazaree, Oodagunge, Bhogwanpore, Kalligunge, Bhabah, Monykanda, Khurbah, Ashapore, Allipore, Koyah, Mahadebpore, Koboya, Doorgapore, Gopalpore, Kistapore, Mulluncha, Galimpore, Muttrapore, Jodoopore, Bhandiah, Kanyepore, Taherpore, Chundypore, Darmar, Bulrampore, and Chunderparah, is required.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction and repair of a road from Shumshee to Allaul, it is hereby declared that for the above purpose a strip of land measuring 33,360 feet, more or less, in length, 50 feet, more or less, in breadth, lying in the villages Andirampara, Gungarampara, Sreepore, Monohurpore, Bullubpore, Shakepore, Roghonathpore, or Lushkerpore, Dhishal, Magura, and Natanpore, is required.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction and repair of a road from Belpokhuriah to Shahurgachee, it is hereby declared that for the above purpose a strip of land measuring 17,400 feet, more or less, in length, 50 feet, more or less, in breadth, lying in the villages Gopalpore, Noorpore, Burnah, Maltipore, Duckinshahur and Shajib, is required.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction and repair of a road from Kollygram to Muttrapore, it is hereby declared that for the above purpose a strip of land measuring 13,560 feet, more or less, in length, 50 feet, more or less, in breadth lying in the villages Rajapore, Pooriah, Bhimpore, and Emampore, is required.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction and repair of a road from Tulshigunge to Hyatpore, it is hereby declared that for the above purpose a strip of land measuring 74,400 feet, more or less, in length, 50 feet, more or less, in breadth, lying in the villages Tulshigunge, Bhobanipore, Bungruah, Tildangi, Jote-Chintamun, Mohendropore, Gangur, Gola-Suntushpore, Nobogram, Rangaipore, Dowlutpore, Malipakur, Gyashpore, Natashee, Koriallee, Bhalookaroy, and Murarpotee, is required.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the public expense for a public purpose, viz. for a road starting from the village of Bamongola to that of Pakooahat, zillah Maldah, it is hereby declared that for the above purpose a strip of land passing through the villages as per margin, and measuring more or less 3,312 cottahs in length and 2½ to 3 cottahs in breadth, equal to 22 beeghas 16 cottahs and 6 dhools of the standard measurement, more or less, is required.

DECLARATION.

The 5th August 1874.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up at the public expense, viz. for construction of a road from Bankoora to Judpore, in the district of Bankoora, it is hereby declared that a strip of land, 7 miles in length and 50 feet in breadth, measuring 142 beeghas, is required.

This declaration is made under the provisions of Section 6 of Act X of 1870 to all whom it may concern.

J. F. K. HEWITT,
Offg. Junior Secy. to the Govt. of Bengal.

The following orders, issued by the Government of India in the Home Department, are republished for general information :—

No. 2159.—*Fort William, the* 14*th August* 1874.—*Notifications.—Public.*—The Government of India, in the Notification issued from this Department, under date the 21st August 1867, No. 3742, and published in the *Gazette of India* of the 24th idem, page 1221, promulgated, for general information, certain rules for the submission, receipt, and transmission of memorials, and other documents of the same class, addressed to Her Majesty, or to Her Majesty's Secretary of State for India, by private individuals, or by public officers of civil departments in India.

2. These rules declared that "no memorial would be received or attended to by the Home Government which had not been forwarded through the regular channel of the Governments in India," and that every memorial addressed to Her Majesty, or to Her Majesty's Secretary of State, "should be forwarded through the local Government under which the writer is residing, or employed, with the view of affording an opportunity to such local Government of expressing an opinion and offering an explanation."

3. Notwithstanding the promulgation of these rules, memorials have constantly been forwarded to England direct by persons in India; but they have invariably been rejected by Her Majesty's Government, and forwarded to the Government of India to be returned to the writers, with the intimation that Her Majesty's Government declines to entertain any representations from persons in India unless submitted through the local Government or Administration.

4. Her Majesty's Secretary of State has recently returned a number of such memorials, and has requested the Government of India to notify, for general information, "that no communication from any individual resident in India can be considered by Her Majesty, or by Her Majesty's Government, which is not transmitted through the prescribed channel, viz. that of the local Government." Attention is, therefore, again drawn to the necessity of presenting such petitions to the local Governments and Administrations for transmission by them.

No. 554.—*The* 10*th August* 1874.—Mr. G. Graham, of the Bengal Civil Service, has been granted by Her Majesty's Secretary of State an extension of leave for six months on medical certificate.

No. 562.—*The* 14*th August* 1874.—The following list of Civil Servants on the Bengal Establishment, absent on furlough, special or subsidiary leave, on the 30th June 1874, is published for general information :—

No.	Name.	Substantive appointment.	Date of commencement of furlough or leave.	Date of expiry of furlough or leave.

No. 378.—*The* 13*th August* 1874.—Baboo Suresh Chunder Sircar, attached to the Medical College Hospital, Calcutta, is permitted to resign his appointment of Assistant Surgeon of the third grade.

The following order issued by the Government of India, in the Department of Revenue, Agriculture, and Commerce, is republished for general information :—

No. 254.—*Fort William, the* 12*th August* 1874.—*Notifications.—Statistics.—Erratum.*—In the list of names of important places in Mysore appended to Notification No. 183, dated the 3rd ultimo, for "Kaveri" read "Cauvery."

The following order issued by the Government of India, in the Foreign Department, is republished for general information :—

No. 1735*P.*—*Fort William, the* 12*th August* 1874.—*Political.*—Subject to the confirmation of Her Majesty's Government, the Hon'ble the President in Council is pleased to recognize the appointment of Mr. John Ebenezer Borland, as Acting Vice-Consul for Denmark, at Rangoon.

Extract from the Proceedings of the Government of India in the Foreign Department, No. 1740*P., dated Fort William, the* 13*th August* 1874.

Read—

A despatch from Her Majesty's Secretary of State, to the address of the Bombay Government, No. 18, dated 9th April 1873, regarding the importance of encouraging the study of the Arabic and Persian languages by Political Officers.

Read also the following correspondence on the same subject :—

Political A., September 1873, Nos. 397-402. Circular Nos. 2111P. to 2125P., dated 12th September 1873, and replies from Local Governments and Administrations.

OBSERVATIONS.—In the despatch above quoted Her Majesty's Secretary of State dwelt on the necessity for encouraging officers employed in the Political Department to study the

Persian and Arabic languages. Probably such encouragement could most effectually be afforded by holding out some reasonable prospect of employment to officers who devote themselves to the study of these languages. In the opinion of the Hon'ble the President in Council, however, it is impossible to give any definite promise of employment in the Political Department as reward to officers who pass examinations, or even high examinations, in Arabic or Persian. Other qualifications must necessarily be regarded as of even greater importance than linguistic attainments. At the same time a thorough knowledge of these languages should be allowed much weight in the selection of candidates, Civil or Military, for employment in the Political Department. With the view of ascertaining the number of officers who have passed the higher examinations in Arabic and Persian, a Circular was addressed on the 12th September 1873 to Local Governments and Administrations and to the Military authorities, desiring the submission of a list of all officers, Civil and Military, who have passed the "High Proficiency" and "Honor" tests in Arabic and Persian. From the replies received, a general list has been prepared, and forms an appendix to this resolution. Annual lists will, in future, be called for of officers who have passed these examinations, and will be published in the *Gazette of India.*

2. The President in Council deems it necessary that officers who are hereafter appointed to the Political service without having passed the High Proficiency or Honor tests in Persian or Arabic should, after their appointment, pass a linguistic test of a higher standard than that now demanded. Under Foreign Department Resolution No. 541P., dated 17th March 1871, officers in the Political Department are at present required to translate a passage of Persian into English, and a passage of English into Persian. They are also called on to hold, with moderate fluency, a conversation in Persian, and to read, with fair facility, a Persian manuscript. In order both to raise the present standard of qualification, and to bring it into accordance with the standards recognized under the Civil and Military Examination Rules, the President in Council considers it necessary to prescribe that in future officers appointed to the Political Department in and below the grade of 1st Class Political Assistant shall be required to pass either in Arabic or in Persian by the "High Proficiency" test; further that such officers, if employed in Turkish Arabia, the Persian Gulf, and Muscat, shall be required to pass a colloquial examination in Arabic; and if employed at Zanzibar, a colloquial examination in Arabic or Swaheli, even though they may have already passed in Persian; and if employed in the continent of India, a colloquial examination either in Hindee or the local vernacular of the place where they are serving. If such officers be appointed to Burmah, they will be required to pass the High Proficiency test in Burmese, but will not be required to pass in Arabic or Persian.

3. In thus raising the standard of qualification, the President in Council does not desire to exaggerate unduly linguistic acquirements, or to impose an irksome task on officers who have already attained a certain position in the Political Department. When the exigencies of the public service require the employment of an officer in any of the higher posts of the Political Department, Government reserves to itself the right of appointing any officer whom it considers to possess the best general qualifications, even though he may not have passed in these languages. But for the retention of appointments in and below the grade of 1st Class Political Assistant, it will be essential that officers hereafter appointed shall have passed, or shall within three years from date of appointment pass, the tests above prescribed, besides qualifying in the other subjects laid down for examination in the Political Department. To officers above the grade of 1st Class Political Assistant, neither these rules nor the rules contained in the Resolution No. 541P., dated 17th March 1871, are applicable.

4. This Resolution will only have prospective effect, and will not apply to officers at present holding either officiating or permanent appointments in the Political Department.

5. Under the existing examination rules of the Civil and Military services, officers are precluded from passing examinations by the High Proficiency standard elsewhere than in Presidency towns. For the purposes of the present Resolution, however, examinations of officers in Political employ will be conducted by the Committees, which, under the Foreign Department Resolution No. 541P., dated 17th March 1871, are periodically assembled for the examination of candidates in the other subjects prescribed for the Political Department, but no officer will be entitled to receive any pecuniary reward for passing the "High Proficiency" standard at such examinations. Rewards are granted only for examinations passed at a Presidency town under the rules prescribed for the Civil and Military services.

ORDER.—Ordered, that the foregoing Resolution be published in the *Gazette of India.* Also, that (with the reservation that the change does not affect officers now in the Political service) the following alteration be made in the Examination Rules published under Notification No. 541P., dated 17th March 1871:—

Instead of Rule 14, Clause 3, substitute "the Persian or Arabic language up to the High Proficiency standard."*

Instead of Rule 14 substitute:

"The requisite examination in Persian or Arabic may be passed at any time within three years, from the date of the officer's entry into the Political service of Government."

Ordered, also, that the annexed list of officers who have passed the "High Proficiency" examinations in the Persian and Arabic languages be published in the *Gazette of India.*

* Under paragragh 4 the above Notification, the production of a certificate to show that the candidate has elsewhere passed an examination in the High Proficiency test Persian or Arabic, will exempt him from examination therein. In British Burmah the test will be the "High Proficiency" standard in Burmese.

List of Civil Officers serving under the several Local Governments and Administrations subordinate to the Government of India, including Officers of the Bengal, Madras, and Bombay Armies, who have passed the High Proficiency or Degree of Honor tests in the Arabic and Persian languages, or either of them.

NOTIFICATION.

The 13*th August* 1874.—The Lieutenant-Governor has been pleased to approve of the following revised boundaries of the Berhampore Municipality. So much of the notification of the 20th February 1869 as relates to the limits of this Municipality is hereby cancelled.

The Municipality is divided into two blocks—Block A or the Berhampore Block, and Block B or the Gorabazar Block. Block A of the Municipality is bounded on the west by the left bank of the Bhagiruttee river, from a point opposite Kotwallee Thannah on the road, about 154 yards to the north of the north-western corner of the hospital boundary wall up to a point due west of Mekraj Baboo's house at Koonjoghatta.

The other boundaries then run east along the Koonjoghatta Rajbarree Lane, up the Radhabullhubpara Lane, down the Girjatolla Lane, till it meets the Dayanuggur pucka road; it then runs south along the Dayanuggur road for about 110 yards to a small culvert, thence direct to the tank on the north side of the Chattra Bheel, thence along the north and east bank of that Bheel, down to Joy Chand Khagra Lane, thence westward along the Joy Chand Khugra Lane to Baboo Radhica Churn Sen's garden, thence direct to Sooreeparra, and on to the pucca bridge over the Kalkapore Bheel. The southern bank of the Kalkapore Bheel then forms the boundary, winding round up to the junction of the Jhoukholla pucca road and the Kalkapore pucca road. It then runs north along the Kalkapore pucca road up to a point near the Dutch burial-ground, where five roads meet, then north along the Sahebghatta Lane to the bank of the Adigunga, thence east along the south bank of the

Adigunga to a large tank at Dhungurparra, thence direct to a point where three roads meet at the old cemetery, thence along Cossimbazar outpost road, along the southern bank of the Katigunga to a cross road leading to the Nijsripore road, thence westward along the Nijsripore road to Moharanee Surno Moyee's dwelling-house, thence south along the Baboolbona pucca road, thence west along the Punchanund Tollah pucca road to Grant Hall corner, thence north along Khalassibazar road, and west along Berhampore bazar road to Kotwallee Thannah.

Block B is bounded on the west by the Bhagiruttee river, from a point opposite Koylaghatta at the north-west corner of the College as far as Ojoodhyanuggur Lane, thence east along the Ojoodhyanuggur Lane, north up the Poora Pookur Lane, west along the Wakeelpara Lane to the south of the Judge's Cutchery, thence north along the Koolee Bazar road to the soldiers' cemetery, and thence east along the Koylaghatta road, south of the Military Cantonment, to the north-west corner of the College.

2. The Vice-Chairman after reading the proceedings of the last special meeting held on the 21st February 1874, which were confirmed by the Committee, explained that, in accordance with resolution 4 of that meeting, the current work of the Committee had been transacted at weekly meetings until the 9th June 1874, and in strict accordance with the rules approved of at that meeting ; that is to say, the work of distributing cash for relief under heads *b*, *c*, and *d* of the Central Committee's Notification of the 4th March 1874, had been carried out by the valuable assistance of four Honorary Secretaries who supervised the committees and examined their reports and accounts before laying them before the weekly meetings with their recommendations. Similarly, the work in Serampore had been conducted by a Sub-Divisional Committee under Mr. Jeffrey, the Sub-Divisional Officer.

3. The recent orders to substitute rice relief for cash had however compelled him, the Vice-President, to reorganize the whole system of relief on a new basis, for it was not possible to saddle the Honorary Secretaries with the transport and storage of Government rice in remote parts of the mofussil at a time of the year when the rainy season might be immediately expected to render the roads difficult, and some of the sub-committees inaccessible. All the arrangements had been expressly framed to meet the exigencies of cash relief, and were not adapted for relief in kind.

4. The Vice-President therefore was compelled to stop the weekly meetings, and to give his whole attention to the storage of sufficient rice in the mofussil to last till the country should again be in a practicable state.

5. In the meantime, however, it became clear that even under a system of payment in kind on production of tickets, which was the system introduced, the services of the four Honorary Secretaries would still be most useful in supervising the system of light-labor relief under heading *c*, and endeavouring to extend it to committees which had hitherto neglected this most important branch of relief. The Secretaries willingly came forward, and, as is shown by the increase of figures of *c* relief, have effected a marked improvement.

6. The Vice-President then submitted the accounts showing the receipts and cash disbursements of the fund for each month up to date, and explained that to the disbursement therein shown, it would be necessary to add a large sum, not less than Rs. 31,096-7-6, as the price of Government grain supplied for relief.

7. For this purpose, as well as for purchase of materials for labor, expense of establishment, and of transportation of grain, he had applied for a sum of Rs. 45,000 from the Central Committee for the month of August, and he requested the approval of the full Committee at this special meeting to what had been done up to date, both by the Committee at their weekly meeting and by the Vice-President. As regards the accounts, they would have to stand the scrutiny of the Comptroller-General, and it was needless to ask for the Committee's approval of them except in a general manner; but he wished for a general resolution as to the opinion of the Committee, composed as it was of gentlemen of position and influence from all parts of the district, as to the sufficiency or otherwise of the relief afforded, and as to their approval or disapproval of the means taken for the purpose of relief. He had also some resolution to bring forward in due course.

8. Baboo Peary Mohun Mookerjee proposed, and Baboo Troylokho Nath Mitter seconded, a resolution, to the effect that the measures of relief undertaken were sufficient, and met with the hearty approval of the Committee, and had been the means of averting much distress in the district, and that in the opinion of the Committee similar measures should be continued, as from the condition of the crops it was to be feared that exceptional distress will continue for some time.

9. This resolution was agreed to *nem. con.*

10. The Vice-President then proposed that the thanks of the Committee be accorded to the four Honorary Secretaries—

Baboo Dwarka Nath Chuckerbutty,	Baboo Nemye Chand Seal,
„ Hurro Chunder Ghose,	„ Gobind Chunder Bose,

and to Baboo Lolit Mohun Singh, who had for a time carried on the duties of an Honorary Secretary. The Vice-President explained that these gentlemen had each of them the charge of more than 20 sub-committees, whose weekly accounts and reports they had to check and digest, besides supplying them with cash and materials for gratuitous relief, and relief by light-labor; that the work thus imposed on them was of no light nature, as the sub-committees were continually asking for advice and explanations, and continually requiring check and control. Now that the supply of rice centres had devolved on him, the Vice-President, he was continually reminded of the amount of work which had been cheerfully and punctually performed by these gentlemen.

11. The resolution was seconded by Baboo Peary Mohun Mookerjee, and was carried *nem. con.*

12. The Vice-President then proposed that a vote of thanks be accorded to all the Presidents of sub-committees, especially—

Revd. Juggudishur Bhuttacherjee, of Mahanad,
Baboo Kedar Nath Nag, of Gooroop,
„ Jodoo Nath Mookerjee, of Ala,
„ Bunko Behary Neogee, of Chinsurah,

who have succeeded in organizing labor on a considerable scale, and almost self-supporting basis, in their respective circles.

13. This proposition was seconded by Baboo Troylokho Nath Mitter, and carried unanimously.

14. At the request of the Honorary Secretaries the following sub-committee was appointed for auditing their accounts:—

Baboo Opendro Nath Nundy.	Baboo Kristo Mohun Bose.
„ Bhagavati Churun Laha.	„ Behary Lall Dutt.

15. The meeting then dissolved.

F. H. PELLEW, *Chairman.*

The Calcutta Gazette.

WEDNESDAY, AUGUST 19, 1874.

PART II.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

NOTICE is hereby given that the undermentioned plots of land, no longer required by the Government, situated in the district of Patna, will be put up to sale at the Collector's Office at Bankipore at 12 o'clock on Monday, the 7th September 1874, corresponding with 23rd Bhadro 1281 *B.S.*

The purchasers of these plots will be subject to the following conditions:—

1*st.*—If the amount of purchase-money does not exceed Rs. 100, the whole amount to be paid down at once.

2*nd.*—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled, the sum deposited being forfeited to Government, and the estate to be again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.

3*rd.*—The plots will be sold revenue-free to the highest bidders.

4*th.*—The purchasers shall be put in possession on receipt of the orders of the Collector confirming the sales. But such possession shall be liable to be disturbed in case the final sanction of the Member of the Board of Revenue in charge should not be accorded to the proceedings.

JESSORE COLLECTORATE, the 25th July 1874. A. SMITH, *Collector.*

Notice

Is hereby given that the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the office of the Deputy Commissioner of Durrung, will be sold by public auction at the said Deputy Commissioner's office at Tezpore at 11 o'clock A. M., on the 3rd October 1874, unless in the meantime the sale is stopped, or postponed in consequence of claims or objections, under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands) or owing to any other cause.

For the conditions of sale, see detailed notice, copies of which may be obtained on application to the Deputy Commissioner of Durrung.

SCHEDULE.

A lot of waste land consisting of 843·97 acres, situated in Mouzah Sakomatha in the district of Durrung, and bounded as follows :—

East.—By a line running from pillar B to C along the Majulighor, measuring 3,375 yards long.

South.—By a line from pillar B to pillar A and by Gorsunga Bheel, measuring 1,155 yards.

West.—By a line from pillar A to pillar D along the Khoraghor and the Dehingijhan. measuring 2,215 yards approximately.

North.—By Bengna Khawa Joory (stream), measuring approximately 2,665 yards.

The pillars are marked A B C D on the map filed in the office of the Deputy Commissioner of Durrung, Assam. J. M. GRAHAM, *Deputy Commissioner.*

ZILLAH DURRUNG REVENUE DEPUTY COMMISSIONER'S OFFICE, the 16th *May* 1874.

Notice

Is hereby given that the land specified in the schedule hereunto annexed, and of which the plan is open to inspection at the office of the Deputy-Commissioner of Nowgong, Assam, will be sold by public auction, at the office of the said Deputy-Commissioner, at 11 o'clock, on the 2nd October 1874, unless meantime the sale is stopped or postponed in consequence of claims or objections under Act XXIII of 1863 (to provide for the adjudication of claims to waste lands), or owing to any other cause.

For the conditions of sale see the detailed notice, copies of which may be obtained on application to the Deputy-Commissioner of Nowgong, Assam.

SCHEDULE.

A lot of waste land, consisting of about 317 acres, situated in Mouzah Telia Chapori, in the district of Nowgong, Assam, and bounded as follows :—

North.—A line drawn from pillar marked G, on the side of a road to pillar H, and a stream called Dijoo Nuddee on the north-east, at a distance of 400 yards.

South.—A line drawn from pillar O to pillar A, on the south-west, at a distance of 1,580 yards.

West.—A line drawn from pillar A to pillar B on the north-west, at a distance of 240 yards; from pillar B to pillar C on the north-west, at a distance of 200 yards; from pillar C to pillar D on the north-west, at a distance of 220 yards; from pillar D to pillar E on the north-west, at a distance of 1,320 yards; from pillar E to pillar F on the north-west, at a distance of 600 yards; from pillar F to pillar G on the north-east, at a distance of 940 yards.

East.—A line drawn from pillar H to pillar I on the south-east, along the edge of the above stream, at a distance of 400 yards; from pillar I to pillar J on the south-east, along the edge of the above stream, at a distance of 200 yards; from pillar J to pillar K on the south-east, along the edge of the above stream, at a distance of 120 yards; from pillar K to pillar L on the south-east, along the edge of the above stream, at a distance of 200 yards; from pillar L to pillar M on the south-east, at a distance of 500 yards; from pillar M to pillar N on the south, at a distance of 820 yards; from pillar N to pillar O on the south-west at a distance of 500 yards.

Note.—The pillars are marked A to O on the plan of the land filed in the office of the Deputy-Commissioner.

NOWGONG, ASSAM, the 1st May 1874. J. F. SHERER, *Deputy Commissioner.*

Commissioners for making Improvements in the Port of Calcutta.

NOTICE.

UNDER SECTION 69 OF ACT V (B.C.) OF 1870.

THE following Packages, landed at the Jetties from the undermentioned ships, have been removed to the Commissioners' Import Warehouse, where they remain at the risk and expense of the owners. If not cleared within two months from the date stated against each item they will be sold under Section 72 of the said Act.

The Hymns of the Rig-Veda, in the Samhita and Pada Text, by Professor F. Max Müller, M.A., in two Volumes. *Price Rs. 24; packing and postage, Re. 1-12.*

*** The Rig-Veda, the oldest book of Indian literature, has very properly been made one of the principal class-books for those who study Sanskrit in the schools and colleges in India, and though at present a scholar-like knowlege of the Vedic hymns is in the examinations required of the more advanced students only, yet, as soon as editions, translations, grammars, and dictionaries shall have rendered the study of these ancient documents more accessible, I doubt not that the time will come when no one in India will call himself a Sanskrit sholar, who cannot construe the hymns of the ancient Rishis of his country.—*Extract rom Preface.*

The next Overland Mail, *viâ* Bombay, will close at the General Post Office, on Tuesday, the 25th August 1874, by which mails for Mauritius, St. Denis, Zanzibar, Mozambique, Delagoa Bay, Natal, Cape of Good Hope, Comoro Islands, and Madagascar, can be forwarded.

2. Book-post and pattern packets must be posted on the 24th idem.

N.B.—The Letter-Box will close at 7 P.M. precisely, after which hour Overland letters, fully prepaid, and bearing extra postage stamp of two (2) annas on each cover, will be received up to 7-30 P.M., or, bearing an extra postage stamp of four (4) annas on each cover, up to 8 P.M., and after 8 up to 9 P.M., by a Post Office Clerk at the East Indian Railway Station, Armenian Ghât.

CALCUTTA, the 18th August 1874. M. PERCY, *Post-Master.*

In Chancery.

In the matter of the Companies Act, 1862,
and
In the matter of the Nowgong Tea Company of Assam, Limited.

WHEREAS a dividend has been declared in the above-named matter by the Official Liquidator of the said Company, and sanctioned and approved of by the Judge, to whose court the winding-up of the said matter is attached by an order dated the 29th day of May 1874, of twelve shillings in the pound, payable to all the creditors of the said Company, who have proved their claims against or been admitted creditors of the said Company. Now this is to give notice that all the creditors of the said Company, who have proved their claims against, or who have been admitted creditors of the said company, are requested to apply to Samuel Lowell Price, the Official Liquidator of the said Company, at his offices, No. 13, Gresham Street, London, England, on or before the first day of February 1875, for payment of such dividend, otherwise they will be excluded from participating in such dividend.

Dated this 14th day of July 1874.

LEWIS MUNNS & LONGDEN, 8, *Old Jewry, London, Solicitors to the Official Liquidator.*

(316—3)

In the matter of Rajnarain Paul and Kissory Mohun Paul.

NOTICE is hereby given that on the 1st day of September next an application will be made to the Commissioner of the Insolvent Court on behalf of the Insolvent Rajnarain Paul for an order setting aside the order of adjudication made herein. Dated this 11th day of August 1874.

(319—2) KALLYNAUTH MITTER, *Attorney for Rajnarain Paul.*

INSOLVENT NOTICES.

Court for the Relief of Insolvent Debtors at Calcutta.

IN the matter of KHETTERMOHUN SHEN and BROJONATH SHEN, Insolvents.

On Friday, the 31st day of July last, it was ordered that the matters of the petition of the said Insolvents be heard on Tuesday, the 1st day of September next, and that the said Insolvents do then attend to be examined before the said Court.

Dhur and Mitter, *Attorneys.*

Chief Clerk's Office, the 4th day of August 1874.

IN the matter of BHEEKAREERAM AND RAKHARAM, Insolvents.

On Monday, the 3rd day of August instant, it was ordered that the matters of the petition of the said Insolvents be heard on Tuesday, the 6th day of October next, and that the said Insolvents do then attend to be examined before the said Court.

E. O. Moses, *Attorney*.

IN the matter of UJEET DOSS, an Insolvent.

On Wednesday, the 5th day of August instant, it was ordered that the matters of the petition of the said Insolvent be heard on Tuesday, the 6th day of October next, and that the said Insolvent do then attend to be examined before the said Court.

Promothonauth Basu, *Attorney*.

Chief Clerk's Office, the 18th day of August 1874.

BENGAL CIVIL FUND.

At an Adjourned Half-yearly Meeting of Subscribers to the Bengal Civil Fund held Calcutta on Wednesday, the 12th August 1874.

PRESENT:—The Hon'ble W. F. McDonell, v. c., Messrs. C. U. Aitchison, J. F. K. Hewitt, W. Grimley, D. M. Barbour, W. H. Verner, H. J. S. Cotton, James Crawfurd, J. A. Bourdillon, a L. C. Abbott.

The Hon'ble W. F. McDonell, v. c., in the Chair.

Read the following report submitted by the Managers :—

REPORT.

"The Managers submit their proceedings for the past half-year for the consideration and sanctio of the meeting."

"Subject to the approval of Subscribers, they have admitted to the benefits of the Fund t following families :—

Mrs. Templer	£ 400	0	0
Daughter	„ 100	0	0
	£ 500	0	0
Less private income	„ 125	12	2
	£ 374	7	10

"The widow and daughter of the late M J. W. Templer (an annuitant of 1847,) who di in England on the 22nd March 1873, admitt under the old Rules."

Mrs. Robertson	£ 300	0	0
Children	„ 120	0	0
	£ 420	0	0
Less $\frac{1}{6}$ under Article VII	„ 70	0	0
	£ 350	0	0

"The widow and three children (two sons a a daughter) of the late Mr. J. G. Robertson, w died at Futtehgurh on the 28th December last."

Mrs. Tulloh	£ 300	0	0

"The widow of the late Mr. C. R. Tulloh (annuitant of 1852), who died in England on t 10th January last."

Mrs. Ravenshaw	£ 300	0	0

"The widow of the late Mr. J. H. Ravensha who died in France on the 4th March last."

Mrs. Brownlow	£ 300	0	0
Children	„ 1,000	0	0
	£ 1,300	0	0

"The widow and ten children (five sons five daughters) of the late Mr. H. B. Brow (an annuitant of 1852), who died in England the 12th March last."

Mrs. Tayler	£ 300	0	0
Daughter	„ 100	0	0
	£ 400	0	0

"The widow and daughter of the late M Tayler (an annuitant of 1851), who died England on the 4th April last."

Mr. Alexander's five children	£ 310	0	0
Less $\frac{1}{6}$ under Rule VII	„ 51	13	4
	£ 258	6	8

"The five children (one son and four daughte of the late Mr. F. J. Alexander, who died Maldah on the 3rd May last."

Mrs. Wynne	£ 300	0	0
Daughter	„ 30	0	0
	£ 330	0	0
Less $\frac{1}{6}$ under Rule VII	„ 55	0	0
	£ 275	0	0

"The widow and daughter of the late Mr. H LePoer Wynne, who died at Calcutta on the 4t May last."

"The widow of the late Mr. H. B. Beresford has intimated that her son John is blind and unabl to follow a profession, and as he will soon attain his majority, applies for the continuation of hi pension. The Managers have informed her that it is necessary that she should furnish a certificat from the Medical Officer to the India Office, or from some leading physician or oculist."

"An application has been received from Mr. D. M. Smeaton for remission of the fine of Rs. 50 in curred under Article V (6) of the Rules for reporting his marriage after the expiry of the month o grace allowed. Mr. Smeaton pleaded ignorance of the rules, and was informed that the rule wa absolute, and that it was out of the power of the Managers to remit the penalty. The above case i submitted to the meeting at the request of Mr. Smeaton for decision."

"That no surplus be declared or distributed, and that no scheme for increase of benefits or reduction of subscriptions be allowed to come into force until after reference to a professional Actuary; provided that any benefits that may be distributed shall have retrospective effect from the 1st April 1873."

"The votes of Subscribers have affirmed the firs resolution passed at the last General Meeting o Subscribers. The votes for the adoption of th resolution noted on the margin were 149 in favo and 23 against it."

"That in referring to the Actuary for a valuation of the nd, he be supplied with information showing in detail the ounds for apprehending a future decrease in the average oss salaries of Subscribers during their term of service, and at his advice be obtained as to the surplus which should asonably remain undistributed as a margin to ensure the vency of the Fund."

"That a Committee, representing all grades of the Service, appointed to give effect to the above resolution."

"The votes have likewise affirmed the second resolution, which is noted on the margin. The votes for the adoption were 132 and 39 against."

"The third resolution has fallen through, the votes for it being 76 and those against 98."

"The Managers have written to some members of the Service, asking them for statements of any cts or arguments that may seem to them calculated to throw light upon the subject-matter of the cond resolution. Mr. Verner has furnished the Managers with his views, and they only await rtain information which has been promised from other sources before communicating further with the ctuary."

"On the 3rd May, a letter of the Actuary, dated 28th March, was received, in which he states that e hopes to be able to furnish the new tables, valuations and report in about three months from the ate of his letter. The Managers hope to be able to lay before the next General Meeting of Sub- ribers the report on the position of the Fund."

"The Managers have appointed Mr. Verner to discharge the duties of Secretary during the sence of Mr. Mackenzie."

Proposed by Mr. Aitchison—
Seconded by Mr. Grimley—

That the proceedings of the Managers in respect of the admission of families to the benefits of he Fund during the past half-year be confirmed.—*Carried.*

Proposed by Mr. Hewitt—
Seconded by Mr. Bourdillon—

That the reply given by the Managers to Mr. D. M. Smeaton be approved.—*Carried.*

A Vote of thanks was passed to the Chairman.

W. F. McDONELL,
Chairman.

THE ANNUAL REPORT OF THE BOTANICAL GARDENS FOR 1873-74.

RESOLUTION.

FINANCIAL DEPARTMENT.

AGRICULTURE AND FORESTS.

Calcutta, the 12th June 1874.

READ—

The Annual Report upon the Botanical Garden, Calcutta, for the year 1873-74.

IN thanking Dr. King for this very interesting report, the Lieutenant-Governor regrets to notice that the prospects of the garden continue to be indefinitely compromised by the destruction of the large trees therein in the cyclones of 1864 and 1867. In addition to the disadvantage of an originally poor soil, there is now a want of shade in the garden, while the growth of the new plantations under Dr. Anderson's plan, was seriously hindered in the last season by the almost unprecedented failure of the rains. The Lieutenant-Governor agrees with Dr. King that it is essential to restore the shade that is so necessary in a tropical garden, both for the growth of the plants and for the comfort of visitors; and he notices with satisfaction the efforts that are being made in this direction. Attention is meanwhile being given to the culture of herbaceous plants in the conservatories, and to the collection of orchids and other flowering plants; and Dr. King's suggestion, that we should do something in the way of landscape gardening by the outlay of a little money for this purpose on the estate, is one which the Lieutenant-Governor hopes may be carried out as soon as the existing necessity for general economy shall have passed away.

We need not lose sight of the primary objects of the garden in so doing; and turning to its economic aspects, the Lieutenant-Governor is able to congratulate the Superintendent and his staff on the success which promises to attend their efforts to acclimatize *Ipecacuanha* in these provinces. His Honor observes from the earlier reports, that four years ago there were but twelve cuttings of the plant at the Cinchona gardens, and that of these seven were destroyed by an accident. From the report now before him he learns with great satisfaction that, under the mode of propagation by root and leaf-cuttings, so successfully worked by Mr. Jaffrey, there are now not fewer than 63,000 living plants in all.

His Honor notes with satisfaction also the expression of Dr. King's opinion, that no difficulty whatever is likely to be experienced in planting *Mahogany* on a large scale in the districts of Lower Bengal. The statistics given

in the report of the immense size and the fine quality of the timber planted in the early days of our rule in these gardens and the surrounding neighbourhood, are very striking, and Sir Richard Temple desires that Dr. King's proposals for the systematic introduction of seeds from the West Indies may be effectually followed up. The Superintendent of the Garden has been asked to consult with the Conservator of Forests as to the precise steps to be taken to give effect to these recommendations.

Concerning the promotion of the growth of rubber in Bengal, the Lieutenant-Governor notices with interest the introduction by Dr. King, personally, on his return from Europe, of several plants of the *Hevea Braziliensis*, or Para rubber tree. The very curious account which he has given of the parasitical nature of the indigenous *Ficus Elastica*, invests the introduction of other rubber-yielding trees with much importance, and this part of the report will be brought to the special notice of the Chief Commissioner of Assam. Sir Richard Temple would suggest also to the Superintendent the propriety of attempting, if it has not already been attempted, to introduce the *Gutta percha* tree of Guiana, (*Sapota Mullerii, Michi. Mimusops Balota, Gaert:*); and would be glad to have a report from Dr. King at his early convenience on the possible acclimatization of this valuable tree in the littoral tracts of these provinces.

In future reports, the Lieutenant-Governor will be glad if the Superintendent will briefly bring up to date the history of the various experiments that have been made of late years in the garden with exotic cotton, Carolina rice, rheea, and other fibres, the fruit-trees planted in 1869, and the aquatic garden started by Mr. Scott in 1871. He would also like to have a list and description of the agricultural machinery now in the garden. With the organization of a scientific department of forestry, the opening of an Economic Museum in Calcutta, the contemplated establishment of a central Government depôt for the selection and interchange of seed in the provinces, and the formation of a small department to superintend the experimental farms we are founding, His Honor wishes to see an end put to desultory and isolated efforts at advancement; and in place thereof, systematic sustained effort for developing the powers of the rich tropical soil of Bengal, without breach of continuity. Sir Richard Temple knows that he may count upon Dr. King's co-operation in these views, and is prepared to give all the assistance in his power to make the Botanic Garden, not a mere resort of the pleasure-seeker, but a means of more actively stimulating the development of our natural possessions and advantages. The Lieutenant-Governor thanks the Superintendent of the Garden and his staff, both here and at the Cinchona plantations, for their labours during the year under report; and Dr. Henderson also, for his efficient and valuable superintendence of both during Dr. King's absence.

By order of the Lieutenant-Governor of Bengal,
R. KNIGHT,
Asst. Secy. to the Govt. of Bengal.

No. 36, dated Royal Botanical Gardens, the 28th April 1874.

From—GEORGE KING, ESQ., M.B., Supdt., Royal Botanical Gardens, Calcutta,
To—The Secretary to the Government of Bengal.

I HAVE the honor to submit the report of the Royal Botanical Gardens for the year ending 31st March 1874.

2. *General Condition of the Garden.*—The growth of the general collection of trees and shrubs planted out to replace those broken and uprooted by the cyclones of 1864 and 1867, has not, since last report, been very luxuriant. In addition to the two abiding potent reasons for this, namely, poverty of soil and want of shade, there was added last season an insufficient rainfall. Efforts are being made to remedy the two first-mentioned conditions by planting nurse trees and manuring heavily. Shade in a tropical garden is quite as necessary for the growth of many plants as it is for the comfort of visitors. The condition of these gardens cannot, therefore, be considered satisfactory until there be protection enough from the sun to allow a thoroughly tropical tree, such as *Amherstia Nobiles* for instance, to live happily out of doors, and to permit visitors to walk without fear of sunstroke in any part of the garden even at mid-day. These were both possibilities in this garden prior to the cyclone of 1864, and no effort should be spared to restore this desirable state of things. Some time must, however, elapse before this can be; and there is the more reason why, in the meantime, increased attention should be given to the culture of herbaceous plants in conservatories. A new orchid-house has been built during the past year, and the old one has been thoroughly repaired. The collection of orchids is very good indeed, but might be much better if facilities were

or the collection of orchids in parts of India other than Bengal. Burma and the are both very rich in orchids as well as in other handsome flowering plants, and unds to maintain a good collection in either or both of these, a magnificent set of ht not only be brought together in this garden, but large numbers might be anical Gardens in other parts of the world, from which in return new and valuable it be got. Every large garden in Europe has either such facilities for exchange or rchase, and the magnificence of the collections at Kew, Vienna, St. Petersburgh, laces, is largely owing to this cause. Improvements have also been made in some r conservatories; a new propagating-house fitted with a flue to secure bottom heat, new hot beds on a smaller scale, have been erected. The present fern-house, built as an experiment some years ago, is much too small for the collection of these in the garden. Experience in this house has proved that ferns can be grown very in Calcutta. We have learnt what is wanted to secure these beautiful plants ood condition all the year round, and I feel sure no addition to the garden would opular than a large new fern conservatory. In such a house, if properly ferns from Sikhim and the Nilgiris, as well as from Astralia and New Zealand, be grown in luxuriance. So large an extent of the garden being under grass, e regretted that the quality of the latter is so coarse. The luxurance of this nother of the numerous evil effects of the cyclone. It dislikes shade, and as long ees stood, it made no headway, but as soon as the shade was lost by the destruction ees, it began to take thorough possession of the soil, and I fear it cannot be until the trees have again grown up. At present it causes much trouble and expense, ing unsightly. The mere cutting of it is costly, and when cut it is not readily Grazing is inadmissible, as cattle ruin young trees. Much would be gained were ss-ground over the whole garden smooth enough to allow mowing machines to but levelling and smoothing are costly, and, with the present establishment, can dertaken only at odd times, when labor can be spared. With a little money a great ould be done in the way of landscape gardening. The Eden Garden in Calcutta s an excellent example of what can be done in making even a level bit of ground look esque, and there is room in the grounds here for an Eden Garden on a large scale could s be spared.

3. *Roads and Buildings.*—The new road from Bishop's College gate to the Cuba palm nue is now approaching completion, and promises to be a fine addition to the garden ves. Some of the older roads are not in very good condition, but arrangements are being de for their repair. The new dwelling-house for the Assistant Curator, although sanctioned, not yet been begun. The encroachments of the current on the riverbank during the year e been but slight. Some injury has, however, been done at places by the wash caused by s and other steamers passing along the river at a rapid rate. A separate communication been addressed to Government on this subject.

4. *Ipecacuanha cultivation.*—A year ago there were 6,719 ipecacuanha plants of all in Sikhim, and about 500 in the garden here. At present the stock is as follows:—

	Rs.
In Sikhim, planted out experimentally under various conditions...	292
Rooted plants, potted-off and under cover	13,000
Unrooted, and partially rooted cuttings...	50,000
	63,292
In Calcutta Botanical Garden	131
Total ...	63,423

Experience during the past year has confirmed the conclusion come to long ago by the Dr. Anderson, Mr. C. B. Clarke, and Mr. Scott, that ipecacuanha will not answer in tta either in the open sun or under shade. The cultivation has been practically confined khim, where it has been conducted chiefly by Mr. Jeffery of the Cinchona establishment, om is largely due the credit of its success. Having been carried on by the existing ona establishment, it has cost very little. Until the mode of propagating this plant ot and leaf-cuttings was discovered, progress was extremely slow. Since this discovery, figures just quoted prove, it has been proportionately rapid. It will be observed that, he exception of 292 plants, all the Sikhim stock is under cover. Until quite recently, were too few plants to permit of any number being risked out of doors, and all our efforts directed to propagation only. The ulterior object of discovering under what conditions ants could be successfully grown, as a crop was however never lost sight of, and during year 1872, as many plants as could be spared, viz. 36, were planted out in various parts of e cinchona reserve and in the Darjeeling Terai. During the year 1873, a number more, inging the total up to 292, were planted out in a similar manner. These have been under the servation of Mr. Gammie, the resident manager of the cinchona plantation, and I went to e most of them with Mr. Gammie in December last. Mr. Gammie and I quite agree that ecacuanha cannot be successfully cultivated in Sikhim except in shady places. In open ts where it gets the full sun it soon becomes very sickly. It is essentially a tropical plant, d evidently prefers moist shady spots where there is much vegetable mould on the soil, and an iable, steamy atmosphere. If these conditions exist anywhere in the Eastern Himalayas, y are probably most attainable at an elevation of about 800 to 1,200 feet above the sea, in ts where the virgin forest remains uncut. A number of plants have been put out under such

conditions in the valley of the Ryang, a few miles above its junction with the Tees these have done fairly well. I propose to plant out a number more this year with arriving as soon as possible at some definite conclusion as to the suitability of Sikhim for this cultivation. I fear the Terai is, from the extensive clearings for tea too dry for ipecacuanha, and I do not propose to try any more there—the pla planted not having succeeded so well as had been hoped. A few plants had been the year to the Khasi Hills, and a hundred are about to be despatched to Government for trial on the garden at Barliar, a low lying, moist spot, in valleys of the Nilgiris. I think some should be sent to the Andamans, Burma, as also a further supply to the Khasias. It may be thought that with so many pla as the returns show, planting out on a larger scale might have been already must be remembered that ipecacuanha is a plant of most peculiar habit and of growth, and the great majority of the 13,000 rooted plants on hand are even ye unfit to take their chance in a plantation.

5. *Mahogany.*—During the year a considerable number of mahogany p been distributed. These were raised from seeds received from Honduras and Jama are, as Government is aware, a good many old mahogany trees about Calcutta. Thes rarely yield seed, and our supplies are mostly derived from the West Indies and Hitherto, I regret to say, these supplies have been scanty and irregular, and until s definite arrangement for collection is made, there seems no prospect of their imp am strongly of opinion that, if it can be got in no other way, it would be worth wh a man specially to collect and transmit seeds to India. It has been abundant that the tree will thrive in most parts of Bengal, and that the Indian-grown timber i There are fine trees of it also in the gardens at Saharunpore and Madras, and I have that it will grow admirably in almost any part of India in situations free from frost, an a little moisture can be secured in very dry weather. For garden cultivation in most on the plains of India, it is therefore suitable, and in districts like Lower Bengal, I difficulty in getting up plantations of it on a large scale and at a moderate cost. mahoganies here which were spared by the cyclone are by far the finest trees of any s garden contains. They were planted about eight years ago, and at present, at a heig six feet from the ground, their girth runs from 8 to 11½ feet. Now the average girth of tea 90 years of age is only about 6½ feet and that of sâl is less. As to the value of the timber following facts speak for themselves. A hundred and thirty logs obtained from trees blown d by the cyclone of 1864 were sold by auction in 1866, and fetched the ordinary market price mahogany, and a Calcutta firm, engaged in timber and cabinet-making business, so long ag the year 1846, reported to Government, that an immature sample submitted to them (taken f a tree about 50 years old) would, "if it had stood for a few years longer, have been e to Honduras mahogany."

6. *India-rubber.*—In returning to this country from England in November la brought with me six plants of the Para rubber tree (*Hevea Braziliensis*), which were g to me by Dr. Hooker, of Kew, to whom the gardens already owe so much. Para r is one of the finest sorts known in commerce, and in view of the possible early exhau of the rubber-yielding figs of Assam, the introduction to India of the plant producir becomes a matter of some interest. The rubber of this country is obtained from fig-t most of which (at least in early life) are parasitical. These figs begin life by establis themselves on the tops of other trees, along the trunks of which they send their twin aerial roots which ultimately reach the ground. In course of time the supporting t are killed, but the figs remain and grow, often entirely obliterating their prede sors. It is from the long aerial roots of these figs that rubber is mostly got, and not f their branches. After a few severe tappings, a fig ceases to yield rubber from its roots. number of mature rubber trees even in a country like Assam is limited, and it is eas foresee their early exhaustion. It is true it is also easy to propagate these figs by cut but plants produced from cuttings put into the soil cannot very well have aerial roots may consequently be expected to yield little, if any, rubber. The artificial formati India-rubber plantations on the summits of tall forest trees is obviously impractica any large scale. The Para rubber tree has no such parasitic habits in early life white juice, which on hardening forms crude rubber, is yielded freely by all parts plant, which moreover promises to be one easy of propagation. Already Mr. Liste Assistant Curator, has been able to raise a few plants from cuttings taken from the six s Dr. Hooker. Before another year is over I hope to be able to report a considerable incre

7. *Sweet Chestnuts.*—The transport of fleshy seeds, such as the chestnut, to any d is a matter of great difficulty. I have seen several importations of chestnuts arrive England without containing one good seed. Dr. Henderson, while acting for me, arr for a supply of chestnuts being sent from Italy. Two boxes were accordingly lately rece from Brindisi, and in excellent order. The most of the nuts were at once sent to Sikh and the Khasi Hills, where they have germinated well. A few retained here have a germinated. I have little doubt the success of this Italian importation depends very grea on the comparatively dry climate (compared to that of England) in which the nuts w gathered and packed: it is also, doubtless, due partly to the shorter voyage. The sw chestnut will make a very valuable addition to the food-supply of the hill districts, if it be got to grow freely.

8. *Interchange of living plants.*—Besides the India-rubber plants already referred the garden has been enriched by other valuable plants sent by Dr. Hooker, of the R Garden, Kew. The gardens at Mauritius and Singapore have also contributed, and so

Mr. W. H. Ball, of Chelsea. Among Indian contributions, those of Dr. Jameson of the Botanical Garden, Saharunpore, have been most extensive. Plants to the number of 12,812 have been distributed from the garden during the year. These were mostly taken away by the indentors. A hundred and five boxfuls were however sent by rail and steamer to various parts of India, and eleven Wardian cases filled with plants were sent to foreign countries.

9. *Interchange of seeds.*—The most important contributors during the year have been—Dr. Hooker, C.B.P R.S., Kew; Dr. Thwaites, F.R.S., of the Ceylon Botanical Garden, Ceylon; Baron Von Muller, F.R.S., Melbourne; Dr. Regel of the Imperial Garden, St. Petersburgh; and the admirably conducted Acclimatization Society of Queensland, Australia. The Secretary of this Society, Mr. Bernays, has done a great work for his own colony by his indefatigable efforts for the introduction of plants of economic value, and this garden is much indebted to his energy and liberality for many gifts of valuable seeds. Mr. C. A. B. Anderson, of Koliabar, Assam, has collected a quantity of forest seeds in the jungles adjoining his plantation; some of these have arrived, and are most valuable. Tea planters and others, located near forests, might render immense assistance by collecting for the garden. The Conservators of Forests of the Punjab and North-West Provinces, as well as Dr. Bonavia, of Lucknow, have sent important contributions. Altogether 718 parcels of seeds have been received, and there have been distributed to India and to various parts of the world 2,532 parcels of seeds. The number of parcels receive and sent out does not, however, give a very accurate idea of the actual quantity of seed, as many of the parcels weighed as much as a hundredweight; detailed lists both of seed and plant distribution are sent as an appendix to this report. The scheme of collection of seeds by the Forest Department proposed by me two years ago, having received the sanction and support of the Government of India, has begun to be carried out; some time, however, must elapse before it gets into good working order.

10. *Herbarium.*—During the year the undernoted donations of dried plants were received:—

A. L. Home, Esq., plants from the Soonderbuns—20 species; Dr. F. Hance, a collection of Chinese and other plants—400 species; Baron F. O Muller, Australian plants, chiefly *Euphorbiaceæ* and *Proteaceæ*—200 species; A. L. Home, Esq., plants from eastern parts of the Soonderbuns—50 species; a collection of Bavarian plants, chiefly from Munich, of the late Dr. Kummer—800 species, presented by the Curator (Mr. Kurz); A. L. Home, Esq., a collection of Andaman plants—92 species; Dr. W. Schlich, a few Khasi Hill plants; C. B. Clarke, Esq., a few Indian *Gentianaceæ*.

Thanks to the exertions of the Curator, Mr. S. Kurz, the collections are excellently arranged, and in good condition. There are still, however, many Indian plants of which good specimens do not exist in the Herbarium, but I trust in course of time to be able to remedy this.

11. *Library.*—In accordance with the orders of Government, indents for books and periodicals are now submitted through Government for execution at the India Office, London. During the past year some books, indented for in July 1871 (*i.e.*, nearly three years ago), were duly received; the indents sent in by me in July 1872 and September 1873 remain, however, still entirely uncomplied with.

12. *Official changes.*—Owing to the continued absence of Mr. Scott, on special duty in the opium districts, the office of Curator of the garden remained vacant for the first eight months of the year, and Mr. Lister, the Assistant Curator, single-handed, did the work of that appointment in addition to his own. In the end of October Mr. Beck, late of the Omraotee cotton farm, was sent to act as Curator. On 6th March Mr. Beck was retransferred to the Cotton Department, and his place was taken by Mr. A. Parsons. I returned from sick furlough to England, and resumed charge of my appointment on 5th November from Dr. George Henderson, who had been acting for me.

13. In conclusion, my best thanks are due to Mr. Kurz for his admirable mangement of the Herbarium. Mr. Kurz, besides his own work, has been engaged on special duty in preparing a *Flora* of Burmah for the Forest Department. My acknowledgments are also due to Mr. Lister for the energy in which he conducts his own duties, as also for the way in which he appears to have managed the whole garden during the first eight months of the year. The native establishment in the office have also worked well.

APPENDIX A.

Seeds received from the 1st April 1873 to the 31st March 1874.

From whom received.	Number of parcels.
Baron Muller, Melbourne	49
Acclimatization Society, Queensland, Australia	78
Jute Commissioner, Calcutta	100
Dr. Beaumont, Indore	17
Commissioner of Dacca	15
Dr. Regel, St. Petersburgh, Russia	22
Government Cinchona Plantations, Rungbee, Darjeeling	132
Superintendent of Police, Mooltan	5
Agri-Horticultural Gardens, Lucknow	40
James Taylor, Esq., Ceylon	1
Dr. Hooker, Botanical Garden, Kew	55
Botanical Garden, Saharunpore	25
J. Horne, Esq., Mauritius	7
Dr. Scheffer, Botanical Garden, Java	78
Superintendent of Jail, Mooltan	3
Rama Varna, Travandrum	3
Colonial Secretary, British Honduras	2
W. Bull, Esq., London	27
J. C. Hayne, Esq.	1
J Scott, Esq., Bankipore	3
John Stalkart, Esq., Calcutta	2
A. H. Blechynden, Esq., Agri-Horticultural Society, Calcutta	2
——— Wordie, Esq., Alipore	1
Conservator of Forests, Punjab	14
Agri-Horticultural Society, Madras	13
Dr. Thwaites, Botanical Garden, Ceylon	5
Colonel Lowther, Jubbulpore	1
Dr. Tonnerre, Calcutta	13
C. A. B. Anderson, Esq., Assam	2
Inspector-General of Forests	1
Government Garden, Hong-Kong	1
Total	718

APPENDIX B.

Seeds Despatched from 1st April 1873 to 31st March 1874.

To whom supplied.	Number of parcels.
F. A. Berwick, Esq., Calcutta	33
Revd. Mr. Coe, Bishop's College, Seebpore	30
Government Experimental Farm, Baraset	73
Eden Garden, Calcutta	6
Captain Impey, Morar, Gwalior	35
Lieutenant-Colonel Gobban, Tungoo	1
Government Cinchona Plantations, Rungbee, Darjeeling	243
John Scott, Esq., Bankipore	48
Messrs. Cassella & Co., Calcutta	8
Secretary to the Justices of the Peace, Calcutta	1
C. F. Amery, Esq., Forest Department, Goruckpore	19
R. Graham, Esq., Darjeeling	1
R. Adam, Esq , Sambur Lake, Jeypore	2
Agri-Horticultural Society of India, Calcutta	103
Dr. Hooker, Royal Gardens, Kew	13
J. Gamble, Esq , Forest Department, Siligoree	1
The Proprietor of Medelah Estate, Debrooghur	1
Botanic Garden, Mauritius	6
Botanic Garden, Natal	14
——— Russel. Esq., Kidderpore	24
Revd. W. Wilson, Darjeeling	1
J. B. Stirling, Esq., Calcutta	1
Superintendent, Cotton Experiments, Camp Salara, Scinde	1
Ram Howa Garden, Jeypore	96
Messrs. Jules DeCock and Soeur Grand, Belgium	5
Messrs. Thomas Lang and Co., Ballarat	10
Messrs. Hoage and Schmidt, Seedsmen. Erfurt	32
E. Lockwood, Esq., Government Experimental Garden, Monghyr	11
Henry Beadon, Esq., Deputy Commissioner, Hazareebagh	5
Dr. Lynch, Superintendent, Alipore Jail	8
Brigadier-General W. J. Stafford, Shillong, Eastern Frontier District	50
R. J. Quinnel, Esq., M D., Goozerat, Punjab	66
J. J. Goulding, Esq., Principal, Government College, Ajmere	25
Secretary, Municipal Committee, Ajmere	50
J. Elster, Esq., Soojabad	7
R Clarke, Esq. Secretary, Municipal Committee, Lahore	25
A. Smith, Esq., Oude	60
G. Elliot, Esq. Assistant Commissioner, Calcutta	13
G. Robinson, Esq.,	17
Captain Cowper, Garden Reach	12
J. George, Esq., Hissar	9
Major J. R. Dyce, R.A., Umritsur	36
Deputy Commissioner, Shillong	60
R. Morris, Esq.	30
J. J. Monteith, Esq., Civil Assistant Surgeon, Cachar	156
Charles Harold, Esq., Simla	30
Baboo N. N. Roy Chowdry	70
Major W. Warson, Agra	30
C. Sconce, Esq., Superintendent of Jail, Midnapore	81
James Macnab, Esq., Edinburgh	3
W. M. Bull, Esq., London	10
Governor-General's Palace, Calcutta	30
M. A. Bidulp, Esq.. Simla	55
R. Jameson, Esq., M.A., Allahabad	10
P. M. Lowther. Esq., Calcutta	22
M. H. Daily, Esq.. Rampore	7
J. M. Rutt, Esq., Darjeeling	50
Mr. Price, Calcutta	21
Officer in Command, Her Majesty's 54th Light Infantry, Fyzabad	25
R. Daly, Esq., Calcutta	8
Superintendent of Jail, Shillong	50
J. W. Hughes, Esq., Snperintendent of Jail, Nowgong, Assam	50
Agri-Horticultural Society, Lahore	110
A. B. Thomson, Esq., Shalimar, Seebpore	1
W. R. Erington, Esq., Barrackpore	1
C. A. B. Anderson, Esq., Assam	3
W. B. Freeman, Esq., Model Farm, Shillong	55
Dr. Bonavia, Lucknow	7
Dr. Jameson, Superintendent, Botanic Garden, Saharunpore	19
Professor Balfour, Edinburgh	7
Baboo Bissumbur Ghose, Botanic Garden, Calcutta	12
W. Lloyd, Esq., Surpintendent, Model Farm, Umritsur	3
Secretary, Queensland Acclimatization Society, Brisbane, Australia	13
Colonial Secretary, Wellington, New Zealand	10
Dr. Prentis, Civil Surgeon, Goruckpore	103
G. Branning, Esq., St. Kilda Nursery, near Melbourne, Victoria, Australia	1
Dr. Dickie, Professor of Botany, Aberdeen	[illegible]
Dr. McKenzie, Presidency Jail, Calcutta	[illegible]
A. Collins, Esq., Akola	[illegible]
Agri-Horticultural Society, Bangalore	[illegible]
,, ,, Bombay	[illegible]
,, ,, Rangoon	[illegible]
W. J. Williamson, Esq., Deputy Commissioner, Garo Hills	1
J. Beck, Esq., Nagpore	31
H. C. Wood, Esq., Durrandar, Brisbane, Australia	6
Botanic Garden, Melbourne, Australia	5
,, ,, Adelaide, Australia	5
Dr. Thwaites, Botanic Garden, Ceylon	6
Messrs. Benjamin, Reid & Co., Aberdeen, Scotland	6
Dr. Reichenbach, Botanic Garden, Hamburgh	6
M. Mathieu, Nancy, France	6
Professor Regel, Botanic Garden, St. Petersburgh, Russia	6
Professor Todaro, Botanic Garden, Palermo, Sicily	6
Professor Martens, Botanic Garden, Montpellier, France	6
Professor Parlatore, Botanic Garden, Italy	6
Colonel Taylor	50
Total	2,532

APPENDIX C.

E. KING, *Superintendent.*

ADMINISTRATION REPORT OF THE BURDWAN MUNICIPALITY FOR THE YEAR 1873-74.

No. 341, dated Burdwan, the 31st July 1874.

From—C. T. BUCKLAND, ESQ., Commissioner of the Burdwan Division,
To—The Secretary to the Government of Bengal, Judicial Department.

I HAVE the honor to submit the Administration Report of the Burdwan Municipality for the year 1873-74. The report is so clear and detailed that it requires no remarks from me except to endorse the favourable mention of the Secretary to the Municipality, Mr. Sherman.

2. The general report on the municipalities and townships, with the returns of income and expenditure, will be submitted hereafter.

Dated Burdwan, the 1st May 1874.

From—E. H. WHINFIELD, ESQ., Chairman of the Burdwan Municipality,
To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit on behalf of the Municipal Commissioners of the town of Burdwan the Administration Report of the Municipality for the past official year 1873-74.

2. At the commencement of the year under review the Municipal Committee was made up of 15 members in the proportion of 9 Natives to 6 Europeans. At its close the Committee consisted of 7 Europeans and 9 Natives, viz. :—

Mr. C. T. Buckland, ...	Commissioner (ex-officio Member).
„ E. H. Whinfield, ...	Magistrate, ex-officio Chairman.
„ J. Cockburn, ...	Dist. Supdt., Police (ex-officio Member).
„ W. H. Nightingale, ...	Executive Engineer ditto.
„ E. H. Ruddock, ...	Joint-Magistrate (Vice-Chairman).
„ R. T. Sevestre, ...	Deputy Magistrate.
Dr. J. G. French, ...	Civil Surgeon.
Baboo Ram Lal Mookerjee, ...	Pleader.
„ Bonomalee Mookerjee, ...	Ditto.
„ Paranundo Mookerjee, ...	Secretary, Educational Committee.
„ Muddon Mohun Tewaree, ...	Zemindar.
„ Brijo Lal Tewaree, ...	Ditto.
„ Muddon Lal Burmon, ...	Ditto.
„ Bhoobun Mohun Chatterjee, ...	Medical Practitioner.
„ Jagadbundhu Mitra, ...	Ditto.
„ Kassee Nath Dass, ...	Tradesman.

3. During the year the following changes occurred:—Mr. Pryce, Station Master, was appointed a Commissioner in January, but left the station the following month; Dr. French and Baboo Jagadbundhu Mitra were also appointed in January and are still present; Baboo Gopee Nath Shaha died in December.

4. The provisions of Section 17 of the Municipal Act, with reference to the convening of bi-monthly meetings for the transaction of business, continue to be enforced whenever there is business for transaction.

5. For the purposes of business 11 Ordinary and 4 Special Meetings were convened during the year. Appendix A gives the attendance of the Commissioners at those meetings. On four occasions the absence of *quorums* prevented the transaction of business.

6. Special Meetings were called for the following reasons:—(1) 13th October.—To consider the question of completing the water works with reference to an offer of Government to grant a further donation of Rs. 10,000 towards that object. (2) 13th November—To consider and pass the Municipal Budget for the year 1874-75. (3) 15th December—To reconsider the Budget revised with reference to an intimation received from Government that the proposed donation would not be granted during the year 1874-75. (4) 26th January—To consider and confirm the report of the Finance Sub-Committee for the quarter ending the 31st December 1873.

7. The following subjects were considered by Sub-Committees, and their reports subsequently laid before meetings and adopted:—

CONSERVANCY.

The whole question of the conservancy of the river Banka and the framing of a bye-law with respect to it.

FINANCE.

The quarterly audits of the Municipal accounts.

8. In addition to the above, the Legal Sub-Committee was requested to consider certain questions relating to the collection of house-rate, but have not yet submitted its report.

INCOME.

9. The income of the year was estimated at Rs. 60,370. The financial results are exhibited in the following statement :—

DETAILS.	Estimates.	Actuals.	Excess.	Deficit.	REMARKS.
	Rs.	Rs. A. P.	Rs. A. P.	Rs. A. P.	
Cash balance	4,670	4,876 5 4	206 5 4	.....	
House-rate	41,000*	39,537 6 0	.....	1,462 10 0	* Includes Rs. 352-4-9 arrears of past years.
Wheel tax	2,300	1,893 12 0	.....	406 4 0	
Registration fees	1,500	1,211 8 0	.....	288 8 0	
Tolls and ferries	3,000	1,825 0 0	.....	1,175 0 0	
Fines	1,200	906 10 0	.....	293 6 0	
Miscellaneous	6,700	16,789 2 3	10,089 2 3	.....	
Total ...	60,370	67,039 11 7	10,295 7 7	3,625 12 0	

10. From the above statement it will be seen that the actual receipts of the year exceed the estimate by Rs. 6,669-11-7. This is due almost entirely to extraordinary receipts which have been credited under the head of *Miscellaneous*, and which will be treated on hereafter.

I proceed to notice in detail the several items of income.

11. *House-rate.*—The subjoined tabular statement explains the *house-rate* collections :—

DETAILS.	Demand.	Collections.	Remissions.	Arrears.	REMARKS.
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	
Arrears of 1871-72 ...	53 2 9	32 5 0	3 10 0	17 3 9	* Detail of remissions :—
Ditto of 1872-73	299 2 0	187 8 0	47 0 3	64 9 9	
1st Qr., 1873-74	10,169 0 3	9,896 14 6	255 6 0	16 11 9	Vacancy 635 8 9
2nd „ „	10,145 7 0	9,819 6 6	300 10 0	25 6 6	Ruined 365 15 3
3rd „ „	10,084 9 6	9,868 2 6	186 7 3	29 15 9	Poverty 36 14 0
4th „ „	10,017 8 0	9,733 1 6	245 4 6	39 2 0	Total 1,038 6 0
Total ...	40,768 13 6	39,537 6 0	1,038 6 0*	193 1 6	

12. The house-rate collections have, for the third year, resulted in a deficit; but it is evident, from the total demand being only Rs. 40,768-12-6, that the estimate of Rs. 41,000 was an over-estimate. This has been rectified in the Budget for the current year.

13. In spite of the strictest scrutiny of the applications for abatement of the tax, remissions are on the increase. Nothing but a general revision of assessment, as said before, can remedy it, and this, I regret to say, financial reasons have again prevented.

14. The uncollected arrears of the years 1871-72 and 1872-73 are in course of recovery through the civil courts. Similar measures will have to be taken to recover the uncollected balance of the past year.

15. *Wheel Tax.*—The *wheel tax* collections were levied on 11 carriages drawn by two horses, 57 carriages drawn by one horse, 19 two-wheeled vehicles on springs, 80 horses, 150 ponies, &c., 11 elephants, and are explained in the following statement :—

DETAILS.	Due.	Collections.	Remissions.	Arrears.
	Rs. A. P.	Rs. A. P.	Rs. A. P.	
1st Quarter	474 0 0	472 8 0	1 8 0	.....
2nd „	463 8 0	463 8 0	.....	.....
3rd „	456 0 0	435 0 0	18 12 0	2 4 0
4th „	528 12 0	522 12 0	4 8 0	1 8 0
Total ...	1,922 4 0	1,893 12 0	24 12 0	3 12 0

16. It was estimated that the receipts from wheel-tax would have amounted to Rs. 2,300. The demand, however, was under Rs. 2,000.

17. *Registration Fees.*—The income realized from the registration of carts has also resulted in a deficit. Such, however, has been invariably the result since the introduction of registration within the Municipality in 1870-71.

18. From the accompanying statement it would appear that there has been a considerable falling off in the number of carts since that year; but there are strong reasons for believing that the number of carts registered during the year under review does not represent the number liable to registration.

Years.	No. of carts registered.	Total fees.	Years.	No. of carts registered.	Total fees.
		Rs. A. P.			Rs. A. P.
1870-71 ...	716	1,584 0 0	1872-73 ...	701	1,375 12 0
1871-72 ...	758	1,493 4 0	1873-74 ...	615	1,211 8 0

19. An effective registration of carts is very difficult in the present state of the law. Section 51 gives no power of seizure before conviction, and this enhances the difficulty. I am of opinion, the only satisfactory way of meeting the difficulty is the appointment of a special establishment on salaries varying with the number of convictions obtained.

20. *Fines.*—The *fines* imposed for breaches of the Municipal laws are shewn in the subjoined statement, which also gives the number and nature of the offences reported:—

Cases reported.	Nature of Offences.	Convictions.	Amount of fines. Rs.	A.	P.
26	For not registering carts	19	17	4	0
7	For not affixing plates to carts after registration	7	1	8	0
7	Allowing sewerage to flow on highways and drains	4	5	8	0
34	Obstructing highways, drains, &c.	26	49	10	0
47	Retaining night-soil for more than 24 hours	26	34	10	0
364	Keeping filthy houses and grounds	294	451	2	0
149	Keeping drains, privies, &c., in a filthy state after warning ...	90	105	8	0
12	Depositing building materials on highways without permission	10	14	4	0
6	Establishing offensive and dangerous trades without permission	6	14	0	0
2	Neglecting to furnish schedules within the prescribed time ...	2	6	0	0
17	Excavatin without written permission	9	22	8	0
2	Steeping vegetable matter in tanks	2	1	0	0
23	Allowing pigs to be at large	21	18	0	0
5	Neglecting to remove encroachments after notice	3	8	8	0
100	Keeping noisome matter for more than 12 hours to the annoyance of residents	78	144	0	0
17	Throwing refuse, &c., out of fixed hours	13	13	2	0
5	Keeping cattle-pens filthy	5	7	8	0
9	Depositing carcasses, &c., other than in places fixed ...	7	12	0	0
3	Allowing bazars to be in an unclean and filthy state ...	2	7	0	0
2	Obstructing bazar lanes	2	1	8	0
3	Constructing privies within 4 feet of public roads	1	0	4	0
12	Performing offices of nature in unauthorized places ...	5	1	4	0
1	Carrying night-soil after stated hours	1	5	0	0
5	Allowing offensive matter to run into tanks, &c.	2	1	8	0
858		635	942	8	0

21. Six hundred and forty two notices were also issued during the year for the removal and abatement of nuisances.

22. Appendix B gives the attendance of the Commissioners at their judicial sittings which continue to be held bi-weekly. The attendance of some of the members at these sittings is far from regular.

23. *Tolls and Ferries.*—The prices realized by the sale of the *Huitoodewan* Toll-bar and *Banka* and *Kastogola* Ferries make up these receipts.

24. The estimate included the receipts of the *Sudder Ghât* ferry, for the transfer of which application was made last year to Government (see para. 20, last year's report), but which was unsuccessful. Hence the deficit under the head of *Tolls* and *Ferries*.

25. During the year a ferry was established on the river Banka as an experimental measure. The site selected was the *Surbomongolah Ghât*, at which it was known a considerable number of persons were in the habit of crossing daily. At first no person could be found willing to take over the ferry at any price; but subsequently it was leased out, in November, to the end of the year, for Rs. 5. It has been leased out during the current year for Rs. 35.

26. *Miscellaneous.*—The *miscellaneous* receipts of the year have exceeded the estimate by Rs. 10,089-2-3, and are made up as follow:—

		Rs.	A.	P.
(1)	Refund by Government of disbursements effected out of Municipal funds on medical relief operations between the years 1869-70 and 1872-73 inclusive...	5,831	15	3
(2)	Night-soil removal fees	4,541	1	0
(3)	Local subscriptions towards the water-works	1,611	5	0
(4)	Press receipts	1,183	13	3
(5)	Amount received from the Maharajah of Burdwan for diverting the Baldanga Road	662	15	6
(6)	Pound receipts	605	14	6
(7)	License fees	462	13	9
(8)	Rent of Municipal property	484	0	0
(9)	Refund by Messrs. Jessop and Co. of an account inadvertently paid twice	427	4	6
(10)	Distraint fees	164	14	0
(11)	Hackney Carriage cash balance of 1872-73	157	12	9
(12)	Proceeds of Municipal garden	156	5	3
(13)	Deadcart fees	93	4	0
(14)	Gambling Act fees	52	0	0
(15)	Refuse removal fees	40	0	0
(16)	Refund of civil suit costs	18	1	9
(17)	Various other sources	295	9	9
	Total ...	16,789	2	

27. *Item* 1.—This refund was sanctioned by Government on a representation submitted by the Magistrate. It was not anticipated; and to it, with item 3, local subscriptions towards water works, is chiefly due the large excess in the *miscellaneous* receipts of the year.

28. *Item* 2.—These receipts include sums realized for the removal of night-soil from private enclosures in eight circles of latrine conservancy, and payments made by the Railway Company and the Maharajah of Burdwan on account of the station and palace premises.

29. *Item* 3.—These subscriptions were realised in Mr. Metcalfe's time, Rs. 1,000 being the subscription of the Maharajah of Burdwan.

30. *Item* 4.—The Municipal Press continues to be remunerative, as will be seen from the subjoined statement:—

Receipts.	Amount.	Expenditure.	Amount.
	Rs. A. P.		Rs. A. P.
Value of office printing ...	1,216 11 6	Salaries of establishment ...	801 8 6
Actual receipts on account of out-work	1,026 12 6	Contingencies, including the purchase of type, stationery, &c. ...	1,100 3 3
			1,901 11 9
		Saving	341 12 3
Total ...	2,243 8 0		2,243 8 0

31. *Item* 5.—The diversion of the Baldangah Road was carried out to meet the wishes of the Maharajah of Burdwan who bore all expenditure attending it. The Baldangah Road originally passed through a large garden, the property of the Maharajah.

32. *Item* 6.—The income realizable from pounds was estimated at Rs. 720. The actual results are given in the subjoined statement:—

Names of Pounds.	Bullocks.	Bulls.	Buffaloes.	Cows.	Calves.	Horses.	Asses.	Goats.	Sheep.	Lambs or kids.	Total.	Amount.
												Rs. A. P.
Parbeerhatta ...	67	19	1	416	452	41	...	588	127	69	1,780	243 4 9
Alumgunge ...	113	46	...	462	397	11	...	563	8	3	1,603	255 3 3
Kunchunnuggur ...	35	43	...	268	90	12	...	115	5	2	570	107 6 6
Total ...	215	108	1	1,146	939	64	...	1,266	140	74	3,953	605 14 6

33. *Item* 7.—License fees are levied on all dangerous and offensive trades carried on within certain limits which are not conterminous with the limits of the Municipality. During the year the following licenses were issued:—

Under Section 78.—Private burial-grounds 1. *Under Section* 77.—Wood depôts 26; coal depôts 11; straw depôts 1; dying-houses 5; slaughter yards 6; lime kilns 1; brick-making 1; total 52.

34. *Item* 8.—This *item* is made up of the following rents:—Serai, river Banka, Civil Court tank, Criminal Court tank, Cutchery latrine tank, and cattle-shed enclosure.

35. The serai continues to be leased out conjointly with the round house, and the attendance of travellers at it does not appear to have diminished. The fisheries of the river Banka have been leased out at a loss. The Criminal Court and Cutchery latrine tanks have been farmed out for five years at a yearly rental of Rs. 24. The Civil Court tank was only completed in August, and the amount credited is its rent for the remainder of the year. It has since been leased out for four years at an annual rental of Rs. 35. The receipts from the cattle-shed enclosure are the rent of its fruit-trees and manure.

36. *Item* 10.—These fees were realized by the enforcement of 625 distraints under Section 47 for the recovery of house and wheel taxes.

37. *Item* 11.—The hackney carriage balance of 1872-73 was transferred to the Municipal funds under Government letter No. 1335, dated 15th May 1873, to the Commissioner of the division.

38. *Item* 12.—The receipts from the Municipal garden were derived from the sale of European and other vegetables raised during the past cold season.

39. *Item* 14.—All fines under the Gambling Act, inflicted within Municipal limits, are now made over to the Municipal funds under Government letter No. 3550, dated 11th June 1872.

40. *Item* 15.—These fees were realized under bye-law 40 from the owners of slaughter-houses for the removal of refuse resulting from their business.

41. The remaining items of the *miscellaneous* receipts call for no explanation.

EXPENDITURE.

42. The following is a comparative statement of the actual and estimated expenditure of the year:—

Details.	Estimates.	Actuals.	Savings.	Excess.	REMARKS.
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	
Collections ...	1,944 0 0	1,910 3 0	33 13 0	...	
General charges ...	6,156 0 0	6,114 8 6	41 7 6	...	
Roads ...	4,538 0 0	5,539 14 6		1,001 14 6	
Watering ...	1,362 0 0	1,236 14 9	125 1 3	...	
Conservancy ...	14,168 0 0	16,737 6 6		2,569 6 6	
Police ...	12,146 6 0	12,073 11 9	72 10 3	...	
Local improvements ...	12,670 0 0	16,388 2 9	..	3,718 2 9	
Miscellaneous ...	7,385 10 0	7,008 14 3	376 11 9	...	
Total ...	60,370 0 0	67,009 12 0	649 11 9	7,289 7 9	
Net excess ...	...	...	...	6,639 12 0	

43. The excess expenditure over estimate has been incurred almost entirely in liquidating the outstanding liabilities of the year 1872-73, and in completing the various works which remained unfinished at the close of that year.

44. Deducting the expenditure of the year from the income, there was a cash balance at the close of the year of Rs. 29-15-7.

45. *Collection.*—The expenditure in the *Collection* Department has resulted in a small saving. This is due to the circumstance that during the year the services of one of the collecting ameens were dispensed with.

46. *General charges.*—The disbursements of the year in connection with the office of the Commissioners are included under this head. Here also there has been a small saving.

47. *Roads.*—The expenditure on *roads* exceeds the estimate by Rs. 1,001-14-6, and is divided under the following heads:—(1) repairs, (2) purchase of material, (3) establishment, (4) contingencies.

48. The excess expenditure on roads is due:—(1) On works connected with the diversion of the *Baldanga* Road; (2) on the liquidation of contingent bills for 1872-73; and (3) to the insufficiency of the contingent allotment.

49. The annual statement of receipts and disbursement, appended to this report, gives the details of the roads repaired and the expenditure thereon; but the following statement shows the number and extent of those roads and the nature and quantity of work executed:—

Description.	Number.	Extent in miles	QUANTITY OF			Cost, including contingencies.	REMARKS.
			Metal.	Earth-work.	Turfing.		
Kunkur ...	9	8¼	24,300*	1,75,000	10,000	2,311 10 6	* At the close of the year there remained 4,900 cubic feet of Kunkur unexpended.
Ballast ...	19	6½	8,800	1,50,000	10,000	1,191 3 6	
Fair weather ...	7	2	.....	2,00,000	20,000	783 2 6	
Total ...	35	16¾	33,100	5,25,000	40,000	4,286 0 6	

50. *Watering.*—The small saving in the charges for *watering* is owing to the circumstance that rainfalls were of frequent occurrence during the cold season, which rendered street watering unnecessary.

51. *Conservancy.*—The large excess expenditure in the *Conservancy* Department has been caused chiefly in meeting the liabilities of the past year.

52. During the year the services of two peons and sixteen methers attached to the suburbs were dispensed with on a reduction of establishment.

53. The measures taken for the daily removal and disposal of street refuse, and the clearing out of drains and water-ways continue to be effective. The sweepings of the streets are utilized in filling up useless holes, the owners of which agree to cover in the rubbish with earth when called upon to do so.

54. With a view to the better conservancy of the river Banka, a stringent bye-law prohibiting the pollution of its banks and stream was proposed and sanctioned by Government. The depth of the stream within Municipal limits has also been increased, in compliance with the suggestions of the Conservancy Sub-Committee to whom the question of the conservancy of the river had been referred, by closing the opening of the anicut to a height of nearly 8 feet. The depth of water at the anicut was previously only 6 feet. The anicut is also partially opened monthly to allow the scum and other impurities collected on the surface of the stream to run off. These arrangements have had satisfactory results.

55. The operations connected with the latrine conservancy of the town are explained in Appendix B. The system has now been extended to eight circles which include within their boundaries 48 mohullas. A public latrine accommodates each circle.

56. The attendance at the public latrines has not been satisfactory. In fact there is a strong tendency on the part of the inhabitants to shirk the use of these latrines, and advantage is taken of the slightest cover to do so.

57. The latrines are daily inspected, and the strictest supervision is exercised over the methers in charge. Disinfectants are freely used, and the deposits are removed morning and evening and buried in the Municipal garden; but in spite of these measures, and of frequent prosecutions of persons found committing nuisances in the open air, such nuisances continue to be committed and the latrines remain comparatively unused.

58. The town of Burdwan contains many ruined houses, and within these ruins the majority of the nuisances are committed. The removal of "dangerous" ruins is provided for by the law, and in a sanitary point of view these ruins may be regarded as dangerous; but so many obstacles are thrown by the owners in the way of their removal, invariably accompanied by the threat of litigation, that it has not been thought desirable to proceed to extreme measures.

59. One of the principal objections advanced by owners against the removal of these ruins is their value. A good plan for testing the validity of this objection would be to decline to remit the tax of a holding so long as its walls remained standing.

60. During the year a reduction in the salaries of the methers working in the public latrines was effected. The monthly charge for establishment is now Rs. 24 for each latrine.

61. *Police.*—The small saving in the *Police* charges calls for no remarks.

62. *Local Improvements.*—The expenditure incurred during the year on *local improvements* aggregated Rs. 16,388-2-9, and is divided under the following heads:—

	Rs.	A.	P.
(1) Water works	9,614	0	9
(2) Latrines	2,764	5	0
(3) Miscellaneous	4,009	13	0
Total ...	16,388	2	9

63. *Water Works.*—With the exception of some trifling disbursements connected with the painting of the wood-work of the Engine-house, and in making the building air and water-tight, almost the entire expenditure on water works has been incurred in meeting the liabilities of 1872-73. The details of this expenditure has been given in the annual statement of receipts and expenditure appended.

64. Want of funds prevented any attempt being made to complete the water works during the year; but the question of utilizing the stoneware piping ordered by Mr. Metcalfe from the Raneegunge potteries was considered. Professional opinion was adverse to the use of pottery pipes for the water works, on the grounds that they could not be depended upon to stand even a small amount of pressure. The pipes were in consequence returned to the potteries at a sacrifice.

65. On the 24th December, a letter was received from Government submitting a proposal by Colonel Nicolls, Chief Engineer to the Bengal Government in the Public Works Department, for carrying out the water-supply scheme.

66. The Chief Engineer proposed to lay down one mile of iron piping with 10 stand posts, and to construct one or more high level masonry reservoirs. The total cost was estimated at Rs. 20,000, towards which Government proposed to grant a donation of Rs. 10,000, provided the Commissioners arranged the further funds necessary to complete the work safely and securely.

67. The whole question was then considered at a Special Meeting dated the 13th October, and the Commissioners unanimously agreed to accept the scheme on the terms proposed by Government. The necessary funds were accordingly allotted in the current year's Budget, but subsequently, owing to an intimation that the promised donation would not be forthcoming during the current year, the budget was revised. The works thus remain perforce incompleted.

68. *Construction of Latrines.*—The expenditure on *latrines* is thus divided:—

	Rs.	A.	P.
(1) Dhograsohid latrine	2,134	3	0
(2) Peeritpara latrine communication	225	0	9
(3) Municipal garden	405	1	3
Total ...	2,764	5	0

69. The Dhograsohid latrine stands on a site presented to the Municipality by the Maharajah of Burdwan. It was completed in April and opened for use the following month.

70. The expenditure on the Peeritpara latrine communication includes the cost of laying out and forming the road, as well as further compensation paid for the acquisition of the

site. The Peeritpara latrine was completed in November at a cost of Rs. 2,278-8-6, and was opened for use the following month. The cost of its construction was not paid during the year.

71. The expenditure on the Municipal garden was made for the purpose of carrying out certain arrangements for irrigating.

72. *Miscellaneous Improvements.*—Subjoined are the details of the expenditure incurred during the year on miscellaneous improvements :—

		Rs.	A.	P.
(1)	Excavation of triangular tank	2,039	12	0
(2)	Completion of Civil Court tank	1,410	12	9
(3)	Compensation for latrine tank site	351	4	9
(4)	Enclosing and protecting dangerous holes, &c.	207	15	6
	Total ...	4,009	13	0

73. The excavation of the triangular tank was undertaken to fill up and improve a low swampy piece of ground, private property, situated close to the Government Charitable Hospital. Rs. 863-3-0 were paid for the acquisition of the site. Want of funds prevented the completion of this tank.

74. The object for which the excavation of the Civil Court tank was undertaken was explained in last year's report (see para. 50). It was completed during the year.

75. *Miscellaneous.*—The *miscellaneous* expenditure of the year is divided under the following heads :—

		Rs.	A.	P.
(1)	Repayment of loan	2,500	0	0
(2)	Press	1,901	11	9
(3)	Refund of house-rate on vacant houses	498	0	3
(4)	Lighting liabilities for 1872-73	342	8	6
(5)	Medical relief	323	14	6
(6)	Water work's establishment	299	9	9
(7)	Purchase of a dead-cart	250	0	0
(8)	Office rent	220	0	0
(9)	Salaries of pound-keepers	168	0	0
(10)	Rent of Banka *Julker*	110	0	0
(11)	Salaries of burial-ground peons	99	13	6
(12)	Cost of civil suits	114	7	9
(13)	Salaries of vaccinators	87	3	0
(14)	Various other items	93	9	3
	Total ...	7,008	14	3

76. *Item* 1.—This disbursement represents the repayments of the 1st instalment with principal and interest of the Government loan.

77. *Item* 2.—This *item* includes the cost of working the press, and the sum expended in the purchase of materials, stationery, &c.

78. *Item* 4.—The unpaid contingent bills on account of lighting the streets during the months of January, February, and March 1873, were disbursed out of the miscellaneous allotment, as the Budget for the year under review made no provision for lighting.

79. *Item* 5.—This *item* includes the pay and allowances of the medical staff engaged on town relief during the month of March 1873. It has since been refunded by Government.

80. *Item* 6.—The salaries and contingencies of the following persons employed for the "waterworks" make up this item :—(1) A mistre on Rs. 10 monthly for engine-house; (2) a peon on Rs. 5 monthly for sluice; (3) a peon on Rs. 5 monthly for anicut.

81. *Item* 7.—This *item* is another of the liabilities of the past year.

82. *Item* 10.—The origin of this *item* was explained in last year's report (see para. 67).

83. *Item* 11.—The salaries of two peons in charge of the Kurbolah and Peerbaharam Mahomedan burial-grounds are included in this *item*. During the year the services of these men were dispensed with, and the conservancy peons directed to supervise the burials.

84 The number of deaths reported by the police during the year was 1,600 against 1,951 in the previous year. This gives a ratio of mortality of 5·22 per 100 during the year, against 4·75 for 1872-73.

85. In order to the better collection of these statistics, it was proposed by Mr. Cockburn, the District Superintendent of Police—(1) to limit the cremation of Hindoos to two ghâts on the banks of the river Damoodah, and to check the same by paid Municipal servants; (2) to remove the burial-ground of the Joogees and Boistubs from the banks of the river Banka to that of the Damoodah, placing it near one of the ghâts; (3) to utilize the services of the peons in charge of the two Mahomedan burial-grounds in checking the burials thereat; (4) to close all the burial-grounds without Municipal limits *used by the inhabitants of the Municipality.*

86. These proposals were laid before an ordinary meeting dated the 19th July, but were not approved of for financial and other reasons.

87. *Item* 12.—This *item* includes Rs. 25-7-6, costs incurred in the execution of decrees gained last year, and the law expenses of the Municipality during the year under review, which are detailed below :—

No.	Position of Municipality.	Nature of suits.	Amount claimed.	Result.	Costs incurred.	REMARKS.
			Rs. A. P.		Rs. A. P.	
1	Plaintiff ...	19 cases for recovery of house-rate ...	107 3 6	Decreed ...	68 13 3	
2	Ditto ...	For cutting and clearing jungles ...	1 3 3	Ditto ...	2 3 3	
3	Defendant ...	Damages incurred in removing an encroachment ...	5 0 0	Dismissed ...	3 5 3	
4	Ditto ...	Ditto in removing a privy constructed within 4 feet of the public road ...	29 12 0	Ditto ...	14 10 6*	*Costs of subsequent appeal included.

88. *Item* 13.—The salaries of three vaccinators are included in this *item*—two engaged during the cold season of 1872-73 at Rs. 10 each monthly, and one during the cold season of the year under review at Rs. 12. From the report on vaccination within the town during the year, submitted by the Civil Surgeon, it appears that the number of persons vaccinated within the Municipality has been 471, as against 74 in 1872-73.

89. *Review of the present position of the Municipality.*—As may be gathered from the preceding paragraphs, the history of the Municipality during the year under report is that of one continued struggle to meet liabilities. This has obliged the Commissioners to give up lighting the town—to put off to a future time the revision of the house assessment—to make all possible retrenchments of expenditure—to refuse their consent to several excellent proposals involving outlay of money—and finally, to stop the further prosecution of the waterworks scheme, the excavation of the triangular tank, and the extension of the public latrine arrangements. This is, of course, very much to be lamented, and doubts may naturally suggest themselves to persons viewing the matter from afar, whether it might not have been possible for the Commissioners, by some means or other, to surmount these difficulties, at least to the extent of finding ways and means to complete the waterworks. But those doubts cannot be felt by any one who is practically conversant with the affairs of the Municipality. We have the opinion of the Chief Engineer to the Government of Bengal, that to complete the waterworks in a proper manner and lay down one mile of piping, would cost Rs. 20,000, and to provide this sum has been found, up to the present date, to be simply impossible. It is out of the case that the Commissioners should take a second loan from Government (as has been suggested), because they have at present to pay Rs. 5,000 a year on account of the loan of Rs. 40,000 taken in 1872-73, and the greatest difficulty is experienced in providing for the payment of these instalments. I see no chance of our being able to complete these works unless Government be pleased to make a special grant for the purpose. A statement of the expenditure in 1872-73 and 1873-74 on extraordinary local improvements and repayment of loan is annexed, with a note of the outstanding liabilities under each head. It should be added that Rs. 55,000 of this expenditure was met from the Government donation of Rs. 15,000 and loan of Rs. 40,000; the balance, Rs. 18,708-11-3, has been met from the ordinary income of the Municipality.

90. *Conduct of officers.*—Mr. Sherman, the Secretary, has continued to discharge his duties in that extremely satisfactory manner for which he has been so many times favourably mentioned, and the subordinate clerks and officials have likewise worked well.

Asst Secy to the Govt of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 15th August 1874.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.				
		Western Districts.		
BURDWAN DIVISION.	1	Burdwan, 17th* Aug. 1874	1·89	Rainfall at Culna 1·62; at Cutwa 2·17; at Bood-bood 1·06; at Raneegunge 1 66; at Jehanabad nil. Complaints still made of want of rain, and transplantation of amun or late rice reported to be delayed, but the crops in the Sudder Sub-division do not look amiss. Fever as before.
	2	Bankoora, 15th " "	3·22	Heavy showers in most parts, but scanty in a few small tracts, especially in the west. The crops generally are doing well, but amun or late rice transplantation is not carried on rapidly, where the rainfall is less abundant. General health good.
	3	Beerbhoom, 15th " "	0·94	Showery weather. The state and prospects of the crops in the portion of the district lying west of the Railway are excellent; in the south-east, comprising Divisions Lallpore and Socoolipore, fair; in the north-east. *i.e.* in Burwan, and the north-east of Mouressar Divisions, bad, owing to drought; fair throughout the rest of Mouressar. Export by rail, of fortnight ending 8th August, 402 maunds, all to the Moorshedabad district. Prices almost stationary.
	4	Midnapore, 15th " "	2·45	Heavy rain fell on Monday, the 10th, rest of the week fine, but showery. Slight improvement in prospects reported from almost all quarters. The aous or early, and amun or late rice crops both promise thus far to be very little below the average. The late rice crop may, indeed, yet be very good. Subordinate crops also doing well.
	5	Hooghly, 15th " "	·88	Cloudy and sunny alternately, with wind from south and south-east; partial showers. Rainfall at Serampore 2·48. The rainfall has been insufficient and the transplantation of the main rice crop has been generally postponed, though in parts it has been effected.
		Howrah, 15th " "	1·67	There has been some rain during the week, throughout the district. Weather sometimes clear and sometimes cloudy. Wind from south and east. The ryots are preparing lands for transplanting amun or late rice seedlings, and in some parts, transplanting has commenced, but more rain is wanted throughout the district. The jute, sugarcane, and aous or early rice, have been benefitted by the late rain. The rain has kept back so long that an average crop of the late rice is not expected.
		Central Districts.		
PRESIDENCY DIVISION.	6	24-Pergunnahs, 17th† Aug. 1874.	0·95	Warm and close, with occasional light showers. There has been no heavy rain during the week. The transplantation of the late rice continues very backward. Much anxiety is felt regarding this crop in the Busseerhat, Satkhira, Baraset and Barripore Sub-divisions. The continued dry weather is in places injuring both the early and late rice planted on the low lands. The harvest of the early rice has commenced. Fever continues in Diamond Harbour, Barripore, and Satkhira.
	7	Nuddea, 15th Aug. 1874	0·40	No return received yet from Bongong, but everywhere else the rainfall has been insufficient In the distressed part, they have had one day's good rain, which has much improved the aous or early rice. The crops on high lands have suffered greatly, while those on low lands will be very good. The outturn will vary much even in neighbouring villages. The average in the distressed part, will probably be 8 annas of what was at first expected, or (allowing for the increased area sown) about 10 annas of an ordinary year. In the rest of the district, the aous has been much injured by drought, but (allowing for increased area) there will be about 12 annas fair ordinary year gathered. Not much amun or late rice has yet been transplanted; but if there be good rain within 8 or 10 days, the only harm done by the drought would be, that the crop would be thrown back. Indigo has not turned out quite so large a crop as had been anticipated.
	8	Jessore, 15th " "	·61	Generally cloudy. The rainfall is very short for the season of the year. The aous or early rice, though it has suffered in many places from drought, and in part of Nurail from inundation, is on the whole a good crop. The amun or late rice also promises fairly, but there is much want of rain. In Jhenida it is said that the plants are getting withered, and in Jessore and part of Khoolnah they cannot be transplanted. In Nurail, the chotua amun on the higher land is getting scorched, and in Khoolna and Bagirhat also insufficient rain is complained of.

* Telegram of the 17th August, received on the same day, shows rainfall during the seven days immediately preceding.
† Report of the 17th August, received on the same day, shows rainfall during the seven days immediately preceding.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Contd.*)				
		Central Districts.—(Contd.)		
RAJSHAHYE DIVISION.	9	Moorshedabad, 15th Aug. 1874.	0·34	There was no rain worthy of mention during the week. Clouds accumulate daily, but pass off without rain or with very light showers only The heat is greater than it has been for some weeks past. The early rice harvest is going on in different parts of the district. The outturn in the Jungypore Sub-division is expected to be very good, as more rain fell there at the time that the ears were forming. In the Sudder Sub-division deficient rainfall has greatly reduced the outturn of the more advanced crops, and has retarded the progress of crops which were sown later. In the parts of Burwa bordering on the Bhagiruthee, an extensive area of crops has been withered by the drought, and nothing but a heavy downpour could be of any avail now. The late rice crops in Bhurutpore and Gokurn particularly are in a very precarious state. There have been but two or three slight showers in those parts during the last fortnight. Kalleangunge is fortunately slightly better off.
	10	Dinagepore, 14th Aug. 1874.	·31	There has been heavy rain to the north and south-east. Showers in other places. A good deal of the bhadoi or early crop has been cut, in most places a very good crop. Hymunty or late rice is looking well; more rain wanted to enable the transplanting on high lands to be completed..
	11	Maldah, 15th Aug. 1874	2·	The first three days cloudy and rainy, and the last four days cloudy and sunny alternately. Bhadoi or early crop is being reaped and is turning out well, as too sama (grass seed) and Indian corn. Hymunty or late rice sowings are still going on. Some damage has been done by the Mohananda rising again. Rice is little cheaper.
	12	Rajshahye, 15th „ „	0·90	There has been rain throughout the district during the week, but heavy rain only to south of Nattore for about 24 hours; more rain required to ensure a crop of the transplanted late rice. The early rice is being cut more extensively than last week, the yield being good. A good deal of this crop in the Ganges dearahs has been submerged by the present great rise of the river, and is, of course, lost; the Attrai is also rising for the second time and is flooding some of the bheels in and round which both early and late rice are growing. The late rice crop is doing well all over the district according to latest report. More rain, however, would be beneficial, especially for the bhurind. Jute and other crops are thriving. Rice has, however, become cheaper everywhere.
	13	Rungpore, 14th „ „	0·74	Weather much as before; slight showers intermitting with bright sunshine. There has been nearly 3 inches of rainfall at Gyebandah, and in parts the fall has been sufficient to enable transplantation to proceed, but more rain is wanted, especially at the extreme south, where the crops are in very bad condition, owing to the want of it. Jute is being cut, and is a fair crop.
	14	Bogra, 15th „ „	2·43	There is nothing serious to complain of, but more rain would do good. The young amun or late rice, a great part of which has been transplanted, looks very well. There is still moisture in most of the fields, although on high lands the effects of deficient rainfall are visible. The aous or early rice is almost completely harvested. Miscellaneous crops, such as mulberry, sugarcane, and jute promise a full outturn. Health of the district is generally good.
	15	Pubna, 15th „ „	0·54	Rain fell almost every day of the week, but showers were slight, and a strong south-east wind blowing. Harvesting of bhura and kawni (millets) and early rice is still going on. The prospect of amun or late rice is favorable. State of sugarcane, arhur (pulse) and turmeric is good. Fever still continues.
COOCH BEHAR DIVN.	16	Darjeeling, 14th „ „	3·52	Alternate rain and sunshine. In the plains more rain has fallen than during the previous week, and the cultivators say that there is now no danger for some time to come. On the whole, crops in both the plains and the hills are reported as progressing very favorably.
	17	Julpigoree, 14th „ „	3·40	The weather has been most favorable for the rice crop; heavy showers and hot intermediate days. Bhadoi or early crop, which is being cut, is a fine crop. Hymunty being still planted out, promises very well. Jute not all round as good a crop as usual.
		Cooch Behar, 13th „ „	5·04	Showery and cloudy with bright sunshine occasionally. Excellent harvest of aous or early rice continue to be gathered, and the prospects of the amun or late rice are most favorable as yet, the weather having been as propitious as possible.
		Eastern Districts.		
DACCA DIVISION	18	Dacca, 17th* Aug 1874	1·01	Weather seasonable. State of crops critical, if rivers go on falling, damage will be done.
	19	Fureedpore, 15th „ „	1·29	Excepting on Monday, drizzling rain throughout the week, alternated by cloudy weather and sunshine. The aous or early rice crop all over the district is in course of being reaped, and in many parts is already gathered in. The river is happily rising again, which will be beneficial for amun or late rice, and the rain has done good to both early and late rice. The price of coarse rice has fallen at Fureedpore and Goalundo, remains the same at Madareepore and Bhanga, but has risen slightly at Gopalgunge, owing to the new aous rice not being brought to the market for sale in that part of the country.

* Telegram of the 17th August, received on the same day, shows rainfall during the seven days immediately preceding.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Concld.*)				
		Eastern Districts.—(*Contd.*)		
DACCA DIVN.	20	Backergunge, 13th Aug. 1874.	1·32	Rainy and close. Prospects of crops good.
	21	Mymensingh, 14th Aug. 1874.	2 80	Hot with light showers. There is still a great want of rain and in the east the rain has been very much less than in the sudder station. Transplantation of the late rice is still retarded.
	22	Sylhet, 11th Aug. 1874	3·24	Very close weather. Prospects of crops good. More rain wanted for the amun or late rice and *katarie* crops, especially the latter. Exportation of rice continues. Fever still prevalent all over the district.
CHITTAGONG DIVN.	23	Chittagong, 13th " "	·90	Slight falls of rain almost daily, weather cloudy and breezy; 1·07 inches of rain reported from Cox's Bazar up to 11th instant. Reaping of the aous or early rice is progressing, as also transplanting of the late rice crop. More rain will soon be wanted for the latter. No cholera reported during the week.
	24	Noakholly, 13th " "	7·31	Weather variable, in general cool for the season, with stormy south wind. Heavy rain on the morning of the 10th and 11th. Aous or early rice has been partly reaped, and except on some high lands where the rain was insufficient, promises well. The amun or late rice is being transplanted.
	25	Tipperah, 14th " "	1·66	Bright and clear, with a cool south-east wind; only a few showers of rain. Weather quite unlike what it ought to be. The aous or early rice is being harvested, and the outturn promises to be good. The amun or late rice is still in a promising condition, but more and heavy rain is much wanted.
	26	Chittagong Hill Tracts, 11th Aug. 1874.	1·34	Hot throughout the whole week. The paddy crop is now being reaped here and there in small quantities by the Joomeahs. The prospects of the joom crops are generally good, but more rain would be of benefit to the plough cultivators.
		Hill Tipperah, 12th Aug. 1874.	1·55	Weather cloudy and unsettled. Transplanting of the late rice going on; nothing particular to report.
BEHAR.				
PATNA DIVISION.	27	Patna, 17th* Aug. 1874	·99	Weather all that could be desired for the young crops, much more rain has fallen both in the Barrh and Behar Sub-divisions than at head-quarters, and the transplanting of the rice is going on briskly. Health of the district, fair.
	28	Gya, 15th " "	1·49	Seasonable weather; the bhadoi or early crops are magnificent, and the khureef or late crop is doing as well as could be wished for.
	29	Shahabad, 15th " "	5·60	Showery, with intervals of clear weather. Everywhere favorably reported on. Paddy transplanting has been carried on in all directions. Excessive rain has fallen on the plateau lands. Health of the district, on the whole, good; fever in places.
	30	Tirhoot, 15th " "	2 53	Cloudy at intervals, easterly wind prevailing. In the Hajeepore Sub-division 3·99 inches of rain fell. The prospects of the crop near about Hajeepore are good. In the interior of the sub-division the prospects are not favorable, owing to deficiency of rainfall In the Tajpore Sub-division the rain has been most partial and uneven. There has been most in the western side of the sub-division, and there heavier in the south than north. On the night of the 13th about three-quarters of an inch fell at Hursingpore, Tajpore and Poossah, but less in the west and south. The rain, light as it was, has been most useful to all bhadoi or early crops, except the very early makai, for which it has come too late. About 8-10 annas crop of makai, kownee and samon all round is still hoped. There will be more in south-west and west; for such outturn of murwa, (millet) rain is still required. There has been nowhere sufficient rain for the paddy even in low churs, this is looking burnt, and transplantation is at present at a stand still. Aluas or potatoes are being put out; Sutthnees, another sort of potatoe or bulb, are promising. In the Durbhunga Sub-division transplanting of winter rice is still checked by want of moisture Many fields on this account are lying untilled. Bhadoi crops have been injured to extent of from two to four annas, but crop on the whole promises to be a fair one. Sama (grass seed) being cut in some places. Rain much wanted. In the Mudhoobunnee Sub-division later sown bhadoi crops are suffering from the drought, but early crops are being reaped in many places. The drought is doing serious damage to the paddy crop. Transplantation on high lands almost at a stand still, though much remains to be transplanted. Great anxiety is felt with regard to this crop. In the Seetamurhee Sub-division the bhadoi dhan or early paddy and murwa have been reaped in places. Murwa early sown yielded full crop; later sown murwa not yet cut; is expected to yield 12-anna crop. Sathi and sama backward for want of sufficiency of rain; 3 or 4 inches required to ensure full crop. Maize also backward. Aghani dhan or late paddy is suffering, except in lands near Bagmutty. Cholera and malarious fever prevalent in places. In the Sudder Sub-division the prospect is the same as reported last week. Rain is much wanted for both bhadoi and winter crops. Public health good.

* Telegram of the 17th August, received on the same day, shows rainfall during the seven days immediately preceding.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BEHAR.—(*Contd.*)			
PATNA DIVN.—(*Contd.*) 31	Sarun, 15th Aug. 1874	2·46	Cloudy with sunny breaks. East wind prevailing. Partial showers throughout the district. Except where destroyed by inundation, the bhadoi or early crops are nearly everywhere thriving well, and promise an abundant harvest. Aghani or late rice is being transplanted in places where the rainfall has been sufficiently heavy, but general transplantation is still retarded in many parts of the district by the want of rain. Manufacture of indigo going on, but the outturn is small. About three-fourths of the bhadoi or early crops in the Dighwara thana are stated to have been destroyed by the late inundation, and near Chupra three-fourths of the crops in twelve villages are reported to have been lost from the same cause, while damage has been caused to crops in other villages also; detailed inquiries are being made. Prices steady. Cholera has broken out in the town and in parts of the interior.
32	Chumparun, 14th „ „	2·76	No general rainy interval, but very heavy showers throughout the district alternating with sunshine. Light showers still continue. Prospects have much improved since last report, and the rainfall has been sufficient for the present except in a small tract in the south-east of Ramnuggur Sub-division. The bhadoi or early crops are now safe for a fair outturn, which will be large compared with other years owing to the great breadth sown this year. Winter rice is generally safe for the present. More rain is wanted and expected.
BHAGULPORE DIVN. 33	Monghyr, 15th „ „	0·90	Showery weather. More rain wanted. The prospects generally on high lands continue good. Unfortunately the Ganges rose and flooded the dearahs and low lands subject to inundation before the bhadoi or early crop could be secured. The crops on several thousand acres have been more or less destroyed. It must be remembered, however, that these lands are sown with bhadoi as a speculation only, a crop being secured not oftener than once in five or six years. These remarks apply chiefly to the Begoo Serai Sub-division. In Jamooee and Sudder Sub-division prospects both as regards early and late rice crops continue very good.
34	Bhagulpore, 17th* „ „	1·85	Weather reported from the north as very favorable, leaving little more to be desired. The aghani or late rice crop with one or two more seasonable falls of rain within the next month, and a final downpour in October, should be a very fine one. Rain, however, is urgently required in the south of the district for the late rice, but it holds off notwithstanding heavy clouds. General health very good.
35	Purneah, 15th „ „	2·07	Showery and seasonable. Transplanting of late rice and reaping of early crops going on well. Prices falling considerably. New rice in large quantities in the market.
36	Sonthal Pergunnahs, 15th Aug. 1874.	1·62	Drizzling all through the week at Doomka; at Rajmehal 1·2 inches of rain; at Godda ·98; and Deoghur not received. Everything as good as possible about Doomka. Heavy rain seen constantly in the hills; good reports from the Damun. Uncertain reports from Godda. The north, which means Monceharee, now said to be doing well; janera (Indian-corn), called a 10-anna crop. Rain is wanted in Rajmehal; and the rising Ganges is doing much mischief.
ORISSA.			
ORISSA DIVISION. 37	Cuttack, 17th* Aug. 1874	5·32	Rain at Kendraparah 3·1, at Jajepore ·075. Though frequent and heavy rain was less constant last week and seems breaking; crops under water in low lands, but not damaged. Prospects excellent. Sporadic cholera.
38	Pooree, 13th „ „	2·31	There has been copious rain, which is falling daily. The weeding of the early rice crop and the transplanting of the late rice are going on well on high lands. Operations on low lands are at a stand-still, owing to excessive rain, which has submerged them and caused some slight harm to the crops in certain parts of the district. Sugarcane is doing well. Cotton is being gathered. Maudia (pulse) is being weeded, arahur (pulse) castor and teel or oil-seed plants are doing well. The prospects of all the crops are yet fair and hopeful. The rivers rose and have now fallen. The flood has caused some inconsiderable damage. Prices are stationary in the mofussil. Cholera and fever continue, but in a diminished degree.
39	Balasore, 14th „ „	2·71	Rain has fallen on six days of the week. The fall has been particularly heavy in the south-east of the district, where a great part of the pergunnahs in the north bank of the Byturnee has been under water for a considerable time, and fears are entertained for the safety of the crop in low lying plains. General prospects are excellent.
CHOTA NAGPORE. *South-West Frontier Agency.*			
40	Hazareebagh, 14th Aug. 1874.	·69	Rain throughout the district exactly as required. Early millet crop being reaped. Not a grumble anywhere. Heavy rain early in the week; fine, steamy, Calcutta weather at present. Cholera less, small-pox less, but typhoid in the barracks as before. Jails, European and native, perfectly healthy.
41	Lohardugga, 14th Aug. 1874.	3·81	Cloudy and close, but little or no rain since the 8th, when the fall was 3·60. The weather has been very favorable for harvesting the goondli (millet) crop, which is said to be a full one. All the other crops at present promise very well. In Palamow the rainfall has been 2·85. The bhadoi or early crops there are reported to be particularly fine, and the rice prospects excellent. General health pretty good.
42	Singbhoom ...	.....	Return not received.
43	Manbhoom, 15th Aug. 1874.	0·41	Dry weather. There has again been another break in the rains, and from the centre and south-east of the district the reports are less favorable than last week. In the sub-division of Gobindpore the prospects are good, as more rain has fallen there. No damage has yet been done, but more rain is very much required. The maturing of the early crops in some places is being delayed, and in others transplanting is hindered for want of water in the fields situated on high land.

* Telegram of the 17th August, received on the same day, shows rainfall during the seven days immediately preceding.

Published for general information.

NOTE.

Barometric Pressure.—The pressures in column 2 of the above table, for all stations below 500 feet, are reduced from those given in column 3 of the table on the previous page, by adding the weight of a column of air of the temperatures given in column 17. For stations above 500 feet elevation the reduction is made by Dippe's tables, as given in Guyot's "Meteorological and Physical Tables." The temperatures at the sea-level are taken from column 3 of the above table.

Temperature.—The temperatures in column 3 are reduced from those in column 17 on the preceding page by adding 1° Fahrenheit for every 450 feet.

Wind Resultant.—The resultant wind direction and its comparative predominance are calculated from the whole number of wind observations recorded during the month. The relative predominance in the direction of the resultant is given, as a percentage of the whole number of observations. The direction is computed in the usual way by Lambert's formula.

Serenity.—This column gives the average proportion of unclouded sky; a cloudless sky being indicated by 10, and one completely overcast by 0.

The above, being all comparable, afford the data for constructing a meteorological chart for the month, which shall show the isobaric and isothermal lines and the resultant wind directions, which last may be represented by arrows of varying length, proportioned to the prevalence of the wind. To these may be added the rainfall from the previous tables.

CALCUTTA,
The 17th August 1874.

W. G. WILLSON,
Offg. Meteorological Reporter to the Govt. of Bengal.

Results of the Meteorological Observations taken at the Surveyor-General's Office, Calcutta, from 8th to 14th August 1874.

The mean barometer, as likewise the dry and wet bulb thermometer means, are derived from the twenty-four hourly observations made during the day.

The dew-point is computed with the Greenwich constants. The figures in column 10 represent the humidity of the air, the complete saturation of which being taken at unity. The receiver of the lower rain gauge is 1½ feet, and that of the anemometer 70 feet 10 inches above the level of the ground. The velocity of wind, as indicated by Robinson's anemometer, is registered from noon to noon.
